BUENAVENTURA

Buenaventura Materiality Assessment

We are Buenaventura, a mining company that develops a responsible, sustainable business and is committed to its stakeholders. This year we developed our materiality matrix, a key tool that helps us prioritize resources and efforts to manage economic, social, environmental and governance issues that are relevant to our company and also to our stakeholders. We prioritize issues by gathering information through interviews and surveys with our main stakeholders. The material issues, due to their relevance, will be included in the Sustainability Report detailing the indicators according to the thematic axes established by the Global Reporting Initiative.

Materiality analysis allows us to:

Participants

Company

- Board
- CEO
- Vice Presidents
- Executive Team

Stakeholders

- Investors
- Employees
- Community
- Local authorities
- National Government
