UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, D.C. 20549

FORM 20-F

REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g)  
OF THE SECURITIES EXCHANGE ACT OF 1934

OR

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)  
OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2023

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE  
SECURITIES EXCHANGE ACT OF 1934

OR

SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d)  
OF THE SECURITIES EXCHANGE ACT OF 1934

Date of event requiring this shell company report

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file number 001-14370

**COMPAÑÍA DE MINAS BUENAVENTURA S.A.A.**  
(Exact name of Registrant as specified in its charter)

**BUENAVENTURA MINING COMPANY INC.**  
(Translation of Registrant's name into English)

REPUBLIC OF PERU  
(Jurisdiction of incorporation or organization)

LAS BEGONIAS 415 FLOOR 19,  
SAN ISIDRO, LIMA 27, PERU  
(Address of principal executive offices)

Daniel Domínguez, Chief Financial Officer  
Telephone: (511) 419-2540  
Facsimile: (511) 419-2502

E-mail: [daniel.dominguez@buenaventura.pe](mailto:daniel.dominguez@buenaventura.pe)  
(Name, Telephone, E-mail and/or Facsimile number and Address of Company Contact Person)

Securities registered or to be registered pursuant to Section 12(b) of the Act:

<b>Title of each class</b>	<b>Trading Symbol</b>	<b>Name of each exchange on which registered</b>
<i>Common shares, nominal (par) value of ten Peruvian Soles per share ("Common Shares")</i>	BVN	New York Stock Exchange Inc.* Lima Stock Exchange
<i>American Depositary Shares ("ADSs") representing one Common Share each</i>	BVN	New York Stock Exchange Inc.*

Securities registered or to be registered pursuant to Section 12(g) of the Act: None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

Common Shares nominal (par) value of S/.10.00 per share [ ]

[Table of Contents](#)

Investment Shares nominal (par) value of \$10.00 per share

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes  No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files).

Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or an emerging growth company. See definition of "accelerated filer," "large accelerated filer," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer  Non-accelerated filer  Emerging growth company

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards<sup>†</sup> provided pursuant to Section 13(a) of the Exchange Act.

<sup>†</sup> The term "new or revised financial accounting standard" refers to any update issued by the Financial Accounting Standards Board to its Accounting Standards Codification after April 5, 2012.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements.

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b)

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP  International Financial Reporting Standards as issued by the International Accounting Standards Board  Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

Item 17  Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes  No

\* Not for trading but only in connection with the registration of ADSs pursuant to the requirements of the Securities and Exchange Commission.

[Table of Contents](#)**INTRODUCTION****Presentation of Financial Information**

As used in this Annual Report on Form 20-F, or “Annual Report,” unless the context otherwise requires, references to “we,” “us,” “our,” “Company,” “BVN” and “Buenaventura” mean Compañía de Minas Buenaventura S.A.A. and its consolidated subsidiaries. Unless otherwise specified or the context otherwise requires, references to “\$,” “US\$,” “Dollars” and “U.S. Dollars” are to United States Dollars and references to “S/,” “Sol” or “Soles” are to Peruvian Soles, the legal currency of the Republic of Peru, or “Peru”.

We present our consolidated financial statements (the “Consolidated Financial Statements”) in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (“IASB”).

Unless otherwise specified, references to a value denominated in “t” or “tonnes” refer to metric tons; the terms “g” or “gr” refer to metric grams; the terms “oz.” or “ounces” refer to troy ounces of a fineness of 999.9 parts per 1,000, equal to 31.1035 grams.

Pursuant to the rules of the United States Securities and Exchange Commission (the “SEC”), this Annual Report includes certain separate financial statements and other financial information of Sociedad Minera Cerro Verde S.A.A., or “Cerro Verde.” Cerro Verde maintains its financial books and records in U.S. Dollars and presents its financial statements in accordance with IFRS as issued by the IASB.

We record our investment in Cerro Verde in accordance with the equity method as described in “Item 5. Operating and Financial Review and Prospects—Buenaventura—A. Operating Results—General” and Note 2.4(f) to the Consolidated Financial Statements. As of December 31, 2021, 2022 and 2023, our equity interest in Cerro Verde was 19.58%.

**Forward-Looking Statements**

This Annual Report contains “forward-looking statements” as defined in the U.S. Private Securities Litigation Reform Act of 1995 and are intended to be covered by the safe harbor provided for under these sections. Our forward-looking statements are based on management’s assumptions and beliefs in light of the information currently available to it and may include, without limitation:

- Our and Cerro Verde’s costs and expenses;
- estimates of future costs applicable to sales;
- estimates of future exploration and production results;
- plans for capital expenditures;
- expected commencement dates of mining or metal production operations; and
- estimates regarding potential cost savings and operating performance.

The words “anticipate,” “may,” “can,” “plan,” “believe,” “estimate,” “expect,” “project,” “intend,” “likely,” “will,” “should,” “to be” and any similar expressions are intended to identify those assertions as forward-looking statements. In making any forward-looking statements, we believe that the expectations are based on reasonable assumptions. We caution readers that those statements are not guarantees of future performance and our actual results may differ materially from those anticipated, projected or assumed in the forward-looking statements. Important factors that can cause our actual results to differ materially from those anticipated in the forward-looking statements include:

- The results of explorations at our mines and those of our mines of joint venture partners;
- the results of our joint ventures and our share of the production of, and the income received from, such joint ventures;

[Table of Contents](#)

- commodity prices;
- production rates;
- geological and metallurgical assumptions;
- industry risks;
- timing of receipt of necessary governmental permits or approvals;
- regulatory changes;
- political risks;
- inaccurate estimates of reserves or mineralized material not in reserve;
- anti-mining protests or other potential issues with local community relationships;
- labor relations;
- The effects of pandemics, or the future outbreak of any other highly infectious or contagious disease, including the COVID-19 pandemic, and any subsequent mandatory regulatory restrictions;containment measures environmental risks;
- our ability to finance capital expenditures;
- our ability to replace reserves as they become depleted;
- our ability to maintain positive relationships with the communities in which we operate;
- information technology failures;
- risks relating to tailings dams;
- legal proceedings and their effect on our existing financing agreements;
- any future defaults in respect of our outstanding debt agreements;
- the ongoing conflict between Russia and Ukraine; and
- other factors described in more detail under “Item 3. Key Information—D. Risk Factors.”

Many of the assumptions on which our forward-looking statements are based are likely to change after our forward-looking statements are made, including, for example, commodity prices, which we cannot control, and Cerro Verde’s production volumes and costs, some aspects of which we may or may not be able to control. Further, we may make changes to our business plans that could or will affect our results. We do not intend to update our forward-looking statements, notwithstanding any changes in our assumptions, changes in our business plans, our actual experience or other changes, and we undertake no obligation to update any forward-looking statements more frequently than required by applicable securities laws.

[Table of Contents](#)**Glossary of Selected Mining Terms**

- **Alteration:** Changes in the chemical or mineralogical composition of a rock, generally produced by weathering or hydrothermal solution.
- **As:** Arsenic.
- **Assay:** The chemical analysis of mineral samples to determine the metal content.
- **Brownfield project:** An exploration or development project near or within an existing operation, which can share infrastructure and management.
- **Capital Expenditure:** All expenditures not classified as operating costs but excluding corporate sunken costs such as acquisition.
- **Concentration:** The process by which crushed and ground ore is separated into metal concentrates and reject material through processes such as flotation.
- **Concentrate plant:** A plant where metal concentration occurs.
- **Composite:** Combining more than one sample result to give an average result over a larger distance.
- **Concentrate:** A metal-rich product resulting from a mineral enrichment process such as gravity concentration or flotation, in which most of the desired mineral has been separated from the waste material in the ore.
- **Crushing:** Initial process of reducing ore particle size by impact to render it more amenable for further processing.
- **Cut-off Grade (CoG):** The grade of mineralized rock above which it becomes profitable to extract the mineralization.
- **Deposit:** A mineralized body that has been physically delineated by sufficient drilling, trenching, and/or underground work, and found to contain a sufficient average grade of metal or metals to warrant further exploration and/or development expenditures. Such a deposit does not qualify as a commercially mineable ore body or as containing reserves or ore, unless final legal, technical and economic factors are resolved.
- **Development:** The process of constructing a mining facility and the infrastructure to support the facility is known as a mine development.
- **Diamond drill:** A type of rotary drill in which the cutting is done by abrasion rather than percussion. The cutting bit is set with diamonds and is attached to the end of the long hollow rods through which water is pumped to the cutting face. The drill cuts a core of rock which is recovered in long cylindrical sections an inch or more in diameter.
- **Dilution:** Waste which is rock below an economic cutoff value mined with ore.
- **Dip:** Angle of inclination of a geological feature/rock from the horizontal.
- **District:** A bounded division and organization of a mining region.
- **Disseminated:** Fine particles of mineral dispersed throughout the enclosing rock.
- **Exploration:** Activities associated with ascertaining the existence, location, extent or quality of a mineral deposit.
- **Fault:** The surface of a fracture along which movement has occurred.

[Table of Contents](#)

- **Gangue:** Non-valuable components of the ore.
- **Grade:** The measure of concentration of a specific mineral within mineralized rock.
- **Greenfield project:** An exploration or development project that is located outside the area of influence of existing mine operations and/or infrastructure and will be independently developed and managed.
- **Host rock:** A body of rock serving as a host for other rocks or for mineral deposits, or any rock in which ore deposits occur.
- **Hydrothermal:** A term pertaining to hot aqueous solutions of magmatic origin which may transport metals and minerals in solution.
- **Igneous:** Primary crystalline rock formed by the solidification of magma.
- **Indicated Mineral Resource:** *A mineral resource that is* part of a mineral resource for which quantity and grade or quality are estimated on the basis of adequate geological evidence and sampling.
- **Inferred Mineral Resource:** *A mineral resource that is* part of a mineral resource for which quantity and grade or quality are estimated on the basis of limited geological evidence and sampling.
- **Intrusion:** The process of the emplacement of magma in pre-existing rock, magmatic activity. Also, the igneous rock mass so formed.
- **Kriging:** An interpolation method of assigning values from samples to blocks that minimizes the estimation error.
- **Lithological:** Description of the physical characteristics of a rock.
- **Massive:** Said of a mineral deposit, especially of sulphides, characterized by a great concentration of ore in one place, as opposed to a disseminated or veinlike deposit.
- **Measured mineral resource:** That part of a mineral resource for which quantity and grade or quality are estimated on the basis of conclusive geological evidence and sampling.
- **Metal Concentrate:** The crushed and ground material obtained after concentration, including zinc, lead and copper concentrates. This is the product from our mining operations. Most of the zinc concentrate we produce is used in our smelting operations and the remaining portion, along with our lead and copper concentrates, is sold to our customers.
- **Mineral Reserve:** The economically mineable part of a measured and/or indicated mineral resource. It includes diluting materials and allowances for losses, which may occur when the material is mined or extracted and is defined by studies at prefeasibility or feasibility level as appropriate that include application of “modifying factors” (which are defined as considerations used to convert mineral resources to mineral reserves, including, mining processing, metallurgical, infrastructure, economic, marketing, legal, environmental, social and governmental factors). Such studies demonstrate that, at the time of reporting, extraction could reasonably be justified.
- **Mineral resource:** A concentration or occurrence of solid material of economic interest in or on the Earth’s crust in such form, grade or quality and quantity that there are reasonable prospects for eventual economic extraction. The location, quantity, grade or quality, continuity and other geological characteristics of a mineral resource are known, estimated or interpreted from specific geological evidence and knowledge, including sampling.
- **Mineralization:** The concentration of metals and their chemical compounds within a body of rock.

[Table of Contents](#)

- **Mine site:** An economic unit composed of an underground and/or open pit mine, a treatment plant and equipment and other facilities necessary to produce metals concentrates, in existence at a certain location.
- **NSR:** Net Smelter Return is the net revenue that the owner of a mining property receives from the sale of the mine's metal/nonmetal products less transportation and refining costs.
- **Open pit:** Surface mining in which the ore is extracted from a pit. The geometry of the pit may vary with the characteristics of the ore body.
- **Ore:** A mineral or aggregate of minerals from which metal can be economically mined or extracted.
- **Oxide:** Mineral that has undergone chemical reaction in which the substance has combined with oxygen.
- **Probable Mineral Reserve:** The economically mineable part of an indicated and, in some cases, a measured mineral resource.
- **Proven Mineral Reserve:** The economically mineable part of a measured mineral resource and can only result from conversion of a measured mineral resource.
- **RC:** A method of drilling whereby rock cuttings generated by the drill bit are flushed up from the bit face to the surface through the drill rods by air or drilling fluids for collection and analysis.
- **Sedimentary:** Pertaining to rocks formed by the lithification of accumulated of sediments, formed by the erosion of other rocks.
- **Siliciclastic:** Silica-based sediments, lacking carbon compounds, which are formed from pre-existing rocks, by breakage, transportation and redeposition to form sedimentary rock.
- **Stratigraphy:** The study of stratified rocks in terms of time and space.
- **Sill:** A tabular igneous intrusion that parallels the planar structure of the surrounding rock.
- **Skarn:** Metamorphic zone developed in the contact area around igneous rock intrusions when carbonate sedimentary rocks are invaded by large amounts of silicon, aluminum, iron and magnesium. The minerals commonly present in a skarn include iron oxides, calc-silicates, andradite and grossularite garnet, epidote and calcite. Many skarns also include ore minerals. Several productive deposits of copper or other base metals have been found in and adjacent to skarns.
- **Strike:** Direction of line formed by the intersection of strata surfaces with the horizontal plane, always perpendicular to the dip direction.
- **Sulfide:** A sulfur bearing mineral.
- **Sustaining Capital:** Capital estimates of a routine nature, which is necessary for sustaining operations.
- **Tabular:** Said of a feature having two dimensions that are much larger or longer than the third, or of a geomorphic feature having a flat surface, such as a plateau.
- **Tailings:** Finely ground rock from which valuable minerals have been extracted by concentration.
- **Tectonic:** Pertaining to the forces involved in, or the resulting structures of, tectonics.
- **Tectonics:** A branch of geology dealing with the broad architecture of the outer part of the earth, that is, the major structural or deformational features and their relations, origin and historical evolution.

[Table of Contents](#)

- **Thickening:** The process of concentrating solid particles in suspension.
- **Tonne:** A unit of weight. One metric tonne equals 2,204.6 pounds or 1,000 kilograms. One short tonne equals 2,000 pounds. Unless otherwise specified, all references to “tonnes” in this report refer to metric tonnes.
- **Total Expenditure:** All expenditures including those of an operating and capital nature.
- **TRS:** A Technical Report Summary as required by Regulation S-K 1300.
- **Ultramafic:** Said of an igneous rock composed chiefly of mafic minerals.
- **Variogram:** A statistical representation of the characteristics (usually grade).
- **Vein:** An epigenetic mineral filling of a fault or other fracture, in tabular or sheet-like form, often with the associated replacement of the host rock; also, a mineral deposit of this form and origin.
- **Volcaniclastic:** Pertaining to a clastic rock containing volcanic material in whatever proportion, and without regard to its origin or environment.

[Table of Contents](#)**PART I****ITEM 1. Identity of Directors, Senior Management and Advisers**

Not applicable.

**ITEM 2. Offer Statistics and Expected Timetable**

Not applicable.

**ITEM 3. Key Information****A. Selected Financial Data**

This selected financial information should be read in conjunction with, and is qualified in its entirety by reference to, the Consolidated Financial Statements, including the notes thereto appearing elsewhere in this Annual Report. The selected financial information as of December 31, 2022 and 2023 and for the years ended December 31, 2021, 2022 and 2023 is derived from the consolidated statements of financial position, consolidated statements of profit or loss and consolidated statements of other comprehensive income, included in the Consolidated Financial Statements appearing elsewhere in this Annual Report. The statement of financial position data as of December 31, 2021 has been derived from a consolidated statement of financial position which is not included in this Annual Report. The report of Tanaka, Valdivia & Asociados S. Civil de R.L. (a member firm of Ernst & Young Global Limited) on our Consolidated Financial Statements as of December 31, 2022 and 2023 and for the years ended December 31, 2021, 2022 and 2023 appears elsewhere in this Annual Report. The Consolidated Financial Statements are prepared and presented in accordance with IFRS as issued by the IASB, which differs in certain respects from U.S. GAAP. The operating data presented below is derived from our records and has not been subject to audit. The financial information and operating data presented below should be read in conjunction with “Item 5. Operating and Financial Review and Prospects—Buenaventura,” the Consolidated Financial Statements and the related Notes thereto and other financial information included in this Annual Report.

- (2) See Note 1(e) to the Consolidated Financial Statements.
- (3) Profit (loss) per share has been calculated for each year as net profit (loss) divided by average number of shares outstanding during the year. As of December 31, 2021, 2022 and 2023, we had 253,715,190 Common Shares outstanding, exclusive of 21,174,734 treasury shares. As of December 31, 2021, 2022 and 2023, we had 271,677 of Investment Shares (as defined below) outstanding, exclusive of 472,963 treasury shares as of December 31, 2021, 2022 and 2023.
- (4) We have no outstanding options, warrants or convertible securities that would have a dilutive effect on earnings per share. As a result, there is no difference between basic and diluted loss per share or ADS.
- (5) The amounts in this table reflect the total production of all of our consolidated subsidiaries, including Sociedad Minera El Brocal S.A.A., or “El Brocal,” in which we owned a 61.43% controlling equity interest as of December 31, 2023, 2022 and 2021, and Minera La Zanja S.R.L., or “La Zanja,” in which we owned a 100% controlling equity interest as of December 31, 2023 and 2022, and 53.06% controlling equity interest as of December 31, 2021. Amounts for 2021, 2022 and 2023 exclude production coming from the operating mines classified as discontinued operations.
- (6) The amounts in this table reflect the reserves of all of our consolidated subsidiaries other than Julcani, La Zanja and Tambomayo, which are not included as disclosed under “Mining Operations—Julcani—Mineral Reserves and Mineral Resources”, “Mining Operations—La Zanja—Mineral Reserves and Mineral Resources” and “Mining Operations—Tambomayo—Mineral Reserves and Mineral Resources”, and including El Brocal, in which we owned a 61.43% controlling equity interest as of December 31, 2023, 2022 and 2021. SRK Consulting Perú S.A. (“SRK”), an independent consultant, audited the process used to estimate proven and probable ore reserves and resources for Uchucchacua and Orcopampa. SLR Consulting (Canada) Ltd. (“SLR”), an independent consultant, audited the process used to estimate proven and probable ore reserves and resources for El Brocal and Coimolache. Agnitia Consulting S.A.C. (“Agnitia”), an independent consultant, audited the process used to estimate proven and probable ore reserves and resources for San Gabriel. Mining Plus Peru S.A.C. (“MPP”), an independent consultant, audited the process used to estimate proven and probable ore reserves and resources for Trapiche. Amounts for 2021, 2022 and 2023 exclude reserves coming from the operating mines classified as discontinued operations. The total amount of reserves does not consider ounces from Pads

[Table of Contents](#)**Cerro Verde Selected Financial Information and Operating Data**

The following table presents selected financial information and operating data for Cerro Verde as of the end of and for each of the periods indicated. This information should be read in conjunction with, and is qualified in its entirety by reference to, Cerro Verde's audited financial statements as of December 31, 2022 and 2023 and for the years ended December 31, 2021, 2022 and 2023, or the Cerro Verde Financial Statements. The selected financial information as of December 31, 2021, 2022 and 2023 have been derived from Cerro Verde's financial statements that are not included in this Annual Report. The report of Tanaka, Valdivia, & Asociados S. Civil de R.L. (a member firm of Ernst & Young Global Limited ) on Cerro Verde's financial statements appears elsewhere in this Annual Report. The Cerro Verde Financial Statements are prepared and presented in accordance with IFRS as issued by the IASB, which differs in certain respects from U.S. GAAP, as indicated in Note 24 and Note 25 to the Cerro Verde Financial Statements. The operating data presented below, which are based on 100% of Cerro Verde's production and reserves, are derived from Cerro Verde's records and have not been subject to audit. The financial information presented below should be read in conjunction with "Item 5. Operating and Financial Review and Prospects—Cerro Verde," the Cerro Verde Financial Statements and the related Notes thereto and other financial information included in this Annual Report

	<b>As of and for the year ended December 31,</b>		
	<b>2023</b>	<b>2022</b>	<b>2021</b>
	(US\$in thousands) <sup>(1)</sup>		
<b>Statements of comprehensive income:</b>

(1) Except per share and operating data.

(2) BVN's equity participation in Cerro Verde was 19.58% for all the years shown.

[Table of Contents](#)**B. Capitalization and Indebtedness**

Not applicable.

**C. Reasons for the Offer and Use of Proceeds**

Not applicable.

**D. Risk Factors****Factors Relating to the Company*****We have incurred losses in the past and may incur losses in the future.***

For the years ended December 31, 2023, 2022 and 2021, our net profit (loss) was \$32.7 million, \$602.9 million and \$(262.8) million, respectively. We may incur losses in the future and there can be no assurance that we will be able to operate profitably during future periods. If we are unable to operate profitably during future periods, and are not successful in obtaining additional financing, we could be forced to cease certain exploration and evaluation programs and mine development activities as a result of insufficient cash resources.

***Our financial performance is highly dependent on the performance of our partners under our mining exploration and operating agreements.***

Our participation in joint venture mining exploration projects and mining operations with other experienced mining companies is an integral part of our business strategy. Our partners, co-venturers and other shareholders in these projects generally contribute capital to cover the expenses of the joint venture or provide critical technological, management and organizational expertise. The results of these projects can be highly dependent upon the efforts of our joint venture partners and we rely on them to fulfill their obligations under our agreements.

***Our financial performance is highly dependent on the prices of gold, silver, copper and other metals.***

The results of our operations are significantly affected by the market price of specific metals, which are cyclical and subject to substantial price fluctuations. We derive our revenues primarily from the sale of gold and silver and in the case of Cerro Verde, in which we have a material equity investment, we derive revenues primarily from copper sales. The prices that we and Cerro Verde obtain for gold, silver, copper and ore concentrates containing such metals, as applicable, are directly related to world market prices for such metals. Such prices have historically fluctuated widely and are affected by numerous factors beyond our control, including (i) the overall demand for and worldwide supply of gold, silver, copper and other metals; (ii) levels of supply and demand for a broad range of industrial products; (iii) the availability and price of competing commodities; (iv) international economic and political trends; (v) currency exchange fluctuations (specifically, the U.S. Dollar relative to other currencies); (vi) expectations with respect to the rate of inflation; (vii) interest rates; (viii) actions of commodity markets participants; and (ix) global or regional political or economic crises.

In the past, we engaged in hedging activities, such as forward sales and option contracts, to minimize our exposure to fluctuations in the prices of gold, silver and other metals; however, we and our wholly owned subsidiaries no longer hedge the price at which our gold and silver will be sold except for the Brocal unit that is allowed to hedge the price of copper and zinc. In addition, Cerro Verde does not engage in hedging activities. As a result, the prices at which we and Cerro Verde sell gold, silver, copper and ore concentrates, as applicable, are fully exposed to the effects of changes in prevailing market prices. See “Item 11. Quantitative and Qualitative Disclosures About Market Risk” and Note 35 to the Consolidated Financial Statements. For information on gold and silver prices for each of the years in the five-year period ended December 31, 2019, see “Item 4. Information on the Company—Buenaventura—B. Business Overview—Sales of Metal Concentrates.”

On December 31, 2023 and March 31, 2024, the morning fixing price for gold on the London Bullion Market was US\$ 2,062 per ounce and US\$ 2,207 per ounce, respectively. On December 31, 2023 and March 31, 2024, the afternoon fixing spot price of silver on the London market, or “London Spot,” was US\$ 23.79 per ounce and US\$ 24.54 per ounce, respectively. On December 31, 2023 and March 31, 2024, the London Metal Exchange Spot Price for copper was US\$ 8,464 per tonne and US\$ 8,767 per tonne, respectively.

[Table of Contents](#)

The world market prices of gold, silver and copper have historically fluctuated widely. We cannot predict whether metal prices will rise or fall in the future. A continued decline in the market price of one or more of these metals could adversely impact our revenues, net income and cash flows and adversely affect our ability to meet our financial obligations. If prices of gold, silver and/or copper should decline below our cash costs of production and remain at such levels for any sustained period, we could determine that it is not economically feasible to continue production at any or all of our mines. We may also curtail or suspend some or all of our exploration activities, which may result in our depleted reserves not being replenished. This could further reduce revenues by reducing or eliminating the profit that we currently expect from reserves. Such declines in price and/or reductions in operations could cause significant volatility in our financial performance and adversely affect the trading prices of our Common Shares and ADSs.

**COVID-19 Pandemic**

Ministerial Resolution 031-2023-MINSA ended the Health Emergency on May 25, 2023. However, with the potential for new variants of COVID-19 to emerge, the Peruvian government may re-impose restrictive measures to help slow its spread in the future, which could impact our business. . Currently, we are subject to certain minor rules and recommendations mainly related to precautionary measures contemplated in Resolution No. 022-2024-MINSA that approved Administrative Directive No. 349-MINSA/DIGIESP-2024, which established new provisions for the prevention, surveillance and control of workers at risk of exposure to COVID-19.

***Economic, mining and other regulatory policies of the Peruvian government, as well as political, regulatory and economic developments in Peru, may have an adverse impact on our and Cerro Verde's businesses.***

Our and Cerro Verde's activities in Peru require us to obtain mining concessions or provisional permits for exploration and processing concessions for the treatment of mining ores from the Peruvian Ministry of Energy and Mines (the "MEM"). Under Peru's current legal and regulatory regime, to maintain these mining and processing rights companies must meet a minimum annual level of production or investment and pay an annual concession fee. A fine is payable for the years in which minimum production or investment requirements are not met. Although we are, and Cerro Verde has informed us that they are, current in the payment of all amounts due in respect of mining and processing concessions, failure to pay such concession fees, processing fees or related fines for two consecutive years could result in the loss of one or more mining rights and processing concessions, as the case may be.

Mining companies are also required to pay the Peruvian government mining royalties and/or mining taxes. See "Item 4. Information on the Company—Buenaventura—B. Business Overview—Regulatory Framework—Mining Royalties and Taxes." We cannot guarantee that the Peruvian government will not impose additional mining royalties or taxes in the future or that such mining royalties or taxes will not have an adverse effect on our or Cerro Verde's results of operations or financial condition. In addition, future regulatory changes, changes in the interpretation of existing regulations or stricter enforcement of such regulations, including changes to our concession agreements, may increase our compliance costs and could potentially require us to alter our operations. We cannot guarantee that future regulatory changes will not adversely affect our business, financial condition or results of operations.

On December 7, 2022, Peru's former President Pedro Castillo announced the dissolution of the congress and called for new elections as soon as possible, provoking an attempted *coup d'état*. Subsequently, he was removed from office and arrested. On the same day, Castillo's vice president Dina Boluarte assumed the presidency of Peru, to serve the remaining presidential term until 2026. President Boluarte is Peru's sixth president since 2018. None of her five predecessors in office completed the five-year term established by the Constitution and several former presidents are in prison or prosecuted in judicial proceedings. President Boluarte has publicly encouraged economic stability and private investment and is trying to amend several policies enacted during the Castillo government. On December 11, 2022, President Boluarte announced she would introduce a bill to accelerate the general elections up to April 2024, however, Congress rejected this proposal. Since then, there has been considerable political unrest in Peru, and demonstrations related to the political situation have led to multiple clashes between protestors and security forces, resulting in casualties and deaths. The political unrest also resulted in many roadblocks across the country and some smaller airports such as Andahuaylas, Cusco, Juliaca and Arequipa across Peru have seen their operations interrupted. We cannot assure that the new government will continue with its initial policies. Future proposals of President Boluarte (or of other political officials in Peru) could affect the macroeconomic climate in Peru, including spurring currency volatility. Such political instability could have a material adverse effect on our business, prospects, financial condition, results of operations or cash flows.

[Table of Contents](#)***Environmental and other laws and regulations may increase our costs of doing business, restrict our operations or result in operational delays.***

Our and Cerro Verde's exploration, mining and milling activities, as well our smelting and refining activities, are subject to a number of Peruvian laws and regulations, including environmental laws and regulations.

Additional matters subject to regulation include, but are not limited to, concession fees, transportation, production, water use and discharges, power use and generation, use and storage of explosives, surface rights, housing and other facilities for workers, reclamation, taxation, labor standards, mine safety and occupational health.

We anticipate additional laws and regulations will be enacted over time with respect to environmental matters. The development of more stringent environmental protection programs in Peru could impose constraints and additional costs on our and Cerro Verde's operations and require us and Cerro Verde to make significant capital expenditures in the future. Although we believe that we are substantially in compliance, and Cerro Verde advised us that they are substantially in compliance, with all applicable environmental regulations, we cannot assure you that future legislative or regulatory developments will not have an adverse effect on our or Cerro Verde's business or results of operations. See "Item 4. Information on the Company—Buenaventura—B. Business Overview—Regulatory Framework—Environmental Matters" and "—Permits" and "Item 4. Information on the Company—Yanacocha—B. Business Overview—Environmental Matters."

Our ability to successfully obtain key permits and approvals to explore for, develop and successfully operate mines will likely depend on our ability to do so in a manner that is consistent with the creation of social and economic benefits in the surrounding communities. Our ability to obtain permits and approvals and to successfully operate in particular communities or to obtain financing may be adversely impacted by real or perceived detrimental events associated with our activities or those of other mining companies affecting the environment, human health and safety or the surrounding communities. Delays in obtaining or failure to obtain government permits and approvals may adversely affect our operations, including our ability to explore or develop properties, commence production or continue operations.

***Our operations are subject to physical challenges related to climate change***

Climate change may have an adverse impact on the regions where our operations are located. Our operations are exposed to certain risks due to climate change including droughts, heavy precipitation, extremely high temperatures and severe weather events, such as El Niño and Global El Niño. Extreme weather conditions could disrupt day to day mining operations. For example, flooding may damage the roads we rely on and potentially reduce our productivity, increase our costs and increase the lead times for mineral concentrates and supplies. Additionally, exceptionally high level of precipitation could exceed the capacity of our water treatment plans, which is a risk we factor into operational analysis.

***Russia/Ukraine War, Conflicts in the Middle East, Other Conflicts and Terrorism.***

Our business and operations may be adversely affected by political tension, hostility and instability caused by conflicts in Europe, the Middle East and Asia. For example, On February 24, 2022, Russia launched a large-scale military invasion of Ukraine and since then sustained conflict and disruption in the region has occurred and is likely to continue. In response, several countries imposed broad and far-reaching sanctions against Russia, certain Russian persons and certain activities involving Russia or Russian persons. Additionally, the ongoing conflict in Israel which began in October 2023 has enveloped the Middle East region in unrest. This conflict has extended to the Persian Gulf where increasing attacks on international shipping have caused concern due to the potential economic impact and supply chain concerns. It is not possible to predict the broader or longer-term consequences of the war in Ukraine, or the conflict in Israel which could include expansion of the conflict into adjacent countries, further sanctions, embargoes, regional instability, geopolitical shifts and adverse effects on macroeconomic conditions, security conditions, fuel prices, currency exchange rates and financial, credit and insurance markets. Regional unrest, terrorist threats and the potential for war may increase market volatility across the globe. There have also been concerns about the relationship between China and other countries, including the surrounding Asian countries, which may potentially have economic effects.

[Table of Contents](#)

***Our estimates of mineral reserves and resources may be materially different from the total mineral quantities we actually recover, and changes in metal prices, operating and capital costs, and other assumptions used to calculate these estimates may render certain mineral reserves and resources uneconomical to mine.***

There is a degree of uncertainty attributable to the estimation of mineral reserves and resources. Until mineral reserves and resources are actually mined and processed, the quantity of metal and grades must be considered as estimates only, and no assurance can be given that the indicated levels of metals will be produced. To determine whether to advance any of our projects to development, we must rely upon estimated calculations for the mineral reserves and mineral resources and grades of mineralization on our properties. The estimation of mineral reserves and resources is a subjective process that is partially dependent upon the judgment of the qualified persons preparing such estimates. The process relies on the quantity and quality of available data and is based on knowledge, mining experience, statistical analysis of drilling results and industry best practices. Valid estimates made at a given time may significantly change when new information becomes available.

Our estimates of mineral reserves and resources are based on geological interpretation and geostatistical inferences or assumptions drawn from drilling and sampling analysis made as of the date of such estimates. We periodically update our mineral reserves and resources estimates based on the guidelines of the relevant qualified persons with respect to new data from exploratory and infill drilling, results from technical studies and the experience acquired during the operation of the mine and metallurgical processing, as well as changes to the assumptions used to calculate these estimates.

Several of the assumptions used to calculate these estimates, including the market prices of commodities, operating and capital costs and mining and metallurgical recovery rates, among others, can greatly fluctuate, which may result in significant changes to our current estimates. These changes may also render it uneconomic to exploit some or all of our proven and probable mineral reserves and measured and indicated mineral resources or may ultimately result in a reduction of mineral reserves and resources.

In addition, inferred mineral resources have a great amount of uncertainty as to their existence and their economic and legal feasibility. You should not assume that any part of an inferred mineral resource will be upgraded to a higher category or that any of the mineral resources not already classified as mineral reserves will be reclassified as mineral reserves.

***We depend on our ability to replenish our mineral reserves for our long-term viability.***

Mineral reserves data is only indicative of future results of operations at the time the estimates are prepared and are depleted over time as we conduct our mining operations. We use several strategies to replenish and increase our depleted mineral reserves, including exploration activities and the acquisition of mining concessions. If we are unable to replenish our mineral reserves or develop our mineral resources, our business, results of operations and prospects would be materially adversely affected.

***Our metals exploration efforts are highly speculative in nature and may not be successful.***

Precious metals exploration, particularly gold exploration, is highly speculative in nature, involves many risks and is frequently unsuccessful. We cannot assure you that our or Cerro Verde's metals exploration efforts will be successful. Once mineralization is discovered, it may take a number of years from the initial phases of drilling before production is possible, during which time the economic feasibility of production may change. Substantial expenditures are required to establish proven and probable ore reserves through drilling, to determine metallurgical processes to extract the metals from the ore and, in the case of new properties, to construct mining and processing facilities. As a result of these uncertainties, we cannot assure you that our exploration programs will result in the expansion or replacement of current production with new proven and probable ore reserves.

[Table of Contents](#)

We base our estimates of proven and probable ore reserves and estimates of future cash operating costs largely on the interpretation of geologic data obtained from drill holes and other sampling techniques and feasibility studies. Advanced exploration projects have no operating history upon which to base estimates of proven and probable ore reserves and estimates of future cash operating costs. Such estimates are, to a large extent, based upon the interpretation of geologic data obtained from drill holes and other sampling techniques, feasibility studies which derive estimates of cash operating costs based upon anticipated tonnage and grades of ore to be mined and processed, the configuration of the ore body, expected recovery rates of the mineral from the ore, comparable facility and equipment operating costs, anticipated climatic conditions and other factors. As a result, it is possible that actual cash operating costs and economic returns based upon proven and probable ore reserves may differ significantly from those originally estimated. Moreover, significant decreases in actual over expected prices may mean reserves, once found, will be uneconomical to produce. It is not unusual in new mining operations to experience unexpected problems during the start-up phase. See "Item 5. Operating and Financial Review and Prospects—Cerro Verde—A. Operating Results" for the price per ounce used by us and Cerro Verde, respectively, to calculate our respective proven and probable reserves.

***Increased operating costs could affect our profitability.***

Costs at any particular mining location frequently are subject to variation due to a number of factors, such as changing ore grade, changing metallurgy and revisions to mine plans in response to the physical shape and location of the ore body. In addition, costs are affected by the price of commodities, such as fuel and electricity, as well as by the price of labor. Commodity costs are at times subject to volatile price movements, including increases that could make production at certain operations less profitable. Reported costs may be affected by changes in accounting standards. A material increase in costs at any significant location could have a significant effect on our profitability.

***Our business is capital-intensive and we may not be able to finance necessary capital expenditures required to execute our business plans.***

Precious metals exploration requires substantial capital expenditures for the exploration, extraction, production and processing stages and for machinery, equipment and experienced personnel. Our estimates of the capital required for our projects may be preliminary or based on assumptions we have made about the mineral deposits, equipment, labor, permits and other factors required to complete our projects. If any of these estimates or assumptions change, the actual timing and amount of capital required may vary significantly from our current anticipated costs. In addition, we may require additional funds in the event of unforeseen delays, cost overruns, design changes or other unanticipated expenses. We may also incur debt in future periods or reduce our holdings of cash and cash equivalents in connection with funding future acquisitions, existing operations, capital expenditures or in pursuing other business opportunities. Our ability to meet our payment obligations will depend on our future financial performance, which will be affected by financial, business, economic and other factors, many of which we are unable to control. There can be no assurance that we will generate sufficient cash flow or that we will have access to sufficient external sources of funds in the form of outside investment or loans to continue exploration activities at the same or higher levels than in the past or that we will be able to obtain additional financing, if necessary, on a timely basis and on commercially acceptable terms.

***We engage in mergers and acquisitions activity in the ordinary course of business and may make future acquisitions and dispositions that may not achieve expected benefits.***

In the future, we may decide to expand our business by acquiring other companies in Peru or abroad in order to diversify our existing portfolio of products and services and expand our geographic footprint, or alternatively, contract our business by disposing some of our assets. Any future acquisitions and dispositions will depend on our ability to identify suitable candidates or buyers, negotiate acceptable terms, and obtain financing in the case of acquisitions. If future acquisitions or dispositions are significant, they could change the scale of our business and expose us to new geographic, political, operating, and financial risks. In addition, each transaction involves a number of risks, such as the diversion of our management's attention from our existing business, possible adverse effects on our results of operations, our inability to achieve the intended objectives of the transaction and potential unknown liabilities associated with the acquired assets.

[Table of Contents](#)

***Estimates of proven and probable reserves are subject to uncertainties and the volume and grade of ore actually recovered may vary from our estimates.***

The proven and probable ore reserve figures presented in this Annual Report are our and Cerro Verde's estimates, and there can be no assurance that the estimated levels of recovery of gold, silver, copper and certain other metals will be realized. Such estimates depend on geological interpretation and statistical inferences or assumptions drawn from drilling and sampling analysis, which may prove to be materially inaccurate. Actual mineralization or formations may be different from those predicted. As a result, reserve estimates may require revision based on further exploration, development activity or actual production experience, which could materially and adversely affect such estimates. No assurance can be given that our or Cerro Verde's mineral resources constitute or will be converted into reserves. Market price fluctuations of copper, gold, silver and other metals, as well as increased production costs or reduced recovery rates, may render proven and probable ore reserves containing relatively lower grades of mineralization uneconomic to exploit and may ultimately result in a restatement of proven and probable ore reserves. Moreover, short-term operating factors relating to the reserves, such as the processing of different types of ore or ore grades, could adversely affect our profitability in any particular accounting period.

***We may be unable to replace reserves as they become depleted by production.***

As we produce gold, silver, zinc and other metals, we deplete our respective ore reserves for such metals. To maintain production levels, we must replace depleted reserves by exploiting known ore bodies and locating new deposits. Exploration for gold, silver and the other metals we produce is highly speculative in nature. Our exploration projects involve significant risks and are often unsuccessful. Once a site is discovered with mineralization, we may require several years between initial drilling and mineral production, and the economic feasibility of production may change during such period. Substantial expenditures are required to establish proven and probable reserves and to construct mining and processing facilities. There can be no assurance that current or future exploration projects will be successful and there is a risk that our depletion of reserves will not be offset by new discoveries. See "Item 5. Operating and Financial Review and Prospects—Cerro Verde—A. Operating Results" for a summary of our and Cerro Verde's estimated proven and probable reserves as of December 31, 2022. On February 8, 2022, Buenaventura entered into binding agreements with Newmont Mining ("Newmont") to sell its total interest in Yanacocha. See detail in Note 1(e) to the Consolidated Financial Statements.

***We are subject to operational risks inherent to the nature of our business, in respect of which insurance may prove insufficient.***

The business of mining, smelting and refining gold, silver, copper and other metals is generally subject to a number of risks and hazards, including industrial accidents, labor disputes, unusual or unexpected geological conditions, changes in the regulatory environment, environmental hazards and weather and other natural phenomena such as earthquakes, most of which are beyond our control. Such occurrences could result in damage to, or destruction of, mining properties or production facilities, personal injury or death, environmental damage, delays in mining, monetary losses and possible legal liability. We and Cerro Verde each maintain insurance against risks that are typical in the mining industry in Peru and in amounts that we and Cerro Verde believe to be adequate but which may not provide adequate coverage in certain circumstances. No assurance can be given that such insurance will continue to be available at economically feasible premiums or at all. Insurance against certain risks (including certain liabilities for environmental pollution or other hazards as a result of exploration and production) is not generally available to us or to other companies within the industry.

***Legal proceedings could have a material adverse effect on our business.***

Buenaventura is involved in legal proceedings against SUNAT in connection with SUNAT's refusal to recognize Buenaventura's deductions with respect to contracts for physical deliveries and certain contractual payments made by the Company during the years 2007 and 2008, as well as tax loss, which was offset in 2009 and 2010.

During 2007 and 2008, Buenaventura modified its client contracts for the purposes of the sale of gold, shifting from a fixed price arrangement to a variable price arrangement. This allowed the Company to appropriately benefit from improved market prices. Additionally, it caused Buenaventura to incur significant expenses during the two-year transition period from 2007 to 2008, which also impacted the income tax payable by Buenaventura for fiscal years 2008 and 2009. However, the modified pricing structure also favorably impacted Buenaventura's financial results with a corresponding increase in Buenaventura's income tax payment to SUNAT during subsequent fiscal years.

[Table of Contents](#)

SUNAT's position is that Buenaventura should disregard the additional expenses incurred in connection with the shift to variable price arrangement for purposes of calculating its income tax for fiscal years 2007 and 2008. According to SUNAT, said payments correspond to an early settlement of financial derivative contracts in situations where the Company did not establish the purpose or risks covered by such instruments. Additionally, SUNAT does not recognize the tax losses which the Company offset during fiscal years 2009 and 2010, related to the losses incurred during fiscal years 2007 and 2008.

The claim for the years 2007, 2008, 2009 and 2010 initially amounted to 373.3 million soles (approximately US\$100.5 million updated at the exchange rate of December 31, 2023) which, when accounting for alleged penalties and fees at the date SUNAT commenced collection proceedings, and according to SUNAT's estimations, amounted to 2,107.5 million soles (approximately US\$567.6 million based on the exchange rate corresponding to December 31, 2023).

On November 26, 2020, following the intervening tax court's decision to dismiss the Company's appeal against certain Administrative Resolutions issued by SUNAT in connection with the above-referenced matter, SUNAT began collection proceedings in respect of such amounts. Following the commencement of such collection proceedings by SUNAT, the Company filed a request for deferral and payment plan of the amounts claimed by SUNAT in order to make such tax payments over a 67-month term, in addition to making interest payments in connection with such payments. The requested payment plan consists of an initial payment in an amount equal to 14% of the amount claimed by SUNAT and 66 equal installments for the remaining amounts. In order to finalize the deferral and payment agreement with SUNAT, the Company was required to deliver Letters of Credit in an amount equal to the aggregate claimed amount in accordance with applicable law. To satisfy this requirement, on December 30, 2020, the Company entered into the Syndicated L/C Agreement with a group of financial entities and following delivery of the Letters of Credit, SUNAT approved the Company's payment plan.

On July 30, 2021, the Company paid the full amount of the disputed tax assessment related to the 2007, 2008, 2009 and 2010 tax proceedings that were subject to deferment and installment and that are recorded in the caption "Trade and other receivables, net". For fiscal years 2007 and 2008, the total amount paid was S/1,584,227,000 (equivalent to US\$426,670,000 based on the exchange rate corresponding to December 31, 2023), which included updating the debt to reflect interest accrued as of July 30, 2021, such interest amounting to S/78,279,000 (equivalent to US\$21,082,000 based on the exchange rate corresponding to December 31, 2023). For fiscal year 2009, total amount paid was S/193,398,000 (equivalent to US\$52,199,000 based on the exchange rate corresponding to December 31, 2023) which included updating the amount claimed to reflect interest accrued as of July 30, 2021, such interest amounting to S/8,477,000 (equivalent to US\$2,283,000 based on the exchange rate corresponding to December 31, 2023). For fiscal year 2010, as a result of a deferral and installment, the total amount paid was S/356,691,000 (equivalent to US\$96,273,000 based on the exchange rate corresponding to December 31, 2023) which included the updating the amount claimed to reflect interest accrued as of July 30, 2021, such interest amounting to S/16,762,000 (equivalent to US\$4,514,000).

As of December 31, 2023, as a result of the advance payment mentioned above, the deferral and installment resolutions of the SUNAT tax claim have been rendered null and the letters of credit that were delivered as collateral for said disputed payments have been returned to the issuing banks.

On November 2023, the Fifth Chamber of Transitory Constitutional and Social Law of the Supreme Court notified the Cassation Ruling declaring the lawsuit filed by the Company unfounded. In response, on December 22, 2023, the Company and its sponsoring lawyers filed an amparo request before the Constitutional Chamber of the Superior Court of Justice with the purpose of declaring the annulment of the cassation ruling in response to the violations to the right constitutional protection of the Company.

As part of the assessment of the status of the process as of 2023, the Buenaventura's legal advisors concluded that the probabilities of recovering a portion of the payments made under protest to the Tax Administration related to fiscal years 2009 and 2010 were less than 50%, for which it was recognized with effect on the results of the year a liability due to a claim to the Tax Administration for S/420,231,000 (equivalent to US\$113,178,000) regarding the portion of accounts receivable related to such carry-forwarded losses. The impact in profit or loss was distributed as follows: others, net (US\$9,598,000), financial expenses (US\$58,454,000), and income tax (US\$45,126,000).

[Table of Contents](#)

In March 2024, the Supreme court notified the cassation ruling that declared unfounded the lawsuit filed by the Company to assert its position regarding derivative financial instruments operations in 2007. In the opinion of the sponsored lawyers, there are solid grounds to file an amparo claim, that will be ultimately resolved by the Constitutional Court, requesting the annulment of the aforementioned cassation as a result of the violation of constitutional rights and guarantees. The Company will file said constitutional action in the following days. The liability previously mentioned does not represent a withdrawal from the process, since the process remains in progress. Moreover, it does not imply a cash outflow as it is related to a payment in full made in previous years prior to the recognition of the account receivable.

We will continue to pursue appeals on this matter in Peruvian courts. These legal proceedings may be costly and time consuming and there can be no guarantee in respect of the final outcome of these proceedings or that SUNAT will not bring future claims against us.

***Increases in equipment costs, energy costs and other production costs, disruptions in energy supply and shortages in equipment and skilled labor may adversely affect our results of operations.***

In recent years, there has been a significant increase in mining activity worldwide in response to increased demand and significant increases in the prices of natural resources. The opening of new mines and the expansion of existing ones have led to increased demand for, and increased costs and shortages of, equipment, supplies and experienced personnel. These cost increases have significantly increased overall operating and capital budgets of companies like ours, and continuing shortages could affect the timing and feasibility of expansion projects.

Energy represents a significant portion of our production costs. Our principal energy sources are electricity, purchased petroleum products and natural gas. An inability to procure sufficient energy at reasonable prices or disruptions in energy supply could adversely affect our profits, cash flow and growth opportunities. Our production costs are also affected by the prices of commodities we consume or use in our operations, such as cyanide, reagents and explosives. The prices of such commodities are influenced by supply and demand trends affecting the mining industry in general and other factors outside our control, and such prices are at times subject to volatile movements. Increases in the cost of these commodities or disruptions in energy supply could make our operations less profitable, even in an environment of relatively high copper, gold or silver prices. Increases in the costs of commodities that we consume or use may also significantly affect the capital costs of new projects.

***We may be adversely affected by labor disputes.***

Our ability to achieve our goals and objectives is dependent, in part, on maintaining good relations with our employees. A prolonged labor disruption at any of our material properties could have a material adverse impact on our results of operations.

As of December 31, 2023, unions represented approximately 20.31% of our and our subsidiaries' employees, including Coimolache's employees and contractors. Although we consider our relationship with our employees to be positive, there can be no assurance that we will not experience strikes or other labor-related work stoppages that could have a material adverse effect on our operations and/or operating results in the future.

***Our and Cerro Verde's operations are subject to political and social risks.***

Our and Cerro Verde's exploration and production activities are potentially subject to political and social risks. Over the past several years, we have been the target of local political protests. In recent years, certain areas in the south and northern highlands of Peru with significant mining developments have experienced strikes and protests related to the environmental impact of mining activities. Such strikes and protests have resulted in commercial disruptions and a climate of uncertainty with respect to future mining projects.

As explained above, in the procedure of Prior Consultation with the native and indigenous Communities, the Peruvian governmental body responsible for issuing or approving the administrative measure or decree in question, rather than the affected local indigenous community, retains the right to approve or reject the relevant legislative or administrative matter following such consultation. However, to the extent that any future projects operated by us or Cerro Verde require legislative or administrative measures that impact local indigenous communities, the required prior consultation procedure may result in delays, additional expenses or failure to obtain approval for such new project.

[Table of Contents](#)***We could face geotechnical challenges, which could adversely impact our production and profitability.***

No assurances can be given that unanticipated adverse geotechnical and hydrological conditions, such as landslides and pit wall failures, will not occur in the future or that such events will be detected in advance. Geotechnical instabilities can be difficult to predict and are often affected by risks and hazards outside of our control, such as severe weather and considerable rainfall, which may lead to periodic floods, mudslides, wall instability and seismic activity, which may result in slippage of material.

Geotechnical failures could result in limited or restricted access to mine sites, suspension of operations, government investigations, increased monitoring costs, remediation costs, loss of ore and other impacts, which could cause one or more of our projects to be less profitable than currently anticipated and could result in a material adverse effect on our results of operations and financial position. Despite this, we have installed geotechnical instrumentation according to indications of consultants, reviewers and engineers of record. We also monitor instrumentation according to operation manuals of each component and recommendations of specialists. All these implementations have been carried out following Peruvian laws and international standards for such as The Canadian Dam Association (CDA) for designs in tailings facilities and The Mining Association of Canada (MAC) for management of tailings facilities. Both standards consider the entire life cycle of tailing facilities, from the conception, through the design, construction, operation, closure and post-closure.

***We rely on contractors to conduct a significant portion of our operations and mine development projects.***

A significant portion of our operations and mine development projects are currently conducted by contractors. As a result, our operations are subject to a number of risks, some of which are outside our control, including:

- failure of a contractor to perform under its agreement;
- interruption of operations or increased costs if a contractor ceases its business due to insolvency or other unforeseen events;
- failure of a contractor to comply with applicable legal and regulatory requirements, to the extent it is responsible for such compliance; and
- problems of a contractor with managing its workforce, labor unrest or other employment issues.

In addition, we may incur liability to third parties as a result of the actions of our contractors. The occurrence of one or more of these risks could adversely affect our results of operations and financial position.

***We are exposed to behaviors incompatible with our and Cerro Verde's ethics and compliance standards.***

Given the large number of contracts with suppliers and other partners to which we and Cerro Verde are a party, the geographic distribution of our operations and the great variety of parties that we interact with in the course of our business, we are subject to the risk that our employees, contractors and other persons having relations with us may misappropriate our assets, manipulate our assets or information or engage in money laundering or the financing of terrorism, for such person's personal or business advantage. Our systems for identifying and monitoring these risks may not be effective to fully mitigate them in all circumstances. Such acts may result in material financial losses or reputational harm to us.

***We are not, and do not intend to become, regulated as an investment company under the U.S. Investment Company Act of 1940, as amended (the "Investment Company Act"), and if we were deemed an "investment company" under the Investment Company Act, applicable restrictions could make it impractical for us to operate as contemplated.***

As of December 31, 2023, we have a 19.58% partnership interest in Cerro Verde and no longer hold any interest in Yanacocha. We also hold 19.32% of Tinka Resources Limited. These interests may constitute "investment securities" for purposes of the Investment Company Act. On February 8, 2022, the Company sold the entirety of its stake in Yanacocha to Newmont. As such, Yanacocha has been classified in our financial statements as of December 31, 2021 as an asset held for sale as outlined in Note 1(e) to our Consolidated Financial Statements.

[Table of Contents](#)

Under the Investment Company Act, an investment company is defined in relevant part to include (i) any company that is or holds itself out as being engaged primarily, or proposes to engage primarily, in the business of investing, reinvesting or trading in securities and (ii) any company that owns or proposes to acquire investment securities having a value exceeding 40% of such company's total assets (exclusive of certain items) on an unconsolidated basis. Issuers that are investment companies within the meaning of the Investment Company Act, and which do not qualify for an exemption from the provisions of such act, are required to register with the Securities and Exchange Commission (the "SEC") and are subject to substantial regulations with respect to capital structure, operations, transactions with affiliates and other matters. If we were deemed to be an investment company and did not qualify for an exemption from the provisions of the Investment Company Act, we would be required to register with the SEC and would be subject to such regulations, which would be unduly burdensome and costly for us and could adversely impact us.

We received an order from the SEC on April 19, 1996 declaring us to be primarily engaged in a business other than that of an investment company and, therefore, not an investment company within the meaning of the Investment Company Act. We intend to conduct our operations and maintain our investments in a manner, and will take appropriate actions as necessary, to ensure we will not be deemed to be an investment company in the future. The SEC, however, upon its motion or upon application, may find that the circumstances that gave rise to the issuance of the order no longer exist, and as a result may revoke such order. There can be no assurance that such order will not be revoked.

***Our inability to maintain positive relationships with the communities in which we operate may affect our reputation and financial condition.***

Our relationship with the communities in which we operate are critical to ensuring the future success of our existing operations and the construction and development of our projects. Adverse publicity generated by non-governmental organizations or local communities related to extractive industries generally, or our operations specifically, could have an adverse effect on our reputations or financial condition and may impact our relationships with the communities in which we operate. In addition, following the enactment of Law No. 29785, the Law of Prior Consultation for Indigenous and Native Communities in 2011, the Peruvian government must undertake a prior consultation procedure in concert with local indigenous communities whose collective rights may be directly affected by new legislative or administrative measures. Implementing regulations under Law No. 29785 were approved by Supreme Decree No. 001-2012-MC, which became effective on April 2, 2012. Law No. 29785 and the Implementing regulations do not establish a specific term to complete the Prior Consultation procedure. Our national reputation for maintaining positive relationships with the communities in which we operate may affect the outcome of any such prior consultation process involving approvals that we seek for new projects. In addition, some communities may not agree to exercise their right to Prior Consultation or They could claim greater benefits by being considered as areas of direct influence or also claim to be a direct part of the business. These situations can generate delays in obtaining permits and authorizations, which affects the time that we may have projected for the development of our projects While we are committed to operating in a socially responsible manner, there is no guarantee that our efforts in this regard will mitigate this potential risk. Social and political conflicts could also affect the willingness of Communities or owners to reach agreements on their lands for the development of our projects.

We have implemented extensive community relations and good practices to anticipate and manage social issues that may arise at our operations.

***Deterioration in our financial position or a downgrade of our ratings by a credit rating agency could increase our borrowing costs, and our business relationships could be adversely affected.***

Credit rating agencies could downgrade our ratings either due to factors specific to Buenaventura, a prolonged cyclical downturn in the precious metals mining industries, macroeconomic trends (such as global or regional recessions) or trends in credit and capital markets more generally. For instance, on September 20, 2022, Moody's Investors Service downgraded our unsecured corporate rating from "B1" to "B2" due to the Company's operating challenges and cost structure. In line with these reasons, Fitch downgraded our credit rating on February 08, 2023 to "BB-" from "BB".

A deterioration of our financial position or a further downgrade of any of our credit ratings for any reason could increase our borrowing costs and have an adverse effect on our business relationships with customers and suppliers. A subsequent downgrade could adversely affect our existing financings, limit access to the capital or credit markets, or otherwise adversely affect the availability of other new financing on favorable terms, if at all, result in more restrictive covenants in agreements governing the terms of any future indebtedness that we incur, increase our borrowing costs, or otherwise impair our business, financial condition and operating results.

[Table of Contents](#)***Our tailings dams are subject to significant environmental, safety and engineering challenges and risks that could adversely affect our business.***

The rupture of a tailings dam or similar structure may cause severe damages. Currently, the Company owns 14 tailings dams, consisting of 5 active and 9 inactive (those in the process of being closed or remediated) tailing dams, and other geotechnical structures like water dams, dumps, open pits, and leaching pads. All active and three of the inactive tailings dams were built using the “downstream” raising method or were raised with filtered/compacted tailings. The remaining inactive tailings dams were built using the “upstream” raising method, which could present stability risks, especially related to liquefaction.

Management of these facilities is regulated in the jurisdiction where we operate and our programs are designed to comply with applicable national laws, permits and approved environmental impact studies.

The failure of tailings dams could cause loss of life and severe personal, property and environmental damages, which could further have an adverse effect on our business, results of operations and reputation. That is why we maintain strict operational controls on critical components, according to the recommendations of specialists.

***We could be subject to information technology system failures, network disruptions, and breaches in data security which could negatively affect our business, financial position, results of operations, and cash flows.***

As dependence on digital technologies is expanding, cyber incidents, including deliberate attacks or unintentional events have been increasing worldwide. Computers and telecommunication systems are used to conduct our exploration, development and production activities and have become an integral part of our business. We use these systems to analyze and store financial and operating data, as well as to support our internal communications and interactions with business partners. Cyber-attacks could compromise our computer and telecommunications systems and result in additional costs as well as disruptions to our business operations or the loss of our data.

A cyber-attack involving our information systems and related infrastructure, or those of our business partners, could disrupt our business and negatively impact our operations in a variety of ways, such as, among others:

- an attack on the computers which control our mining operations could cause a temporary interruption of our production while contingency manual systems are brought online;
- a cyber-attack on our accounting or accounts payable systems could expose us to liability to employees and third parties if their sensitive personal information is obtained;
- possible loss of material information, which in turn could delay productive processes and selling efforts, causing economic losses; or
- a cyber-attack on a service provider could result in supply chain disruptions, which could delay or halt our major development projects.

***The laws of Peru related to anti-bribery and anti-corruption are still developing and could be less stringent than those of other jurisdictions, and our risk management and internal controls may not be successful in preventing or detecting all violations of law or of company-wide policies.***

Our business is subject to a significant number of laws and regulations in Peru and the United States, including without limitation, those pertaining to anti-bribery and anti-corruption, such as Peru’s Law 30424 – Law that Regulates the Administrative Liability of Legal Entities in Criminal Process, as amended, the Foreign Corrupt Practices Act (“FCPA”) and the applicable sanctions imposed by the United States Treasury’s Office of Foreign Assets Control (“OFAC”).

While Peru’s legal framework is becoming more mature, requiring and promoting control measures for the prevention of corruption, bribery, money laundering and the financing of terrorism, among other crimes, its supervisory and sanctioning reach remains lacking. Given the Company’s operations and activities, the Company continues to update its Corporate Compliance Program to incorporate international best practices and aim to satisfy United States and Peru related requirements, with the objective of preventing and mitigating the risks associated with its operations and activities.

[Table of Contents](#)

The nature and dynamism of the Company's operations and the number of third parties with which it interacts, which includes public officials, requires ongoing and adequate monitoring to identify improper practices, fraud or violations of the law by our employees, contractors, managers or any other person doing business with or on behalf of the Company, and thereby the Company has continued to update its third party risks as well as other risks, reinforcing its internal processes and controls in this respect.

The Company has a number of internal policies, manuals and procedures in place conforming its Corporate Compliance Management System, including the Company's Anti-Corruption Policy, the Manual for the Prevention of Money Laundering and Financing of Terrorism, and the Policies of Donations and/or Charitable Contributions, Protection of Personal Data, Gifts and Conflict of Interest.

While the Company continues to improve its Corporate Compliance program and its compliance function, its existing compliance processes and internal control systems may not be sufficient to prevent or detect all inappropriate practices, fraud or violations of law by our employees, contractors, agents, officers or any other persons who conduct business with or on behalf of us.

We may in the future discover instances in which we have failed to comply with applicable laws and regulations or internal controls. If any of our employees, contractors, agents, officers or other persons with whom we conduct business engage in fraudulent, corrupt or other improper or unethical business practices or otherwise violate applicable laws, regulations or our own internal compliance systems, we could become subject to one or more enforcement actions by Peruvian or foreign authorities (including the U.S. Department of Justice, the Securities and Exchange Commission and OFAC) or otherwise be found to be in violation of such laws, which may result in penalties, fines and sanctions and in turn adversely affect our reputation, business, financial condition and results of operations.

***The climatic phenomenon El Niño and other natural phenomena such as earthquakes and floods may have a material and adverse effect on us.***

Peru has experienced natural phenomena in the past such as earthquakes, other geologic events and flooding. A major earthquake could damage the infrastructure necessary for our operations. In addition, increased rainfall from the weather phenomenon known as "El Niño," which typically occurs every two to seven years, can contribute to flooding and mudslides, which could damage roads and highways providing access to our facilities. Peru has also experienced droughts caused by low rainfall. If such events occur in the future, we may suffer damage to, or destruction of, properties and equipment, or losses not covered by our insurance policies, as well as temporary disruptions to our services, which may materially and adversely affect us. If a significant number of our employees were affected by a natural disaster, our ability to conduct business could be impaired.

**Factors Relating to Peru**

***The political and social situation in Peru is complex and has a direct impact on the economy and investment climate in the country.***

Both Compañía de Minas Buenaventura and Cerro Verde conduct their mining operations exclusively in Peru. Consequently, the political and social instability that periodically affects Peru, as well as the severe weather events that primarily impact the north coast and center of the Peruvian territory impacts our business, financial condition, mining activity results and our company.

For most of 2022, then President Pedro Castillo Terrones, and those closest to him, faced inquiries about the quality of his management, scandals related to irregular contracting processes, and his appointment of senior officials who did not meet the qualifications to hold high responsibility positions. Over the course of his almost 500 day tenure, the Castillo administration appointed 78 State Ministers, an unprecedented number of appointments in Peruvian politics.

President Castillo faced three presidential vacancy processes to remove him from office based on charges related to tax investigations, links to individuals related to radical left factions, and ties to a shadow power group, among others. The third presidential vacancy vote scheduled for December 7, 2022, was expected to fail for lack of sufficient support. However, on December 6, 2022, President Castillo announced the dissolution of Congress and establishment of an exceptional emergency government in an attempted "self-coup". On the same day, Congress inaugurated Dina Boluarte as the first female president of Peru.

Dina Boluarte, an official from Apurímac and vice president of Pedro Castillo, started her provisional government in a context in which large sections of the country began to demand the recall of the politicians, not only in the executive branch but also in the legislative branch.

[Table of Contents](#)

According to analysts, President Boluarte misstepped in the early days of her administration when she declared that she would govern until July 28, 2026, completing the term of her predecessor, Pedro Castillo. However, faced with mounting nationwide protests, the president reversed her decision two months later and announced that she would hold office until 2023. President Boluarte repeatedly called on Congress to undertake constitutional reform to accelerate the at-large elections, which Congress has consistently rejected.

The escalation of popular discontent towards country's politicians caused one of the most serious social unrests in the republican history of Peru. Large portions of the population across nine regions of the country, concentrated in the southern and central regions where major mining operations are situated, mobilized violently and clashed with law enforcement. Radical groups took advantage of this instability to instigate constitutional reform and, consequently, change the country's economic model.

More than 60 Peruvians, including a police officer, died during three months of widespread violence in the country. Public and private institutions, such as banks, police stations, supermarkets, municipalities, airports and even the homes of some officials were attacked by radical groups. Likewise, important facilities in the mining-energy sector, such as Camisea (Cusco), Julcani (Huancavelica), and Antapaccay (Cusco) suffered acts of vandalism.

Currently, Peruvian authorities are investigating President Boluarte for unlawful enrichment and on March 29, 2024, Peruvian police raided her residence. Following the raid nearly a third of her cabinet resigned and Congress approved her third cabinet in 16 months. Since then, there also been two attempts to bring a presidential vacancy process against Boluarte to debate, which were rejected. It is currently unclear what the result of the investigation will be or whether there will be other attempts to remove Boluarte from office or the impact of those events on the political, social and economic situation in Peru and ultimately our business.

***Inflation, reduced economic growth and fluctuations in the Sol exchange rate may adversely affect our financial condition and results of operations.***

Inflation, reduced economic growth and fluctuations in the Sol exchange rate may adversely affect our financial condition and results of operations.

Prior to 1994, Peru periodically experienced high inflation, slow or negative economic growth and substantial currency devaluation. The inflation rate in Peru, as measured by the Índice de Precios al Consumidor and published by Instituto Nacional de Estadística e Informática has fallen from a high of 7,649.7% in 1990 to 3.2% in 2023. Our revenues and operating expenses are primarily denominated in U.S. Dollars. If inflation in Peru were to increase without a corresponding devaluation of the Sol relative to the U.S. Dollar, our financial position and results of operations, and the market price of our Common Shares and ADSs, could be affected. Although the Peruvian government's stabilization plan has significantly reduced inflation since 1999, and the Peruvian economy has experienced strong growth in recent years, there can be no assurance that inflation will not increase from its current level or that such growth will continue in the future at similar rates or at all.

Among the economic circumstances that could lead to a devaluation would be the decline of Peruvian foreign reserves to inadequate levels. Peru's foreign reserves at December 31, 2023 were US\$73.6 billion as compared to US\$71.9 billion at December 31, 2022, as per the Banco Central de Reserva. Although actual foreign reserves must be maintained at levels that will allow the succeeding government the ability to manage the Peruvian economy and to assure monetary stability in the near future, there can be no assurance that Peru will be able to maintain adequate foreign reserves to meet its foreign currency denominated obligations, or that Peru will not devalue its currency should its foreign reserves decline.

***Climatic phenomena in Peru have an impact on some economic activities and infrastructure in the country.***

Multiple global studies have consistently highlighted Peru as one of the nation's most susceptible to the adverse effects of climate change and water scarcity.

In March 2023, Cyclone Yaku made landfall in Peru, mainly affecting regions in the northern coast of the country. Cyclone Yako brought intense rains and consequently activation of rivers and streams, which produced floods, landslides and road interruptions.

[Table of Contents](#)

Likewise, in March 2023, the Multisector Commission in charge of the National Study of the El Niño Phenomenon (ENFEN) upgraded the alert system status from “Surveillance of El Niño Costero” to “El Niño Costero Alert” (Niño 1+2 region), due to unusual changes in the ocean-atmosphere coupling in the Niño 1+2 region, which includes the northern and central zone of the Peruvian sea, which has caused the warming expected for March to extend during the fall with an initial magnitude of weak.

On June 8, 2023 the Government, through Supreme Decree No. 072-2023-PCM, made official the declaration of a state of emergency in several provincial districts of various regional governments of the country, due to imminent danger due to intense rainfall and possible El Niño Phenomenon.

According to ENFEN, the characterization of “El Niño Costero” was initially considered moderate, then at the end of 2023 it became strong and returned to moderate.

On July 4, 2023, the World Meteorological Organization officially declared the start of the Global El Niño phenomenon, which will cause an increase in temperature and various climatic events. It is unclear what the impact of the Global El Niño will be on Peru’s infrastructure and economic activity or its impact on our business.

***The Peruvian economy is temporarily stagnant, but it could rebound for the rest of the year despite political upheavals and natural phenomena.***

The growth of the Peruvian economy will be between 2.5% and 3% this year, according to the perspectives indicated by the Central Reserve Bank of Peru and World Bank, despite the presence of the El Niño and Global El Niño phenomena. Natural phenomena may affect the supply chain, and key infrastructure, and may raise the price of essential items such as rice and lemon, items that are highly popular.

Inflation will be around 3% in the first quarter of the year and the trend is for it to decrease towards the middle of the year. The exchange rate remains relatively stable and the country risk remains among the lowest in the region.

***Peruvian exchange and investment control policies could affect dividends paid to holders of Common Shares and ADRs.***

Peruvian law currently imposes no restrictions on the ability of companies operating in Peru to transfer foreign currency from Peru to other countries, to convert Peruvian currency into foreign currency or foreign currency into Peruvian currency or to remit dividends abroad, or on the ability of foreign investors to liquidate their investment and repatriate their capital. Before 1991, Peru had restrictive exchange controls and exchange rates. During the latter part of the 1980s, exchange restrictions prevented payment of dividends to our shareholders in the United States (the “U.S.”) in U.S. Dollars. Accordingly, should such or similar controls be instituted, dividends paid to holders of Common Shares and, consequently, holders of ADRs, could be affected. There can be no assurance that the Peruvian government will continue to permit such transfers, remittances or conversion without restriction. See “Item 10. Additional Information—D. Exchange Controls.”

***Holders of our securities may find it difficult to enforce judgments against us outside of Peru.***

We are organized under the laws of Peru. A significant majority of our directors and officers reside outside the U.S. (principally in Peru). All or a substantial portion of our assets or the assets of such persons are located outside the U.S. As a result, it may not be possible for investors to effect service of process within the U.S. upon us or upon such persons or to enforce against them in federal or state courts in the U.S. judgments predicated upon the civil liability provisions of the federal securities laws of the U.S. We have been advised by our Peruvian counsel that there is uncertainty as to the enforceability, in original actions in Peruvian courts, of liabilities predicated solely under the U.S. federal securities laws and as to the enforceability in Peruvian courts of judgments of U.S. courts obtained in actions predicated upon the civil liability provisions of the U.S. federal securities laws.

[Table of Contents](#)**Factors Relating to the Common Shares and ADSs*****The concentration of our capital stock ownership with certain major shareholders may limit our stockholders' ability to influence corporate matters.***

As of March 31, 2024, Antofagasta plc and two of our directors (and their families), Roque Benavides and Raul Benavides (collectively, the "Benavides Family") held an aggregate of approximately 35% of Buenaventura's outstanding share capital (including outstanding Common Shares and investment shares with a nominal (par) value of ten Peruvian Soles per share, which do not entitle their holders to voting rights ("Investment Shares")). In addition, certain other members of the Benavides Family are believed to hold a significant number of our Common Shares in aggregate.

While the Benavides Family is not, to our knowledge, acting together as a group to vote their Common Shares, there can be no assurance that the Benavides Family will not, in the future, form a group for the purpose of voting their Common Shares or exerting influence over the management and policies of Buenaventura. Because of the significant aggregate ownership interest held by individual members of the Benavides Family, the Benavides Family could have the power to elect a significant number of the outstanding directors and exercise significant influence over the outcome of substantially all matters to be decided by a vote of shareholders.

In addition, under the terms of the amended and restated deposit agreement dated May 3, 2002 (as further amended and restated as of November 12, 2003, the "Amended and Restated Deposit Agreement"), among us, The Bank of New York Mellon (formerly The Bank of New York), as depositary, or the "Depositary", and the owners and beneficial owners of ADSs, or the Amended and Restated Deposit Agreement, relating to our ADSs, if holders of ADSs do not provide the Depositary with timely instructions for the voting of Common Shares represented by such ADRs, the Depositary will be deemed to be instructed to give a person designated by us, which could be a member of the Benavides Family, a discretionary proxy to vote such shares, unless we inform the Depositary that we do not wish such proxy to be given.

***Shareholders' rights under Peruvian law may be fewer and less well-defined than shareholders' rights in other countries, including the U.S.***

Our shareholders have fewer and less well-defined rights under applicable Peruvian law than they might have as shareholders of a corporation incorporated in a jurisdiction of the U.S. or certain other countries. For example, Peruvian law does not provide for proceedings by which non-controlling shareholders may file class action lawsuits or shareholder derivative actions against controlling shareholders or officers and directors, and the procedural requirements to file shareholder actions in Peru differ from those of the U.S. As a result, holders of our shares may face difficulty enforcing their rights.

***U.S. securities laws do not require us to disclose as much information to investors as a U.S. issuer is required to disclose, and you may receive less information about us than you might otherwise receive from a comparable U.S. company.***

The corporate disclosure requirements applicable to us may not be equivalent to the requirements applicable to a U.S. company and, as a result, you may receive less information about us than you might otherwise receive in connection with a comparable U.S. company. We are subject to the periodic reporting requirements of the United States Securities Exchange Act of 1934, as amended, or the Exchange Act, that apply to "foreign private issuers." The periodic disclosure required of foreign private issuers under the Exchange Act is more limited than the periodic disclosure required of U.S. issuers.

***A sale of a substantial number of shares by the our major shareholders Benavides Family could have an adverse impact on the price of our Common Shares and ADSs.***

The sale of a substantial number of our shares by Antofagasta plc or members of the Benavides Family, or a market perception of the intention of Antofagasta plc or members of the Benavides Family to sell a substantial number of shares, could materially and adversely affect prevailing market prices for the Common Shares and ADSs. There is no contractual restriction on the disposition of shares of our share capital by our shareholders. Furthermore, under the *Ley General de Sociedades Peruanas*, or "Peruvian Companies Law," any restriction on the free sale of shares in a *sociedad anónima abierta* (publicly held corporation) such as we are, is null and void.

[Table of Contents](#)***Holders of ADSs may be unable to exercise preemptive rights and accretion rights available to the Common Shares underlying the ADSs.***

Holders of the ADSs are, under Peruvian law, entitled to exercise preemptive rights and accretion rights on the Common Shares underlying the ADSs in the event of any future capital increase by us unless (x) the increase is approved, expressly stating that the shareholders have no preemptive rights to subscribe and pay for the Common Shares to be issued in such increase, by holders of Common Shares holding at least 40% of the Common Shares at a properly called meeting with a proper quorum and (y) the increase is not designed to improve directly or indirectly the shareholding of any shareholder. However, U.S. Holders (as defined herein) of ADSs may not be able to exercise through the Depository for the ADSs the preemptive rights and accretion rights for Common Shares underlying their ADSs unless a registration statement under the Securities Act of 1933, as amended, or the "Securities Act," is effective with respect to such rights or an exemption from the registration requirement thereunder is available. Any such rights offering would have a dilutive effect upon shareholders who are unable or unwilling to exercise their rights. We intend to evaluate, at the time of any rights offering, the costs and potential liabilities associated with any registration statement as well as the associated benefits of enabling the holders of ADSs to exercise such rights and will then make a decision as to whether to file such a registration statement. Therefore, no assurance can be given that we will file any such registration statement. To the extent that holders of ADSs are unable to exercise such rights because a registration statement has not been filed and no exemption from such registration statement under the Securities Act is available, the Depository will, to the extent practicable, sell such holders' preemptive rights or accretion rights and distribute the net proceeds thereof, if any, to the holders of ADSs, and such holders' equity interest in us will be diluted proportionately. The Depository has discretion to make rights available to holders of ADSs or to dispose of such rights and to make any net proceeds available to such holders. If, by the terms of any rights offering or for any other reason, the Depository is not able to make such rights or such net proceeds available to any holder of ADSs, the Depository may allow the rights to lapse.

**ITEM 4. Information on the Company****BUENAVENTURA****A. History and Development*****Overview***

We are Peru's largest publicly traded precious metals company in terms of market capitalization and we are engaged in the exploration, mining and processing of gold, silver, copper and (to a lesser extent) other metals in Peru. We currently operate the Orcopampa, Uchucchacua, Julcani, Tambomayo and La Zanja mines and have controlling interests in two other mining companies that operate the Colquijirca-Marcapunta and Coimolache mines. We also own an electric power transmission company, a hydroelectric plant and a processing plant, as well as non-controlling interests in several other mining companies, including a significant ownership interest in Cerro Verde, a Peruvian company that operates a copper mine located in the south of Peru. For the year ended December 31, 2023, our consolidated operating income were US\$823.8 million and our consolidated net profit was US\$32.7 million.

*Discontinued operations.* During December 2021, Buenaventura management reclassified its negative investment held in Minera Yanacocha S.R.L for US\$264,838,000 as available for sale and recognized it as a discontinued operation in the consolidated income statement for the years 2019, 2020 and 2021. See Note 1(e) and Note 2.4(w) to the Consolidated Financial Statements of 2021 and 20F 2021 for further details. On February 7, 2022, Buenaventura entered into definitive agreements to sell the entirety of its interest in Yanacocha for cash consideration of \$300,000,000 to Newmont, as well as contingent cash payment linked to (i) production of the Sulphides Project that Newmont plans to develop at Yanacocha and (ii) potential future increases in mineral prices. Collectively, such contingent payments can potentially amount to an additional \$100,000,000. On February 8, 2022, Newmont paid us the initial \$300,000,000 cash consideration owned. During 2022, we sold our Yanacocha mining unit which was previously classified as an discontinued asset during 2021. As of December 31, 2023, we have classified 2 mining units as units with discontinued operations: Poracota and Shila-Paula. See Note 1 (e) and Note 2.4 (v) to the Consolidated Financial Statements.

[Table of Contents](#)

The table below summarizes the total production and our equity share of production for the Orcopampa, Uchucchacua, Julcani, Tambomayo, El Brocal, La Zanja, Coimolache and Cerro Verde mines for the year ended December 31, 2023:

UNIT	Buenaventura's Equity Ownership	Total Production (unaudited)						Buenaventura's Equity Share of Production (unaudited)					
		Silver (Oz)	Gold (Oz)	Lead (t)	Zinc (t)	Copper (t)	Molybdenum (t)	Silver (Oz)	Gold (Oz)	Lead (t)	Zinc (t)	Copper (t)	Molybdenum (t)
Orcopampa	100.00 %	30,164	83,239	0	0	0	0	30,164	83,239	0	0	0	0
Uchucchacua	100.00 %	2,595,038	0	1,962	2,763	0	0	2,595,038	0	1,962	2,763	0	0
Julcani	100.00 %	1,670,679	237	545	0	14	0	1,670,679	237	545	0	14	0
Tambomayo	100.00 %	1,590,784	41,675	3,877	5,092	0	0	1,590,784	41,675	3,877	5,092	0	0
El Brocal	61.43 %	3,192,724	20,442	5,026	17,153	57,707	0	1,961,290	12,558	3,088	10,537	35,450	0
La Zanja	100.00 %	20,589	9,080	0	0	0	0	20,589	9,080	0	0	0	0
Coimolache	40.094 %	264,835	67,140	0	0	0	0	106,183	26,919	0	0	0	0
Cerro Verde	19.58 %	4,076,615	0	0	0	447,035	9,874	798,201	0	0	0	87,529	1,933
<b>Total Production</b>		<b>13,441,428</b>	<b>221,814</b>	<b>11,410</b>	<b>25,008</b>	<b>504,756</b>	<b>9,874</b>	<b>8,772,928</b>	<b>173,708</b>	<b>9,472</b>	<b>18,392</b>	<b>122,993</b>	<b>1,933</b>

Compañía de Minas Buenaventura S.A.A., a *sociedad anónima abierta* (publicly held corporation) under the laws of Peru, was originally established in 1953 as a corporation (*sociedad anónima*) under the laws of Peru. Our registered office is located at Las Begonias 415, 19<sup>th</sup> floor, Lima 27, Peru, telephone no. 511-419-2500. Our website may be found at <http://www.buenaventura.com>. The information on our website is not a part of, and is not incorporated into, this document.

The SEC maintains an internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. All of the SEC filings made electronically by the Company are available to the public on the SEC website at [www.sec.gov](http://www.sec.gov) (commission file number 1-14370).

### History

During the first several decades of our operations, we focused on the exploration and development of silver mines in Peru, including our Julcani, Orcopampa and Uchucchacua mines. Beginning in the early 1980s, we began to explore for gold and other metals in Peru, in order to diversify our business and reduce our dependence on silver. We expanded our mineral reserves through property acquisition and intensive exploration programs which were designed to increase reserves and production of gold. We also conducted exploration leading to the discovery of gold mineralization and subsequent production of gold at our Orcopampa, La Zanja, Breapampa and Tambomayo mines. In addition, we made significant equity investments in Cerro Verde, which operates an open pit copper mine in Peru, and Coimolache, which owns the Coimolache gold mine that we operate. As a result of these initiatives, the majority of our revenues are now derived from the production of gold, silver and copper.

### Business Strategy

Our strategy is to sustain our position as Peru's largest, publicly traded gold and silver mining company by expanding our reserves and production. We are currently engaged in an active exploration and mine development program and participate in several mining exploration projects with Newmont Mining, Southern Copper Corporation, Corporación Aceros Arequipa S.A. and Compañía de Minas Caudalosa S.A.C. In addition, we seek to increase the efficiency and capacity of our mining operations. We are aware of our social and environmental responsibilities and aim to excel in the prevention, mitigation and rehabilitation of mining-related disturbances.

[Table of Contents](#)*Maintaining an Active Exploration Program*

During the years ended December 31, 2023, 2022 and 2021, our “exploration in non-operating areas” expenses and “exploration in operating units” expenses were as follow:

	Year ended December 31,		
	2021	2022 (US\$ in thousands)	2023
<b>Exploration in non-operating areas</b>			
Marcapunta	1,383	4,008	4,095
Emperatriz	5,742	5,243	3,958
Ccelloccasa	405	1,748	151
San Gabriel	1,010	282	1,148
Other, net	2,730	2,971	4,100
<b>Total exploration in non-operating areas</b>	<b>11,270</b>	<b>14,252</b>	<b>13,452</b>
<b>Exploration in operating units</b>			
Uchucchacua	11,090	32,592	24,423
Orcopampa	11,466	11,594	6,071
Julcani	6,107	6,747	6,990
Tambomayo	10,076	9,980	3,446
Colquijirca	17,099	16,671	7,761
La Zanja	574	3,212	538
<b>Total exploration in operating areas</b>	<b>56,412</b>	<b>80,796</b>	<b>49,229</b>

In 2024 we intend to invest approximately between US\$ 41.0 and US\$ 44.0 million in exploration in operating units (mainly in Tambomayo, Orcopampa, Uchucchacua and El Brocal) and between US\$ 14.0 and US\$ 16.0 million in exploration in non-operating areas.

*Participation in Mining Exploration Agreements*

In addition to managing and operating precious metals mines, we participate in mining exploration agreements with mining partners to reduce risks, gain exposure to new technologies and diversify revenues to include other base metals, such as copper and zinc. See “B. Business Overview—Exploration.” We believe that maintaining our focus on mining operations complements our partnership strategy because the engineering and geological expertise gained from such operations enhances our ability to participate in, and contribute to, those projects.

Buenaventura recognizes in its corporate materiality analysis the importance of climate change for the country and the areas where our mining operations are conducted. In response to this challenge, our company has undertaken an initial analysis of climate change-associated risks in each of the areas where our mines and projects are located, based on climate data provided by public entities and direct information from our own units.

It is important to mention that Peru has not yet implemented regulations regarding climate change, except for the commitments made by the Peruvian state within the framework of the Conference of the Parties (COP) of the United Nations Framework Convention on Climate Change.

Buenaventura has initiated a gap assessment to establish a roadmap for gradually aligning with the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD), identifying corporate strengths regarding climate governance and greenhouse gas emissions measurements. Likewise, processes for improvement have been identified regarding the analysis of risks under long-term climate scenarios and the corresponding financial impacts and opportunities.

Concerning the demand for low-emission goods and services, we acknowledge that the use of low-emission greenhouse gas (GHG) energy is a key sustainability element for our mining operations. Therefore, we believe that our GHG mitigation efforts are supported by a market-based approach to renewable energy consumption.

[Table of Contents](#)

Furthermore, considering market and investor requirements about climate change-related disclosure, we believe that the trend of demand for goods and services is shifting towards low-carbon economies. In this regard, we consider that Buenaventura's minerals (such as copper, silver, zinc, among others) will have competitive advantages in the market due to their contribution to energy transition.

Buenaventura has been working to manage its emissions, which, according to GHG inventories conducted since 2021, show very low levels, especially when compared to other activities in the same sector. At the same time, we aim not only to align our operations with the requirements of products resulting in lower carbon emissions, such as copper, but also to prepare for future responses to commercial and regulatory trends related to climate change. At the moment, Buenaventura currently has no plans for initiatives involving the purchase or sale of carbon credits.

The primary physical risks associated with climate change, which could potentially impact operational results, are related to the Ultraviolet Radiation Index (UVI) and mass movements triggered by high precipitation.

The Ultraviolet Radiation Index (UVI) established by the World Health Organization is a measure of the intensity of solar UV radiation at the Earth's surface. It is expressed on a scale from 1, which is low, to greater than 11, which is dangerously high. Buenaventura's operations are in high-altitude areas that have a high UVI, ranging from 13 to 16 UV according to the UVI map of Peru's National Meteorology and Hydrology Service (SENAMHI, by its initials in Spanish).

According to SENAMHI, during the summer of 2021-2022, levels of ultraviolet radiation were considered between high and extremely high throughout the country. In the regions where Buenaventura's operations are located, monthly averages of UV index fluctuated between 9 and 13, with maximum values between 10 and 17 (extremely high). In 2023, in the highlands, maximum UV index values ranged from 9 to 17, extremely high. Nevertheless, this topic is not currently considered as a material risk for our operations, due to the preventive measures implemented by the company (use of personal protective equipment, worker training, etc.).

According to the National Center for Estimation, Prevention and Reduction of Disaster Risks (CENEPRED, by its initials in Spanish), the rainy season in our country occurs between September and April, with the highest precipitation happening during the summer months (January to March). The intensity of the rains will depend on the behavior of the ocean and the atmosphere, causing amounts greater or less than their normal values, and may present extreme situations in each space and time.

The risk scenario is linked to excess rainfall, potentially leading to floods, landslides, or other types of mass movement, which could result in damage or losses to the population and their livelihoods, as well as disrupt the transport routes used by operations for the transfer of supplies, mineral concentrates, and workers.

The rainy season of 2021-2022 was influenced by La Niña event in the Central Pacific, leading to reduced rainfall frequency in the western Andes. Consequently, there was a precipitation deficit during the spring of 2021 and the summer of 2022, although drought conditions did not occur in the high Andean areas where our operations are situated (SENAMHI, Analysis of the national rainy season, 2021-2022).

However, in late February 2023, heavy rains linked to an uncommon tropical depression named Cyclone Yaku impacted the coastal regions. In the areas where our operations are situated, the precipitation patterns had no significant physical risks, considering the functionality of our water management infrastructure for handling exceptional rainfall.

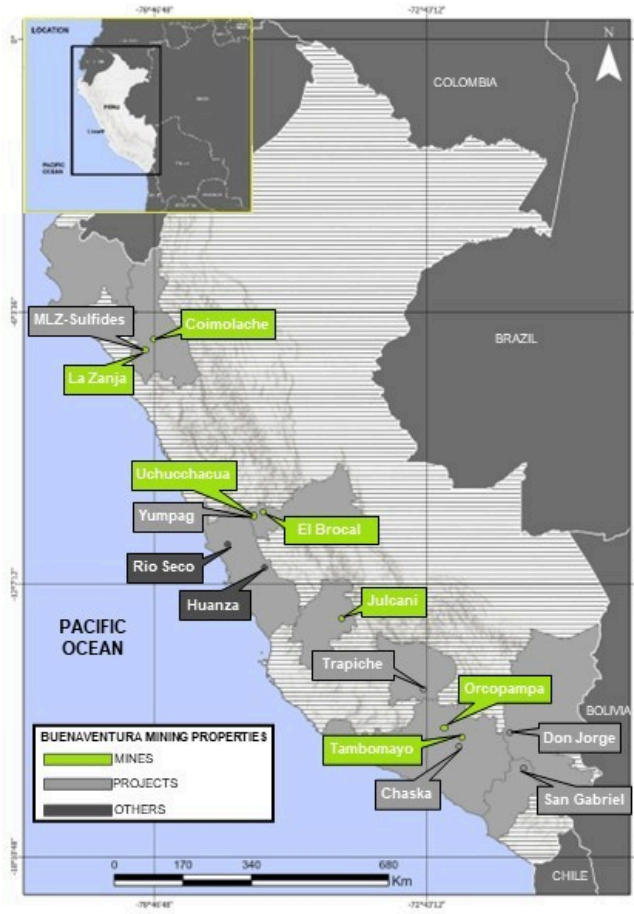

In May 2023, isolated rainfall occurred in the central and southern highlands due to the arrival of a weather system known as an Isolated High-Level Depression, commonly referred to as DANA, but it had no material impact on the regions where our operations are located.

The National Study of the El Niño Phenomenon (ENFEN) forecasted the probability of occurrence for the last semester of 2023 corresponding to the Coastal Niño zone (Niño 1+2), which typically affects Peru in conditions that have remained moderate.

**Mining Operations**

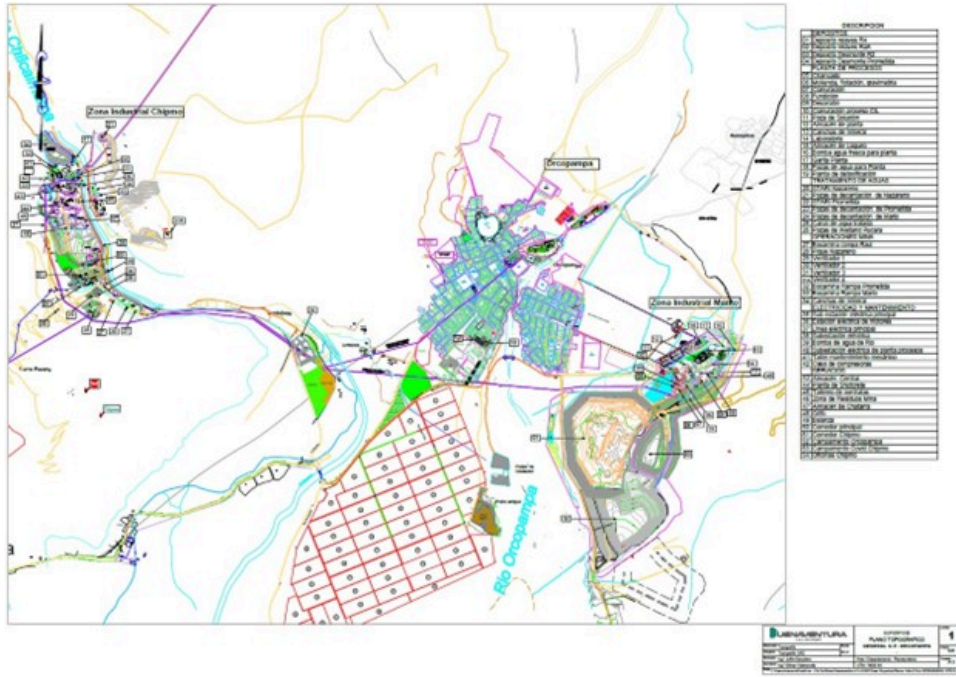

Map 1. Mines and Properties in Peru.

[Table of Contents](#)

**Orcopampa**

**Location and means of access**

The Orcopampa mine is located in the province of Castilla, department of Arequipa, approximately 1,350 kilometers southeast of the city of Lima, at an altitude between 3,800 and 4,500 meters above sea level. There are two routes of access to the property: (1) through Peru’s Panamerican Highway starting in Lima and continuing to the city of Arequipa for a total distance of 319 kilometers from Orcopampa; and (2) the route between Arequipa and Aplao-Viraco for a total distance of 333 kilometers. The Orcopampa mine is also accessible through a commercial flight directly from Lima.

**History**

The first mining operations date back to colonial times. The district was abandoned from 1842 until 1910, when the Orcopampa Mining Union was formed to continue mining. In 1960, we became interested in the area, and in 1962, exploration began in Orcopampa, with work resuming in the Tudela area and studies in Manto. The results of our initial work concluded with the signing of a lease agreement with the Orcopampa Mining Union and consequently with the construction of a 300-ton concentrator plant, which began operating in 1967 under an agreement with the Orcopampa Mining Union for royalties. We have maintained our operations at the site since that date.

[Table of Contents](#)

***Title, leases and options***

The Orcopampa mine is wholly owned and operated by Buenaventura. We lease the rights to the mining concessions of Orcopampa from a group of private investors. This lease, which expires in 2043, requires us to pay 10% of production value, subject to certain conditions. Operations began at the Orcopampa mine in 1965. In 2023, we made lease payments of US\$6.0 million. We operated Orcopampa as a silver mine until the late 1990s, when we also began to mine gold-bearing veins.

***Mineralization***

The Orcopampa mine consists of an epithermal gold telluride deposit, hosted into lava flows and domes of Sarpane complex (calc-alkaline to high potassium), of early Miocene to Holocene, which forms part of the tertiary metallogenic belt of Southern Peru (Au-Ag).

***Operations and infrastructure***

Mining at Orcopampa is conducted underground using cut-and-fill methods. Mine ore is processed by the carbon-in-leach method in a plant located in Orcopampa. Electric power is primarily obtained from the Peruvian national electricity grid. Water for operations at Orcopampa is obtained from a lake and local river.

The mining method in Orcopampa's underground mine is conventional and mechanized cut and fill (Breasting), this method is used to mine ore veins thickness from 0.9 to 5m. Mining is done by us and a service contractor. The equipment used for development and exploration includes single-arm jumbos, bolters, scaler and scoop loaders (4yd<sup>3</sup>). The equipment used for conventional production are jacklegs, micro-electrical scoops (0.52yd<sup>3</sup>) and for mechanized are single-arm jumbos and diesel scoop loaders (2.5yd<sup>3</sup>). Ore haulage to surface is done with 10 m<sup>3</sup> underground tipper trucks and 40m<sup>3</sup> loading pocket in Nazareno's and Prometida's Shaft. Ore is taken to the process plant with 15 - 20 m<sup>3</sup> tipper trucks.

***Production***

The Orcopampa mine is in the production stage and has a treatment plant capacity of 2,250 tonnes of ore per day. The table below summarizes the Orcopampa mine's concentrate production, metal contained in concentrates produced and average grades for the periods indicated. Production in 2023 was higher than in 2022 to compensate for the lower average grade of mined ore.

	<b>For the Year Ended December 31,</b>		
	<b>2021</b>	<b>2022</b>	<b>2023</b>
<b>Treatment ore (in tonnes)</b>	189,265	236,505	288,104
<b>Average ore grade</b>			
Gold grade (g/t)	8.20	10.01	9.34
Silver grade (g/t)	4.42	5.71	4.42
<b>Metal contained in concentrates production</b>			
Gold (Oz)	50,020	74,478	83,239
Silver (Oz)	14,814	32,124	30,164
<b>Cost applicable to sales per oz. of gold (US\$/Oz-Au)</b>	1,303	913	951
<b>Cost applicable to sales per oz. of silver (US\$/Oz-Ag)</b>	18.14	11.32	10.96
<b>Capital Expenditures (in millions of US\$)</b>	3.0	3.6	4.5

[Table of Contents](#)**Mineral Reserves and Mineral Resources**

The Orcopampa Mineral Reserves are estimated at a net smelter return (“NSR”) cut-off value of 144.35 US Dollars per tonne (“US\$/t”). A minimum mining width of 0.9 to 5m was used and inclusive dilution was applied based on mining method. The NSR cut-off value is determined using the mine operating costs, as well as ore treatment, general and administrative costs, off site costs and capital costs. The NSR value is determined using reserve metal prices, refining costs, and metal recoveries. Metal prices used for Mineral Reserves are based on market study and long-term consensus sources. Mineral Reserves are estimated using average long term metal prices of gold: 1,750 US\$/oz and silver: 23 US\$/t. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at life of mine (“LOM”) average head grade amounts to 96.0% for gold and 73.0% for silver. The current LOM plan continues through 2024. However, we are continuing our exploration program, and these figures are subject to change. The total book value for the Orcopampa property and its associated plant and equipment was US\$ 23.18 million as of December 31, 2023.

**Orcopampa – Year End Mineral Reserves as of December 31, 2023 (on a 100% ownership basis)(1)(3)(4)**

Ownership	Class	Tonnage <sup>(2)</sup> (t)	Grade		Contained Metal	
			Gold (g/t)	Silver (g/t)	Gold (Oz)	Silver (Oz)
100%	Proven	7,059	10.33	5.20	2,345	1,179
	Probable	215,277	9.73	4.99	67,375	34,562
	<b>Subtotal</b>	<b>222,336</b>	<b>9.75</b>	<b>5.00</b>	<b>69,721</b>	<b>35,741</b>

**Notes:**

1. S-K 1300 definitions were followed for Mineral Reserves.
2. Mineral Reserves data presented in this table represents 100% of the Mineral Reserves estimates for the property. Buenaventura owns 100% of this property.
3. Numbers may not add due to rounding.
4. The qualified person for the Mineral Reserves estimate is SRK Consulting Perú S.A.

The Orcopampa Mineral Reserves are estimated considering the modifying factors for conversion of measured and indicated resource classes into proven and probable reserves. Inferred resources are considered as waste in the life of mine (LOM) plan. The Mineral Reserve estimate has been prepared using industry accepted practice and conforms to the disclosure requirements of SK-1300. Mineral reserve estimates consider technical, economic, and environmental, and regulatory parameters containing inherent risks. Changes in grade and/or metal recovery estimation, realized metal prices, and operating and capital costs have a direct relationship to the cash flow and profitability of the mine. Mineral reserve and mineral resource estimates are evaluated annually, providing the opportunity to reassess the assumed conditions.

**Orcopampa – Net Difference in Mineral Reserves between December 31, 2023 versus December 31, 2022**

Class	Tonnage <sup>(1)(2)</sup> (t)	Contained Metal	
		Gold (Oz)	Silver (Oz)
Proven	7,059	2,345	1,179
Probable	(40,015)	(10,435)	(1,179)
<b>Subtotal</b>	<b>(32,956)</b>	<b>(8,089)</b>	<b>0</b>

**Notes:**

1. The total Mineral Reserves dated from December 31, 2022 considered an ownership basis of 100%.
2. The total Mineral Reserves dated from December 31, 2021 considered an ownership basis of 100%.

In comparison to 2022, Orcopampa’s Mineral Reserves show a decrease mainly due to depletion of reserves mined in 2023.

[Table of Contents](#)**Orcopampa– Year End Mineral Resources as of December 31, 2023 (on an 100% ownership basis) (1)(3)(4)(5)**

Ownership	Class	Tonnage <sup>(2)</sup> (t)	Grade		Contained Metal	
			Gold (g/t)	Silver (g/t)	Gold (Oz)	Silver (Oz)
	Measured	10,536	7.55	8.11	2,557	2,747
	Indicated	313,852	5.44	17.14	54,915	172,995

Indicated	(29,315)	(43,941)	(99,080)
<b>Subtotal</b>	<b>(18,779)</b>	<b>(41,384)</b>	<b>(96,333)</b>
Inferred	470,936	74,166	450,329

**Notes:**

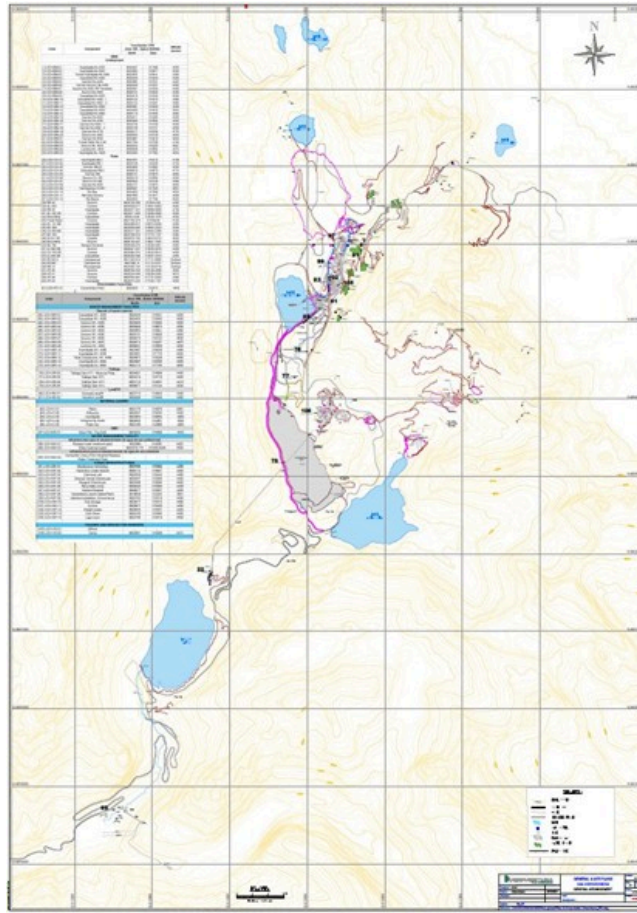

1. The total Mineral Resources dated from December 31, 2022 considered an ownership basis of 100%.
2. The total Mineral Resources dated from December 31, 2023 considered an ownership basis of 100%.

In comparison to 2022, Orcopampa's Mineral Resources show an increase, mainly due to exploration of new areas like Melissa, Maria Isabel and Ocoruro.

[Table of Contents](#)

**Uchucchacua**

*Location and means of access*

The Uchucchacua mine is wholly owned and operated by Buenaventura. Operations began in 1975 and Uchucchacua remains our largest single source silver production. The mine has been temporarily closed from October 2021 due to the operational problems that were aggravated by the COVID-19 pandemic, including delays in the preparation and exploration of the mine. The mine resumed its operations in September 2023. Uchucchacua is located in the province of Oyón, in the department of Lima, approximately 265 kilometers northeast of the city of Lima at an altitude of between 4,000 and 5,000 meters above sea level. The mine site is accessible through the Panamericana Norte highway, following the Lima - Huacho - Sayán - Churín - Oyón - Uchucchacua route for a distance of 283 kilometers.

[Table of Contents](#)**History**

Uchucchacua is a silver deposit in the central highlands discovered during the viceroyalty. Evidence of this are the many Spanish workings in the areas of Nazareno, Mercedes, Huantajalla and Casualidad. The mines passed into the hands of the Jungbluth, who continued with small scale works and even mined ore in Uchupaton and Otuto, where there are vestiges of old "mills".

At the beginning of 1960, Cia. de Minas Buenaventura started prospecting-exploration works in the area. Initial conditions were difficult as there was no road between Oyón and Chacua road until 1965, and the road was only later extended to Yanahuanca. From 1969 to 1973, Buenaventura installed a pilot plant that initially treated ores from the Socorro and Carmen mines. Satisfactory results led to the installation of an industrial plant in 1975, which currently has a treatment capacity of 4,200 metric tonnes per day. Currently, the Socorro, Carmen and Casualidad mines are operating. The Huantajalla area mine is also operating, though to a lesser extent. In September 2023 Yumpag mine initiated an industrial treatment test in Uchucchacua plant.

**Title, leases and options**

The Uchucchacua mining unit, including Yumpag, comprises 29 mining concessions and one beneficiation concession (concentrator). These 29 concessions represent the area of mines and exploration projects. Mining and exploration activities are carried out within these mining concessions. Uchucchacua's concessions have a total area of approximately 43,050 hectares.

**Mineralization**

The Uchucchacua mineral structures are hosted by Mesozoic limestone of the Jumasha Formation and are classified as a mesothermal polymetallic deposit of silver-lead-zinc with important contents of manganese. The main mineralized structures are veins and ore bodies with high-grade silver content.

**Operations and infrastructure**

Mining at Uchucchacua is conducted underground and utilizes the mechanized bench-and-fill and cut-and-fill methods. Ore is processed at a mill located at Uchucchacua. The mill has a rated capacity of 4,200 tonnes per day and utilizes differential flotation to obtain a lead-silver concentrate and a zinc concentrate, using two circuits of 3,000 tonnes per day and 1,200 tonnes per day respectively. Electric power is obtained from the Peruvian national electricity grid, a hydroelectric plant and a diesel generator. Water for operations at Uchucchacua is obtained from three local lakes.

During 2023, the manganese sulfate plant of Rio Seco did not operate due to a stoppage in the supply of concentrate from our Uchucchacua mine, which stopped operating in 2021. A pilot plant to produce battery grade manganese sulfate was built and is currently working to achieve market specifications. A Metallurgical Laboratory to support BVN operations and projects is also operating. Uchucchacua mine resumed operations in October 2023 while Rio Seco resumed operations in November 2023.

[Table of Contents](#)**Production**

The Uchucchacua mine is in the production stage and has a treatment plant capacity of 4,200 tonnes of ore per day. The table below summarizes the Uchucchacua mine's concentrate production, metal contained in concentrates produced and average grades for the periods indicated. Production in Uchucchacua resumed in September 2023.

	For the Year Ended December 31,		
	2021	2022	2023
<b>Treatment ore (in tonnes)</b>	757,945		171,471
<b>Average ore grade</b>			
Silver grade (g/t)	200.61		519.08
Zinc Grade (%)	1.61		2.19
Lead Grade (%)	0.93		1.28
<b>Metal contained in concentrates production</b>			
Silver (Oz)	3,732,391		2,595,038
Zinc (t)	6,203		2,763
Lead (t)	4,836		1,962
<b>Cost applicable to sales per oz. of silver (US\$/Oz-Ag)</b>	27.45		19.92
<b>Cost applicable to sales per tonne of zinc (US\$/t-Zn)</b>	4,338		3,046
<b>Cost applicable to sales per tonne of lead (US\$/t-Pb)</b>	2,333		1,996
<b>Capital Expenditures (in millions of US\$)</b>	16.1	31.2	52.1

**Mineral Reserves and Mineral Resources**

The Uchucchacua Mineral Reserves are estimated at an NSR cut-off value between 58.8 US\$/t to 114.7 US\$/t. A minimum mining width of 0.9 to 25m was used and inclusive dilution was applied based on mining method. The NSR cut-off value is determined using mine operating costs, as well as ore treatment, general and administrative costs, off site costs and capital costs with a contingency. The NSR value is determined using reserve metal prices, refining costs, and metal recoveries. Metal prices used for Mineral Reserves are based on market study and long-term consensus sources. Mineral Reserves are estimated using the following metal prices, based on average long term metal prices of silver: 23 US\$/oz, lead: 2,100 US\$/t, zinc: 2,600 US\$/t. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average amounts to 83.3% for silver, 55.3% for lead and 43.1% for zinc. The current LOM plan continues through 2028. The total book value for the Uchucchacua property and its associated plant and equipment was US\$ 165.3 million as of December 31, 2023.

**Uchucchacua – Year End Mineral Reserves as of December 31, 2023 (on a 100% ownership basis)(1)(3)(4)**

Ownership	Class	Tonnage <sup>(2)</sup> (t)	Grade			Contained Metal		
			Silver (g/t)	Zinc (%)	Lead (%)	Silver (Oz)	Zinc (t)	Lead (t)
100%	Proven	647,791	356.55	2.31	1.51	7,425,924	14,969	9,794
	Probable	4,674,629	457.86	2.18	1.34	68,812,998	101,935	62,491
	<b>Subtotal</b>	<b>5,322,420</b>	<b>445.53</b>	<b>2.20</b>	<b>1.36</b>	<b>76,238,922</b>	<b>116,904</b>	<b>72,285</b>

**Notes:**

1. S-K 1300 definitions were followed for Mineral Reserves.
2. Mineral Reserves data presented in this table represents 100% of the Mineral Reserves estimates for the property. Buenaventura owns 100% of this property.
3. Numbers may not add due to rounding.
4. The qualified person for the Mineral Reserves estimate is SRK Consulting Perú S.A.

[Table of Contents](#)

The Uchucchacua Mineral Reserves are estimated considering the modifying factors for conversion of measured and indicated resource classes into proven and probable reserves. Inferred resources are considered as waste in the LOM plan. The Mineral Reserve estimate has been prepared using industry accepted practice and conforms to the disclosure requirements of S-K 1300. Mineral reserve estimates consider technical, economic, and environmental, and regulatory parameters containing inherent risks. Changes in grade and/or metal recovery estimation, realized metal prices, and operating and capital costs have a direct relationship to the cash flow and profitability of the mine. Mineral reserve and mineral resource estimates are evaluated annually, providing the opportunity to reassess the assumed conditions. Additional information regarding the Mineral Reserve estimates provided can be found in Section 12 of the Uchucchacua Technical Report Summary.

**Uchucchacua – Net Difference in Mineral Reserves between December 31, 2023 versus December 31, 2022**

Class	Tonnage <sup>(1)</sup> (t)	Contained Metal		
		Silver (Oz)	Zinc (t)	Lead (t)
Proven	59,156	3,054,229	1,596	2,239
Probable	(453,137)	13,607,903	2,340	3,779
<b>Subtotal</b>	<b>(393,981)</b>	<b>16,662,132</b>	<b>3,936</b>	<b>6,018</b>

**Notes:**

1. The total Mineral Reserves dated from December 31, 2022 considered an ownership basis of 100%.
2. The total Mineral Reserves dated from December 31, 2023 considered an ownership basis of 100%.

In comparison to 2022, Uchucchacua's Mineral Reserves show a decrease mainly due to the change in modifying factors and delimitation of non-exploitable areas (bridges and pillars), however explorations allowed the incorporation of reserves of better grades.

**Uchucchacua – Year End Mineral Resources as of December 31, 2023 (on a 100% Buenaventura ownership basis) <sup>(1)(3)(4)(5)</sup>**

Ownership	Class	Tonnage <sup>(2)</sup> (t)	Grade Silver (g/t)	Zinc (%)	Lead (%)	Contained Metal		
						Silver (Oz)	Zinc (t)	Lead (t)
100%	Measured	922,759	297.46	2.31	1.22	8,824,917	21,331	11,277
	Indicated	2,683,337	295.96	2.30	1.25	25,532,667	61,692	33,472
	<b>Subtotal</b>	<b>3,606,096</b>	<b>296.34</b>	<b>2.30</b>	<b>1.24</b>	<b>34,357,584</b>	<b>83,023</b>	<b>44,749</b>
	Inferred	6,543,825	453.71	2.28	1.41	95,456,417	148,894	92,247

**Notes:**

1. S-K 1300 definitions were followed for Mineral Resources.
2. Mineral Resources data presented in this table represents 100% of the Mineral Resources estimates for the property. Buenaventura owns 100% of this property.
3. Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
4. Numbers may not add due to rounding.
5. The qualified person for the Mineral Resources estimate is SRK Consulting Perú S.A.

The Uchucchacua Mineral Resources estimates in the table above were estimated with a 3D geological model informed by various types of data (mainly drill holes, mine channels, working mapping and section interpretation) to constrain and control the shapes of minerals veins. Drilling data from cores and mine channels were combined into geological structures, Ag, Pb, Zn, Fe and Mn grades were interpolated into block models for the different zones of the mine using Ordinary Kriging and Inverse Distance methods in its different veins. The results were validated visually, through various statistical comparisons. Additional information regarding the Mineral Resources estimates provided can be found in Section 11 of the Uchucchacua Technical Report Summary.

[Table of Contents](#)**Uchucchacua – Net Difference in Mineral Resources between December 31, 2023 versus December 31, 2022**

Class	Tonnage <sup>(1)</sup> (t)	Contained Metal		
		Silver (Oz)	Zinc (t)	Lead (t)
Measured	222,232	2,821,783	9,912	4,272
Indicated	741,615	7,672,083	29,265	14,443
<b>Subtotal</b>	<b>963,847</b>	<b>10,493,867</b>	<b>39,178</b>	<b>18,715</b>
Inferred	(673,621)	8,905,541	(7,725)	(13,849)

**Notes:**

1. The total Mineral Resources dated from December 31, 2022 considered an ownership basis of 100%.
2. The total Mineral Resources dated from December 31, 2023 considered an ownership basis of 100%.

In comparison to 2022, Uchucchacua's Mineral Resources show an increase, mainly due an increase in the NSR cutoff and new interpretation of the geometry of the veins.

**Julcani****Location and means of access**

Julcani is an underground mine that is wholly owned and operated by us and was acquired in 1953 as our first operating mine. Julcani is located in the province of Angaraes, in the department of Huancavelica, approximately 500 kilometers southeast of Lima at an altitude between 4,200 and 5,000 meters above sea level. There are two routes to access the mine site, both departing from Lima: (1) a road starting in Lima and continuing to La Oroya followed by Huancayo and Huancavelica for a total distance of 444 kilometers; and (2) another road starting in Lima and continuing to Pisco and then through Huancavelica which is 45 kilometers from the property for a total distance of approximately 499 kilometers.

**History**

The mining district of Julcani has been explored since colonial times. Between 1936 and 1945 the Swiss-Peruvian Julcani Mining Company mined the veins on an industrial scale. The mine was then worked by the Cerro de Pasco Corporation until 1951. In 1953, the Buenaventura Mining Company was founded and has worked the Julcani mines until today, more than 68 years later.

**Title, leases and options**

The Julcani mining unit, comprises six mining concessions and one beneficiation concession (concentrator). These six concessions represent the area of mines and exploration projects. Mining and exploration activities are carried out within these mining concessions. Julcani's concessions have a total area of approximately 11,566 hectares.

**Mineralization**

Julcani is a large polymetallic deposit in Central Peru, which principally produces silver that presents mainly as sulpho-salts in many mineralogically complex veins. They are hosted in dacite domes, tuffs, breccias and other tertiary volcanic rocks.

**Operations and infrastructure**

Ore is processed by bulk flotation to obtain a concentrate of silver-lead-copper-gold. The plant has a rated capacity of 600 tonnes per day. Water for operations in Julcani is obtained from mine drainage (that must be previously treated with lime), from seasonal streams and a small lagoon.

[Table of Contents](#)

The mining method used in this operation is cut and fill, for which the primary equipment employed are pneumatic shovels, and locomotives. The mine is currently deepening the mine at level 710 operating with synergistic equipment such as electric shovels, jumbo jets and battery powered locomotives.

Electric power for the site is generated by two hydroelectric plants, Huapa and El Ingenio. Power is also provided by the Peruvian national electricity grid which Julcani is connected to.

### **Production**

The Julcani mine is in the production stage and has a treatment plant capacity of 600 tonnes of ore per day. The table below summarizes the Julcani's mine's concentrate production, metal contained in concentrates produced and average grades for the periods indicated. Production in 2023 was consistent in terms of tonnage and grade compared to 2022, with "Acchilla" being the main mining area.

	<b>For the Year Ended December 31,</b>		
	<b>2021</b>	<b>2022</b>	<b>2023</b>
<b>Treatment ore (in tonnes)</b>	127,925	132,298	113,035
<b>Average ore grade</b>			
Gold grade (g/t)	0.10	0.12	0.23
Silver grade (g/t)	625.82	632.73	478.15
Lead grade (%)	0.42	0.44	0.55
<b>Metal contained in concentrates production</b>			
Gold (Oz)	358	—	237
Silver (Oz)	2,572,036	2,640,689	1,670,679
Lead (t)	478	530	545
<b>Cost applicable to sales per oz. of silver (US\$/Oz-Ag)</b>	16.79	14.88	23.83
<b>Cost applicable to sales per tonne of lead (US\$/t-Pb)</b>	1,579	1,480	2,040
<b>Capital Expenditures (in millions of US\$)</b>	2.4	1.6	0.9

### **Mineral Reserves and Mineral Resources**

The method used to estimate resources and reserves in the Julcani property requires the person preparing the estimation to manually determine the blocks and samples to be used, as well as the scope of the grades to be considered for such purposes. This manual determination is made subjectively by the applicable geologist upon visiting the property and is not based on objective parameters such as an interpretation of the vein. Additionally, the information used by Company's management for internal purposes is prepared on the basis of 'relative coordinates' that would need to be converted to The World Geodetic System 1984 standards for purposes of producing information compliant with the requirements of Regulation S-K 1300.

These manual processes prevent the possibility of repetition across different blocks within the property, which in turn would lead to the production of information that would not meet the standard of "transparency" required pursuant to Regulation S-K 1300. Further, given that the scope of the samples is not based on objective natural parameters, the Company's calculations would likely also fail to satisfy the principle of "materiality" underlying Regulation S-K 1300.

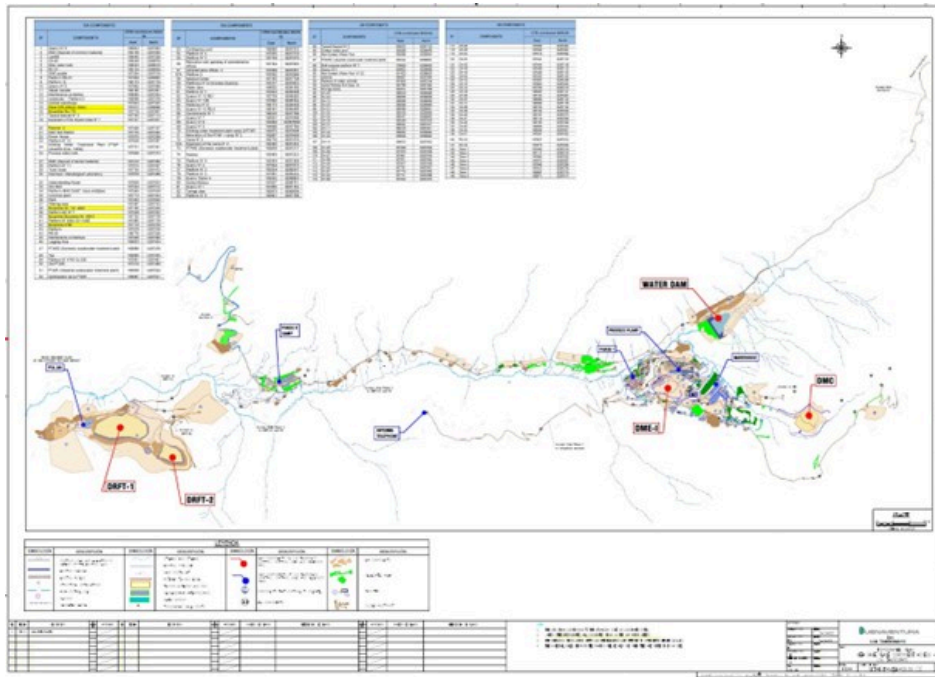

In light of the material amount of resources that would be required for the Company to produce reserves and resources information that is compliant with Regulation S-K 1300 for a property that Company management deems to be nearly depleted and immaterial when compared to the Company's aggregate reserves and resources disclosed elsewhere in this annual report, the Company has decided that the cost to produce such information would outweigh its benefits and therefore discontinued its reporting of reserves and resources in respect of the Julcani property going forward.

The total book value for the Julcani property and its associated plant and equipment was US\$ 18.8 million as of December 31, 2023.

[Table of Contents](#)

**Tambomayo**

**Location and means of access**

The Tambomayo mine is located in the province of Caylloma, Arequipa region, at an altitude between 4,550 and 5,000 meters above sea level. There is one route of access to the property through Peru's Panamericana Highway starting in Lima and going to the city of Arequipa for a total distance of 764 kilometers. Between Arequipa and Tambomayo, there is a 300 kilometer road along Cañahuas-Sibayo-Caylloma-Talta Huarahuarco. The site is also accessible through a commercial flight from Lima to Arequipa and by highway from Tambomayo.

**History**

Between 1990 and 2004 the Hochschild mining company developed several exploration campaigns in the Surihuire mountain without any success. For the years 2006 to 2007, CEDIMIN SAC (Shila-Paula) carried out the procedures to delineate the high zones of the eastern part of the Molloco River, and when they obtained the concessions, they named it Tuyumina.

In 2008, exploration work began, evidencing a prominent outcrop that showed a silica-quartz outcrop, which had continuity in length, known today as the Mirtha Vein. After an aggressive exploration campaign in which geological mapping and sampling were developed, we obtained robust geological information by 2009, which included geochemical analysis of the Mirtha vein sector, which led us to begin a drilling campaign at the site in late 2009. Between January and May 2010, the results of the first drill holes were obtained, validating the continuity of the structure at depth.

Finally, in 2012, Compañía de Minas Buenaventura acquired directly 100% of the Tuyumina concessions, changing its name to Tambomayo.

[Table of Contents](#)
**Title, leases and options**

The Tambomayo mining unit comprises seven mining concessions and one beneficiation concession (concentrator). These seven concessions represent the area of mines and exploration projects. Mining and exploration activities are carried out within these mining concessions. Tambomayo's concessions have a total area of approximately 29,566 hectares.

**Mineralization**

Tambomayo is an underground mine that is wholly owned and operated by us. It is considered an epithermal deposit with quartz veins and mineralization mainly of gold and silver with important contents of lead and zinc.

**Operations and infrastructure**

The underground works on the main Mirtha and Paola veins and diamond drilling carried out to date show an economic mineralization that deepens up to approximately 900 meters, and it expands horizontally over 900 meters (1,500 horizontal meters as a quartz system), increasing the size of the economic mineralization area to explore. Mining at Tambomayo is conducted underground and utilizes the sub-level stoping, mechanized bench-and-fill and cut-and-fill methods.

The mining method in Tambomayo's underground mine is sub-level stoping and mechanized bench-and-fill and cut-and-fill. These methods are used to mine massive ore body (30 meters between sublevels and a 10 meter stope span). We conduct the ore mining while horizontal labor is executed by a service contractor. The equipment used for development and exploration includes single-arm jumbos, bolters, scalers and scoop loaders (4 - 6yd<sup>3</sup>). The pieces of equipment used in stopes are Simbas (Cable Bolting and Production) and scoops with remote control (6 yd<sup>3</sup>). Ore haulage to surface is done with 15-20 m<sup>3</sup> tipper trucks. Ore is taken to the process plant with 15-20 m<sup>3</sup> tipper trucks.

Tambomayo is connected to the Peruvian electricity grid and water for its operations comes from the damming of a stream with seasonal variations in flow.

**Production**

The Tambomayo mine is in the production stage and has a treatment plant capacity of 1,500 tonnes of ore per day. The table below summarizes the Tambomayo mine's concentrate production, metal contained in concentrates produced, and average grades for the periods indicated. Production in 2023 was significantly lower than in 2022 in volume terms because of depletion of mine reserves. The gold grade in 2023 was lower than in 2022 due to the depletion of high grade reserves.

	<b>For the Year Ended December 31,</b>		
	<b>2021</b>	<b>2022</b>	<b>2023</b>
<b>Treatment ore (in tonnes)</b>	566,881	634,368	584,246
<b>Average ore grade</b>			
Gold grade (g/t)	4.35	3.06	2.66
Silver grade (g/t)	112.86	97.12	97.68
Lead grade (%)	1.92	1.79	0.79
Zinc grade (%)	2.85	2.40	1.11
<b>Metal contained in concentrates production</b>			
Gold (Oz)	69,554	54,320	41,675
Silver (Oz)	1,815,288	1,863,411	1,590,784
Lead (t)	9,307	10,290	3,877
Zinc (t)	13,135	13,511	5,092
<b>Cost applicable to sales per oz. of gold (US\$/Oz-Au)</b>	950	1,008	1,364
<b>Cost applicable to sales per oz. of silver (US\$/Oz-Ag)</b>	13.61	12.11	17.01
<b>Cost applicable to sales per tonne of lead (US\$/t-Pb)</b>	1,218	1,190	1,445
<b>Cost applicable to sales per tonne of zinc (US\$/t-Zn)</b>	2,243	2,924	1,955
<b>Capital Expenditures (in millions of US\$)</b>	3.9	3.2	0.3

[Table of Contents](#)

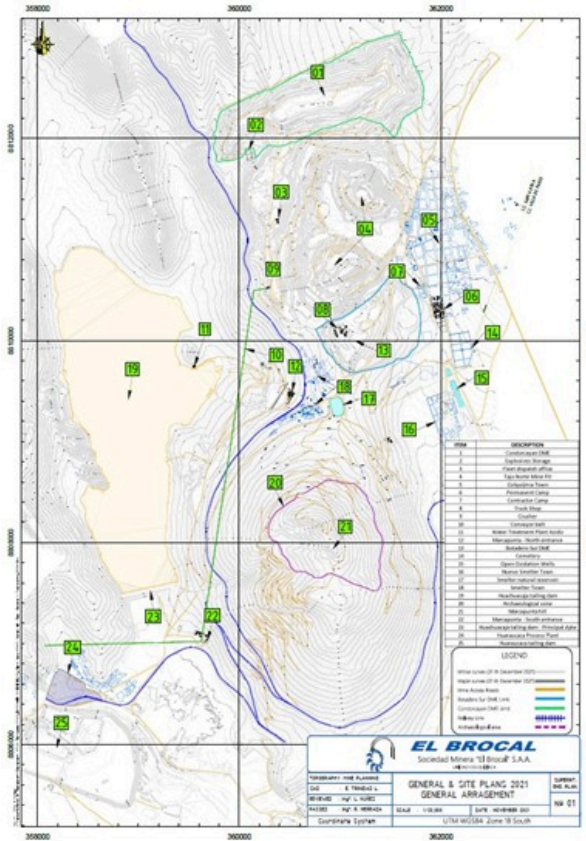

**Mineral Reserves and Mineral Resources**

Despite all the exploration efforts in recent years at Tambomayo, we have not successfully replenished reserves and resources at the same rate as we have been producing. Company management considers the Tambomayo nearly depleted but deems the depletion immaterial when compared to the Company's aggregate reserves and resources disclosed elsewhere in this annual report. Tambomayo has approximately 1 more year of LOM and therefore the Company will discontinue reporting of reserves and resources in respect of the Tambomayo property going forward.

The total book value for the Tambomayo property and its associated plant and equipment was US\$ 112.1 million as of December 31, 2023.

**El Brocal**

**Location and means of access**

[Table of Contents](#)

The Tajo Norte and Marcapunta mines are adjacent and are located 285 kilometers east of the city of Lima and 16 kilometers south of the city of Cerro de Pasco. There are three routes of access to the property: (1) Through Peru's Central Highway starting in Lima and continuing to the city of Colquijirca for a total distance of 240 kilometers, (2) through the Canta - Huaral highway for a total distance of 250 kilometers and (3) a commercial flight from Lima to Jauja followed by travel on the highway from Jauja to Colquijirca for a total distance of 142 kilometers.

**History**

The Tajo Norte (also known as Colquijirca) and Marcapunta Norte mines are wholly owned by El Brocal. El Brocal was founded in 1956 and is engaged in the extraction, concentration and sale of concentrates of polymetallic minerals—mainly zinc, copper, lead and silver. Our aggregate direct and indirect equity interest in El Brocal was 61.43% as of December 31, 2023.

**Title, leases and options**

The El Brocal mining unit comprises one mining concession, one mining transport concession and one beneficiation concession (concentrator). These concessions represent the area of mines and exploration projects. Mining and exploration activities are carried out within these mining concessions. El Brocal's concession has an extension of approximately 32,819 hectares.

**Mineralization**

El Brocal produces copper, zinc, lead and silver concentrates from the Tajo Norte mine and copper concentrates from the Marcapunta mine. The Colquijirca mine consists of three important polymetallic deposits: (1) Tajo Norte-Sur, which contains zinc, silver, lead, copper and gold; (2) Marcapunta, which contains an auriferous mineralization in breccia oxides and an arsenic copper enargite mineralization as a continuation of the mineralized mantles of the Marcapunta mine; and (3) San Gregorio, which contains zinc.

**Operations and infrastructure**

The Tajo Norte (Colquijirca) and Marcapunta mines primarily rely on a power line connected to the Peruvian national electricity grid, and the ore from the mines is primarily treated in two plants. In 2023, for the period in which the plants were able to operate without the interference of COVID-19 restrictions, the two plants treated an average of 13,409 tonnes of ore per day.

As in 2022, in 2023, El Brocal continued to focus on optimizing Marcapunta's mining method, while also seeking the optimization of productivity and production costs, as well as accelerating the conversion of resources to reserves.

The mining method in the Marcapunta mine (Underground) is sub-level stopping with rib pillars and backfill. This method is used to mine the Copper mantle that has an ore thickness up to 60 meters. Mining is done through a contractor using their own equipment. The equipment used for development are 2 boom jumbos with 6 yd3 underground loaders. The equipment used for production includes S7 top hammer Simbas and two Wassara ITH (down-the-hole hammer) drills with 6 yd3 underground loaders with remote control. Ore haulage to surface is done with 12 m3 and 15 m3 tipper trucks. Ore is taken to the process plant with 20 m3 tipper trucks and with the overland conveyor belt. Beginning in Q4 2024 through 2025, we plan to use our own long hole autonomous Simbas and 9-11 yd3 underground loaders. Additionally, we optimized bench height in new zones from 20 meters to 30 meters.

Meanwhile, the mining method in Tajo Norte is an open pit. It is a conventional truck and shovel operation, through a contractor. The height of a workbench is 6 meters and the equipment used includes DM45 and DML drilling rigs. Loading is by hydraulic excavators EC950E (5.6 m3) and 374D (4.6 m3) and hauling is by G500 B8X4 trucks (24.5 m3). In late 2023 production for the open pit stopped due to unavailability of environmental and operational permits for the tailings deposit and open pit footprint. In 2024, the open pit mine will continue stopped until the tailing dam expansion is completed. The tailings deposit expansion requires land acquisition from the Colquijirca community, this negotiation is ongoing. In 2024, we plan to increase the underground mine production to 11,000 tonnes per day and in 2025 this production should increase to 12,000 tonnes per day. To maximize mine production a fleet management system is working in the underground mine.

[Table of Contents](#)**Production**

The El Brocal mine is in the production stage and has a treatment plant capacity of 20,000 tonnes of ore per day. The table below summarizes the El Brocal Zinc-Lead-Silver zone of Tajo Norte (Colquijirca) mine's concentrate production, metal contained in concentrates produced and average grades for the periods indicated. Production in 2023 was significantly lower than 2022 due to the lower volume of ore treated. The decrease was due to stability problems in the west wall of the pit and depletion of the Zinc-Lead-Silver ore and the mine work stoppage in the open pit due to delay in permits. This decrease was offset by copper production from the open pit and underground mine.

	For the Year Ended December 31,		
	2021	2022	2023
<b>Treatment ore (in tonnes)</b>	2,450,214	1,653,457	959,442
<b>Average ore grade</b>			
Silver grade (g/t)	73.10	52.54	54.16
Lead grade (%)	0.88	1.01	1.53
Zinc grade (%)	2.51	2.54	3.61
<b>Metal contained in concentrates production</b>			
Silver (Oz)	4,069,870	1,843,264	858,469
Lead (t)	10,096	6,791	5,026
Zinc (t)	35,975	23,359	17,153
<b>Cost applicable to sales per oz. of silver (US\$/Oz-Ag)</b>	15.35	17.23	16.44
<b>Cost applicable to sales per tonne of lead (US\$/t-Pb)</b>	1,352	1,583	1,338
<b>Cost applicable to sales per tonne of zinc (US\$/t-Zn)</b>	1,937	2,734	1,918
<b>Capital Expenditures (in millions of US\$)</b>	37.6	61.9	61.8

The table below summarizes the El Brocal Copper-Silver zone of Tajo Norte (Colquijirca) mine's concentrate production, metal contained in concentrates produced and average grades for the periods indicated. Production in 2023 was higher than 2022 due to the depletion of Pb/Zn ore and the transition to copper ore.

	For the Year Ended December 31,		
	2021	2022	2023
<b>Treatment ore (in tonnes)</b>	313,515	172,005	478,455
<b>Average ore grade</b>			
Gold grade (g/t)	0.13	0.13	—
Silver grade (g/t)	140.15	66.57	69.72
Copper grade (%)	0.98	1.10	2.49
<b>Metal contained in concentrates production</b>			
Gold (Oz)	319	189	—
Silver (Oz)	797,884	199,632	600,569
Copper (t)	1,957	1,187	8,235
<b>Cost applicable to sales per oz. of gold (US\$/Oz)</b>	1,254	1,477	1,463
<b>Cost applicable to sales per oz. of silver (US\$/Oz)</b>	15.35	17.23	16.44
<b>Cost applicable to sales per tonne of copper (US\$/t)</b>	6,593	6,614	5,962
<b>Capital Expenditures (in millions of US\$)</b>	37.6	61.9	61.8

[Table of Contents](#)

The table below summarizes the El Brocal Marcapunta underground mine's concentrate production, metal contained in concentrates produced and average grades for the periods indicated. Production in 2023 was higher than 2022 due to a greater amount of ore treated. Additional production resulted from optimized fleet management in the underground mine and more use of the wassara-ith drill.

	For the Year Ended December 31,		
	2021	2022	2023
<b>Treatment ore (in tonnes)</b>	2,517,474	3,030,696	3,456,535
<b>Average ore grade</b>			
Gold grade (g/t)	0.78	0.67	0.70
Silver grade (g/t)	29.89	27.70	28.11
Copper grade (%)	1.70	1.78	1.67
<b>Metal contained in concentrates production</b>			
Gold (Oz)	17,549	23,170	20,442
Silver (Oz)	1,291,226	1,513,932	1,733,686

#### Mineral Reserves and Mineral Resources

The Brocal Zinc-Lead-Copper-Silver zone of Tajo Norte (Colquijirca) Mineral Reserves are estimated at an internal NSR cut-off value of 29.22 US\$/t. The NSR cut-off value is determined using mine operating costs, as well as ore treatment, general and administrative costs, off site costs and capital costs with a contingency. The NSR value is determined using reserve metal prices, refining costs, and metal recoveries. Metal prices used for Mineral Reserves are based on market study and long-term consensus sources. Mineral Reserves are estimated using metal prices, based on average long term metal prices of silver: 23 US\$/oz, lead: 2,100 US\$/t, Zinc: 2,600 US\$/t, Copper: 8,800 US\$/t. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries over the LOM average head grade for lead-zinc open pit is 43.4% for lead, 56.7% for zinc and 59.2% for silver. The current LOM plan continues through 2034. The total book value for the El Brocal property and its associated plant and equipment was US\$ 435.7 million as of December 31, 2023.

#### El Brocal Zinc-Lead-Silver zone of Tajo Norte (Colquijirca) – Year End Mineral Reserves as of December 31, 2023 (on 61.43% Buenaventura attributable ownership basis) <sup>(1)(3)(4)</sup>

Ownership	Class	Tonnage <sup>(2)</sup> (t)	Grade			Contained Metal		
			Silver (g/t)	Lead (%)	Zinc (%)	Silver (Oz)	Lead (t)	Zinc (t)

**Notes:**

1. S-K 1300 definitions were followed for Mineral Reserves.
2. Mineral Reserves data presented in this table represents 100% of the Mineral Reserves estimates for the property. Buenaventura owns 61.43% of this property
3. Numbers may not add due to rounding.
4. The qualified person for the Mineral Reserves estimate is SLR Consulting (Canada) Ltd.

The El Brocal Zinc-Lead-Silver zone of Tajo Norte (Colquijirca) Mineral Reserves are estimated considering the modifying factors for conversion of measured and indicated resource classes into proven and probable reserves. Inferred resources are considered as waste in the life of mine (LOM) plan. The Mineral Reserve estimate has been prepared using industry accepted practice and conforms to the disclosure requirements of S-K 1300. Mineral Reserve estimates consider technical, economic, and environmental, and regulatory parameters containing inherent risks. Changes in grade and/or metal recovery estimation, realized metal prices, and operating and capital costs have a direct relationship to the cash flow and profitability of the mine. Mineral Reserve and Mineral Resource estimates are evaluated annually, providing the opportunity to reassess the assumed conditions.

The El Brocal Zinc-Lead-Silver zone of Tajo Norte (Colquijirca) Mineral Resources estimates in the table above were estimated with a 3D geological model (lithological, structural and mineralization bodies) that was elaborated with several types of data (mainly drill holes, working mapping and section interpretation) to constrain and control ore shapes and domains. Drilling data from cores were combined into geological structures, copper, zinc, lead, silver, gold, and iron grades were interpolated into block models for the different mine zones using the Ordinary Kriging method in each domain. The results were visually validated through various statistical comparisons.

**Notes:**

1. S-K 1300 definitions were followed for Mineral Resources.
2. Mineral Resources data presented in this table represents 100% of the Mineral Resources estimates for the property. Buenaventura owns 61.43% of this property.
3. Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
4. Mineral Resources are reported based on the December 31, 2023 topography surface
5. The open pit Mineral Resources are contained within a pit shell generated using an internal net smelter return (NSR) cut-off value of \$29.22/t for Pb-Zn mineralization and \$28.35/t for Cu mineralization.
6. The Mineral Resource estimate are based on metal price assumptions of \$1,925/oz gold, \$25.3/oz silver, \$9,680/t copper, \$2,860/t zinc.
7. The metallurgical recoveries vary with grade.
8. Numbers may not add due to rounding.
9. The qualified person for the Mineral Resources estimate is SLR Consulting (Canada) Ltd.
10. Point of reference is in-situ tonnes.

The El Brocal Copper-Silver zone of Tajo Norte (Colquijirca) Mineral Resources estimates in the table above were estimated with a 3D geological model (lithological, structural and mineralization bodies) that was elaborated with several types of data (mainly drill holes, working mapping and section interpretation) to constraint and control ore shapes and domains. Drilling data from cores were combined into geological structures, copper, zinc, lead, silver, gold, and iron grades were interpolated into block models for the different mine zones using the Ordinary Kriging method in each domain. The results were visually validated through various statistical comparisons.

**El Brocal Copper-Silver zone of Tajo Norte (Colquijirca) – Net Difference in Mineral Resources between December 31, 2023 versus December 31, 2022**

Inferred	(1,504,395)	(11,913)	(886,649)	(13,668)

**Notes:**

1. Mineral Resources data presented in this table are calculated on 100% basis. Buenaventura owns 61.43%.

In comparison to 2022, El Brocal Copper-Silver zone of Tajo Norte (Colquijirca)'s Mineral Resources show an increase, mainly due to depletion of 2022 production and pit shell update with new recorded parameters. This was partially offset by NSR cutoff decrease and metal prices update.

The Brocal Marcapunta Mineral Reserves are estimated at an NSR cut-off value between 35.21 US\$/t to 39.10 US\$/t. A minimum mining width of 6 to 16m was used and inclusive dilution was applied based on mining method. The NSR cut-off value is determined using mine operating costs, as well as ore treatment, general and administrative costs, off site costs and sustaining capital costs with a contingency. The NSR value is determined using reserve metal prices, refining costs, and metal recoveries. Metal prices used for Mineral Reserves are based on market study and long-term consensus sources. Mineral Reserves are estimated using metal prices, based on average long term metal prices of copper: 8,800 US\$/t, gold: 1,750 US\$/oz and silver: 23.00 US\$/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries over the LOM average amounts to 83.7% for copper, 50.9% for silver and 23.0% for gold. The current LOM plan continues through 2030. The total book value for the El Brocal property and its associated plant and equipment was US\$ 435.7 million as of December 31, 2023.

The El Brocal Marcapunta Mineral Reserves are estimated considering the modifying factors for conversion of measured and indicated resource classes into proven and probable reserves. Inferred resources are considered as waste in the life of mine (LOM) plan. The Mineral Reserve estimate has been prepared using industry accepted practice and conforms to the disclosure requirements of S-K 1300. Mineral Reserve estimates consider technical, economic, and environmental, and regulatory parameters containing inherent risks. Changes in grade and/or metal recovery estimation, realized metal prices, and operating and capital costs have a direct relationship to the cash flow and profitability of the mine. Mineral Reserve and Mineral Resource estimates are evaluated annually, providing the opportunity to reassess the assumed conditions.

<b>Subtotal</b>	<b>16,360,297</b>	<b>122,362</b>	<b>5,465,716</b>	<b>92,179</b>
Inferred	(2,539,680)	(69,815)	(794,266)	(118,184)

**Notes:**

1. Mineral Resources data presented in this table are calculated on 100% basis. Buenaventura owns 61.43%.

In comparison to 2022, El Brocal Marcapunta's Mineral Resources show an increase, mainly due to the reported total tonnage and grades inside the enveloped stopes with a lower NSR cutoff.

**La Zanja****Location and means of access**

The La Zanja mine is located in the district of Pulan, province of Santa Cruz, department of Cajamarca, 48 kilometers northwest of the Yanacocha gold mine, at an average altitude of 3,500 meters above sea level. Access to the operation site is available through the Panamericana Norte highway from Lima to Cajamarca followed by a departmental road network that leads to Pulán where the mining concession is located. We operate the La Zanja mine.

**History**

In 1990, La Zanja was part of the northern Peru project established between Buenaventura and Newmont, covering 83,900 hectares in the Yanacocha volcanic belt by Buenaventura Ingenieros S.A. In addition to La Zanja, other copper and gold prospects were discovered in the La Huaca, Peña Verde and Galeno zones. In 1997, a total of 3,800m of diamond drilling was completed at La Zanja.

[Table of Contents](#)

After many years, in August 2010, the Peruvian government granted permits to Buenaventura to commence metallurgical operations at La Zanja. In September 2010, Buenaventura and Newmont began production at La Zanja. The mine was expected to produce 100,000 oz Au per year over a seven-year mine life.

***Title, leases and options***

The operation area has mining concessions assigned to La Zanja, and the surrounding area also shows the presence of other concession holders such as Buenaventura, Newmont and several other companies. The La Zanja mining unit comprises 43 mining concessions and one beneficiation concession (concentrator). These 43 concessions represent the area of mines and exploration projects. Mining and exploration activities are carried out within these mining concessions. La Zanja's concessions have an extension of approximately 27,414 hectares.

***Mineralization***

La Zanja is located within a large area of hydrothermal alteration, mainly related to epithermal gold deposits in high sulphidation environments, in addition to some bonanza Au vein epithermal systems, Cu-Au transitional epithermal-porphyry, and breccias pipe Cu-Au-Mo. We have two-ore deposits in production in oxide material: San Pedro Sur and Pampa Verde.

***Operations and infrastructure***

During 2023, there was no mining activity in the San Pedro Sur and Pampa Verde open pits. However, the operation focused on generating 23 hectares of leaching area of the leaching PAD to recover the remaining gold and silver ounces.

In 2023, a total of 21 diamond drillings were conducted with a total of 11,082 meters within the Cu-Au exploration project Emperatriz, and the extensions of the corridors Alba, Cedrillo, Central Emperatriz and Amanda.

***Production***

La Zanja is a depleted mine but it is currently in the exploration stage. The table below summarizes the La Zanja mine's doré bars production, metal contained in doré bars produced, and average grades for the periods indicated. Production in 2023 was significantly lower than in 2022 because there was no mining activity in the San Pedro Sur and Pampa Verde open pits.

	<b>For the Year Ended December 31,</b>		
	<b>2021</b>	<b>2022</b>	<b>2023</b>
<b>Treatment ore (in tonnes)</b>	2,627,252	4,336,273	—

[Table of Contents](#)

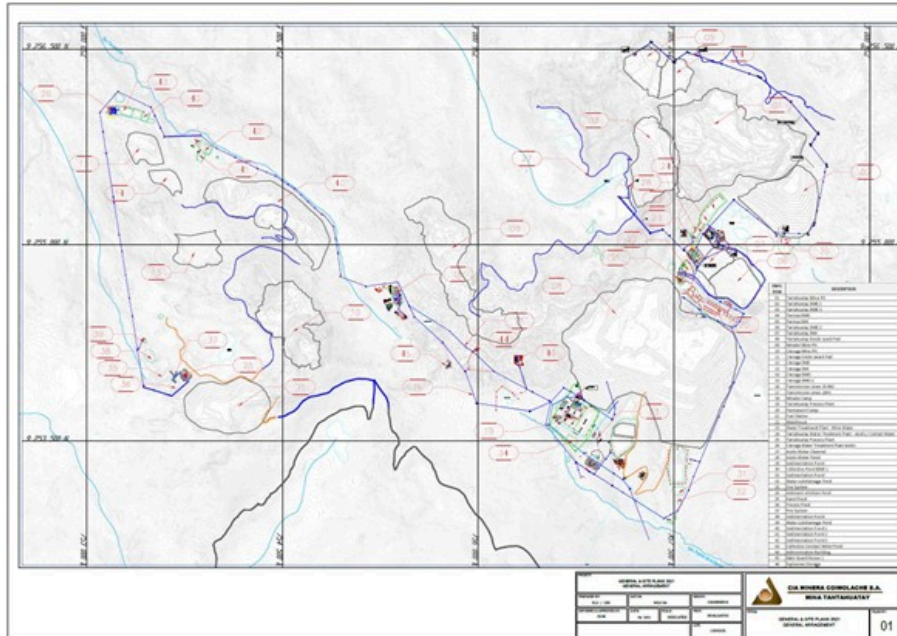

**Mineral Reserves and Mineral Resources**

In light of the material amount of resources that would be required for the Company to produce reserves and resources information that is compliant with Regulation S-K 1300 for a property that Company management deems to be nearly depleted and immaterial when compared to the Company's aggregate reserves and resources disclosed elsewhere in this annual report, the Company has decided that the cost to produce such information would outweigh its benefits and therefore discontinued its reporting of reserves and resources in respect of the La Zanja property going forward.

The total book value for the La Zanja property and its associated plant and equipment was US\$ 6.7 million as of December 31, 2023.

**Coimolache**

**Location and means of access**

Coimolache is a gold and silver mine located in the district and province of Hualgayoc, in the department of Cajamarca, in northern Peru, at an average altitude of 3,900 meters above sea level. Access to the operation site is available through the Panamericana Norte highway from Lima to Cajamarca followed by a departmental road network that leads to Chugur, where the mining concession is located. Coimolache is operated by Buenaventura, and wholly owned by Coimolache, in which we hold a 40.094% equity interest.

**History**

In the Coimolache Project, initial explorations took place from 1991 to 1998 by Southern Peru and in 1992 Compañía Minera Coimolache S.A. (CMC) was established, with 40.094% shares held by Cia. de Minas Buenaventura S.A.A. (BVN), 44.244% by Southern Copper Corporation (SPCC) and 15.662% by ESPRO S.A.C.

[Table of Contents](#)

Coimolache's history is linked from its origins to the Hualgayoc Mining District, a historic mining center in northern Peru. The first work in the area was recorded from 1969 to 1971 by the British Geological Survey (BGS) who carried out sediment sampling in the region and the district and identified seven anomalies in the Tantauhuatay and Sinchao creeks. From 1970 to 1991 Cia. Minera Colquirrumi S.A., developed exploration and exploitation works in the Hualgayoc district.

The first works during SPCC's administration involved geological mapping, rock and soil geochemistry in trenches and test pits. From 1994 to 1998 they carried out 27,411 meters of diamond drilling between the sectors of Tantauhuatay, Mirador, Ciénaga and Peña de las Águilas as Calera Orbamas S.A. (the company's name was CMC at that time).

BVN took over the administration in 1999 and carried out underground exploration for oxides with two tunnels in the deposits of Tantauhuatay 2 and Cienaga Norte, respectively. BVN also carried out diamond infill drilling in the deposits of Tantauhuatay 2 (BISA) and Ciénaga Norte, Mirador Norte (CEDIMIN) during 2002 and from 2006 to 2007 for a total of 6,063 meters.

CMC began the pre-feasibility stage in 2007, the EIA was completed with a public hearing in Hualgayoc in 2008, and construction began in 2009. The oxide operation started in June 2011.

***Title, leases and options***

The area of the concessions in which CMC performs exploitation and beneficiation activities totalizes 16,713.52 hectares and the titleholder is Compañía Minera Coimolache S.A.

There are 27 mining concessions and one beneficiation concession (beneficiation plant). These 27 concessions cover the area of the mines and the exploration projects. The mining operation and the explorations are conducted within the mining concessions. All the mining reserves and resources presented in this report are located within these concessions controlled by Compañía Minera Coimolache.

***Mineralization***

Geologically, the Coimolache ore deposits are located in a sequence volcano-magmatic hydrothermal, predominantly linked to the regional mineralized sector northern of Peru.

Coimolache consists of several areas of epithermal Au-Ag mineralization, contained in oxide material. Below the oxides level of the Cerro Tantauhuatay area, there is a significant copper, gold and silver mineralization associated to pyrite-enargite-chalcopyrite (sulphides), which are present as disseminations and fracture fillings associated with an epithermal-porphyry transitional zone, breccias bodies multiphases, and porphyry intrusives.

***Operations and infrastructure***

During 2023, the operation was focused on the Mirador, Tantauhuatay 2 and Ciénaga Norte areas. Reinterpretation geological exploration was also performed at projects with resources and reserves. The operation is carried out with outsourced equipment, which includes loading equipment of 5.6 m<sup>3</sup> and hauling equipment of 15 - 22 m<sup>3</sup>. The average material moved is 36 ktonnes per day.

[Table of Contents](#)**Production**

The Coimolache mine is in the production stage and has a treatment plan capacity of 30,000 tonnes of ore per day. The table below summarizes the Coimolache mine's doré bars production, metal contained in doré bars produced and average grades for the periods indicated. Production in 2023 increased slightly compared to 2022, mainly due to higher stripping ratio.

	For the Year Ended December 31,		
	2021	2022	2023
<b>Treatment ore (in tonnes)</b>	10,505,027	7,712,047	6,939,705
<b>Average ore grade</b>			
Gold grade (g/t)	0.45	0.44	0.48
Silver grade (oz/t)	8.40	3.11	10.28
<b>Metal contained in concentrates production</b>			
Gold (Oz)	110,575	82,408	67,140
Silver (Oz)	647,468	296,968	264,835
<b>Cost applicable to sales per oz. of gold (US\$/Oz-Au)</b>	936	1,393	1,376
<b>Cost applicable to sales per oz. of silver (US\$/Oz-Ag)</b>	13.49	16.77	16.57
<b>Capital Expenditures (in millions of US\$)</b>	20.7	16.7	8.9

**Mineral Reserves and Mineral Resources**

The Coimolache Mineral Reserves are estimated at an internal NSR cut-off value between 5.48 US\$/t to 6.73 US\$/t. The NSR cut-off value is determined using mine operating costs, as well as ore treatment, general and administrative costs, off site costs and capital costs. The NSR value is determined using reserve metal prices, refining costs, and metal recoveries. Metal prices used for Mineral Reserves are based on market study and long-term consensus sources. Mineral Reserves are estimated using metal prices, based on average long term metal prices of gold: 1,750 US\$/oz and silver: 23 US\$/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average amounts to 74.3% for gold and 32.7% silver. The current LOM plan continues through 2028. The total book value for the Coimolache property and its associated plant and equipment was US\$ 119.7 million as of December 31, 2023.

**Notes:**

1. S-K 1300 definitions were followed for Mineral Reserves.
2. Mineral Reserves data presented in this table represents 100% of the Mineral Reserves estimates for the property. Buenaventura owns 40.094% of this property.
3. Numbers may not add due to rounding.
4. The qualified person for the Mineral Reserves estimate is SLR Consulting (Canada) Ltd.

The Coimolache Mineral Reserves are estimated considering the modifying factors for conversion of measured and indicated resource classes into proven and probable reserves. Inferred resources are considered as waste in the life of mine (LOM) plan. The Mineral Reserve estimate has been prepared using industry accepted practice and conforms to the disclosure requirements of S-K 1300. Mineral Reserve estimates consider technical, economic, and environmental, and regulatory parameters containing inherent risks. Changes in grade and/or metal recovery estimation, realized metal prices, and operating and capital costs have a direct relationship to the cash flow and profitability of the mine. Mineral Reserve and Mineral Resource estimates are evaluated annually, providing the opportunity to reassess the assumed conditions. Additional information regarding the Mineral Reserve estimates provided can be found in Section 12 of the Coimolache Technical Report Summary.

**Coimolache – Net Difference in Mineral Reserves between December 31, 2023 versus December 31, 2022**

Class	Tonnage <sup>(1)</sup> (t)	Contained Metal

4. Numbers may not add due to rounding.
5. The qualified person for the Mineral Resources estimate is SLR Consulting (Canada) Ltd.

The Coimolache Mineral Resources estimates in the table above were estimated with three independent block models that were prepared for each of Tantahuatay's deposits: Tantahuatay, Cienaga and Mirador, which are open pit operations. 3D geological model was generated by Buenaventura for different types of data (mainly drill holes, blastholes, working mapping and section interpretation) to constrain and control mineralization and its domains. Drilling data from cores were combined into geological structures. Gold and silver grades were interpolated into block models for the different deposits. Mine zones were modeled using ordinary Kriging in each deposit. The results were visually validated, through various statistical comparisons. Additional information regarding the Mineral Resources estimates provided can be found in Section 11 of the Coimolache Technical Report Summary.

[Table of Contents](#)**Coimolache – Net Difference in Mineral Resources between December 31, 2023 versus December 31, 2022**

Class	Tonnage <sup>(1)</sup> (t)	Contained Metal	
		Gold (Oz)	Silver (Oz)

**Cerro Verde**

*Location and means of access*

We hold a 19.58% interest in Cerro Verde, which operates an open pit copper and molybdenum mining complex located 20 miles southwest of Arequipa, Peru. The site is accessible by paved highway. The Cerro Verde mine has been in operation since 1976 and was previously owned by the Peruvian government before its privatization in 1993. Freeport-McMoRan Inc. (FCX) holds a majority interest in Cerro Verde.

**History**

The first activities of the Cerro Verde porphyry copper deposit date back to the late 1800s when artisanal mining produced high-grade oxide ore. In 1917 Anaconda Copper Mining Company acquired the property and operated intermittently until 1970 when the property was nationalized. Minero Perú S.A., a government-controlled mining company, commenced mining and processing of ore with a SX/EW plant and pilot concentrator plant in 1977. The SX/EW plant was among the first in the world to be commissioned.

Minero Perú S.A. sold Cerro Verde to Cyprus Climax Metals Company in 1994. By 1996, remaining ownership included Buenaventura and a variety of individual investors trading their shares on the Lima Stock Exchange. Shortly thereafter, Cyprus invested in improvements to the leach process production. Cyprus Climax Metals Company was acquired by the Phelps Dodge Corporation (PDC) in 1999. By 2004, the SX/EW plant capacity was at 200 million pounds of copper cathode per year (Bernal and Velarde, 2004).

In 2005, SMM Cerro Verde Netherlands B.V. acquired 21 % ownership, and Buenaventura increased their ownership to 18.3 % while PDC retained 53.56 % as part of construction of a primary sulfide concentrator (C1). Production started in 2006, with a capacity of 108,000 metric tonnes of ore per day. In 2011, C1 capacity was increased to 120,000 metric tonnes per day following completion of various debottlenecking projects.

[Table of Contents](#)

FCX acquired PDC in 2007. In 2007, FCX started a drilling program for deep exploration, infill confirmation, geomechanical, hydrogeological, and condemnation targets. Between 2008 and 2011, more than 200,000 meters were drilled.

Construction of new, additional concentrator facilities (C2) with a nominal capacity of 240,000 metric tonnes of ore per day was completed in 2016. As a result, the total Cerro Verde concentrating capacity expanded to 360,000 metric tonnes of ore per day. Recent production trends are exceeding the designed capacities. In 2018, ore processing capacity of C2 was increased to 288,000 metric tonnes of ore per day. As a result of several efficiency initiatives implemented over the past several years, the Cerro Verde's two concentrators were able to achieve a combined average milling rate exceeding 400,000 metric tonnes of ore per day in 2022. During the year ended December 31, 2023, Cerro Verde's concentrating facilities processed an average of 417,400 metric tonnes of ore per day, a new annual record. The Cerro Verde mine is a well-developed property currently in operation and all previous exploration and development work has been incorporated where appropriate in the access and operation of the property.

***Title, leases and options***

In Peru, mining rights through claims and concessions are regulated by Peru's General Mining Law. Cerro Verde's major operations take place in the mining concession "Cerro Verde No 1, 2, y 3" and in the Cerro Verde processing facilities concession "Cerro Verde Beneficiation Plant", (hereinafter the "Beneficiation Plant"). Sociedad Minera Cerro Verde is the titleholder of the entire mining concession, all other concessions, and areas where the Cerro Verde operations are located. They are retained through the annual payments of rights for the concessions or the corresponding penalties for not exploiting them. Surface land is not owned; however, Supreme Decree 017-1996-AG granted mining companies surface rights of those concessions already titled by the time this regulation was passed upon formal declaration before the Peruvian Ministry of Energy and Mines (MINEM). Cerro Verde mining and main core concessions were declared and exempted from the farmland's privatization processes. The Beneficiation Plant authorization includes the processing and recovery methods of ore entirely sourced from the mining concession.

***Mineralization***

The Cerro Verde mine is a porphyry copper deposit that has leachable oxide and secondary sulfide mineralization, and millable primary sulfide mineralization. The predominant oxide copper minerals are brochantite, chrysocolla, malachite and copper "pitch." Chalcocite and covellite are the most important secondary copper sulfide minerals. Chalcopyrite and molybdenite are the dominant primary sulfides.

***Operations and infrastructure***

Cerro Verde's operation consists of an open pit copper mine, that includes (i) two concentrator facilities with a total permitted milling capacity of 409,500 metric tonnes per day, with the ability to annually treat up to a maximum of 5% more for a total of 430,000 metric tonnes per day and (ii) solution extraction and electrowinning (SX/EW) leaching facilities which has a production capacity of approximately 200 million pounds of copper per year. Cerro Verde began to dismantle its crushed leach facility (which had a capacity of 39,000 metric tonnes of ore per day) as a result of pit expansion but continues to utilize its 100,000-metric tonnes per day ROM leach system.

Cerro Verde has sufficient equipment to move an average of 1,000,000 metric tonnes of material per day using a fleet of haul trucks. Copper cathodes and concentrate production are transported approximately 70 miles by truck and rail to the Pacific Port of Matarani for shipment to international markets.

Cerro Verde receives electrical power under long-term contracts with electric utility companies. During 2023, Cerro Verde entered into a new purchase agreement that is expected to transition its electrical power to fully renewable energy sources in 2026. Water for Cerro Verde's processing operations comes from renewable sources through a series of storage reservoirs, which Cerro Verde believes will be sufficient to support its currently planned operations but Cerro Verde closely monitors ongoing El Niño and Global El Niño weather patterns.

[Table of Contents](#)**Production**

The Cerro Verde mine is in the production stage and has an actual permitted milling plant capacity of 409,500 metric tonnes of ore per day with the ability to annually treating up to a maximum of 5% more for a total of 430,000 metric ton-per-day. The table below summarizes the Cerro Verde mine's concentrate production, metal contained in concentrates produced and average grades for the periods indicated. Production in 2023 was higher than 2022 primarily due to higher throughput processed at concentrator plants.

	For the Year Ended December 31,		
	2021	2022	2023
<b>Treatment ore (in thousand metric tonnes)</b>	164,717	171,348	181,861
<b>Average ore grade</b>			
Mill Copper grade (%)	0.31	0.33	0.34
<b>Metal contained in production</b>			
Silver (Oz)	3,683,926	4,415,291	4,076,615
Copper (MT)	402,370	441,553	447,035
Molybdenum (MT)	9,351	10,558	9,874
<b>Copper Cash Cost (US\$/Cu Lb)</b>	1.82	2.07	2.17
<b>Capital Expenditures (in millions of US\$)</b>	160.9	206.4	312.2

**Mineral Reserves and Mineral Resources**

Cerro Verde Mineral Reserves are estimated at an operational cut-off grade of 0.13% equivalent copper for mill operations and 0.08% equivalent copper for leach operations. In defining open pit mineral reserves, Cerro Verde applies an "operational cutoff grade" strategy, wherein multiple processing options, throughput constraints, mine development and ore availability are given consideration to maximize the value of our operations. Cerro Verde's executive management establishes reasonable long-term metal pricing to be used in determining mineral reserves and mineral resources. These prices are based on reviewing external market projections, historical prices, comparison of peer mining companies' reported price estimates, and internal capital investment guidelines. The long-term sale prices align the company's strategy for evaluating the economic feasibility of the mineral reserves and mineral resources. Mineral Reserves are estimated using average long term metal prices of copper: 3.00 US\$/lb, silver: 20 US\$/oz, molybdenum: 12 US\$/lb. Metallurgical recoveries are based on historical processing data and are variable as a function of head grade. Mill recoveries at LOM is 86% for copper, 45% for silver and 54% for molybdenum. The current LOM plan continues through 2052. The total book value for the Cerro Verde property and its associated plant and equipment was US\$5,529 million as of December 31, 2023.

3. Numbers may not add due to rounding.
4. The various employees of Freeport-McMoRan Inc. (majority owner and operator for the Cerro Verde mine) served as the qualified person for Mineral Reserves

The Cerro Verde Mineral Reserves are summarized from the LOM plan, which is the compilation of the relevant modifying factors for establishing an operational, economically viable mine plan. The mineral reserves are estimated considering the modifying factors for conversion of measured and indicated resource classes into proven and probable reserves. Inferred resources are considered as waste in the life of mine (LOM) plan. The Mineral Reserve estimate has been prepared using industry accepted practice and conforms to the disclosure requirements of S-K1300. Mineral Reserve estimates consider technical, economic, and environmental, and regulatory parameters containing inherent risks. Changes in grade and/or metal recovery estimation, realized metal prices, and operating and capital costs have a direct relationship to the cash flow and profitability of the mine. Mineral Reserve and Mineral Resource estimates are evaluated annually, providing the opportunity to reassess the assumed conditions.

2. Mineral Resources data presented in this table represents 100% of the Mineral Resources estimates for the property. Buenaventura owns 19.58% of this property.
3. Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
4. Numbers may not add due to rounding.
5. The various employees of Freeport-McMoRan Inc. (majority owner and operator for the Cerro Verde mine) served as the qualified person for Mineral Resources.

The Cerro Verde Mineral Resources estimates in the table above are evaluated using the application of technical and economic factors to a geologic resource block model and employing optimization algorithms to generate digital surfaces of mining limits, using specialized geologic and mine planning computer software. The resulting surfaces volumetrically identify material as potentially economical, using the assumed parameters. Mineral resources are the resultant contained metal inventories.

**Notes:**

1. Mineral Resources data presented in this table are calculated on 100% basis. Buenaventura owns 19.58%.

In comparison to 2022, Cerro Verde's Mineral Resources show a decrease, primarily as the result of higher cost assumptions.

**Mining greenfield projects**

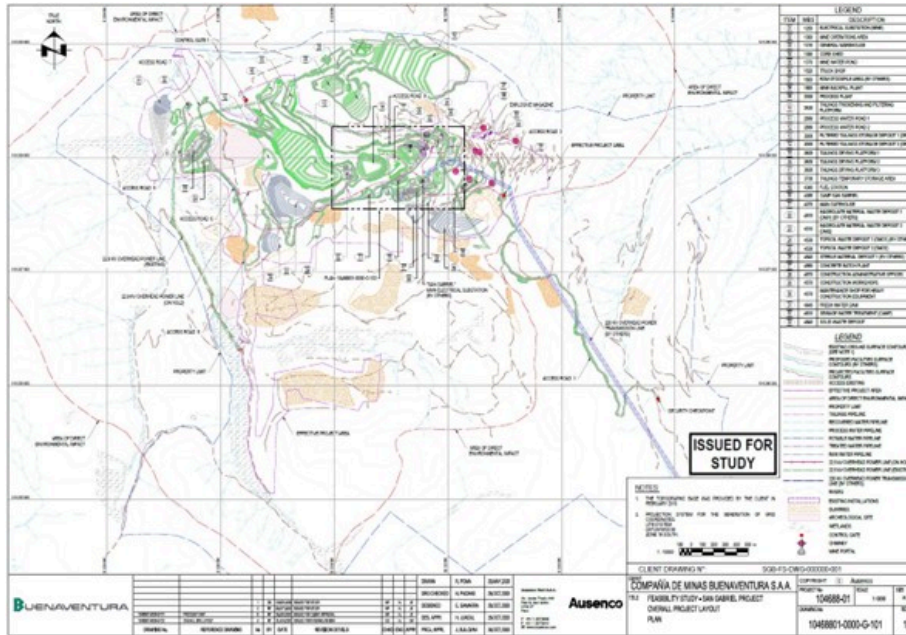

Project Name	Current Project Status
San Gabriel <sup>(1)</sup>	Construction
Trapiche <sup>(2)</sup>	Development
Tantahuatay Sulfides <sup>(3)</sup>	Development

- (1) San Gabriel qualifies as a project in the construction stage under S-K 1300.
- (2) Trapiche qualifies as a project in the development stage under S-K 1300.
- (3) Tantahuatay Sulfides qualifies as a project in the development stage under S-K 1300.

[Table of Contents](#)

**San Gabriel**

*Location and means of access*

The San Gabriel Project is located in the Ichuña district, in the General Sánchez Cerro Province of the Moquegua Region in southern Peru. The project is approximately 837 kilometers southeast of Lima and 116 kilometers northeast of Moquegua.

The San Gabriel Project can be accessed from the cities of Arequipa, Moquegua and Juliaca via a mixture of paved and unpaved roads.

**History**

In 2003, Minera Gold Fields Peru S.A. (Gold Fields Peru) obtained the Chucapaca, Chucapaca Norte, Orcori, Yaretapampa and Yaretapampa Sur mining concessions. In February 2007, Gold Fields Peru joint ventured the Project with Buenaventura. In 2009, Buenaventura and Gold Fields Peru formed Canteras del Hallazgo S.A.C. (Canteras del Hallazgo) as the operating entity. In 2014, Buenaventura acquired a 51% interest in Gold Fields Peru and a 100% interest in Canteras del Hallazgo, giving Buenaventura a 100% interest in the San Gabriel Project.

**Title, leases and options**

The San Gabriel Project comprises five mining concessions, covering an area of 3,467.3 hectares. Buenaventura complies with government mandated annual payments for the maintenance of the mining property, license fees and, if applicable, payment of any penalties incurred. Three royalties are payable on the Ichuña 2 IMG concession.

[Table of Contents](#)**Mineralization**

The San Gabriel deposit shows many of the characteristics of an intermediate sulfidation epithermal deposit.

An inlier of folded and faulted basement Jurassic-Cretaceous siliciclastic and carbonate sedimentary rocks of the Yura Group forms a basement high in the Ichuña District. It is overlain by a cover sequence of Cenozoic (Paleogene, Neogene, and Quaternary) volcanoclastic sediments and lavas.

Mineralization is hosted in Jurassic–Cretaceous Yura Group sediments, with dark grey limestones and interbedded clastic rocks of the Gramadal Formation hosting the most continuous replacement-style alteration and mineralization. The San Gabriel deposit is approximately 3,000 meters long, 250 meters wide, and averages 170 meters in thickness. It has been drill tested to a depth of 700 m.

**Operations and infrastructure**

The San Gabriel Project, achieved 94% engineering progress and 24% construction progress and is serviced by an operational 22.9 kV transmission line that was installed from the public electricity grid, servicing the mine services (1 MVA) and the Agani advance camp (650 kVA). The transmission line will continue to be used during the construction phase. The 220 kV power line has its EIA in process for approval to then begin its construction, it will be ready for the start of operations. For exploration and construction activities Buenaventura preferentially hires labor from the local communities. During construction and mine operations, Buenaventura plans to preferentially hire both qualified and unskilled personnel from the populations within the project's area of influence, including C.C. Santa Cruz de Oyo Oyo, Maycunaca and Antajahua, and C.C. Corire and the Ichuña District. Where local labor is unavailable, Buenaventura will first hire from the wider Moquegua region, and only afterwards from outside the Moquegua region.

The required infrastructure to support the LOM plan will include the underground mine, backfill and concrete batch plants, waste rock storage facilities, topsoil stockpile, process plant, run-of-mine (ROM) stockpile, process water ponds, mine water pond, freshwater dam, filtered TSFs (FTSF), tailings thickening and filtering platform, tailings drying platforms, temporary tailings storage area, mine operations and warehouse area, administration offices, truck, maintenance and work shops, fuel station, core shed, gatehouse, accommodation camp, sewage treatment plant, temporary waste storage area, and electrical substation. The camp capacity is based on an estimate of construction personnel and operations personnel. In operation, the camp will have a capacity of 816 people. However, during construction the capacity of some modules will be increased to support a total camp capacity of 1,440 persons.

**Mineral Reserves and Mineral Resources**

The San Gabriel Project Mineral Reserves are estimated at an NSR cut-off value between 85 US\$/t to 90 US\$/t. The NSR cut-off value is determined using the concentrate transport, treatment and refining costs, as well as mine operating costs. The NSR value is determined using reserve metal prices and metal recoveries. Metal prices used for Mineral Reserves are based on market study and long-term consensus sources. Mineral Reserves are estimated using average long term metal prices of gold: 1,600 US\$/oz and silver: 25 US\$/t. Metallurgical recoveries are accounted for in NSR calculations based on extensive test work data and are variable as a function of head grade. Recoveries at LOM average amounts to 85.0% for gold and 45.0% for silver. The project LOM is currently estimated at 14 years. The total book value for the San Gabriel property and its associated plant and equipment was US\$ 511.7 million as of December 31, 2023.

**San Gabriel – Year End Mineral Reserves as of December 31, 2023 (on a 100% ownership basis)<sup>(1)(3)(4)</sup>**

Ownership	Class	Tonnage <sup>(2)</sup> (t)	Grade		Contained Metal	
			Gold (g/t)	Silver (g/t)	Gold (Oz)	Silver (Oz)
100%	Proven	982,605	5.09	2.26	160,832	71,541
	Probable	13,951,754	3.97	6.72	1,778,976	3,015,826
	<b>Subtotal</b>	<b>14,934,359</b>	<b>4.04</b>	<b>6.43</b>	<b>1,939,808</b>	<b>3,087,367</b>

**Notes:**

1. S-K 1300 definitions were followed for Mineral Reserves.

[Table of Contents](#)

2. Mineral Reserves data presented in this table represents 100% of the Mineral Reserves estimates for the property. Buenaventura owns 100% of this property
3. Numbers may not add due to rounding.
4. The qualified person for the Mineral Reserves estimate is Agnitia Consultores S.A.C.

The San Gabriel Mineral Reserves are estimated by converting Measured Mineral Resources and Indicated Mineral Resources to Proven Mineral Reserves and Probable Mineral Reserves assuming a combination of overhand drift-and-fill, underhand drift-and-fill and overhand sub-level retreat mining methods. An NSR cut-off was used in preference to a grade cut-off, since both gold and silver are contributors to the San Gabriel Project economics. Additional information regarding the Mineral Reserve estimates provided can be found in Section 12 of the San Gabriel Technical Report Summary.

**San Gabriel – Net Difference in Mineral Reserves between December 31, 2023 versus December 31, 2022**

2. Mineral Resources data presented in this table represents 100% of the Mineral Resources estimates for the property. Buenaventura owns 100% of this property.
3. Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
4. Numbers may not add due to rounding.
5. The qualified person for the Mineral Resources estimate is SRK Consulting Perú S.A.

The San Gabriel Mineral Resources estimates in the table above is supported by core drilling. Leapfrog Software version 6.0 and Vulcan © version 12.1 were used to construct the geological solids, prepare assay data for geostatistical analysis, construct the block model, estimate metal grades and tabulate mineral resources. Supervisor © Software version 8.13 was used for geostatistical analysis, variography, and quantitative kriging neighborhood analysis (QKNA). The block model block size of 5 x 5 x 5 meters and subblock size of 1 x 1 x 1 meters is considered acceptable given the average deposit thickness and assumptions of underground cut-and-fill mining methods. Additional information regarding the Mineral Resources estimates provided can be found in Section 11 of the San Gabriel Technical Report Summary.

**Trapiche**

*Location and means of access*

The Trapiche Project is located in the Apurimac region in south-central Perú and is located about 95 km south of the town of Abancay and about 8 km south of the Mollebamba village in the Antabamba Province. The location coordinates are UTM 728,672 E and 8,396,177 N. The elevation of the property and deposits range from 3,900 to 4,650 meters above sea level (masl).

[Table of Contents](#)

Two access roads are being considered for the access to the mine site from Chunchumayo. One is termed the East Access Road begins in Chunchumayo and ends in the township of Mollocco. The other road is termed the West Access Road and begins in Chunchumayo and eventually ties into the road to Mollebamba. The main access road will be built as a joint effort by the Regional Government and the Federal Government of Peru.

**History**

The geological prospecting work began in 1996, extending until 2000, consisting of geochemical prospecting (stream sediments), mapping and rock geochemistry, determining Cu and Mo anomalies that motivated the continuity of the explorations. In 2001 and 2002, a diamond drilling campaign was completed with the execution of six drill holes (2,192.95 meters). The results were positive leading to the discovery of the Trapiche porphyry with Cu-Mo sulfide mineralization.

**Title, leases and options**

The Trapiche Project area consists of 44,098 hectares in 38 mining concessions as well as an additional 2,300 hectares with land use rights that were granted by the Mollebamba village in 2011 through an easement agreement signed with Compañía de Minas Buenaventura and El Molle Verde S.A.C.

**Mineralization**

The Trapiche deposit corresponds to a typical porphyry deposit with Cu and Mo mineralization, which is related to the location of the hydrothermal polyphase quartz monzonite porphyry (QMP) and Breccia Pipe, which crosscuts sedimentary sequences of Late Jurassic to Early Cretaceous age.

The mineralization is a Cu-Mo porphyry, constituted mainly by primary and secondary copper sulfides, molybdenite and to a lesser extent, copper oxide. The highest volume of sulfides is located in the Breccia Pipe, followed by the quartz monzonite porphyry, and in a lower percentage, the Cu oxides located in the western border with contact to the breccia and calc-silicate sediments, associated with the monzonite intrusive dikes.

**Operations and infrastructure**

Currently, the power supply for the exploration facilities is provided by generators in the Pionner Camp area with a maximum installed capacity of 460 kW and a capacity of up to 2 MW. The closest electrical substation is Cotaruse and the closest distribution line is the high voltage line that goes from Cotaruse to Las Bambas. The new 220 kV power line has 50% land agreements reached and will be ready for the start of operations. ORE and ROM leaching optimization column tests are being carried at the metallurgical laboratory on site.

The total number of people on site in years of operation is estimated at 865. However, considering the 14x7 rotation system of mining workers in Peru, a total of 1,150 people were hired. A permanent camp was designed by BISA S.A. to provide housing to 1,674 people.

The infrastructure required to support the LOM plan will include an open pit mine and haul roads, as well as a permanent sulfide leach pad, dynamic oxide on-off pad, a permanent ROM pad, topsoil material deposit (DMO), inadequate material deposit (DMI), crushing area, SXEW area, process water ponds, freshwater dam, warehouse facility, administration offices, truck shop facility, fuel station, core shed, gatehouses, accommodation camp, sewage treatment plant, waste storage area, and electrical substation.

[Table of Contents](#)**Mineral Reserves and Mineral Resources**

The Trapiche Project Mineral Reserves are estimated at an NSR cut-off value of 6.5 US\$/t. The NSR cut-off value is determined using the cathodes transport charges and site operating costs. The NSR value is determined using reserve metal prices and metal recoveries. Metal prices used for Mineral Reserves are based on market study and long-term consensus sources. Mineral Reserves are estimated using average long term metal prices of copper: 8,000 US\$/t. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and with fixed values for each type of Ore. Recoveries at LOM average head grade estimated for copper is 71.7% for Enriched Ore, 55.0% for Transitional Ore, 85.0% for Oxide and Mixed Ore and 40.0% for ROM low grade ore. The project LOM is currently estimated at 18 years. The total book value for the Trapiche property and its associated plant and equipment was US\$ 87.6 million as of December 31, 2023.

**Trapiche – Year End Mineral Reserves as of December 31, 2023 (on a 100% ownership basis)<sup>(1)(3)(4)</sup>**

Ownership	Class	Tonnage <sup>(2)</sup> (t)	Grade			Contained Metal

[Table of Contents](#)

**Tantahuatay Sulfides**

***Location and means of access***

The Tantahuatay Sulfides Project as part of the Tantahuatay mining unit is located in the districts of Chugur and Hualgayoc, province of Hualgayoc, region of Cajamarca, in the Andes Mountains of northern Peru. The center of this project has the following geographic coordinates: Latitude 6°44'25" S and Longitude 78°41'50" W.

Access to Tantahuatay Sulfuros Project is by air from Lima (Jorge Chávez International Airport) to the city of Cajamarca (Armando Revoredo Iglesias International Airport), which is located 568 km north of Lima. Hualgayoc can be accessed from the city of Cajamarca by traveling northwest approximately 85 km. By land, the project can be accessed from Lima by traveling the Panamericana Norte highway, taking the detour to the city of Cajamarca, and continuing from Cajamarca to the project (total distance of 1,006 km).

***History***

In the Tantahuatay Mining unit, initial exploration was conducted by Southern Peru Copper Corporation from 1991 to 1998 and in 1992, Coimolache was established with the following shareholder structure: 40.094% held by Buenaventura, 44.244% by SPCC and 15.662% by ESPRO S.A.C.

The Tantahuatay Sulfides project consists of a flotation plant for the treatment of copper sulfides found underlying the Tantahuatay Au-Ag mineralization, which is currently being exploited (Buenaventura, 2022).

***Title, leases and options***

There are 26 mining concessions (22,252 ha), which are located in the area of the current pits and exploration projects related to Tantahuatay Sulfides. All the mineral resources presented in this report are located within concessions whose titles are held by Coimolache.

[Table of Contents](#)

**Mineralization**

Tantahuatay Sulfides project includes high-sulfidation epithermal, porphyry and skarn mineralization. The High-sulfidation epithermal deposit below the oxide level has mineralization is dominated by sulfides, including minerals such as silica, pyrite, enargite, chalcocite and covellite.

Two large mineralization type domains have been differentiated:

*Arsenical copper:* The first corresponds to the mineralization in the high sulfidation epithermal system with enargite domain and vertical zoning to chalcocite-covellite and chalcopyrite in contact with exoskarn.

*Non-arsenical copper:* related to the chalcopyrite-sphalerite mineralization that is hosted in the copper porphyries and exoskarn.

Both domains demonstrate a transition to the mineralization of the intermediate sulfidation type with gray copper mineralization, cadmium-rich sphalerite, bismuthinite, galena, stibnite, orpiment. Mineralization of intermediate to low sulfidation type has been differentiated, related to the emplacement of a diatreme.

**Operations and infrastructure**

The area around the Tantahuatay Sulfides has been extensively mapped, sampled, and drilled over several years of exploration work. Active mining and extensive exploration drilling should be considered the most relevant and robust exploration work for the current mineral resource estimation.

The current pits provide information (i.e. structural) to model intrusive bodies and most of the information from diamond drilling is based on data from the holes made in the pits.

**Mineral Resources**

The Tantahuatay Sulfides Project Mineral Resources are reported within the optimized economic pit and using a NSR cut-off value of 7.76 US\$/t. The NSR value is determined using corporate reserves metal prices and metal recoveries. Metal prices used for Mineral Resources are based on market study and long-term consensus sources. Mineral Reserves are estimated using average long term metal prices of copper 8,800 US\$/t, gold 1,750 US\$/oz and US\$ 23 US\$/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and with fixed values for each type of Ore. Recoveries at LOM average head grade estimated for copper is 85% and 96.35 % payable, Au metallurgical recovery is 60% and 90% payable, for Ag the metallurgical recovery is 50% and 90% payable.

**Notes:**

3. The total Mineral Resources dated from December 31, 2022 considered an ownership basis of 40.094%.
4. The total Mineral Resources dated from December 31, 2023 considered an ownership basis of 40.094%.

[Table of Contents](#)**Tantahuatay Sulfides – Net Difference in Mineral Resources between December 31, 2023 versus December 31, 2022**

Class	Contained Metal			
	Tonnage <sup>(1)(2)</sup> (t)	Gold (Oz)	Silver (Oz)	Copper (t)
Measured	0	0	0	0
Indicated	53,561,124	460,432	17,635,466	315,146
<b>Subtotal</b>	<b>53,561,124</b>	<b>460,432</b>	<b>17,635,466</b>	<b>315,146</b>
Inferred	241,047,991	1,338,429	58,890,439	963,313

**Notes:**

- Mineral Resources data presented in this table are calculated on 100% basis. Buenaventura owns 40.094%.

**Mineral Resources and Reserves***Disclosure of Mineral Resources and Reserves*

The SEC amendments to its disclosure rules modernizing the mineral property disclosure requirements for mining registrants became effective on January 1, 2021. The amendments include the adoption of Subpart 1300 of Regulation S-K as promulgated by the SEC (“S-K 1300”), which governs disclosure for mining registrants S-K 1300 replaced the historical property disclosure requirements for mining registrants that were included in the SEC’s Industry Guide 7 and better align disclosure with international industry and regulatory practices.

For the meanings of certain technical terms used in this prospectus, see “Additional Information-Glossary.”

The qualified persons that have reviewed and approved the scientific and technical information contained in this annual report are identified in the footnotes to the tables summarizing the Mineral Reserves and Resources estimates. See “Information on the Company-Mining operations” below. For the meanings of certain technical terms used in this report, see “Introduction—Glossary of Selected Mining Terms.”

*Presentation of information concerning Mineral Reserves*

The estimates of proven and probable reserves at our mines and projects and the estimates of life of mine (LOM) included in this annual report have been prepared by the qualified persons referred to herein, and in accordance with the technical definitions established by the SEC. Under S-K 1300:

Proven Mineral Reserves are the economically mineable part of a Measured mineral resource and can only result from conversion of a measured mineral resource.

Probable Mineral Reserves are the economically mineable part of an indicated and, in some cases, a measured mineral resource.

[Table of Contents](#)

Measured Mineral Resource is that part of a mineral resource for which quantity and grade or quality are estimated based on conclusive geological evidence and sampling. The level of geological certainty associated with a Measured Mineral Resource is sufficient to allow a qualified person to apply modifying factors, as defined in S-K 1300 (as defined below), in sufficient detail to support detailed mine planning and final evaluation of the economic viability of the deposit. Because a Measured Mineral Resource has a higher level of confidence than the level of confidence of either an Indicated Mineral Resource or an Inferred Mineral Resource, a Measured Mineral Resource may be converted to a Proven Mineral Reserve or to a Probable Mineral Reserve.

Indicated Mineral Resource is that part of a Mineral Resource for which quantity and grade or quality are estimated based on adequate geological evidence and sampling. The level of geological certainty associated with an Indicated Mineral Resource is sufficient to allow a qualified person to apply modifying factors in sufficient detail to support mine planning and evaluation of the economic viability of the deposit. Because an Indicated Mineral Resource has a lower level of confidence than the level of confidence of a measured mineral resource, an indicated mineral resource may only be converted to a probable mineral reserve.

Inferred Mineral Resource is that part of a Mineral Resource for which quantity and grade or quality are estimated based on limited geological evidence and sampling. The level of geological uncertainty associated with an Inferred Mineral Resource is too high to apply relevant technical and economic factors likely to influence the prospects of economic extraction in a manner useful for evaluation of economic viability. Because an Inferred Mineral Resource has the lowest level of geological confidence of all mineral resources, which prevents the application of the modifying factors in a manner useful for evaluation of economic viability, an Inferred Mineral Resource may not be considered when assessing the economic viability of a mining project and may not be converted to a mineral reserve.

We periodically update our reserves and resources estimates when we have new geological data, economic assumptions or mining plans. During 2023, we performed an analysis of our reserves and resources estimates for certain operations, which is reflected in new estimates as of December 31, 2023. Reserves and resources estimates for each operation assume that we either have or expect to obtain all the necessary rights and permits to mine, extract and process mineral reserves or resources at each mine. Where we own less than 100% of the operation, reserves and resources estimates are presented in two forms, showing figures considering 100% ownership and also adjusted to reflect our ownership interest. Certain figures in the tables, discussions and notes have been rounded.

\*\* This table does not include Julcani, La Zanja and Tambomayo information, as disclosed under “Mining Operations—Julcani—Mineral Reserves and Mineral Resources”, “Mining Operations—La Zanja—Mineral Reserves and Mineral Resources” and “Mining Operations—Tambomayo—Mineral Reserves and Mineral Resources”.

\*\*\* The total tonnage and content amounts presented in this table represent Buenaventura’s attributable ownership basis.

- (1) The qualified person for the Mineral Reserves estimate of Orcopampa and Uchucchacua is SRK Consulting Perú S.A.
- (2) The qualified person for the Mineral Reserves estimate El Brocal and Coimolache is SLR Consulting (Canada) Ltd.
- (3) The qualified person for the Mineral Reserves estimate of San Gabriel is Agnitia Consultores S.A.C.
- (4) The qualified person for the Mineral Reserves estimate of Trapiche is Mining Plus Peru S.A.C.
- (5) The qualified person for the Mineral Reserves estimate of Cerro Verde is Freeport-McMoran Inc.
- (6) The point of reference used is in situ tonnes.

**Notes:**

\* Numbers may not add due to rounding.

[Table of Contents](#)

\*\* This table does not include Julcani, La Zanja and Tambomayo information, as disclosed under “Mining Operations—Julcani—Mineral Reserves and Mineral Resources”, “Mining Operations—La Zanja—Mineral Reserves and Mineral Resources” and “Mining Operations—Tambomayo—Mineral Reserves and Mineral Resources”.

\*\*\* The total tonnage and content amounts presented in this table considered an ownership basis of 100% which represents Buenaventura’s ownership as of December 31, 2023.

- (1) The qualified person for the Mineral Reserves estimate of Orcopampa and Uchucchacua is SRK Consulting Perú S.A.
- (2) The qualified person for the Mineral Reserves estimate El Brocal and Coimolache is SLR Consulting (Canada) Ltd.
- (3) The qualified person for the Mineral Reserves estimate of San Gabriel is Agnitia Consultores S.A.C.
- (4) The qualified person for the Mineral Reserves estimate of Trapiche is Mining Plus Peru S.A.C.
- (5) The qualified person for the Mineral Reserves estimate of Cerro Verde is Freeport-McMoran Inc.
- (6) The point of reference used is in situ tonnes.

[Table of Contents](#)

The following table shows a summary of our Mineral Reserves for our material mining properties as of December 31, 2023 prepared in accordance with Item 1304(d)(1) of S-K 1300(\*):

	Ownership Interest (%)	Total Mineral Reserves			NSR Cut-off (US\$/t)	Metallurgical Recovery (%)
		Total (Mt)	Grades (g/t)	Contained Metal (kOz)

**Notes:**

\* Numbers may not add due to rounding.

[Table of Contents](#)

\*\* The estimation of Mineral Resources involves assumptions about future commodity prices and technical mining matters. Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.

\*\*\* The total tonnage and content amounts presented in this table represent Buenaventura's attributable ownership basis.

\*\*\*\* This table does not include Julcani, La Zanja and Tambomayo information, as disclosed under "Mining Operations—Julcani—Mineral Reserves and Mineral Resources", "Mining Operations—La Zanja—Mineral Reserves and Mineral Resources" and "Mining Operations—Tambomayo—Mineral Reserves and Mineral Resources".

- (1) The qualified person for the Mineral Resources estimate of Orcopampa, Uchucchacua, San Gabriel and Tantahuatay Sulfides is SRK Consulting Perú S.A.
- (2) The qualified person for the Mineral Resources estimate of El Brocal and Coimolache is SLR Consulting (Canada) Ltd.
- (3) The qualified person for the Mineral Resources estimate of Trapiche is Mining Plus Peru S.A.C.
- (4) The qualified person for the Mineral Resources estimate of Cerro Verde is Freeport-McMoran Inc.
- (5) The point of reference used is in situ tonnes.

**Notes:**

\* Numbers may not add due to rounding.

[Table of Contents](#)

\*\* The estimation of Mineral Resources involves assumptions about future commodity prices and technical mining matters. Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.

\*\*\* The total tonnage and content amounts presented in this table considered an ownership basis of 100% which represents Buenaventura's ownership as of December 31, 2023.

\*\*\*\* This table does not include Julcani and La Zanja information, as disclosed under "Mining Operations—Julcani—Mineral Reserves and Mineral Resources", "Mining Operations—La Zanja—Mineral Reserves and Mineral Resources" and "Mining Operations—Tambomayo—Mineral Reserves and Mineral Resources".

- (1) The qualified person for the Mineral Resources estimate of Orcopampa, Uchucchacua, San Gabriel and Tantahuatay Sulfides is SRK Consulting Perú S.A.
- (2) The qualified person for the Mineral Resources estimate of El Brocal and Coimolache is SLR Consulting (Canada) Ltd.
- (3) The qualified person for the Mineral Resources estimate of Trapiche is Mining Plus Peru S.A.C.
- (4) The qualified person for the Mineral Resources estimate of Cerro Verde is Freeport-McMoran Inc.
- (5) The point of reference used is in situ tonnes.

\* Based on metal prices of Gold: 1,750 US\$/oz, Silver: 23 US\$/t, Copper: 8,800 US\$/t, Lead: 2,100 US\$/t and Zinc: 2,600 US\$/t  
 \*\* This table does not include Julcani and La Zanja information, as disclosed under "Mining Operations—Julcani—Mineral Reserves and Mineral Resources", "Mining Operations—La Zanja—Mineral Reserves and Mineral Resources". and "Mining Operations—Tambomayo—Mineral Reserves and Mineral Resources".

[Table of Contents](#)

- (1) Cut-off for Cerro Verde is calculated as grade in % Equivalent Copper
- (2) Metallurgical Recovery is 71.7% for Enriched Ore, 55.0% for Transitional Ore, 85.0% for Oxide and Mixed Ore and 40.0% for ROM low grade ore. 62% is an average.
- (3) The point of reference used is in situ tonnes.

*Internal Control Disclosure*

Buenaventura has implemented established quality assurance/quality controls (“QA/QC”). SRK Consulting and SLR Consulting (Canada) Ltd, independent mining consulting firms, reviewed Buenaventura’s QA/QC procedures annually to ensure that those procedures follow best practices and recognized international standards for Mineral Resources and Reserves estimations. The main objective of QA/QC is to monitor and ensure the accuracy (quality) in the sampling both in the preparation phase and in the assay phase, and to verify the probable errors that could arise through the process. Additionally, QA/QC aim to identify any contamination caused by poor or deficient sampling, preparation (crushing and pulverizing) and/or assaying. Before the sample preparation phase, quality control (QC) samples are inserted at pre-determined intervals representing a percentage of the total samples. The control samples inserted in the preparation phase are coarse duplicates, fine duplicates, certified reference materials or standards, coarse blanks, and fine blanks, with the insertion distribution designed by the quality assurance/ quality control Supervisor in accordance with the protocols established for the project. The control samples help to identify some errors in the sampling, preparation and assay phases of the samples, which are been corrected by continuous monitoring and appropriate statistical analysis in order to ensure the quality of the ordinary samples. QA/QC procedures include insertion of blank and duplicate samples and insertion of certified reference materials (CRMs), blanks, and duplicates to monitor the sampling, sample preparation and analytical processes. Every mine and advanced project provides a detailed QA/QC report at least once a year. Internally, regular data verification workflows are carried out to ensure the collection of reliable data. Coordinates, core logging, surveying, and sampling are monitored by exploration and mine geologists, and verified routinely for consistency.

*Capital Expenditures*

Our capital expenditures during the past three years have related principally to the acquisition of new mining properties, construction of new facilities and renewal of plant and equipment, excluding cost for mine closures and rights of use asset, during a given period. Capital expenditures relating to exploration are not included in the table below and are discussed separately in “B. Business Overview— Exploration.” Our presentation of capital expenditures may not be comparable to other similarly titled measures used by other companies. Set forth below is information concerning capital expenditures incurred by us in respect of each of our principal operating mines and by category of expenditure:

	Year Ended December 31,		
	2021	2022	2023
	(US\$ in thousands)		
Colquijirca and Marcapunta	37,649	61,932	61,772
San Gabriel	14,196	34,734	93,235
Uchucchacua	16,109	31,174	52,106
Molle Verde	8,317	11,725	20,756
Orcopampa	2,983	3,584	4,466
La Zanja	999	1,719	2,287
Huanza	754	1,246	1,159
Julcani	2,362	1,559	878
Tambomayo	3,935	3,175	320
Río Seco	1,744	189	90
Conenhua	—	32	10
Others	1,261	904	1,590
Total <sup>(1)</sup>	90,309	151,973	238,669

[Table of Contents](#)

	Year Ended December 31,		
	2021	2022	2023
	(US\$ in thousands)		
Fixed assets	139	25	3
Work in progress	40,768	65,577	140,586
Development costs	49,402	86,371	98,080
Total	<u>90,309</u>	<u>151,973</u>	<u>238,669</u>

(1) Excluding additions of costs for mine closures of US\$11.9 million in 2023, and additions of right of use assets of US\$3.0 million, US\$11.7 million and US\$1.1 million during a given period as of December 31, 2021, 2022 and 2023, respectively.

We partially funded the El Brocal Expansion and the construction of the Huanza hydroelectric power plant with leasing facilities. See “Item 5. Operating and Financial Review and Prospects—Buenaventura—B. Liquidity and Capital Resources—Long-Term Debt.”

We have budgeted approximately US\$ 300 to US\$ 320 million for capital expenditures for 2024. We continuously evaluate opportunities to expand our business within Peru, as well as in other countries as opportunities arise, and expect to continue to do so in the future. We may in the future decide to acquire part or all of the equity of, or undertake other transactions with, other companies involved in the same business as us or in other related businesses. However, there can be no assurance that we will decide to pursue any such new activity or transaction.

## B. Business Overview

We mainly produce refined gold and silver, either as concentrates or doré bars, and other metals such as lead, zinc and copper as concentrates that we distribute and sell locally and internationally. The following table sets forth the production of the Orcopampa, Tambomayo, Uchucchacua, Julcani, La Zanja and Colquijirca-Marcapunta mines by type of product for the last three years, calculated in each case on the basis of 100% of the applicable mine’s production. Production from Cerro Verde and Coimolache are not included in these production figures.

	Year Ended December 31		
	2021	2022	2023
	(Unaudited) (1)(2)		
Gold (oz.)	160,411	181,773	154,673
Silver (oz.)	14,398,043	8,198,488	9,099,978
Zinc (t)	55,312	36,869	25,008
Lead (t)	24,717	17,610	11,410
Copper (t)	37,877	47,352	57,721

(1) The amounts in this table reflect the total production of all of our consolidated subsidiaries, including El Brocal and La Zanja.

(2) Amounts exclude production from the operating mines that are classified as discontinued operations.

## Exploration

We view explorations as our primary means of generating value for our shareholders, and we maintain a portfolio of active exploration projects at various stages of exploration for mineral resources in Peru. During 2023, 2022 and 2021, we spent US\$13.5 million, US\$14.3 million and US\$11.3 million, respectively on “exploration in non-operating areas” investments and US\$49.2 million, US\$80.8 million and US\$56.4 million, respectively on “exploration in operating units” investments mainly focused in the Uchucchacua, Colquijirca and Julcani mining units.

During 2024, we expect to invest approximately US\$ 55.0 to US\$ 60.0 million in these exploration activities.

Our exploration department develops programs and budgets for individual projects each year and we allocate, subject to board approval, the proper amount to fund each particular exploration program. Because of the nature of mining exploration and to maintain flexibility to take advantage of opportunities, we allocate budgeted amounts by property or project only in the case of high probability of success. We also allocate non-budgeted amounts over the course of the year to new projects that our technical team considers highly prospective.

[Table of Contents](#)

We have active joint venture exploration agreements with other mining companies, including Southern Copper Corporation, Alianza Minerals and Minera Bateas. Additionally, we hold a majority ownership of 19.32 % of its current outstanding shares of Tinka Resources Limited. Consequently, we have access to promising mining projects through exploration of our own mining properties as well as third-party properties while sharing the exploration and development risks with recognized partners, and increasing our exposure to new exploration technologies, while expanding our knowledge and experiences of management, geologists and engineers. In these mining exploration agreements, we may be the operator, an equity participant, the manager or a combination of these and other functions.

The following table lists our principal exploration projects in non-operating areas, our effective participation in each project, our partners with respect to each project, the total number of hectares in each project, observed mineralization of each project and the exploration expenditures for each project during 2021, 2022 and 2023.

Exploration Projects (1)(2)	Buenaventura's Effective Participation at March 31, 2023		Property Hectares	Observed Mineralization	Total Exploration Expenditures During		
					2021	2022	2023
					(US\$ in millions)		
Emperatriz	100	%	11,460	Copper, Gold and Silver	5.74	5.24	3.96
Marcapunta	61.43	%	33,748	Copper, Silver and Gold	1.38	4.01	4.10
San Gabriel	100	%	20,500	Gold, Silver and Copper	1.01	0.28	1.15
Ccelloccasa	100	%	9,892	Gold and Silver	0.41	1.75	0.15
Other minor					2.73	2.97	4.10
<b>Total exploration in non-operating areas</b>					<b>11.27</b>	<b>14.25</b>	<b>13.45</b>

(1) In addition to these projects, we continue to conduct exploration at all of our operating mines and our subsidiaries.

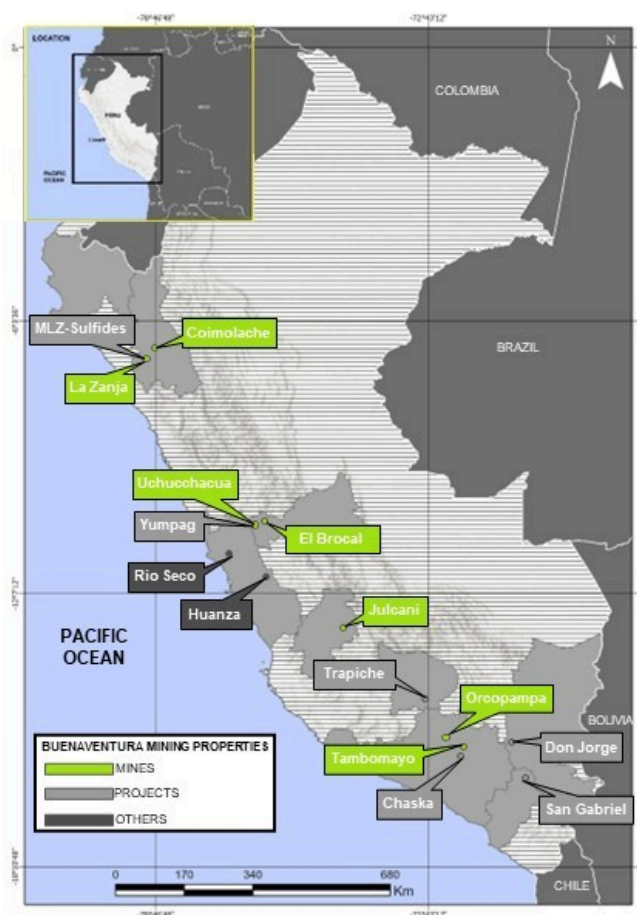

(2) Only includes explorations conducted by Buenaventura.

The following table lists the mines in which we directed our principal exploration efforts, mineralization of each mine and the exploration expenditures for 2022 and 2023.

	Observed Mineralization	Total Exploration Expenditures During 2022		Total Exploration Expenditures During 2023	
		Total	Buenaventura	Total	Buenaventura
		(US\$ in millions)		(US\$ in millions)	
Colquijirca	Copper, Zinc, Lead and Silver	16.67	16.67	7.76	7.76
Orcopampa	Silver and Gold	11.59	11.59	6.07	6.07
Uchucchacua	Silver, Lead and Zinc	32.59	32.59	24.42	24.42
Tambomayo	Gold	9.98	9.98	3.45	3.45
Julcani	Silver	6.75	6.75	6.99	6.99
La Zanja	Gold	3.21	3.21	0.54	0.54
<b>Total</b>		<b>80.80</b>	<b>80.80</b>	<b>49.23</b>	<b>49.23</b>

[Table of Contents](#)

The following is a brief summary of current exploration activities conducted by Buenaventura directly and through joint exploration agreements, which we believe represent the best prospects for discovering new reserves. There can be no assurance, however, that any of our current exploration projects will result in viable mineral production or that any of the mineralization identified to date will ultimately result in an increase in our ore reserves. Set forth below is a map of our principal exploration projects in Peru as of December 31, 2023.

**Exploration Projects in Non-Operating Areas**

*Yumpag.* The Yumpag project is located four kilometers northeast of the Uchucchacua mine. This project is an epithermal silver-manganese deposit hosted by Cretaceous limestone. Mineralization is structurally influenced by the Cachipampa fault, which also influences significant areas of silver mineralization at the Uchucchacua mine.

In 2023 we conducted 9,416 meters of exploration drilling in the Tomasa system, which has allowed us to identify two main ore bodies. In addition, we completed 1,552 meters of exploration drilling in the Camila southwest vein which has allowed us to extend the mineralization for 150 meters southwest. Finally, we conducted an additional 3,167 meters of infill drilling in the Camila vein.

[Table of Contents](#)

For 2024, we expect to execute 6,000 meters of drilling in the Tomasa system, 5,000 meters of exploration drilling in Camila southwest, and 8,000 meters of exploration drilling in new areas.

*Trapiche.* The Trapiche project is operated by Molle Verde S.A.C, which is a wholly-owned subsidiary of Buenaventura. The project is located in the Apurimac region and belongs to the Andahuaylas-Yauri belt, which contains several iron, copper, and gold deposits.

During 2023, we completed a drone-mounted magnetic survey covering an area of 22 square kilometers. This survey identified a bipolar magnetic anomaly located 3 kilometers southeast of the Trapiche Project.

For 2024, we plan to execute 1,500 meters of drilling in this anomaly.

*Don Jorge.* The Project is located in the Puno department and consists of 7,481 hectares of mining concessions and hosts a series of polymetallic silver-rich veins. In December 2022, we obtained the approval of the Environmental Impact Statement for Exploration (DIA), and in October 2023 we obtained the "Inicio de Actividades". In 2024, we plan to execute 3,000 meters of exploration drilling.

*MLZ-Sulfides.* The project is located in the Cajamarca department and consists of a series of hydrothermal breccia pipes with gold and copper mineralization. To date, we have identified four economic breccia pipes in a vertical extend of 300 meters.

In 2023, we conducted 11,080 meters of exploration drilling, and in 2024, we plan to execute 10,000 meters of drilling.

*Chaska,* is located 7 kilometers south of the Tambomayo mine and hosts a series of epithermal veins with gold and silver mineralization.

In 2023, we started the 4<sup>th</sup> semi-detailed environmental impact study; which is expected to be filed during 2024.

#### **Exploration Projects in Operating Areas**

*Orcopampa.* During 2023, we completed 3,800 meters of exploration drilling in the Ariana target, without positive results. No further exploration is required in this target.

In Melissa, we executed 2,320 meters of drilling and identified a breccia with gold and silver mineralization but with low grades. We do not plan to conduct any further exploration. Finally, in Melissa East, we completed 2,700 meters of exploration drilling which has allowed us to identify two new veins. The drilling program is ongoing during 2024.

*Tambomayo.* In 2023, we completed 2,120 meters of exploration drilling in the Venturosa target without positive results. We do not plan to conduct any further exploration. Finally, in the Camila target, we completed 50 meters of exploration tunnels and 600 meters of exploration drilling at the 4290-mine level. The drilling program is ongoing during 2024.

*Uchucchacua.* During 2023, we executed 11,000 meters of exploration drilling and 3,246 meters of infill drilling in the Huantajalla East target. For 2024 we plan to execute an additional 6,000 meters of exploration and infill drilling.

In the Cachipampa vein system, in 2023 we executed 18,900 meters of infill drilling between the 3990 and 3780 mine levels. For 2024, we plan to execute 14,500 meters of additional infill drilling.

Finally, in other targets for 2024 we plan to execute 440 meters of exploration tunnels and 11,000 meters of exploration drilling.

[Table of Contents](#)

*El Brocal.* During 2023 we started two long-term exploration programs. The first one is Unish-Bohojorquez, where we executed 510 meters of exploration tunnels at the 4022 mine level. For 2024, we plan to execute 550 meters of additional tunnels and 2,200 meters of exploration drilling. The second target is called “Falla Longitudinal”, In 2023 we completed 170 meters of exploration tunnels and 1,800 meters of exploration drilling at the 3912 mine level. For 2024, we plan to execute 100 meters of exploration tunnels and 2,600 meters of exploration drilling.

### Competition

We believe that competition in the metals market is based primarily upon cost. One of Buenaventura’s competitive advantages is that it has a diversified portfolio in terms of commodities (which include gold, silver, copper, zinc and lead) and in a number of assets (with 7 mining operations located in different regions of Peru). Additionally, Buenaventura’s long term business plan relies on three main drivers of value: its portfolio of operations, its portfolio of projects (seeking organic growth with a disciplined capital allocation) and, finally, Buenaventura’s position as a ‘partner of choice’ for several other companies in the mining sector in Peru. We also compete with other mining companies and private individuals for the acquisition of mining concessions and leases in Peru and for the recruitment and retention of qualified employees.

### Sales of Metal Concentrates

All of our metal production is sold to smelters and traders, either in concentrate or metal form, such as gold-silver concentrate, lead-silver concentrate, zinc-silver concentrate, copper-gold-silver concentrate, gold dore bars and refined gold and silver. Our concentrates sales are made under one to three-year, U.S. Dollar-denominated contracts, pursuant to which the selling price is based on world metal prices as follows: generally, in the case of gold and silver-based concentrates, the London Bullion Market Association (“LBMA”) Spot AM/PM settlement prices for gold, averaged on the quotational period agreed, less certain allowances, and the LBMA Spot settlement price for silver, averaged on the quotational period agreed, less certain allowances; and, in the case of base-metal concentrates, such as zinc, lead and copper, the London Metals Exchange (“LME”) settlement prices for the specific metal, averaged on the quotational period agreed, less certain allowances. Sales of concentrates and metal allow for price adjustments based on their market price at the end of the relevant quotational period (QP), generally being the month of, the month – or more – following the scheduled month of shipment or delivery according to the terms of the contracts. Sales of concentrates and metals at provisional prices include a gain (loss) to be received at the end of the QP, based on the spread between the actual price at the end of the QP and the agreed contractual average prices; this is considered a variable portion of the consideration. Changes in the price during the QP are recognized in the “Sales of goods” caption of the consolidated statements of profit or loss.

The historical average annual prices for gold and silver per ounce and our average annual gold and silver prices per ounce for each of the last two years and through March 31, 2024 are set forth below:

	Gold		Silver		Copper	
	Average Annual Market Price	Our Average Annual Price(1)	Average Annual Market Price	Our Average Annual Price(1)	Average Annual Market Price	Our Average Annual Price
	US\$/oz.(2)	US\$/oz.	US\$/oz.(3)	US\$/oz.	US\$/t	US\$/t
2022	1,801	1,781	21.75	20.89	8,815	8,113
2023	1,943	1,954	23.39	23.98	8,483	8,418
2024 (through March 31, 2024)	2,070	2,111	23.34	23.44	8,438	8,258

(1) Our average annual price includes only the consolidated average annual price from our mines.

(2) Average annual gold prices are based on the LBMA AM/PM fix as provided by Fast Markets.

(3) Average annual silver prices are based on London Spot prices. Most of the sales contracts we enter into with our customers state a specific amount of metal or concentrate the customer will purchase. We have sales commitments from various parties for nearly all of our estimated 2024 production; however, concentrates not sold under any of our contracts may be sold on a spot sale basis to merchants and consumers.

(4) Average annual copper prices are based on the LME Cash ask price as provided by Fast Markets.

[Table of Contents](#)*Sales and Markets*

The following table sets forth our total revenues from the sale of gold, silver, lead, zinc and copper in the past two fiscal years:

Product	Year ended December 31, <sup>(1)</sup>	
	2022	2023
	(US\$ in thousands)	
Gold	299,747	279,731
Silver	157,924	196,340
Lead	32,950	21,401
Zinc	107,485	46,620
Copper	367,517	466,558
Manganese sulfate	361	—
Antimony	28,083	—
<b>Total</b>	<b>966,013</b>	<b>1,010,650</b>

(1) Does not include commercial deductions for refinery charges and penalties incurred in 2023 of US\$196.9 million and of US\$183.1 million in 2022.

Approximately 31.8% and 34.9% of our concentrate, doré bars and refined metal sales in 2022 and 2023 (without considering adjustments to prior periods liquidations, fair value from sale of concentrate or hedge operations), were sold outside Peru. Set forth below is a table that shows the percentage of sales that was sold to our various customers from 2022 to 2023.

	Percent of concentrates, doré bars and refined metal Sales	
	2022	2023
<b>Export Sales:</b>		
Asahi Refining Canada Ltd and Asahi Refining USA Inc.	22.8	20.1
Daye Qiansheng (HK) Investment Trading Limited	4.1	6.5
MRI Trading AG	3.6	2.7
Glencore International AG	0.4	1.8
Axaya AG	—	1.1
Others	0.9	2.7
Total Export Sales	31.8 %	34.9 %
<b>Domestic Sales:</b>		
Trafigura Peru	32.1	28.2
IXM Trading Peru S.A.C.	21.8	19.2
Glencore Peru S.A.C.	9.7	12.4
Andina Trade S.A.C.	1.9	2.2
Humon Latin America S.A.	1.5	1.6
Others	1.2	1.5
<b>Total Domestic Sales</b>	<b>68.2 %</b>	<b>65.1 %</b>
<b>Total Sales</b>	<b>100 %</b>	<b>100 %</b>

[Table of Contents](#)

The following table shows our committed sales volumes of copper, lead-silver, gold-silver and zinc concentrates from 2024 to 2026:

Concentrate	Wet tonnes 2024 <sup>(1)</sup>	Wet tonnes 2025	Wet tonnes 2026
Uchucchacua's Lead-Silver	45,370	—	—
Uchucchacua's Zinc	38,000	—	—
Yumpag's Silver	35,000	—	—
Tambomayo's Silver-Lead	9,000	—	—
Tambomayo's Zinc	11,000	—	—
El Brocal's Copper	269,000	232,000	236,000
El Brocal's Zinc	7,000	—	—
El Brocal's Lead-Silver	5,000	—	—
Julcani's Lead-Silver	2,500	—	—
Orcopampa Gold-Silver	1,000	—	—

Note: The price of the concentrate supplied under the contract is based on specified market quotations minus refining charges and deductions for refinery charges and penalties.

(1) Represents committed sales volumes from 2024 to 2026.

We also sell refined gold, which is derived from our operations at Orcopampa, Tambomayo, Coimolache and La Zanja to Asahi Refining, or "Asahi," which further refines the gold. During 2023, the price of gold supplied was determined based on, for the gold content, the quotation for gold at the London Bullion Market Association PM fixing in U.S. Dollars, and for the silver content, the quotation for silver at the London Bullion Market Association spot fixing in U.S. Dollars or at spot prices, minus, in each case, certain minimum charges, as well as charges for customs clearance and treatment of the gold (which varies depending on its gold and silver content). We may elect to have our material toll refined at Asahi's works and returned to our account for sale to third parties. Pursuant to our agreement, we are responsible for delivering the gold to Asahi's designated flight at the Lima airport.

#### **Hedging/Normal Sales Contracts**

We and our wholly owned subsidiaries are completely unhedged as to the prices at which our gold and silver will be sold. See "Item 3. Key Information—D. Risk Factors—Factors Relating to the Company—Our financial performance is highly dependent on the prices of gold, silver, copper and other metals."

El Brocal uses derivative instruments to manage its exposure to changes in the price of metals. Such derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

El Brocal's hedge is classified as a cash flow hedge. The effective portion of gain or loss on the hedging instrument is initially recognized in the consolidated statements of changes in equity, under the caption other equity reserves, while the ineffective portion is recognized immediately in the consolidated statements of profit or loss in the finance costs caption. Cerro Verde has not engaged in, and is currently not engaged in, gold or copper price hedging activities, such as forward sales or option contracts, to minimize their respective exposures to fluctuations in the price of gold and copper.

From January to December 2023, El Brocal had no outstanding hedging commitments related to copper or zinc operations.

#### **Regulatory Framework**

##### **Mining and Processing Concessions**

In Peru, as in many other countries, surface land is owned by private landowners, while the government retains ownership of all underground resources. Our right to explore, exploit, extract, process and/or produce silver, gold and other metals is granted by the Peruvian government in the form of mining and processing concessions. The rights and obligations of mining concession holders, as well as the requirements to explore, produce and process minerals are currently set forth in the General Mining Law (Single Unified Text approved by Supreme Decree No.014-92-EM). The statutory authority is the Ministry of Energy and Mines (MINEM).

[Table of Contents](#)

Pursuant to the General Mining Law, filers of mining claims must obtain a mining concession before engaging in any mining-related activity. Depending on the corresponding regime, applications for mining concessions must be filed with the Regional Mining Directorates of each regional government where the mining concession is located (in the case of artisanal and small-scale miners); or with Geological, Mining and Metallurgical Institute (INGEMMET), in the case of medium- and large-scale mining (general regime).

Mining concessions are irrevocable, provided holders comply with the obligations set forth in the General Mining Law and applicable regulations, mainly the payment of an annual concession fee per hectare granted and achievement of minimum annual production for each hectare, or payment of a penalty when applicable. Failure to achieve annual production or investment targets will result in a penalty. Failure to pay annual concession fees or penalties for two consecutive years in any mining concession will result in the cancellation of such mining concession. Failure to satisfy minimum annual production thresholds for a specified period of time (currently thirty years beginning the year after the mining concessions were granted for mining concessions granted after October 10, 2008, and thirty years beginning on January 1, 2009 for mining concessions granted before October 10, 2008) could result in cancellation of the mining concessions.

Our processing concessions enjoy the same duration and tenure as our mining concessions, subject to payment of a fee based on the plate capacity of the applicable processing plant. Failure to pay processing fees for two consecutive years will result in the cancellation of the processing concessions.

Our mining rights and processing concessions are in full force and effect under applicable Peruvian laws. We believe we are in compliance with all material terms and requirements applicable to the mining rights and processing concessions and that we are not subject to any condition, occurrence or event that would cause the revocation, cancellation, lapse, expiration or termination thereof, except that we may, from time to time, allow to lapse, revoke, cancel or terminate mining rights and processing concessions that are not material to the conduct of our business.

In addition to obtaining mining rights from the Peruvian government, applicable Peruvian regulations require to enter into an agreement with surface landowners and/or occupiers, of land located above the mineral resources to be explored or mined. Supreme Decree No.042-2017-EM requires such easements or land agreements to be completed before undertaking exploration or mining activities. We have been actively seeking to acquire surface land rights, easements for land covering prospective exploration targets, or ore deposits that could be brought into production in the future. Regarding processing concessions, Article 82 of Supreme Decree No.020-2020-EM, Mining Proceedings By-law, in force since August 9, 2020, requires holders of such concessions to own the land covering the concession or to have the authorization of the landowner. We have sought to acquire surface land rights in areas suitable for plant and/or processing facilities.

The possibility of developing mining activities in areas classified as urban or urban expansion, is restricted, there must be compatibility of such areas and mining activities. The Law Regulating Mining Concessions in Urban Areas and Urban Expansion Areas and related regulations defines procedures for granting mining rights in urban and urban expansion areas. To grant a mining concession in an urban area and in an urban expansion area, MINEM is required to receive the approval of the council of the applicable provincial municipality. The council has sixty days to issue its decision. Mining concessions in urban expansion areas are granted for 10-year terms, which may be renewed by MINEM subject to the approval of municipal authorities, but cannot exceed 100 hectares.

Since July 22, 2010, the Environmental Evaluation and Overseeing Body (OEFA), which depends on the Ministry of Environment (“MINAM”), is in charge of conducting all types of audits and levy fines on companies which fail to comply with their environmental commitments, either those set out in the applicable legislation, or those entered into in the environmental permits granted.

Law 29783 addresses employee health and safety and employer liability in mining activities. Accordingly, such employee health and safety and employer liability and related matters are now audited by the Ministry of Labor and Employment (MINTRA, through its technical entity *National Superintendence of Labor Inspection (SUNAFIL)*). Law 29783, as amended by Law 30222, establishes the minimum rules designed to prevent employee safety risks and allocate liabilities in relation to such risks. The main principle of this law is that the employer assumes the economic, legal and any liability arising from accidents or diseases suffered by the employee while working and guarantees the employee’s health and safety in connection with the employee’s work. This legislation entitles labor inspectors to inspect commercial facilities and, under certain circumstances, suspend operations. By Supreme Decree No.003-2013—TR, MINTRA transferred its security supervisory, audit and sanctioning functions to the *SUNAFIL*. Such law amended the relevant provision of the criminal code, which currently establishes that a person who intentionally breaches the safety and health provisions, and who after being required by the relevant authority, does not adopt the measures contemplated in such provisions, is deemed to jeopardize the life, health or physical integrity of such person’s employees and may be held criminally liable for such behavior.

[Table of Contents](#)

On July 28, 2016, Supreme Decree No. 024-2016-EM, as amended by Supreme Decree No. 029-2016-EM and Supreme Decree No. 023-2017-EM, relating to Occupational Health and Safety Regulations for Mining was published. These Regulations aim to prevent the occurrence of incidents, work-related accidents and occupational diseases, aiming to promote a culture of prevention of occupational hazards in mining activities. In addition, SUNAFIL is the competent authority for the supervision and enforcement of compliance with legal and technical standards related to employment practices and policies.

Occupational safety and health issues in mining activities are overseen by the Energy and Mining Supervisory Board (OSINERGMIN), the competent authority to supervise compliance of the legal and technical provisions related to worker's health and safety, but also entrusted with the supervision of mining infrastructure stability. As decreed in Supreme Decree No.128-2013-PCM, mining companies are required to make monetary contributions to OSINERGMIN and to fund OEFA's activities.

**COVID-19 Pandemic**

On March 11, 2020, Supreme Decree N°008-2020-SA declared a National Health Emergency due to the COVID-19 pandemic. The severe restrictions initially imposed by said Supreme Decree and other regulations relaxed with the implementation of vaccination programs and a reduction of COVID-19 effects.

Ministerial Resolution 031-2023-MINSA ended the Health Emergency on May 25, 2023. Nevertheless, certain simpler rules are still in effect. Resolution No. 022-2024-MINSA approved Administrative Directive No. 349-MINSA/DIGIESP-2024, which establishes new provisions for the prevention, surveillance and control of workers at risk of exposure to COVID-19. Such rules are mainly related to precautionary measures which, in general, are the following: (i) isolation, medical rest and reporting cases of COVID-19 to SISCOVID (ii) worker health and safety training; and (iii) use of masks (recommended, but not mandatory) for at-risk workers.

**Environmental Matters**

In 2005, Peru enacted the General Environmental Law (Law No. 28611), which establishes the main environmental guidelines and principles applicable in Peru. Pursuant to the General Environmental Law, the MINAM issued national environmental regulations, which have gradually replaced prior guidelines governing governmental agencies environmental competencies. OEFA, as the environmental enforcement agency, has the authority to inspect mining operations and fine companies that fail to comply with prescribed environmental regulations and their approved environmental assessments.

In May 1993, the regulation for environmental protection under mining and metallurgical activities (*reglamento para la proteccion ambiental en la actividad minero - metalúrgica*), was published and approved by Supreme Decree No. 016-93-EM. This regulation required every mining unit that began operations before May 1993 to file a Preliminary Environmental Assessment ("EVAP") followed by a Program for Environmental Adequacy and Management ("PAMA"). Additionally, an EIA had to be submitted for any new operations. In 2014, this regulation was repealed by Supreme Decree No. 040-2014-EM (*reglamento de Protección y Gestión Ambiental para las Actividades de Explotación, Beneficio, Labor General, Transporte y Almacenamiento Minero*), approved on November 12, 2014, which regulates mining production, processing, labor, transportation and storage and sets forth a new set of requirements for these activities. Going forward, social and technical teams from MEM will gather the baseline information to regulate these activities. Early involvement by the regulatory authority in environmental assessments processes is expected to shorten approval times. On March 2, 2020 this regulation was modified by Supreme Decree N° 005-2020-EM (*Modificación del Reglamento de Protección y Gestión Ambiental para las Actividades de Explotación, Beneficio, Labor General, Transporte y Almacenamiento Minero*), amending articles 76, 102 and 132. Pursuant to these modifications the ITS would permit the reserve confirmations through underground works, communicate ITS approval to the social influence area and direct the storage of concentrate minerals in warehouses out of mining concessions. This modification also created Article 133A which introduces the possibility of executing certain changes and improvements without modifying the EIA, though only with a Prior Communication (*Comunicación Previa*). During September 2021, MINAM published and approved by Supreme Decree N° 027-2021, directing that the Servicio Nacional de Meteorología e Hidrología (the "SENAMHI"), have the exclusive authority and jurisdiction to evaluate and review all air pollution models required from mining sector participants during the review of environmental impact assessments.

[Table of Contents](#)

In 1996, MEM also issued regulations that establish maximum permissible levels (“LMPs”) of (i) liquid effluents emissions and (ii) elements and compounds present in gaseous emissions resulting from mining activities. Mines and processing plants that were in operation before May 1993 were required to comply with LMPs within 10 years and in the meantime, operators were required to prepare Environmental Adaptation and Management Programs, or PAMAs, that set forth plans to ensure compliance with more stringent LMPs. The first General Water Law was enacted in 1969. In 2008 and 2010, MINAM enacted new water quality standards and new LMPs for liquid effluents, and, in 2009, all Peruvian mining companies were required to submit updated environmental management plans that complied with water quality standards and new LMPs for liquid effluents to MEM. By the end of 2015, Supreme Decree No. 015-2015-MINAM (the “2015 Decree”) was enacted, modifying water quality standards for designated beneficial uses which apply to mining companies and establishing supplementary provisions related to compliance. In 2017, Environmental Quality Standards (*Estándares de Calidad Ambiental*) (ECAs) for water were modified by Supreme Decree No. 004-2017-MINAM. Permissible maximum limits approved in 2010 are still valid.

In May 2008, the MINAM was created by Legislative Decree No. 1013. MINAM’s main functions include formulating and implementing policies and regulations related to environmental matters and pollution control, including regulation of air and water quality standards, through supervision and education.

On March 26, 2013, Supreme Decree No. 002-2013-MINAM regarding soil quality became effective. It approved the ECAs for soils, or “Standards,” which are applicable to any project or activity that may generate an environmental impact. Subsequently, on March 25, 2014, supplementary provisions for the application of the standards were approved through Supreme Decree No. 002-2014-MINAM. Projects operating at the time those regulations came into force were required to submit the first phase of soil characterization within twelve months of the passage of the decree. Buenaventura and its associated companies submitted this information within the required time.

In 2017, new ECAs for soils were approved by Supreme Decree No. 011-2017-MINAM, replacing the ECAs approved by Supreme Decree No. 002-2013-MINAM. The new ECAs are applicable to new environmental assessments that are required to carry out future mining activity in accordance with the mining regulations. With respect to the environmental assessments that were approved prior to the approval of the new ECAs, Supreme Decree No. 002-2013-MINAM will remain applicable and the new ECAs will only be enforced when the approved environmental assessments need to be modified or updated. In 2017, Supreme Decree No. 012-2017-MINAM replaced Supreme Decree No. 002-2014-MINAM, approving new supplementary provisions for application of the new ECAs. Buenaventura and its associated companies have taken into consideration all new environmental regulations when executing its mining activities.

In 2012, Peru enacted Supreme Decree No. 020-2012-EM, which added Chapter XVII to the Mining Proceedings Regulations approved by Supreme Decree No. 018-92- EM. The new provisions require the approval of the General Mining Directorate of MEM or of the relevant regional government before proceeding to start and re-start exploration, development, preparation and exploitation. The authorizations to start and re-start mining activities may need to be pre-approved by MEM if the mining activities affect indigenous or native people.

In addition, in December 2017, a new regulation for Solid Waste Management was approved by Supreme Decree No. 014-2017-MINAM which brought into force the new Law for Integral Management of Solid Waste, approved by Legislative Decree No. 1278 in December 2016. This resulted in new regulations for all extractive productions and services in Peru, including mining, which prioritize the material and energy recovery of solid waste through different methods, including recycling, reuse and co-generation.

[Table of Contents](#)

*Regulations governing mining explorations.* In May 2008, the Peruvian government enacted Supreme Decree 020-2008-EM, which governs mining exploration activities and related matters. At the end of 2017, this Supreme Decree was modified by a new regulation for exploration activities. Under Supreme Decree 042-2017-EM, exploration activities fall into two categories: Category I and Category II. Category I exploration activities are those involving no more than 40 drilling platforms or affecting a surrounding area measuring less than 10 hectares in size, while Category II exploration activities are those involving between 40 and 700 drilling platforms and affecting an area measuring greater than 10 hectares. For Category I exploration activities, an Environmental Impact Statement (*Declaración de Impacto Ambiental*) (DIA) is required. For Category II exploration activities, a semi-detailed EIA (EIASd) that incorporates technical, environmental and social matters is required. In addition, the new regulation approved by Supreme Decree No. 042-2017-EM requires an Environmental Technical Report (*Ficha Técnica Ambiental*) (FTA), which is a complementary environmental assessment for exploration activities that do not have significant negative impacts. Exploration activities must start within twelve months following the date that the DIA or EIASd is approved. The DIA, the EIASd and the FTA, as applicable, must be approved before exploration activities begin. Any commitments assumed by mining companies in a DIA, EIASd or FTA are mandatory and, if they are not fulfilled, OEFA has the authority to fine non-compliant mining companies. The regulation also provides that the holder of mining concessions will perform specified closure and post closure activities during exploration programs. In addition, fines can be imposed if exploration programs begin before the DIA, the EIASd and the FTA are approved, and the approval of environmental assessments for exploration activities performed within protected natural areas requires the approval of the competent authority. Exploration in Prehispanic Archeological Sites (referred to in Supreme Decree No 004-2000-ED) is forbidden unless expressly authorized by the Ministry of Culture.

In May 2008, MEM also enacted Supreme Decree No 028-2008-EM, which regulates the citizen participation process within the framework of environmental permit approval. The DIA and EIASd provide local communities with an opportunity to engage actively in this process.

The regulation for exploration activities Supreme Decree No. 042-2017-EM, was modified by Supreme Decree No. 019-2020 - EM. The most important changes are: the Ministry de Energy and Mines allows the positive administrative silence for FTA, additional assumptions for Prior Communication, the determination of a deadline to OEFA which must conduct the final closure inspection and the rules modifications of Citizen Participation for the FTA.

The following DIAs and EIASd were approved in 2023:

**Buenaventura**

<u>Mine/Project</u>	<u>Type of Study</u>	<u>Approving Resolution</u>	<u>Date of Approval</u>
La Zanja	Tenth Modification of the EIASd	Board Resolution N° 263-2023-MINEM/DGAAM	18/10/23
Yumpag	Third Modification of the EIASd	Board Resolution N° 010-2023-MINEM/DGAAM	03/02/23

*Regulations Promoting Investments.* Supreme Decree 054-2013-PCM was passed to promote investment projects. It allows companies to submit a supporting technical report, ITS (Informe Técnico Sustentatorio), to modify ancillary components, capacity expansions, or introduce technological improvements in exploration and exploitation activities. SENACE (EIAd) and MEM (DIA and EIASd) will then issue a compliance waiver within no more than 15 working days from the date of submission. This should facilitate the approval of environmental assessments for our new exploration projects and simplify the issuance of certificates of non-existence of archeological remains required for mining projects.

On December 28, 2015, the *Servicio Nacional de Certificación Ambiental* (SENACE), which operates under the auspices of MINAM, took responsibility for the assessment and approval of detailed EIA (EIAd) submitted by private, public, or mixed-capital organizations. This development is consistent with the expansion of MINAM's technical and regulatory capacities. In 2020, EIAs for Yumpag and Trapiche were prepared under SENACE supervision.

[Table of Contents](#)

Moreover, the Environmental Baseline Elaboration Guidelines (*Guía para la elaboración de la Línea Base en el marco del Sistema Nacional de Evaluación del Impacto Ambiental– SEIA*) and the Identification and Characterization of Environmental Impacts Guidelines (*Guía para la Identificación y Caracterización de Impactos*) were approved by Ministerial Resolution No. 036-2018-MINAM in 2018. The purpose of the aforementioned guidelines is to provide information, directives and references to professionals involved in the review of baselines, as well as to provide general guidelines to the project owner or consulting firm for the process of identifying and evaluating the impacts on the environment (including physical, biological and social impacts), the results of which allow decisions to be made on the environmental viability of the project.

Finally, in 2021, Supreme Decree No. 026-2021-EM modified the Supreme Decree No. 040-2014-EM, giving companies the option to carry out actions not incorporated in their Environmental Impact Statements, when the purpose of that action was to control the effects of environmental emergencies. Companies must communicate the execution of these actions to the OEFA within 10 days of execution.

In 2023 the following EIAAd were approved:

Mine/Project	Type of Study	Buenaventura	
		Approving Resolution	Date of Approval
Yumpag	EIAAd	Board Resolution N° 000120-2023-SENACE-PE/DEAR	06/09/23

Finally, the Environmental Baseline Elaboration Guidelines (*Guía para la elaboración de la Línea Base en el marco del Sistema Nacional de Evaluación del Impacto Ambiental– SEIA*) and the Identification and Characterization of Environmental Impacts Guidelines (*Guía para la Identificación y Caracterización de Impactos*) were approved by Ministerial Resolution No. 036-2018-MINAM in 2018.

In January 2022, The SENACE (Servicio Nacional de Certificación Ambiental para las Inversiones Sostenibles) enacted Supreme Decree N°004-2022-MINAM, Procedimiento Único del Proceso de Certificación Ambiental (PUPCA), becoming effective in July 2022, which requires mining companies to conduct accompanying actions during the elaboration of Environmental Impact Assessment or their modifications, also the execution of diverse public participation procedures. It is important to point out that this regulation has introduced mandatory citizen participation mechanisms for the ITS. Likewise, a public hearing will be held for the MEIAd. Although, in May 2023, Supreme Decree No. 006-2023-MINAM modified the Decree No. 004-2022-MINAM, suspending the PUPCA until January 1, 2025, and allowing companies to continue with the previous law. In our case, MEIAd of Brocal and Tambomayo continue with PUPCA framework, while in case of MEIAd of Orcopampa and Julcani was possible to desist of PUPCA and continue with the previous law.

In September 2023, the detailed environmental impact study (EIAAd) of the Yumpag Carama was approved. With this environmental certification, BVN be able to mine 1000 ton/day of ore and process it in Uccuchacua plant.

*Regulations governing mine closures.* In 2003, Law No. 28090, *Ley que Regula el Cierre de Minas* (Law that Regulates the Closing of Mines), established the obligations and procedures that mining companies must follow to prepare, submit and execute plans for the closing of mines, or “Closure Plans,” and the granting of financial environmental guarantees to secure compliance with Closure Plans. We are required to submit a Closure Plan for new projects to MEM within one year following approval of an EIA or PAMA; and inform MEM semi-annually of any progress on the conditions established in the Closure Plan. We are also required to perform the Closure Plan consistent with the schedule approved by MEM during the life of the project and to set up a financial environmental guarantee that covers the estimated amount of the Closure Plan. In addition, Supreme Decree No. 020-2008-EM requires mining companies that perform exploration activities to conduct certain closing activities in accordance with the approved environmental assessment, subject to deferral under certain circumstances, and contemplates a Closure Plan to be submitted by the mining company following the terms and conditions of Supreme Decree N° 033-2005-EM. Supreme Decree N° 036-2016-EM modified articles 12 and 17 and included articles 46-A y 66-A of the Supreme Decree N° 033-2005-EM.

In August 2021, the MEM enacted Law No. 31347 regulating the closure of mines. This law makes important changes in the obligations of mine owners regarding the financial guarantees required in their Mine Closure Plans. The law requires that Mine Closure Plans guarantee the progressive closure for the main facilities (Componentes Principales) and also requires that Mine Closure Plan guarantees must cover the costs of environmental rehabilitation ordered by OEFA. Finally, the law also regulates the actions and obligations of the authorities in case of abandonment of mining facilities.

In 2017, our Closure Plans were approved by MEM for all of our mines and advanced explorations activities.

[Table of Contents](#)

In 2022 there were closure plans under evaluation for Orcopampa, Julcani, Uchucchacua, Pozo Rico, Tambomayo, San Gabriel, Tantahuatay as mine operations and for La Zanja as exploration project.

In 2023, closure plans were approved for Orcopampa, Julcani, Uchucchacua, Tambomayo, San Gabriel, La Zanja, Tantahuatay as mine operation units and La Zanja as an exploration Project. Besides, there were submitted new and updating closure plans for Yumpag, San Gabriel, Tambomayo and Rio Seco copper plant.

On November 9, 2009 Supreme Decree No. 078-2009-EM became effective, creating additional environmental obligations for mining concessions holders. Under this provision, mining concessions holders that performed mining activities, including mining exploration, production and processing activities or related activities, without having an environmental certification are required to prepare and perform an environmental remediation plan to address the environmental impact in the areas in which such activities have been conducted. Environmental remediation plans can only be filed once mining activities have ceased and contain a detailed description of all mining facilities and activities performed without the corresponding environmental certification, including maps and related information, a detailed description of the environmental impacts created by such activities, a detailed description of the remediation actions, a detailed description of the compensation that is proposed to be made, a budget and schedule of the remediation activities, including their costs, and a bond in favor of MEM for the cost of the execution of the measures contained in the environmental remediation plan. Once the environmental remediation plan is completed, mining concessions holders are required to inform the auditing entity so it can verify that the actions were carried out as approved. The auditing entity is required to send the respective report to the relevant authority so that the bond may be returned. Supreme Decree No. 013-2019-EM repealed Supreme Decree No. 078-2009-EM and introduced several amendments to Supreme Decree No. 033-2005-EM, which regulates the Mine Closure Plans.

Law No. 28271, Law that Regulates the Environmental Liabilities of Mining Activities (*Ley que Regula los Pasivos Ambientales de la Actividad Minera*), came into force on July 7, 2004 and serves to regulate the identification of environmental liabilities and financial responsibility for remediation in mining activities, in each case to mitigate any negative impact mining may have with respect to the health of the population, environment and property. Pursuant to Law No. 28271, as amended by Law No. 28526 and Legislative Decree No. 1042, MEM's technical branch will identify environmental liabilities, mining companies responsible for abandoned mining facilities, mining works and residue deposits that may be linked to such environmental liabilities and holders of inactive mining concessions with mining liabilities. Holders of inactive mining concessions with environmental mining liabilities will be required to submit a Closure Plan and enter into environmental remediation agreements with MEM to perform any studies and work necessary to control and mitigate the risk and effects of any contamination. Regulations under Law No. 28271, Regulations of Environmental Liabilities of Mining Activities (*Reglamento de Pasivos Ambientales de la Actividad Minera*), were approved by Supreme Decree No. 059-2005-EM. and then modified by Supreme Decree No. 003-2009-EM.

We have submitted Closure Plans to MEM for all our mining concessions with environmental mining liabilities. To date, the Hualchocopa, Lircay, Bella Unión-Paucaray, Chaquella, Ayacucho and Rifle Rumimaqui, Santa Barbara and Delta Upamayo have all been closed, and post-closure activities are currently underway on all of them.

In 2022, after many years of evaluation, the government established that 2 new projects with environmental liabilities must be managed by Minera Colquirrumi, a subsidiary of Buenaventura, they are Los Negros and El Dorado in the northern part of the country.

We anticipate additional laws and regulations relating to environmental matters will be enacted over time. The development of more stringent environmental regulations in Peru could impose additional constraints, delays and additional costs on our operations that would require us to face additional challenges in the future. Although we believe that we are substantially in compliance with all known and applicable environmental regulations, there is no assurance that future legislation or regulatory developments will not have an adverse effect on our business or results of operations.

[Table of Contents](#)

**Prior Consultation with Local Indigenous Communities**

In 2011, Peru enacted Law No. 29785, the Law of Prior Consultation for Indigenous and Native Communities (Ley del Derecho a la Consulta Previa a los Pueblos Indígenas y Originarios – ILO 169 Convention). This law establishes a prior consultation procedure that the Peruvian government must undertake in concert with local indigenous communities whose collective rights may be directly affected by new legislative or administrative measures. Under this law, the Peruvian governmental agency responsible for issuing or approving the administrative measure or decree in question, rather than the affected local indigenous community, retains the right to approve or reject the relevant legislative or administrative matter following such consultation. However, bearing in mind that all our future projects require the promulgation of legislative or administrative measures that impact collective rights of local indigenous communities, the required prior consultation procedure may result in delays, additional expenses or failure to obtain approval for such new project.

Regulations under Law No. 29785 were approved by Supreme Decree No. 001-2012-MC and became effective on April 4, 2012. These regulations specify the form and circumstances of the required consultation and the manner in which agreements will be formalized and provide for a consultation process that lasts no more than 120 calendar days. In 2019, Ministerial Resolution No. 304 2019 MINEM/DM was issued, establishing the administrative procedures from the Mining Sector that require prior consultation in case those procedures affect indigenous communities -- which are: (i) processing concession; (ii) authorization to initiate or re-initiate exploration, development, or exploitation activities; (iii) mineral transport; and (iv) mining labor.

After the COVID-19 pandemic, the Peruvian Central Government did not introduce legal provisions for the use of digital tools; consequently, ongoing prior consultation processes were disrupted. However, the Peruvian Central Government managed to include additional mechanisms within the framework of established COVID-19 protocols. Additionally, prior consultation processes are usually delayed by indigenous or political organizations making requests to the government, and companies involved, with demands for benefits or negotiations not contemplated. During 2022, prior consultation processes for San Gabriel, Explorations Yumpag and Ccelloccasa were completed by the General Office for Social Management, a branch of the Peruvian Ministry of Energy and Mines, despite adverse circumstances.

During 2023, the Prior Consultation process for the exploration and exploitation projects of Buenaventura Company were led by the General Social Office of the Mining and Mineral Minister in strict compliance with current regulations. So, after a long research activity and technical and legal evidence on the impact that exploration and exploitation projects could generate on the collective rights of the indigenous communities that surround them, it was demonstrated that these activities would not generate impacts and that the process prior consultation concluded satisfactorily.

<u>Mine/Project</u>	<u>Type of Study</u>	<u>Administrative Measure</u>
Don Jorge	Exploration Activities Start DIA	Exploration Start
Trapiche	Exploration Activities Start 5ta MEIA Sd	Exploration Start
Yumpag	Operation Activities Start EIAd	OGGS determined in the second phase that there would be no impact on collective rights (Prior Consultation concluded)

**Permits**

We believe that our mines and facilities have all necessary material permits to operate. All future exploration projects will require a variety of permits. Although we believe the permits required by existing mines and projects can be obtained in a timely fashion, permitting procedures complexity increases steadily, are time-consuming, and subject to potential regulatory delay; that said, material changes in current permitting processes could increase complexity for renewal of our existing permits. Non-renewal of existing permits or the imposition of additional permitting requirements could have a material adverse effect on our financial condition and/or operational results.

**Insurance**

We maintain a comprehensive insurance program designed to address specific risks associated with our operations. Our insurance program is provided through the local Peruvian insurance market with international support and covers the risks of property and business interruption, general civil liability against third parties and employer's against collaborators, vehicle insurance and the damages that these may cause to third parties, cargo transportation and mining equipment insurance.

[Table of Contents](#)**Mining Royalties and Taxes**

Under Peruvian law, holders of mining concessions are required to pay the Peruvian government a mining royalty (“*Regalia minera*”) for the exploitation of metallic and non-metallic resources. In accordance with Law No. 28258, as amended by Law No. 29788, mining royalties are payable either as a specified percentage of tax operating profit or 1% of revenues net, whichever is higher. If the mining royalty is calculated as a percentage of tax operating profit, marginal rates ranging from 1% to 12% that increase progressively for companies with higher operating margins will apply. Percentages for the distribution of proceeds from mining royalties were amended by Law No. 28323.

Mining companies that are a party to mining stabilization agreements are not required to pay a mining royalty during the tenure of their stabilization agreements.

In addition to mining royalties, pursuant to Law No. 29789, effective from October 1, 2011, mining operations in Peru are subject to an extraordinary mining tax. Mining companies that do not have taxation stability agreements with the Peruvian government, such as Buenaventura, will pay the “Special Mining Tax” (*Impuesto Especial a la Minería*). The Special Mining Tax is calculated each quarter as a percentage of operating profit. Marginal rates ranging from 2% to 8.4% that increase progressively for companies with higher operating margins will apply. Mining companies that have stability agreements with the Peruvian government will pay the “Special Mining Duty” (*Gravamen Especial a la Minería*) created by Law No. 29790. The Special Mining Duty is calculated as a percentage of operating profit, with marginal rates ranging from 4% to 13.12% that increase progressively for companies with higher operating margins.

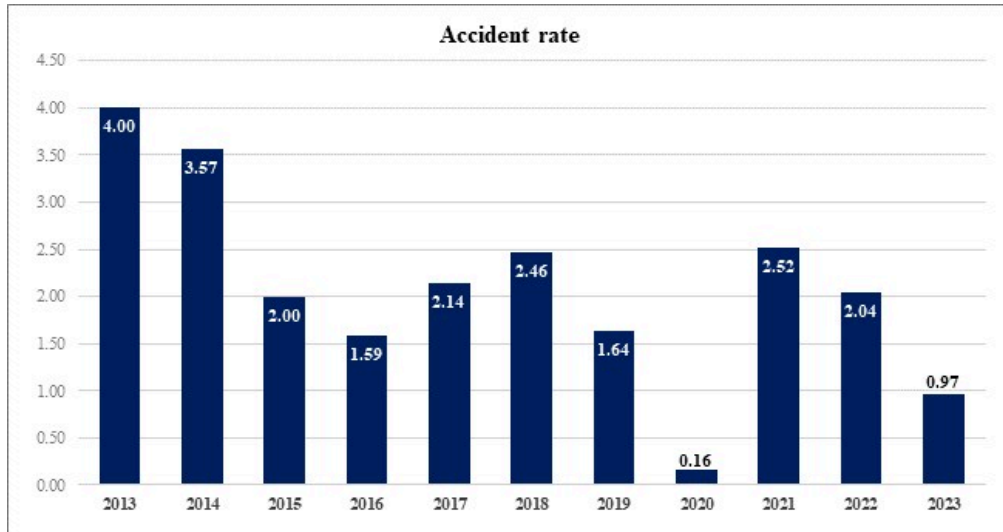

**Safety**

At Buenaventura, we believe that safety is an inherent part of every process, rather than something separate. This means that safety management is the responsibility of the operational staff in charge of each respective proves. Safety is part of our quality indicators and a cross-cutting value throughout the Company.

The Accident Rate decreased by 50 %, from 2.04 in 2022 to 0.97 in 2023, despite one fatal accident at the Tambomayo mining unit. There were 101 incapacitating accidents reported in 2023, an increase of 20% from 2022. The number of days lost, and man-hours worked in 2023 was also lower than in 2022, which had a direct influence on frequency, severity, and accident rates.

[Table of Contents](#)

The table below shows Accident Rates based on the number of fatal and lost time accidents 3,56 and days lost 273,06. The table shows a decreasing trend for Accident Rates between 2022 (2.04) and 2023 (0.97).

Note: The accident rate information is calculated based on 100% Buenaventura, 100% Brocal, 100% Coimolache, 100% Molle Verde, 100% La Zanja, 100% Rio Seco and 100% Conenhua.

Our main activities included the following:

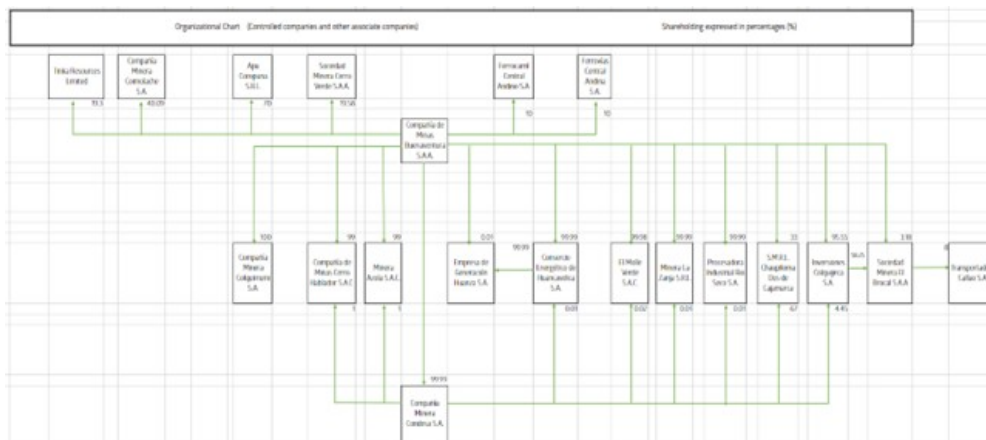

- Relationship building with union boards of directors through awareness-raising workshops titled “Founding Alliances to Boost the Participatory Safety Strategy.”
- Refresher for BVN and contractor employees to raise awareness of disruptive activities, with a focus on the family waiting for them at home (Self-care, the Right to Say NO) as part of the “Pact for Life” Program.
- Roll-out of the “Critical Risk Management” initiative, increasing the number of risks to thirteen to reinforce efficiency and sustainability of engineering controls.
- Improvements to the efficiency of corrective actions by prioritizing engineering operational controls and the application of the ICAM accident investigation methodology.
- Improvements to operational controls: sustainability, efficiency.
- Active participation as members of the SNMPE and roundtables on contributions to the amended Mining Safety Regulations bill.

We continue to work toward a Culture of Safe and Sustainable Production that involves all members of Buenaventura.

[Table of Contents](#)

**C. Organizational Structure**

As of March 31, 2024, we conducted our mining operations, explorations projects and other activities directly and through various majority-owned subsidiaries, controlled companies and other associate companies as described in the following organizational chart:

† All entities in this chart, except for Tinka Resources Limited (which is organized in Canada) are incorporated in Peru.

\* Compañía Minera Condesa S.A. holds 21,160,260 Common Shares of Compañía de Minas Buenaventura S.A.A., or approximately 7.70 % of our total Common Shares.

**Intermediate Holding Companies, Subsidiaries and Equity Participations**

***Compañía Minera Condesa S.A.***

Condesa, our wholly owned subsidiary, is a mining and facilities holding company. Condesa also holds a 7.70% interest in Buenaventura.

***Sociedad Minera Cerro Verde S.A.A.***

Buenaventura holds a 19.58% interest in Cerro Verde, which operates an open pit copper and molybdenum mining complex located 20 miles southwest of Arequipa, Peru. The site is accessible by paved highway. The Cerro Verde mine has been in operation since 1976 and was previously owned by the Peruvian government before its privatization in 1993. Freeport-McMoRan Inc., which is the operator, holds a majority interest in Cerro Verde.

***S.M.R.L. Chaupiloma Dos de Cajamarca***

Chaupiloma is a Peruvian limited liability company that until February 2022 received a Net Smelter Return royalty from certain mineral rights owned by Yanacocha and since February 2022 receives a variable consideration for the mining rights sold to Yanacocha. We own, directly and indirectly, through our interest in Condesa, a 100% interest in Chaupiloma.

[Table of Contents](#)***Consorcio Energético Huancavelica S.A. / Empresa de Generación Huanza S.A.***

Consorcio Energético Huancavelica (Conenhua) is an electrical transmission company that provides electricity to our operations through its transmission facilities. We own 100% of Conenhua and manage its operations. To secure a reliable energy supply from a clean and renewable source for our direct operations and projects at competitive prices, Conenhua, through its subsidiary Empresa de Generación Huanza S.A., or “Huanza,” was commissioned to construct a 90.6 megawatt capacity hydroelectric power plant in the valley of Santa Eulalia. This hydroelectrical plant began operating at full capacity in June 2014.

***Inversiones Colquijirca S.A. / Sociedad Minera El Brocal S.A.A.***

El Brocal owns the Colquijirca and Marcapunta Norte mines and the San Gregorio exploration project. El Brocal was formed in 1956 and is engaged in the extraction, concentration and sale of concentrates of polymetallic minerals, mainly copper, zinc, lead and silver. Currently, we own 61.43% of El Brocal through both direct and indirect ownership interests.

***Minera La Zanja S.R.L.***

La Zanja is located 35 kilometers northwest of the city of Cajamarca. La Zanja, which as of December 31, 2023, was 100% owned by us, began operations in September 2010 as an open pit mine producing gold and silver.

***Compañía Minera Coimolache S.A.***

Coimolache is a mining company that owns the Coimolache mine which is located in the province and district of Hualgayoc in the Cajamarca region. We hold a 40.094% interest and operate this mine, which commenced operations in mid2011 as an open pit mine producing gold and silver.

***Ferrocarril Central Andino S.A and Ferrovias Central Andina S.A.***

We hold a 10% interest in Ferrocarril Central Andino S.A. (FCCA) and Ferrovias Central Andina S.A. (FVCA). Both were incorporated in August 1999 and began operations in that year. FCCA, is an operating company (rail transport). FVCA, is the concessionaire of the central railroad, is dedicated to the infrastructure of the railroad.

***Apu Coropuna S.R.L.***

Buenaventura currently owns 70% of Apu Coropuna S.R.L., with the other 30% owned by Southern Peru Copper Corporation. Apu Coropuna S.A. was created for the purpose of conducting exploration within properties situated in Castilla, Arequipa.

***Procesadora Industrial Rio Seco S.A.***

Procesadora Industrial Rio Seco S.A. is our wholly owned subsidiary that owns and operates a monohydrate manganese sulphate crystallization plant situated in Huaral, Lima. This processing plant allows mining from areas with high silver and manganese content within the Uchucbacua mine, improving silver recovery. The Rio Seco Plant produces high purity manganese sulphate that is used in agriculture and the mining industry.

***El Molle Verde S.A.C.***

El Molle Verde S.A.C. is our wholly owned subsidiary that develops the Trapiche project, located in the Apurimac region. See “—B. Business Overview—Exploration Projects in Non-Operating Areas” above for further information about this project.

***Tinka Resources Limited***

Buenaventura holds 19.32% of Tinka Resources Limited, an exploration and development company that owns 100% of the Ayawilca Project, located at Daniel Alcides Carrión, Pasco.

[Table of Contents](#)**ITEM 4A. Unresolved Staff Comments**

None.

**ITEM 5. Operating and Financial Review and Prospects**

In this Item 5, we present information first with respect to Buenaventura, followed by information with respect to Cerro Verde, in which we have a 19.58% equity interest. We record our investment in Cerro Verde in accordance with the equity method as further described in “Item 5. Operating and Financial Review and Prospects—Buenaventura—A. Operating Results—General” and Note 2.4(f) to the Consolidated Financial Statements.

**BUENAVENTURA****Introduction**

The following discussion should be read in conjunction with the Consolidated Financial Statements as of December 31, 2022 and 2023 and for the years ended December 31, 2021, 2022 and 2023 and the related Notes thereto included elsewhere in this Annual Report, and Item 5 to our annual report for the year ended December 31, 2022 (the “2022 20-F”). The Consolidated Financial Statements are prepared and presented in accordance with IFRS as issued by the IASB. We present our consolidated financial statements in U.S. Dollars.

**A. Operating Results****General**

*Overview.* We were established in 1953 and are one of Peru’s leading producers of gold, silver and other metals. Our consolidated financial statements comprise all of our accounts and those of our subsidiaries, which include:

- the Julcani, Tambomayo, Orcopampa and Uchucchacua mining units;
- the La Zanja and Colquijirca mines, the latter is owned by our non-wholly-owned consolidated subsidiaries;
- Since February 2022, Chaupiloma receives a variable consideration for the mining rights sold to Yanacocha.
- Condesa, which is mainly a holding company for internal investments and other affiliated mining companies;
- Conenhua, which is mainly engaged in the transmission of electric power to Yanacocha and other mining companies;
- other minor subsidiaries; and
- discontinued operations.

We also have material equity investments in (i) Cerro Verde, which is an equity investee engaged in the exploitation and commercialization of copper and (ii) Coimolache, which is an equity investee engaged in the exploitation and commercialization of gold and silver. We account for these investments under the equity method.

*Cerro Verde.* As of December 31, 2023 and 2022, we had a 19.58% equity participation in Cerro Verde, which allows us to exercise significant influence over the company. As a result, we account for our investment in Cerro Verde using the equity method. Although Cerro Verde has no fixed dividend policy, there is an understanding that earnings not required for capital expenditures or future development projects are expected to be distributed.

*Results of operations.* The primary factors affecting our results of operations are:

- the amount of gold, silver, zinc and copper produced and sold;

[Table of Contents](#)

- prevailing world market prices for gold, silver, zinc and copper;
- commercial terms with respect to the sale of ore concentrates; and
- our operating expenses.

*Gold and silver price hedging.* Our revenues and earnings are strongly influenced by world market prices for gold, silver, zinc and copper that fluctuate widely and over which we have no control. Depending upon the metal markets and other conditions, we may from time to time hedge our gold and silver sales to decrease our exposure to fluctuations in the prices of these metals. We and our wholly-owned subsidiaries are currently completely unhedged as to the price at which our gold and silver will be sold. As a result, we are fully exposed to the effects of changes in prevailing market prices of gold and silver.

*Operating costs and expenses.* Operating costs and expenses consist of:

- operating costs, which are direct production costs, the major component of operating expenses;
- exploration costs in operational mining sites;
- depreciation and amortization expenses;
- exploration costs in non-operational mining areas;
- administrative expenses, which principally consist of personnel expenses;
- royalties, which consist of payments to third parties and the Peruvian government to operate leased mining rights; and
- selling expenses, which principally consist of freight expenses.

*Reserves.* We utilize the geological model that includes geological mapping, projection of ore-bearing structures, diamond drilling, core logging and chemical assaying, in addition to drifting along previously indicated mineralization, as one of the inputs to replace and grow reserves. In addition, we use metallurgical test-work of core and bulk samples as a follow-up activity to prove the amenability of any previously indicated mineralization to certain extraction methods available on site. Each reserve estimation we analyze this information with respect to tonnage, precious and other metals average grades, metallurgical recoveries and economic value and allocate funds preferentially to those zones that have the best potential to sustain or enhance profitable mine production in the near-term. Our mining operations are conducted by open pit and underground methods and consist of deposits that have exploration potential and in which the value or prospects for ore based on geologic evidence exceeds the value based on proven and probable reserves throughout most of the life of mines supported by them.

In addition, underground mine infrastructure, such as declines, shafts and/or dewatering/ore haulage crosscuts, that facilitate access to ore reserves are constructed and categorized as mine development. We consider such underground mine infrastructure vital to assure sustainable mine production and reserve production. The design, construction and implementation of our underground mine infrastructure are presented and supervised by our operations manager with the Board of Directors' (the "Board") approval. We capitalize mine development and mineral land costs incurred after we have approved the feasibility of the conceptual study of a project. Upon commencement of production, we amortize these costs over the expected life of the mining area, based on proven and probable reserves and other factors.

*Net income and net distributable income.* Under Peruvian law, each company is required to establish a legal reserve equal to at least 20% of its paid-in capital on an unconsolidated basis. An annual contribution of at least 10% of net income must be made until such legal reserve equals 20% of paid-in capital. The legal reserve may offset losses or be capitalized. However, following any instance in which the reserve is used, Peruvian law calls for mandatory replenishment of the reserve.

[Table of Contents](#)

*Royalties.* Royalty expenses consist mainly of payments made by us pursuant to lease agreements relating to mining rights for the Orcopampa mine. Specifically, we pay the lessor a royalty of 10% of the value of the concentrates produced. We are also required to pay the Peruvian government mining royalties and taxes. In addition to mining royalties, pursuant to Law No. 29789, effective October 1, 2011, mining operations in Peru are subject to an extraordinary mining tax. See “Item 4. Information on the Company—Buenaventura—B. Business Overview—Regulatory Framework—Mining Royalties and Taxes.”

*Environmental protection laws and related regulations.* Our business is subject to Peruvian laws and regulations relating to the exploration and mining of mineral properties, as well as the possible effects of such activities on the environment. We conduct our operations substantially in accordance with such laws and regulations.

*Discontinued operations.* During February 2022, Buenaventura sold its investment held in Minera Yanacocha S.R.L, previously classified in 2021 as available for sale and as a discontinued operation, for consideration collected in full in February 2022 of US\$300,000,000, as well as contingent payments linked to the production of the Sulphides Project that Yanacocha plans to develop and future increases in mineral prices, payments that can amount to up to US\$100,000,000. See Note 1(e) and Note 2.4(v) to the Consolidated Financial Statements. As of December 31, 2021 the mining units with discontinued operations were Yanacocha and Mallay. As of December 31, 2023 and 2022 the mining units with discontinued operations were Poracota and Shila-Paula.

*SUNAT litigation.* Buenaventura is involved in legal proceedings against SUNAT in connection with SUNAT’s refusal to recognize Buenaventura’s deductions with respect to contracts for physical deliveries and certain contractual payments made by the Company during the years 2007 and 2008, as well as tax loss, which was offset in 2009 and 2010.

During 2007 and 2008, Buenaventura modified its client contracts for the purposes of the sale of gold, shifting from a fixed price arrangement to a variable price arrangement. This allowed the Company to appropriately benefit from improved market prices. Additionally, caused Buenaventura to incur significant expenses during the two-year transition period from 2007 to 2008, which also impacted the income tax payable by Buenaventura for fiscal years 2008 and 2009. However, the modified pricing structure also favorably impacted Buenaventura’s financial results with a corresponding increase in Buenaventura’s income tax payment to SUNAT during subsequent fiscal years.

SUNAT’s position is that Buenaventura should disregard the additional expenses incurred in connection with the shift to variable price arrangement for purposes of calculating its income tax for fiscal years 2007 and 2008. According to SUNAT, said payments correspond to an early settlement of financial derivative contracts in situations where the Company did not establish the purpose or risks covered by such instruments. Additionally, SUNAT does not recognize the tax losses which the Company offset during fiscal years 2009 and 2010, related to the losses incurred during fiscal years 2007 and 2008.

The claim for the years 2007, 2008, 2009 and 2010 initially amounted to 373.3 million soles (approximately US\$100.5 million updated at the exchange rate of December 31, 2023) which, when accounting for alleged penalties and fees at the date SUNAT commenced collection proceedings, and according to SUNAT’s estimations, amounted to 2,107.5 million soles (approximately US\$567.6 million based on the exchange rate corresponding to December 31, 2023).

On November 26, 2020, following the intervening tax court’s decision to dismiss the Company’s appeal against certain Administrative Resolutions issued by SUNAT in connection with the above-referenced matter, SUNAT began collection proceedings in respect of such amounts. Following the commencement of such collection proceedings by SUNAT, the Company filed a request for deferral and payment plan of the amounts claimed by SUNAT in order to make such tax payments over a 67-month term, in addition to making interest payments in connection with such payments. The requested payment plan consists of an initial payment in an amount equal to 14% of the amount claimed by SUNAT and 66 equal installments for the remaining amounts. In order to finalize the deferral and payment agreement with SUNAT, the Company was required to deliver Letters of Credit in an amount equal to the aggregate claimed amount in accordance with applicable law. To satisfy this requirement, on December 30, 2020, the Company entered into the Syndicated L/C Agreement with a group of financial entities and following delivery of the Letters of Credit, SUNAT approved the Company’s payment plan.

[Table of Contents](#)

On July 30, 2021, the Company paid the full amount of the disputed tax assessment related to the 2007, 2008, 2009 and 2010 tax proceedings that were subject to deferment and installment and that are recorded in the caption "Trade and other receivables, net". For fiscal years 2007 and 2008, the total amount paid was S/1,583,128,000 (equivalent to US\$426,374,000 based on the exchange rate corresponding to December 31, 2023), which included updating the debt to reflect interest accrued as of July 30, 2021, such interest amounting to S/78,279,000 (equivalent to US\$21,082,000 based on the exchange rate corresponding to December 31, 2023). For fiscal year 2009, total amount paid was S/193,398,000 (equivalent to US\$52,199,000 based on the exchange rate corresponding to December 31, 2023) which included updating the amount claimed to reflect interest accrued as of July 30, 2021, such interest amounting to S/8,477,000 (equivalent to US\$2,283,000 based on the exchange rate corresponding to December 31, 2023). For fiscal year 2010, as a result of a deferral and installment, the total amount paid was S/356,691,000 (equivalent to US\$96,273,000 based on the exchange rate corresponding to December 31, 2023) which included the updating the amount claimed to reflect interest accrued as of July 30, 2021, such interest amounting to S/16,762,000 (equivalent to US\$4,514,000).

As of December 31, 2023, as a result of the advance payment mentioned above, the deferral and installment resolutions of the SUNAT tax claim have been rendered null and the letters of credit that were delivered as collateral for said disputed payments have been returned to the issuing banks.

In November 2023, the Fifth Chamber of Transitory Constitutional and Social Law of the Supreme Court notified the cassation ruling that declared the lawsuit filed by the Company unfounded regarding the derecognition of carry forwarded tax losses. In response, on December 22, 2023, the Company and its sponsoring lawyers filed an amparo request before the Constitutional Chamber of the Superior Court of Justice with the purpose of declaring the annulment of the cassation ruling in response of the grievances to the constitutional right to effective procedural protection of the Company.

As part of the assessment of the process's status as of 2023, the Buenaventura's legal advisors concluded that the probabilities of recovering a portion of the payments made under protest to the Tax Administration related to fiscal years 2009 and 2010 were less than 50%, for which it was recognized with effect on the results of the year a liability due to a claim to the Tax Administration for S/420,231,000 (equivalent to US\$113,178,000) regarding the portion of accounts receivable related to such carry-forwarded losses. The impact in profit or loss was distributed as follows: others, net (US\$9,598,000), financial expenses (US\$58,454,000), and income tax (US\$45,126,000).

The liability previously mentioned does not represent a withdrawal from the process, since the process remains in progress. Moreover, it does not imply a cash outflow as it is related to a payment in full made in previous years prior to the recognition of the account receivable.

In March 2024, the Supreme court notified the cassation ruling that declared unfounded the lawsuit filed by the Company to assert its position regarding derivative financial instruments operations in 2007. In the opinion of the sponsored lawyers, there are solid grounds to file an amparo claim, that will be ultimately resolved by the Constitutional Court, requesting the annulment of the aforementioned cassation as a result of the violation of constitutional rights and guarantees. The Company filed said constitutional action on April 19, 2024.

***Critical Accounting Policies, Judgment and Estimates***

The following is a discussion of our application of critical accounting policies that require our management, or "Management," to make certain assumptions about matters that are highly uncertain at the time the accounting estimate is made, and where different estimates that Management reasonably could have used in the current period, or changes in the accounting estimate that are reasonably likely to occur from period to period, would have a material impact on our consolidated financial statements. Management has identified the following accounting estimates and policies as critical:

- determination of mineral reserves and resources;
- units of production depreciation;
- closure of mining units provision;
- impairment of non-financial assets;

[Table of Contents](#)

- deferred income tax asset and recoverability;
- fair value of contingent consideration; and
- contingencies and uncertain tax treatment.
- Useful life of property, plant and equipment
- We also have certain accounting policies that we consider important, such as our policies for investments carried at fair value, and exploration costs that do not meet the definition of critical accounting estimates, as they do not require Management to make estimates or judgments that are subjective or highly uncertain.
- Management has discussed the development and selection of our critical accounting estimates with the Audit Committee of the Board.

***Determination of mineral reserves and resources***

Recoverable proven and probable reserves and resources are the part of a mineral deposit that can be economically and legally extracted or produced at the time of the reserve and resources determination. The determination of reserves involves numerous uncertainties with respect to the ultimate geology of the ore bodies, including quantities, grades and recovery rates. Estimating the quantity and grade of reserves and resources requires Buenaventura to determine the size, shape and depth of its ore bodies by analyzing geological data, such as sampling of drill holes, tunnels and other underground workings. In addition to the geology of Buenaventura's mines, assumptions are required to determine the economic feasibility of mining these reserves, including estimates of future commodity prices and demand, the mining methods Buenaventura used and the related cost incurred to develop and mine its reserves and resources. The process to estimate proven and probable ore reserves and resources is audited by an independent consultant each year.

All estimated reserves and resources represent estimated quantities of mineral proven and probable that under current conditions can be economically and legally processed. Changes could occur on reserve and resources estimates due to, among others, revisions to the data or geological assumptions, changes in prices, production costs and results of exploration activities. Changes in estimated reserves and resources could primarily affect the depreciation of development costs, property, plant and equipment related directly to mining activity, the provision for mine closure, the assessment of the deferred asset's recoverability and the amortization period for development costs.

***Units of production depreciation***

Reserves and resources (measured and indicated) are used in determining the depreciation and amortization of mine-specific assets, dissimilar to the subsidiary El Brocal who considers only reserves.

This results in a depreciation or amortization charge proportional to the depletion of the anticipated remaining life of mine production. Each mine's life is assessed annually to evaluate: (i) physical life limitations inherent to the asset, and (ii) new assessments of mineral reserves economically recoverable. These calculations require the use of estimates and assumptions, including the amount of mineral reserves economically recoverable. Changes in these estimates are recorded prospectively.

***Closure of mining units provision***

We record a provision for mine closure when a legally enforceable obligation arises, which is independent of the full depletion of the mine reserves. Once such an obligation has been appropriately measured, it is recorded by creating a liability equal to the amount of the obligation and recording a corresponding increase to the carrying amount of the related long-lived asset (mine development cost and property, plant and equipment). Over time, the amount of the obligation changes, impacting recording and accretion expenses. Additionally, the capitalized cost is depreciated and/or amortized based on the useful lives of the related assets.

[Table of Contents](#)

Any difference in the settlement of the liability is recorded in the results of the period in which such settlement occurs. The changes in the fair value of an obligation or the useful life of the related assets that occur from the revision of the initial estimates should be recorded as an increase or decrease in the book value of each of the obligation and related asset.

Following our accounting treatment, as of December 31, 2023 and 2022, we have recorded an accrual for mine closure costs of US\$259.3 million and US\$254.2 million, respectively, to comply with governmental requirements for environmental remediation for Buenaventura and its mining subsidiaries. Please see Note 15(b) to the Consolidated Financial Statements.

We assess our provision for closure of mining units annually. This assessment entails significant estimates and assumptions because there are a number of factors that will affect the ultimate liability for this obligation. These factors include estimating the scope and costs of closing activities, technological changes, regulatory changes, increases in costs compared to inflation rates and changes in the discount rates. Such estimates or assumptions may result in actual expenses in the future that differ from the amounts provisioned at the time the provisions were established. The provision at the date of this report represents our best estimate of the present value of future costs for the closure of mining units.

***Impairment of non-financial assets***

We determine whether the operations of each mining unit are cash generating units, considering each mining unit operation independently. We assess at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, we estimate the asset's recoverable amount. An asset's recoverable amount is (i) the fair value less costs of disposal and (ii) value in use and is determined for an individual asset (cash-generating unit) unless the asset does not generate cash inflows that are clearly independent of those from other assets or groups of assets. These assessments require the use of estimates and assumptions such as long-term commodity prices, discount rates, operating costs and others. These estimates and assumptions are subject to risk and uncertainty.

A cash-generating unit is the smallest identifiable group of assets that generates cash inflows from continuing use that are independent of the cash inflow generated by other assets or groups of assets. We have determined the operations of each mining unit as a single cash generating unit.

In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

At each reporting date, we update our assessment of the recoverability of the book value of our long-term assets under the procedures established by IAS 36 – "Impairment of Assets" for all of our mining units that had impairment indicators at each reporting date. As a result, we recorded impairment losses and recoveries of the provision during 2021 and 2022.

In 2021, we recorded an impairment in our Río Seco unit for US\$19.9 million. In addition, we recognized a reversal of impairment provision of US\$5.0 million for our La Zanja mining unit.

In 2022, we recorded a reversal of the impairment in our Río Seco unit for US\$19.9 million.

In 2023, we evaluated and concluded that there was no impairment as a result of the analysis of the recoverable amount based on the value in use of our mining units.

These impairment charges have not had an impact on our operating cash flows. Cash flows used to assess recoverability of our long-lived assets and measure the carrying value of our mining operations were derived from current business plans using near-term price forecasts reflective of the current environment and Management's projections for long-term average metal prices and operating costs.

Our asset impairment evaluations required us to make several assumptions in the discounted cash flow valuation of (i) our individual mining operations, including near and long-term metal price assumptions, production volumes, estimates of commodity-based and other input costs and (ii) proven and probable reserve estimates, including any costs to develop the reserves and the timing of producing the reserves, as well as the appropriate discount rate. Our December 31, 2022 and 2023 impairment evaluations were based on price assumptions reflecting prevailing metals prices for the following years.

[Table of Contents](#)

We believe events that could result in additional impairment of our long-lived assets include, but are not limited to, (i) decreases in future metal prices, (ii) decreases in estimated recoverable proven and probable reserves and (iii) any event that might otherwise have a material effect on mine site production levels or costs.

***Deferred income tax asset and recoverability***

Deferred tax assets are recognized for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

***Fair Value of contingent consideration***

The contingent consideration arising from a business combination is measured at fair value at the date of acquisition, as part of the business combination. If the contingent consideration is eligible to be recognized as a financial liability the fair value is subsequently re-measured at each date of the Consolidated Financial Statements. Determining the fair value of the contingent consideration is based on a model of discounted future cash flows. The key assumptions take into account the likelihood of achieving each goal of financial performance as well as the discount factor. The results of the re-measurement are recorded as financial income or cost in the Consolidated Statements of Profit or Loss, see note 29(b) of the Consolidated Financial Statements.

***Contingencies and uncertain tax treatment***

Contingent liabilities, when identified, are assessed as either remote, possible or probable. When it is probable that future events will confirm the existence of present obligations that will require an outflow of resources to settle such obligations, the Group record a provision in the consolidated financial statements. Contingent liabilities deemed as possible are only disclosed, together with a possible debit range, when determinable, in notes to the Consolidated Financial Statements.

Contingent assets are not recognized in the Consolidated Financial Statements; however, they may be disclosed in notes to the Consolidated Financial Statements if it is probable that such contingent assets will be realized. See Note 31(c) and (d) to the Consolidated Financial Statements.

Determining contingencies inherently involves the exercise of judgment and calculation of the estimated outcomes of future events.

The Group is subject to income tax in all countries in which it operates. Significant judgement is required in determining the income tax provision. The ultimate tax determination is uncertain for many transactions and calculations. The Group also recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred tax assets and liabilities in the period in which such determination is made.

The Group determines whether to consider each uncertain tax position separately or together with one or more other uncertain tax positions and uses the approach that better predicts the resolution of the uncertainty. In Peru, there are only two possibilities to measure uncertain Peruvian tax positions: 100% probability of recovery in the event that the Group has a favorable decision on the matter to be evaluated, or 0% probability of recovery, in the event that the Group does not prevail in the procedures before the tax authority. The Group determines, based on its tax compliance and transfer pricing studies whether or not it is probable that its tax positions (including those for the subsidiaries) would be accepted by the tax authorities.

[Table of Contents](#)**Useful life of property, plant and equipment***Straight-line method*

Depreciation is calculated under the straight-line method of accounting considering the lower of estimated useful lives of the asset or estimated reserves of the mining unit. The useful lives are the following:

<b>Property, Plant and Equipment</b>	<b>Estimated Years of Useful Life</b>
Buildings, constructions and other	2 to 11
Hydroelectric power station	20 to 40
Machinery and equipment	5 to 30
Transportation units	5
Furniture and fixtures	4 to 10
Other equipment	3 to 10
Computer equipment	3 to 5

An item of property, plant and equipment is de-recognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising from de-recognizing an asset (calculated as the difference between the proceeds from the sale and the book value of the asset) is included in the consolidated statement of profit or loss in the year the asset is de-recognized.

**Results of Operations for the Years Ended December 31, 2023 and 2022**

*Sales of goods.* Sales of goods increased by 1%, mainly due to the net effect of variation of volume and average realized prices, as set forth in the chart below:

<b>Sales of goods</b>	<b>Year ended December 31,</b>			
	<b>2022</b>	<b>2023</b>	<b>Variation</b>	<b>Variation</b>
	<small>(US\$ in thousands)</small>			
Copper (a)	367,278	466,558	99,280	27 %
Gold (b)	299,747	279,731	(20,016)	(7) %
Silver (c)	157,923	196,340	38,417	24 %
Zinc (d)	107,486	46,620	(60,866)	(57) %
Lead	32,951	21,401	(11,550)	(35) %
Manganese sulfate	361	—	(361)	(100) %
Antimony	28	—	(28)	(100) %
	<b>965,774</b>	<b>1,010,650</b>	<b>44,876</b>	<b>5 %</b>
Commercial deductions (e)	(183,077)	(196,893)	(13,816)	8 %
Hedge operations (f)	12,774	6,056	(6,718)	(53) %
Adjustments to prior period liquidations	(920)	(450)	470	(51) %
Fair value of accounts receivable	6,648	(8,402)	(15,050)	(226) %
<b>Total sales of goods</b>	<b>801,199</b>	<b>810,961</b>	<b>9,762</b>	<b>1 %</b>

- (a) Copper sales. The increase in copper sales is mainly due to increases of 22% in the volume of copper sales of the Colquijirca mining unit, and a 4% increase in the average realized price.
- (b) Gold Sales. The decrease in gold sales is mainly due to the net effect of: (i) decreases of 69%, 22% and 20% in the volume of gold sales in La Zanja, Tambomayo and Colquijirca mining units; respectively, partially offset by an increase of 12% in Orcopampa mining unit, and (ii) an increase of the average realized gold price of 10%.
- (c) Silver sales. The increase in silver sales is mainly due to the net effect of: (i) the resuming operation of Uchucchacua's processing plant that was suspended in the previous year which increased its volume of silver sales in 427%, (ii) decrease of 37, 10% and 6% in the volume of silver sales in the Julcani, Tambomayo and Colquijirca mining units; respectively and (iii) an/increase in the average realized silver price of 15%.
- (d) Zinc sales. The decrease in zinc sales is mainly due to the net effect of a 35% decrease in the average realized price and a decrease of 64% and 27% in the volume of zinc sales in the Tambomayo and Colquijirca mining units; respectively.

[Table of Contents](#)

- (e) Lead sales. The decrease in lead sales is mainly due to the volume of lead sold due to the net effect of: (i) decrease of 64% and 21% of lead production in Tambomayo and Colquijirca mining units; respectively, and (ii) the resuming operation of Uchucchacua's that contributed with 17% of the total lead volume of sales of 2023.(f) Commercial deductions. The increase in 8% in the commercial deduction is mainly explained by the increase in sales. Sales of goods figures are obtained by deducting the commercial deductions which corresponds to adjustments in price for treatment and refining charges. These charges can include certain penalties that, in accordance with the applicable contract, are deducted from the international fine metal spot price and that are incurred after the time of sale of the applicable concentrate.
- (g) Hedge operations. Sales of goods figures are obtained by considering the effect of the hedge operations related to sales. The group has suspended the use of hedge financial instruments since the first quarter of year 2023.
- (h) Fair value of accounts receivable. Net sales of goods figures are obtained by considering the variation in the fair value of the account receivable which varies according to the transaction prices of receivables outstanding at the end of each reporting date. A total of US\$8.4 million were expense in 2023, compared to an income of US\$6.6 million in 2023.

The following tables reflect the average realized prices and volumes of gold, silver, lead, zinc and copper sold during the years ended December 31, 2022 and 2023, as well as the variation in such average realized prices and volumes recorded for these years:

Average Realized Price	Year ended December 31,		
	2022	2023	Variation
Gold (US\$/oz.)	1,781.28	1,953.63	10 %
Silver (US\$/oz.)	20.89	23.98	15 %
Lead (US\$/t)	2,081.72	2,092.60	1 %
Zinc (US\$/t)	3,556.72	2,315.14	(35)%
Copper (US\$/t)	8,112.84	8,417.52	4 %

Volume Sold	Year ended December 31,		
	2022	2023	Variation
Gold (oz.)	168,276	143,185	(15)%
Silver (oz.)	7,559,712	8,188,411	8 %
Lead (t)	15,829	10,227	(35)%
Zinc (t)	30,220	20,137	(33)%
Copper (t)	45,276	55,427	22 %

*Sales of services.* Sales of services during 2023 decreased by 42% mostly due to the sale of our investment in Contacto Corredores de Seguros S.A. which revenues only comprised ten months in year 2023, as set forth in the chart below:

Sales by services	Year ended December 31,			
	2022	2023	Variation	Variation
			(US\$ in thousands)	
Insurance brokerage	17,207	8,099	(9,108)	(53)%
Energy generation and transmission	5,015	4,785	(230)	(5)%
<b>Total sales of services</b>	<b>22,222</b>	<b>12,884</b>	<b>(9,338)</b>	<b>(42)%</b>

[Table of Contents](#)

*Total operating costs.* Total operating costs in 2023 decreased by 4% compared to 2022 as indicated in the following table:

Operating Costs	Year ended December 31,			Variation
	2022	2023	Variation	
	(US\$ in thousands)			
Cost of sales of goods, excluding depreciation and amortization (a)	(461,942)	(457,354)	4,588	(1)%
Unabsorbed cost due to production stoppage (b)	(23,058)	(19,893)	3,165	(14)%
Cost of sales of services, excluding depreciation and amortization	(3,163)	(6,243)	(3,080)	97 %
Depreciation and amortization (c)	(176,781)	(181,039)	(4,258)	2 %
Exploration in operating units (d)	(80,796)	(49,229)	31,567	(39)%
Mining royalties	(17,733)	(18,839)	(1,106)	6 %
<b>Total operating costs</b>	<b>(763,473)</b>	<b>(732,597)</b>	<b>30,876</b>	<b>(4)%</b>

(a) *Cost of sales of goods, excluding depreciation and amortization.* The decrease in cost of sales of goods was mainly due to increase in our Uchucchacua and Orcopampa mining units in US\$15.5 million and US\$18.5 million; respectively, offset by a decrease in our Colquijirca and Río Seco mining units in US\$13.6 million and US\$22.2 million; respectively.

	2022	2023	Variation	Variation
	(US\$ in thousands)			
Colquijirca (i)	(254,798)	(241,229)	13,569	(5)%
Uchucchacua (ii)	—	(15,545)	(15,545)	100 %
Tambomayo	(73,036)	(70,260)	2,776	(4)%
Orcopampa (iii)	(55,313)	(73,774)	(18,461)	33 %
Río Seco (iv)	(48,519)	(26,345)	22,174	(46)
Julcani	(29,143)	(27,874)	1,269	(4)%
La Zanja	(1,133)	(2,327)	(1,194)	105 %
<b>Total operating costs</b>	<b>(461,942)</b>	<b>(457,354)</b>	<b>4,588</b>	<b>(1)%</b>

- (i) Colquijirca. The decrease of the cost of sales is mainly explained by the write-off of mineral stock for 483,563 DMT resulting from the landslide of north pit phase 12 that represented an additional cost of sale for US\$10.9 million recorded only in 2022. Additionally, El Brocal had a decrease of third parties services, supplies and spare parts consumption, energy, maintenance and other minor repairment services related to the temporal suspension of exploitation activities in the north mining pit for US\$3.1 million.
- (ii) Uchucchacua. The increase of cost of sales is explained by the end of the temporary suspension of mining exploitation activities that was requested to the Ministry of Energy and Mines in period 2021 (See Note 1(b) of the Consolidated Financial Statements)..
- (iii) Orcopampa. The increase in cost of sales was primarily due to lower productivity in the mining unit as a consequence of lower gold and silver grade of ore treated during 2023 from 10.01 gr/MT and 0.18 gr/MT in 2022 compared to 9.34 gr/MT and 0.14 gr/MT in 2023, and higher ore mined, which resulted in higher costs incurred in milling that produced low value ore production and sales.
- (iv) Río Seco. The decrease in cost of sales was primarily due to the lower sale and production of gold and silver dore that are processed from raw mineral obtained from La Zanja mining unit which suspended this activity. Currently, Río Seco mostly processes silver/lead minerals with manganese content of Uchucchacua, and gold/silver obtained through desorption and melting processes of the materials acquired from La Zanja, since the resuming operations of Uchucchacua only demanded services from Río Seco in December 2023, costs in Río Seco were mostly affected by La Zanja activities.
- (b) *Unabsorbed cost due to production stoppage.* The allocation of fixed production overheads to the costs of conversion is based on the normal capacity of the production facilities under IAS 2, *Inventories* and unabsorbed overheads are recognized as an expense in the period in which they are incurred. Cost of sales related to the unabsorbed costs are presented separately from the rest of cost of sales. As December 2023 and 2022, the unabsorbed costs are attributable to Río Seco and Uchucchacua mining units, the latter resumed operations in late September 2023.

[Table of Contents](#)

(c) Depreciation and amortization. The increase in depreciation and amortization was mainly due to increases in Colquijirca and Orcopampa of US\$15.0 million and US\$4.9 million, respectively, explained by the amortization of the costs resulting from the reconfiguration of phases of the north pit in Colquijirca (see note 1(b) of the Consolidated Financial Statements), and the increase of depreciation derived from the increase of the mine closure plan asset and mine useful life reduction from 4 years in 2022 to 2.3 years in 2023 of Orcopampa, offset by decreases in Tambomayo, and la Zanja of US\$9.3 million and US\$3.6 million, respectively, explained by the decrease in production in those units.

	2022	2023	Variation	Variation
	(US\$ in thousands)			
Colquijirca	(72,171)	(87,216)	(15,045)	21 %
Tambomayo	(59,125)	(49,862)	9,263	(16)%
Orcopampa	(7,757)	(12,625)	(4,868)	63 %
Julcani	(5,833)	(6,285)	(452)	8 %
Uchucchacua	(9,000)	(6,077)	2,923	(32)%
La Zanja	(7,459)	(3,855)	3,604	(48)%
Energy generation and transmission	(9,040)	(9,037)	3	0 %
Industrial activities	(6,396)	(6,082)	314	(5)%
<b>Depreciation and amortization</b>	<b>(176,781)</b>	<b>(181,039)</b>	<b>(4,258)</b>	<b>2 %</b>

(d) Exploration in operating units. The decrease in exploration in operating units was mainly due to decreases in our Colquijirca, Uchucchacua, Tambomayo and Orcopampa mining units in US\$8.9 million, US\$8.2 million, US\$6.5 million and US\$5.5 million; respectively.

	2022	2023	Variation	Variation
	(US\$ in thousands)			
Uchucchacua	(32,592)	(24,423)	8,169	(25)%
Colquijirca	(16,671)	(7,761)	8,910	(53)%
Julcani	(6,747)	(6,990)	(243)	4 %
Orcopampa	(11,594)	(6,071)	5,523	(48)%
Tambomayo	(9,980)	(3,446)	6,534	(65)%
La Zanja	(3,212)	(538)	2,674	(83)%
<b>Exploration in operating units</b>	<b>(80,796)</b>	<b>(49,229)</b>	<b>31,567</b>	<b>(39)%</b>

*Total operating expenses.* Operating expenses in 2023 decreased compared with those of 2022 due to changes in the following components:

<b>Operating Expenses, net</b>	Year ended December 31,			
	2022	2023	Variation	Variation
	(US\$ in thousands)			
Administrative expenses	(67,728)	(69,183)	(1,455)	2 %
Selling expenses	(20,222)	(19,392)	830	(4)%
Exploration in non-operating areas	(14,252)	(13,452)	800	(6)%
Provision (reversal) for contingences (a)	(2,935)	6,927	9,862	(336)%
Impairment loss (reversal) of long-lived assets (b)	19,874	—	(19,874)	(100)%
Other, net (c)	(15,085)	24,973	40,058	(266)%
<b>Total operating expenses, net</b>	<b>(100,348)</b>	<b>(70,127)</b>	<b>30,221</b>	<b>(30)%</b>

(a) *Provision (reversal) for contingences.* The Group assesses the amount of provisions of contingences to reflect the outflows of resources required to settle the obligation based on the most recently updated conditions of its legal processes. During 2023, the Group recognized a reversal of the provision of contingences mostly related to safety, labor and tax processes.

[Table of Contents](#)

(b) *Impairment reversal / loss of long-lived assets.* During 2022, the Group identified impairment indicators in Orcopampa, Uchucchacua, La Zanja and Río Seco mining units. The Group evaluated and concluded a recovery of impairment of long-lived assets for US\$19.9 million in Río Seco previously recorded in 2021. During 20223, the Group identified impairment indicators in Uchucchacua, Julcani, Tombomayo, Colquijirca, La Zanja and Río Seco mining units. The Group evaluated and concluded that there is no impairment as a result of the analysis of the recoverable amount based on their value in use. See Note 11(b) of the Consolidated Financial Statements.

(c) *Other, net.* The variation from an income of US\$24.9 million in 2022 to an expense of US\$15.1 million in 2023 is primarily due to the net effect of:

	2022	2023	Variation	Variation
		(US\$ in thousands)		
Net income related to the sale of the investment in Contacto Corredores de Seguro S.A.				
(c.1)	—	38,634	38,634	100 %
Income from sale of mining rights from Chaupiloma to Yanacocha	8,455	9,843	1,388	16 %
Net effect of impairment of spare parts and supplies	(139)	(1,069)	(930)	669 %
Changes in provisions from mine closure, environmental liabilities and exploration projects				
(c.2)	(13,101)	(1,225)	11,876	(91)%
Net income related to the sale of supplies and merchandise to third parties	(1,128)	(3,990)	(2,862)	254 %
Liability related to the tax claim for the years 2009-2010 (c.3)	—	(9,598)	(9,598)	100 %

(c.1) Corresponds to the net income from the sale of Buenaventura's shares in Contacto Corredores de Seguros S.A as part of its non-core asset divestment strategy, see note 1(d) of the Consolidated Financial Statements.

(c.2) Corresponds mainly to the net effect of: (i) increase of environmental liabilities derived from the update of closure plan of environmental liabilities of Santa Barbara and Delta Ulpamayo from the subsidiary El Brocal for US\$9 million, and (ii) decreases of the liability of mine closure provisions in response to the update of mine closure plants related to exploration projects which resulted in a change from an expense of US\$13.6 million in 2022 to an income of US\$7.8 million in 2023 (total variation of US\$21.4 million). See notes 15(b) and 28 of the Consolidated Financial Statements.

(c.3) Corresponds to the provision related to carry forwarded loses of years 2009 and 2010 that were part of a legal proceeding against SUNAT. See "Legal Proceedings" in "Item 8 Financial information".

*Other income (expense) captions.* Other income (expenses) captions in 2023 decreased compared with those of 2022 due to changes in the following components:

	Year ended December 31,			
	2022	2023	Variation	
		(US\$ in thousands)		
Shares in the results of associates and joint venture (a)	176,270	152,225	(24,045)	(14)%
Finance income (b)	14,443	9,057	(5,386)	(37)%
Finance costs (c)	(54,136)	(119,254)	(65,118)	120 %
Net (loss) from currency exchange difference (c)	26,871	19,375	(7,496)	(28)%
<b>Total operating expenses, net</b>	<b>163,448</b>	<b>61,403</b>	<b>(102,045)</b>	<b>(62)%</b>

(a) *Shares in the results of associates and joint ventures.* Shares in the results of associates and joint venture decreased in US\$24.0 million during 2023 compared to 2022 primarily explained by a decrease in our share of Sociedad Minera Cerro Verde S.A.A for US\$28.7 million See "Item 5. Operating and Financial Review and Prospects—Cerro Verde" for more information and the effect of changes in our share of Compañía Minera Coimolache S.A. for US\$3.5 million mainly due to increase in the equity derived from a loss of US\$8.3 million in 2022 to a profit of US\$4.2 million in 2023.

[Table of Contents](#)

Other income (expense) captions	Year ended December 31,			
	2022	2023	Variation	Variation
	(US\$ in thousands)			
Associates:				
Sociedad Minera Cerro Verde S.A.A.	181,221	152,552	(28,669)	(16)%
Compañía Minera Coimolache S.A.	(2,493)	1,072	3,565	(143)%
Tinka Resources Ltd.	(2,447)	(1,320)	1,127	(46)%
Joint Venture	(11)	(79)	(68)	618 %
<b>Shares in the results of associates and joint ventures</b>	<b>176,270</b>	<b>152,225</b>	<b>(24,045)</b>	<b>(14)%</b>

(b) *Finance income.* Finance income decreased by US\$5.3 million during 2023 compared to 2022 primarily explained by the net effect of: (i) increase of the interest on time deposits accrued in 2023 of US\$4.2 million, and (ii) the reversal of the amortized cost of the syndicated loan of US\$8.9 million resulting from the prepayment of the syndicated loan on the first quarter of 2022. See Note 16(c) of the Consolidated Financial Statements.

(c) *Finance costs.* Finance costs increased in US\$65.2 million during 2023 compared to 2022 primarily explained by the effect of:

- *Increase in the finance costs related to interest related to the tax claim of years 2009-2010 liability.*

During year 2023, the Buenaventura's legal advisors concluded that the probabilities of recovering a portion of the payments made under protest to the Tax Administration related to fiscal years 2009 and 2010 were less than 50%, for which it was recognized with effect on the results of the year a liability due to a claim to the Tax Administration for S/420,231,000 (equivalent to US\$113,178,000) regarding the portion of accounts receivable related to such carry-forwarded losses. The impact in profit or loss was distributed as follows: others, net (US\$9,598,000), financial expenses (US\$58,454,000), and income tax (US\$45,126,000). See "Legal Proceedings" in "Item 8 Financial information" and Note 29(a) of the Consolidated Financial Statements.

- *Increase in the fair value of the financial liability of the contingent consideration liability.* Based on the purchase and sale agreement with Minera Gold Fields Perú S.A. which considers a contingent consideration according with future royalty payments, the Group has to assess significant increases/decreases in the future sales that could result in significant changes in the fair value of the contingent liability. During 2023, the variation of the contingent liability fair value amounted to US\$4.7 million. See Note 29(a) of the Consolidated Financial Statements.

(d) *Net income (loss) from currency exchange difference.* Changes in the exchange difference from an income of US\$26.9 million in 2022 to an income of US\$19.4 million in 2022 are explained by the fluctuations in exchange rate due to a year on year weakening of the PEN relative to the US dollar (3.808 PEN/USD as of December 31, 2022 compared to 3.712 PEN/USD as of December 31, 2023). SUNAT's claim is registered in Peruvian Soles as part of Buenaventura's 'accounts receivables', therefore, a higher exchange rate decreases the total amount when converted to U. S. dollars.

*Income tax from continuing operations.* Provisions for income tax changed from an expense of US\$0.04 million in 2022 to an expense of US\$42.9 million in 2023, due to the net effect of: (i) an increase of the current income tax from US\$15.6 million in 2022 to US\$69.3 million in 2023 mainly due to the liability due to the Tax Administration of US\$45.1 million and higher mining royalties, and special mining tax of US\$2.8 million; and (ii) an increase of the deferred income tax from an income of US\$15.6 million in 2022 to an income of US\$26.3 million in 2023. This increase results mainly from the net effect of: (i) lower deferred income tax asset related to tax-loss carryforward of US\$16.5 million income in 2022 to US\$0.01 million income in 2023, offset by difference in depreciation and amortization rate of US\$9.7 million expense in 2022 to US\$1.6 million income in 2023; and (ii) lower deferred income tax liability related to depreciation and amortization tax rates of US\$10.5 million expense in 2022 to US\$14.3 million income in 2023, offset by U.S dollars translation tax effect of US\$20.2 million income in 2022 to US\$11.22 million income in 2023. See Note 30(a) of the Consolidated Financial Statements.

[Table of Contents](#)

*Non-controlling interest income (loss).* Non-controlling interest income changed from an income of US\$0.4 million in 2022 to an income of US\$12.8 million in 2023 primarily explained by the results of the subsidiary El Brocal of US\$0.2 million income in 2022 to US\$12.9 million income in 2023. Moreover, as result of the sale of shares owned in Yanacocha, which involved transferring shares in La Zanja and Chaupiloma to Buenaventura, there was no non-controlling interest income(loss) from La Zanja and Chaupiloma in 2023. See Note 18(a) of the Consolidated Financial Statements.

*Income (loss) from discontinued operations.* Loss from discontinued operations changed from an income of US\$478.5 million in 2022 to a loss of US\$6.8 million in 2023 primarily explained by net effect of: (i) the profit obtained from the sale of shares owned in Yanacocha and the related reversal of the liability available for sale for a grand total of US\$565.6 million, offset partially by the total income tax expense of US\$89.1 million; and (ii) changes in the closure mine provisions that increased the related expense in US\$6.3 million in 2023.

*Net income (loss).* As a result of the foregoing, net profit decreased in US\$570.2 million in 2023 compared to 2022. Net profit was 73% of revenues in 2022 and 4% of revenues in 2023.

### Results of Operations for the Years Ended December 31, 2023 and 2022 by Segment

We present the operating results for each of our operating segments for the years ended December 31, 2022 and 2023 in more detail in Note 33 to the Consolidated Financial Statements.

#### Sales of goods – Mining Segments

The following tables set forth the volumes of gold, silver, lead, zinc and copper sold at each of our mining segments during the years ended December 31, 2023 and 2022, as well as the variation in such volumes sold for the year ended December 31, 2023 as compared to the year ended December 31, 2022:

Sales of goods - Mining Segment	Volume Sold for the year ended December 31, 2023 (Unaudited)				
	Gold (oz.)	Silver (oz.)	Lead (t)	Zinc (t)	Copper (t)
Julcani	330	1,574,560	461	—	61
Orcopampa	83,311	26,668	—	—	—
Uchucchacua	—	2,431,290	1,721	2,129	—
Tambomayo	37,457	1,433,049	3,394	3,998	—
La Zanja	9,102	35,000	—	—	—
Colquijirca	12,985	2,690,844	4,651	14,010	55,366
Sales of goods - Mining Segment	Volume Sold for the year ended December 31, 2022 (Unaudited)				
	Gold (oz.)	Silver (oz.)	Lead (t)	Zinc (t)	Copper (t)
Julcani	82	2,498,142	418	—	65
Orcopampa	74,354	34,516	—	—	—
Uchucchacua	—	461,315	18	—	—
Tambomayo	48,247	1,598,004	9,479	11,054	—
La Zanja	29,376	109,943	—	—	—
Colquijirca	16,217	2,857,792	5,914	19,166	45,211
Mining Segment	2023 vs 2022 Change (%)				
	Gold (oz.)	Silver (oz.)	Lead (t)	Zinc (t)	Copper (t)
Julcani	302 %	(37)%	10 %	—	(6)%
Orcopampa	12 %	(23)%	—	—	—
Uchucchacua	—	427 %	9,461 %	—	—
Tambomayo	(22)%	(10)%	(64)%	—	(21)%
La Zanja	(69)%	(68)%	—	—	—
Colquijirca	(20)%	(6)%	(21)%	(27)%	22 %

[Table of Contents](#)

The change in sales of goods for the year ended December 31, 2023 as compared to the year ended December 31, 2022 is mainly explained by the changes in volume sold, as presented in the following chart:

Sales of goods – Mining Segments	Year ended December 31,			
	2022	2023	Variation	Variation
		(US\$ in thousands)		
Julcani (a)	50,652	31,663	(18,989)	(37)%
Orcopampa (b)	134,158	143,233	9,075	7 %
Uchucchacua (c)	5,052	91,007	85,955	1,701 %
Tambomayo (d)	152,537	77,907	(74,630)	(49)%
La Zanja (e)	51,588	17,223	(34,365)	(67)%
Colquijirca (f)	385,731	432,154	46,423	12 %

- (a) *Julcani*. Sales of goods decreased by 37% in 2023 compared to 2022 due to the net effect of a 15% increase in the average realized silver price and a 37% decrease in the quantity of silver sold at that unit.
- (b) *Orcopampa*. Sales of goods increased by 7% in 2023 compared to 2022 due to the net effect of a 12% increase in the quantity of gold sold, partially offset by a 23% decrease in the quantity of silver sold at that unit, and higher average realized silver and gold prices of 10% and 15%; respectively.
- (c) *Uchucchacua*. Sales of goods increased by 1,701% in 2023 compared to 2022 primarily due to the net effect of a 15% increase in the average realized silver prices and a 427% increase in the quantity of silver sold at that unit as a consequence of resuming operations in that unit during the last quarter of year 2023.
- (d) *Tambomayo*. Sales of goods decreased by 49% in 2023 compared to 2022 due to the net effect of 15% increase and 35% decrease in the average realized silver and zinc prices, respectively, and a decrease of 64%, 63% and 22% in the quantity of lead, zinc and gold sold; respectively, at that unit.
- (e) *La Zanja*. Sales of goods decreased by 67% in 2023 compared to 2022 due to the net effect of a 15% and 10% increase in the average realized gold and silver price; respectively, and a 69% and 68% decrease in the quantity of gold and silver sold at that unit.
- (f) *Colquijirca*. Sales of goods increased by 12% in 2023 compared to 2022 due to the net effect of a 4% increase in the average realized copper price and a 22% increase in the quantity of copper sold at that unit.

*Total operating expenses – Mining Segments*. The change in operating expenses for the year ended December 31, 2023 as compared to the year ended December 31, 2022 is mainly explained by:

Operating Expenses – Mining Segments	Year ended December 31,			
	2022	2023	Variation	Variation
		(US\$ in thousands)		
Julcani	(7,986)	(3,897)	4,089	(51)%
Orcopampa (a)	(12,298)	(17,728)	(5,430)	44 %
Uchucchacua (b)	(1,891)	(9,644)	(7,753)	410 %
Tambomayo (c)	(20,245)	(15,026)	5,219	(26)%
La Zanja (d)	(16,210)	2,899	19,109	(118)%
Colquijirca	(31,884)	(34,781)	(2,897)	9 %

- (a) *Orcopampa*. The higher operating expenses of US\$5.4 million was mainly due to (i) higher administrative expenses of US\$3.6 million, and (ii) higher expenses of US\$1.0 million of the “Others, net” caption related to contingency provisions of the period.
- (b) *Uchucchacua*. The higher operating expenses of US\$7.8 million was mainly due to (i) higher expenses of US\$3.7 million of the “Other, net” related mostly to the stoppage of operations expenses and “Provision of contingency” captions and (ii) higher administrative expenses of US\$3.9 million as a result of the resumption of operations in the last quarter of 2023.
- (c) *Tambomayo*. The lower operating expenses of US\$5.2 million was mainly due to (i) lower administrative and sale expenses of US\$2.9 million and US\$2.4 million; respectively, in line with the decrease of volume of sales which reduced the related sale expenses.
- (d) *La Zanja*. The lower operating expenses of US\$19.1 million was mainly due to a (i) US\$9.7 million lower expenses related to reversals of the update of the provision of closure of mining unit, (ii) US\$6.6 million lower expenses for impairment provision of inventories, and (iii) US\$2.1 million lower expenses due to reversals of contingencies provisions based on the updated assessment of legal advisors.

[Table of Contents](#)*Total operating expenses - Other Segments*

Operating income (expenses) – Other Segments	Year ended December 31,			
	2022	2023	Variation	Variation
		(US\$ in thousands)		
Insurance brokerage segment	(12,694)	(11,440)	1,254	(10)%
Exploration and development mining projects	(2,633)	(6,775)	(4,142)	157 %
Energy generation and transmission segment	(4,354)	(2,986)	1,368	(31)%
Industrial activities (a)	19,576	(723)	(20,299)	(104)%
Corporate (b)	(16,351)	11,867	28,218	(173)%
Rental of mining concessions	7,846	8,365	519	7 %
Holding of investment in shares	(3,089)	111	3,200	(104)%

- (a) *Industrial activities segment.* The variation from an income of US\$19.6 million in 2022 compared to an expense of US\$0.7 million in 2023 was mainly due to the reversal of the impairment loss recorded by the subsidiary Rio Seco in previous years for US\$19.8 million recorded in 2022
- (b) *Corporate.* The lower expense of US\$28.2 million in 2023 compared to 2022 was mainly due to sale of the investment in Contacto Corredores de Seguro S.A. and the expense related to the liability of the tax claim of year 2009 and 2010 for a net income and expense of US\$38.6 million and US\$9.6 million; respectively.

**Results of Operations for the Years Ended December 31, 2022 and 2021**

See “Item 5. Operating and Financial Review and Prospects” in our 2023 20-F for a comparative discussion of our consolidated results of operations for the year ended December 31, 2022 and 2021.

**Reconciliation of Costs Applicable to Sales and Cost Applicable to Sales per Unit Sold**

Cost applicable to sales and Cost applicable to sales per unit of mineral sold are not measures of financial performance under IFRS, and may not be comparable to similarly titled measures of other companies. We consider Cost applicable to sales and Cost applicable to sales per unit of mineral sold to be key measures in managing and evaluating our operating performance. These measures are widely reported in the precious metals industry as a benchmark for performance, but do not have standardized meanings. You should not consider Cost applicable to sales or Cost applicable to sales per unit of mineral sold as alternatives to cost of sales determined in accordance with IFRS as indicators of our operating performance. Cost applicable to sales and Cost applicable to sales per unit of mineral sold are calculated without adjusting for by-product revenue amounts.

In calculating these figures, we utilize financial records maintained with respect to the various mining units and subsidiaries, each on a standalone basis. Within the standalone accounts for each mining unit or subsidiary, we then allocate cost of sales (excluding depreciation and amortization), exploration in operating units and selling expenses in the proportion to each mineral’s commercial value (realized price multiplied by volume sold).

The tables below set forth (i) a reconciliation of consolidated Cost of sales, excluding depreciation and amortization to consolidated Cost applicable to sales, (ii) reconciliations of the components of Cost applicable to sales (by mine and mineral) to the corresponding consolidated line items set forth on our consolidated statements of profit or loss for the years ended December 31, 2023 and 2022 and (iii) reconciliations of Cost of sales, excluding depreciation and amortization to Cost applicable to sales for each of our mining units. The amounts set forth in Cost applicable to sales and Cost applicable to sales per unit sold for each mine and mineral indicated in the tables below can be reconciled to the amounts set forth on our consolidated statements of profit or loss for the years ended December 31, 2023 and 2022 by reference to the reconciliations of Cost of sales, excluding depreciation and amortization (by mine and mineral), Selling Expenses (by mine and metal) expenses and Exploration in operating units (by mine and mineral) to consolidated Cost of sales, excluding depreciation and amortization, consolidated Selling Expenses and Consolidated Exploration in operating units expenses, set forth below.

**B. Liquidity and Capital Resources**

As of December 31, 2023 and 2022, we had cash and cash equivalents of US\$219.8 million and of US\$253.9 million, respectively.

[Table of Contents](#)

Cash provided by operating activities for the years ended December 31, 2023 and 2022. Net cash and cash equivalents provided by operating activities changed from a net cash-inflow of US\$41.7 million in 2022 to a net cash-inflow of US\$227.1 million in 2023, primarily due to the changes shown in the chart below:

Operating activities cash flows	Year ended December 31,			
	2022	2023	Variation	Variation
	(US\$ in thousands)			
Proceeds from sales <sup>(a)</sup>	809,668	782,421	(27,247)	(3)%
Dividends received from related parties <sup>(b)</sup>	79,140	147,286	68,146	86 %
Value-added tax and other taxes recovered <sup>(c)</sup>	32,793	48,417	15,624	48 %
Royalty received <sup>(d)</sup>	5,183	—	(5,183)	(100)%
Interest received	2,915	5,123	2,208	76 %
Dividends received from other investments	—	150	150	100 %
Payments to suppliers and third parties, and other net <sup>(e)</sup>	(580,468)	(484,868)	95,600	(16)%
Payments to employees <sup>(f)</sup>	(123,903)	(136,612)	(12,709)	10 %
Payments for tax litigation	(7,488)	(10,115)	(2,627)	35 %
Income tax and Royalties paid to Peruvian State <sup>(g)</sup>	(82,637)	(30,049)	52,588	(64)%
Short-term and low value lease payments	(41,352)	(42,264)	(912)	2 %
Interest paid	(41,132)	(39,590)	1,542	(4)%
Payments of mining royalties	(11,053)	(12,832)	(1,779)	16 %
<b>Net operating activities cash flows</b>	<b>41,666</b>	<b>227,067</b>	<b>185,401</b>	<b>445 %</b>

- (a) The decrease in the proceeds from sales was mainly due to slightly higher sales and production of the Group offset by higher outstanding trade receivables at the end of year 2023, sales details are described in *Results of Operations for the Years Ended December 31, 2023 and 2022 by Segment*.
- (b) The /increase is mainly explained by a increase in dividends received from Cerro Verde from US\$78.3 million received during 2022 to US\$146.9 million received in 2023 and a decrease in dividends received from Coimolache from US\$0.8 million in 2022 to US\$0.4 million in 2023.
- (c) The increase is mainly explained by the reimbursement in cash of the income tax prepayments of period 2022 of the subsidiary Condesa for US\$4.7 million as a result of the sale of Yanacocha's share in that year, and the increase of VAT recoverable as a result of higher export sales performed by the subsidiary El Brocal for US\$5.7 million.
- (d) The decrease in royalties received is explained by the sale of Chaupiloma's mining right in Yanacocha. See Note 1(d) of the Consolidated Financial Statements.
- (e) The decrease in payments to suppliers and third parties is mainly explained by the decrease in the exploration in operation units and operation expenses by the Group, as described in *Results of Operations for the Years Ended December 31, 2023 and 2022 by Segment*.
- (f) The increase is mainly explained by higher direct labor costs resulting mostly from the increase of workers profit share in line with the higher taxable income of the year 2023, as described in *Results of Operations for the Years Ended December 31, 2023 and 2022 by Segment*.
- (g) The lower income tax and royalties paid to Peruvian State are mainly explained by the decrease in income tax prepayments from US\$56.8 million in 2022to US\$8.8 million and a decrease in the payment of tax over net assets (ITAN) from US\$12.6 million in 2022 to US\$8.4 million in 2023.

Cash used in investing activities for the years ended December 31, 2022 and 2023. Net cash and cash equivalents used in investing activities changed from a net cash inflow of US\$205.8 million to a net cash outflow of US\$205.5 million primarily due to the changes shown in the chart below:

Investing activities cash flows	Year ended December 31,			
	2022	2023	Variation	Variation %
	(US\$ in thousands)			
Collection for sale of participation in Yanacocha (a)	300,000	—	(300,000)	(100)%
Collection for purchase of La Zanja shares (a)	45,000	—	(45,000)	(100)%
Proceeds from sale of investments (b)	—	27,003	27,003	100 %
Proceeds from sale of property, plant and equipment (c)	13,116	9,689	(3,427)	(26)%
Acquisition of investment in associate	(1,677)	—	1,677	(100)%
Proceeds from sale of investments	1,577	245	(1,332)	(84)%
Additions to property, plant and equipment (d)	(151,973)	(238,669)	(86,696)	57 %
Payments for acquisition of other assets	(290)	(3,804)	(3,514)	1212 %
<b>Net investing activities cash flows</b>	<b>205,753</b>	<b>(205,536)</b>	<b>(411,289)</b>	<b>(200)%</b>

- (a) During 2022, the Group recorded collections from the sale of all of the shares Buenaventura owned in Yanacocha to Newmont for a consideration collected in full in February 2022 of US\$300,000,000 and US\$45,000,000 that Newmont paid to Buenaventura in order to cover part of the future costs of the La Zanja closure plan.
- (b) During 2023, the Group recorded collections from the sale of all of the shares Buenaventura owned in Contacto Corredores de Seguros S.A. to Howden Hodco S.A. According to the contract the initial payment corresponded to US\$27 million and the outstanding amount of US\$6.7 million will be paid in the third year after assessing the final price, see note 1(d) and 7(i) of the Consolidated Financial Statements.
- (c) The proceeds from sale of assets decrease in 2023 mainly due to the nature of the amounts collected, during 2022 the collections were related to the sale of Mally mining unit and the mining concessions rights of the subsidiary Chaupiloma to Yanacocha for a grand total of US\$12.5 million, whereas in 2023 the amounts are mostly related property, plant and equipment components.
- (d) The increase in capital expenditures was mainly due to an increase in San Gabriel and Uchucchacua mining units for US\$58.5 million and US\$20.9 million, respectively. See “Item 4: Information on the Company—Buenaventura—A. History and Development—Capital Expenditures.”

Cash provided by (used in) financing activities for the years ended December 31, 2022 and 2023. Net cash and cash equivalents used in financing activities changed from a net cash outflow of US\$370.5 million in 2022 to a net cash outflow of US\$55.6 million in 2023 primarily due to the changes shown in the chart below:

Financing activities cash flows	Year ended December 31,			
	2022	2023	Variation	Variation
		(US\$ in thousands)		
Proceeds from bank loans	—	49,000	49,000	100 %
Decrease (Increase) of bank accounts in trust	(733)	34	767	(105)%
Payments of bank loans	(50,000)	(49,000)	1,000	(2)%
Increase of restricted time deposits	29,117	—	(29,117)	(100)%
Payments of financial obligations	(323,057)	(31,034)	292,023	(90)%
Lease payments	(4,638)	(4,475)	163	4 %
Dividends paid to controlling interest	(18,542)	(18,542)	—	0 %
Dividends paid to non-controlling shareholders	(2,647)	(1,642)	1,005	(38)%
<b>Net financing activities cash flows</b>	<b>(370,500)</b>	<b>(55,659)</b>	<b>314,841</b>	<b>(85)%</b>

**Short-Term Debt**

We borrow, from time to time, short-term unsecured loans from local Peruvian banks to supplement our working capital needs at favorable short-term interest rates. As December 31, 2022 and 2023, the Group acquired short-term loans that were fully paid, within each year, for US\$50 million and US\$49 million; respectively.

**Long-Term Debt**

*Sociedad Minera El Brocal S.A.A.* On October 29, 2019, El Brocal entered into a new financing agreement in an amount of US\$161,893,850 with Banco de Crédito del Perú in order to repay a financial leaseback signed in 2015 and a medium-term financing entered into in 2017. The new financing agreement has the following terms and conditions:

	Tranche A	Tranche B
Principal	US\$113,325,695	US\$48,568,155
Annual interest rate	3.76 percent	Three-month LIBOR plus 2.39 percent
Term	5 years beginning in October 2019 (matures in October 2024)	7 years beginning in October 2019 (matures in October 2026)

According to this financing agreement, El Brocal is required to maintain the following financial ratios: (i) Debt service coverage ratio: Higher than 1.3, (ii) Leverage Ratio: Less than 1.0 times, (iii) Indebtedness ratio: Less than 2.25 times. This new financial obligation is collateralized by a security agreement in respect of assets; certain contractual rights, flows and account balances, a real estate mortgage; and a mortgage on certain mining concessions.

On May 22, 2023, El Brocal subscribed an addendum to the contract with the Banco de Crédito del Perú to modify the LIBOR interest rate of the financing agreement's tranche B and related clauses referring to the LIBOR rate in terms of calculation basis and reference terms. As a result of this addendum, the updated term and conditions of the financing agreement are as follows:

	Tranche A	Tranche B
Principal	US\$113,325,695	US\$48,568,155
Annual interest rate	3.76 percent	Three-month SOFR plus 2.65 percent
Term	5 years beginning in October 2019 (matures in October 2024)	7 years beginning in October 2019 (matures in October 2026)

Besides the substitution of the LIBOR interest rate mentioned above, there were no other significant changes in the contract terms derived from the addendum that may have an impact on due dates, guarantees and covenants from the initial financing agreement. Furthermore, El Brocal assessed the financial impacts of the transition from LIBOR to SOFR interest rate in compliance with IFRS, as a result there were no significant changes in the recognized liabilities, financial expenses and cashflows as a result of the addendum entering into force.

[Table of Contents](#)

As of December 31, 2022 and 2023, the amount outstanding under this financing was US\$97 million and US\$73 million, respectively. The compliance with the financial ratios is monitored by El Brocal's management. As of December 31, 2022 and 2023, El Brocal complied with the coverage and indebtedness ratios.

*Empresa de Generación Huanza S.A.* The long-term debt of Huanza is made up of: (i) a financial lease agreement entered into on December 2, 2009, with Banco de Crédito del Perú in an aggregate amount of US\$119.0 million, for purposes of constructing a hydroelectric power station. Huanza is the lessee under such agreement. On April 29, 2022, as part of Buenaventura's strategy to preserve cash, Huanza entered into an amendment[s] to this lease agreement (in respect of the final principal installment thereunder, amounting to US\$35 million), pursuant to which parties agreed to extend the maturity through 2027, and (ii) a financial lease agreement entered into on June 30, 2014, with Banco de Crédito del Perú in an aggregate amount of US\$103.4 million. On April 29, 2022, as part of Buenaventura's strategy to preserve cash, Huanza entered into an amendment[s] to this lease agreement (in respect of the final principal installment thereunder, amounting to US\$55 million), pursuant to which parties agreed to extend the maturity through 2027. In the amendment of April 29, 2022, Banco de Credito del Peru and Empresa de Generación Huanza signed an addendum considering a prior amortization of outstanding principal of US\$9,191,364 (Tranche I) and US\$13,904,800 (Tranche II). As of December 31, 2022 and 2023, the amount outstanding under each lease was US\$86.6 million and US\$79.4 million, respectively.

Below we detail the main additional terms and conditions:

	Tranche I		Tranche II
Principal	US\$35,000,000		US\$55,000,000
Annual interest rate	5.05	%	5.05
Term	60 months since May 2, 2022 with final maturity in 2027.		60 months since May 2, 2022 with final maturity in 2027.
Guarantee	Leased equipment		Leased equipment.
Amortization	Through 20 fixed quarterly installments and a final installment of US\$22,531,250 at the end of the payment term.		Through 20 fixed quarterly installments and a final installment of US\$35,406,250 at the end of the payment term.

In addition, Huanza granted a security interest for 100% of shares. According to the lease contract mentioned above, Huanza is required to maintain the following financial ratios:

- Debt service coverage ratio: Higher than 1.1.
- Minimum equity of US\$30,000,000.

*Compañía de Minas Buenaventura S.A.A.*

*Financial obligation -*

On June 27, 2016, Buenaventura entered into a long-term finance contract with seven Peruvian and foreign banks for a principal amount of US\$275,000,000. In 2018, April 2020, April 2021 and May 2021 Buenaventura signed the first, second, third and fourth amendments, respectively, to the Syndicated Term Loan to modify certain terms and conditions including the issue of Notes in accordance with Rule 144A and Regulation S, under the Securities Act of 1933.

On January 3, 2022, the Company made a US\$100 million prepayment of the syndicated loan and the remaining balance of US\$175 million was paid on March 2, 2022. Additionally, the related hedging derivative financial instruments was liquidated.

[Table of Contents](#)**5.500% Senior Notes due 2026**

In order to comply with its tax obligations, the Buenaventura's Shareholders' Meeting held on May 21, 2021 and its board of directors meeting held on July 12, 2021 approved the issue of senior unsecured notes due 2026 (hereinafter the "Notes") which were issued on July 23, 2021 with the following terms:

- Denomination of Issue: US\$550,000,000 5.500% Senior Notes due 2026.
- Principal Amount: US\$550,000,000.
- Issue Date: July 23, 2021.
- Maturity Date: July 23, 2026.
- Issue Price: 99.140% of the principal amount.
- Interest Rate: 5.500% per annum.
- Offering Format: private placement under Rule 144A and Regulation S of the U.S. Securities Act of 1933.
- Listing: The bonds were listed on the SGX-ST.

The bonds were offered in a private placement to qualified institutional buyers in accordance with Rule 144A under the Securities Act of 1933, as amended (hereinafter the "Securities Act"), and outside the United States to non-U.S. persons in accordance with Regulation S under the Securities Act. The Notes are fully and unconditionally guaranteed jointly and severally by Compañía Minera Condesa S.A., Inversiones Colquijirca S.A., Procesadora Industrial Río Seco S.A. and Consorcio Energético Huancavelica S.A.

As part of its issuance of the Notes, Buenaventura entered into an indenture (the "Indenture") among Buenaventura, The Bank of New York Mellon, and various subsidiary guarantors. Under the terms of the Indenture, Buenaventura agreed to comply with certain restrictive covenants. As a result of these covenants, Buenaventura must confirm that it is in compliance with the Notes Indenture if it wants to undertake any of the following transactions that involve:

- (i) the incurrence of additional debt;
- (ii) certain asset sales;
- (iii) the making of certain investments;
- (iv) the payment of dividends;
- (v) the purchasing of Buenaventura's equity interests or making any principal payment prior to any scheduled final maturity or schedule repayment of any indebtedness that is subordinated to the Notes (collectively, "Restricted Payments", as defined in the Indenture),
- (vi) creation of liens; or
- (vii) a merger, consolidation or sale of substantially all assets.

These covenants are known as "Limitations on incurrence of indebtedness", "Limitation on Asset Sales", "Limitation on Restricted Payments", "Limitation on Liens" and "Limitation on Merger, Consolidation or Sale of Assets", respectively, which also have exceptions that let the Company operate in the ordinary course of business.

[Table of Contents](#)**Exploration Costs and Capital Expenditures**

During the years ended December 31, 2023, 2022 and 2021, our expenses in exploration in non-operating areas and on exploration in operating units were as follow:

	Year ended December 31,		
	2023	2022	2021
	(US\$ in thousands)		
<b>Exploration in non-operating areas</b>			
Emperatriz	3,958	5,243	5,742
Marcapunta	4,095	4,008	1,383
San Gabriel	1,148	282	1,010
Ccelloccasa	151	1,748	405
Other, net	4,100	2,971	2,730
<b>Total exploration in non-operating areas</b>	<b>13,452</b>	<b>14,252</b>	<b>11,270</b>
<b>Exploration in operating areas</b>			
Uchucchacua	24,423	32,592	11,090
Colquijirca	7,761	16,671	17,099
Julcani	6,990	6,747	6,107
Orcopampa	6,071	11,594	11,466
Tambomayo	3,446	9,980	10,076
La Zanja	538	3,212	574
<b>Total exploration in operating areas</b>	<b>49,229</b>	<b>80,796</b>	<b>56,412</b>

We expect that we will meet our working capital, capital expenditure and exploration expense requirements for the next several years from internally generated funds, cash on hand and dividends received from our investments in non-consolidated mining operations. Additional financing, if necessary, for the construction of any project, is expected to be obtained from borrowings under bank loans and the issuance of debt securities. There can be no assurance, however, that sufficient funding will be available to us from the internal or external sources to finance any future capital expenditure program, or that external funding will be available to us for such purpose on terms or at prices favorable to us. A very significant decline in the prices of gold and silver would be reasonably likely to affect the availability of such sources of liquidity. In addition, if we fund future capital expenditures from internal cash flow, there may be fewer funds available for the payment of dividends.

**Recent Accounting Pronouncements**

As of December 31, 2023, certain new accounting standards and interpretations have been issued but are not yet effective have not been early adopted by the Group. These standards are not expected to have a material impact on the Group in the current or future reporting periods and on foreseeable future transactions.

## Amendments to IFRS 16: Lease Liability in a Sale and Leaseback -

In September 2022, the IASB issued amendments to IFRS 16 to specify the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction, to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains.

The amendments are effective for annual reporting periods beginning on or after 1 January 2024 and must applied retrospectively to sale and leaseback transactions entered into after the date of initial application of IFRS 16. Earlier application is permitted, and that fact must be disclosed. The amendments are not expected to have a material impact on the Group's financial statements.

## Amendments to IAS 1: Classification of Liabilities as Current or Non-current -

In January 2020, the IASB issued amendments to paragraphs 69 to 76 of IAS 1 to specify the requirements for classifying liabilities as current or non-current. The amendments clarify:

- What is meant by a right to defer settlement.

[Table of Contents](#)

- That a right to defer must exist at the end of the reporting period.
- That classification is unaffected by the likelihood that an entity will exercise its deferral right.
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification.

In addition, a requirement has been introduced to require disclosure when a liability arising from a loan agreement is classified as non-current and the entity's right to defer settlement is contingent on compliance with future covenants within twelve months. The amendments are effective for annual reporting periods beginning on or after January 1, 2024 and must be applied retrospectively. The Group is currently assessing the impact the amendments will have on current practice and whether existing loan agreements may require renegotiation.

#### Supplier Finance Arrangements - Amendments to IAS 7 and IFRS 7 -

In May 2023, the IASB issued amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures to clarify the characteristics of supplier finance arrangements and require additional disclosure of such arrangements. The disclosure requirements in the amendments are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk. The amendments will be effective for annual reporting periods beginning on or after 1 January 2024. Early adoption is permitted but will need to be disclosed. The amendments are not expected to have a material impact on the Group's financial statements.

#### IFRS 18 "Presentation and disclosure of Financial Statements" –

In April 2024, the IASB issued IFRS 18 Presentation and disclosure in the Financial Statements which replaces IAS 1 Presentation of Financial Statements. The new standard is a result of the IASB's Primary Financial Statements project, which is aimed at improving comparability and transparency of communication in financial statements.

While a number of sections have been brought forward from IAS 1, with limited wording changes, IFRS 18 Introduces new requirements on the presentation within the statement of profit or loss, including the specified totals and subtotals. It also requires disclosure of management defined performance measures and includes new requirements for aggregation and disaggregation of financial information based on the identified "roles" of the primary financial statements (PFS) and the notes. These new requirements are expected to impact all reporting entities.

Narrow scope amendments have been made to IAS 7 Statements of Cash flows and some requirements previously included within IAS 1 have been removed to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors, which has also been renamed as IAS 8 Basis of Preparation of Financial Statement. IAS 34 Interim Financial Reporting was amended to require disclosure of management defined performance measures. Minor consequential amendments to other standards were also made.

IFRS 18, and the amendments to the other standards, is effective for reporting periods beginning on or after January 2027, but earlier application is permitted and must be disclosed, IFRS 18 will apply retrospectively. An entity that prepares condensed interim financial statements in accordance with IAS 34 in the first of adoption of IFRS 18, must present the headings and mandatory subtotals it expects to use in its financial statements. Comparative periods in both interim and annual financial statements will need to be restated and a reconciliation of the statement of profit or loss previously published will be required for the immediately preceding comparative period.

The group is currently assessing the new requirements of IFRS 18, with focus on the specific developments in its industry, to identify and collect relevant information to measure the impacts and resources needed, including internal changes, derived from implementing IFRS 18.

#### Off-Balance Sheet Arrangements

Other than in connection with the Bonds, there are no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

[Table of Contents](#)**Tabular Disclosure of Contractual Obligations**

The following table shows our contractual obligations as of December 31, 2023:

	Payments due by Period (US\$ in millions)				Total US\$(000)
	Less than 1 year (2023) US\$(000)	Between 1 and 2 years (2024) US\$(000)	Between 2 and 5 years (2025 to 2027) US\$(000)	More than 5 years (from 2028) US\$(000)	
Trade and other payables	288,570	—	—	—	288,570
Financial obligation – capital	31,034	97,409	574,194	—	702,637
Financial obligation – interest	37,453	40,066	31,093	—	108,612
Lease – capital	3,429	1,515	2,523	2,853	10,320
Lease – interest	239	256	757	1,979	3,231
Contingent consideration liability	—	—	13,274	35,513	48,787
<b>Total Contractual Cash Obligations</b>	<b>360,725</b>	<b>139,246</b>	<b>621,841</b>	<b>40,345</b>	<b>1,162,157</b>

As of December 31, 2023, we had no other commercial commitments.

**C. Research and Development**

Not applicable.

**D. Trend Information**

Other than as disclosed in this Annual Report, we are not aware of any trends, uncertainties, demands, commitments, or events which are reasonably likely to have a material effect upon our net sales or revenues, income from continuing operations, profitability, liquidity or capital resources, or that would cause reported financial information to be not necessarily indicative of future operating results or financial condition.

For our exploration activities, there is no production, sales or inventory in a conventional sense. Our financial success is dependent upon the extent to which we are capable of discovering mineralization and the economic viability of exploration properties. The construction and operation of such properties may take years to complete and the resulting income, if any, cannot be determined with certainty. Further, the sales value of mineralization discovered by us is largely dependent upon factors beyond our control, including the market value of the metals produced at any given time.

**E. Critical Accounting Estimates**

[Table of Contents](#)**CERRO VERDE*****Introduction***

The following discussion should be read in conjunction with the Cerro Verde Financial Statements as of December 31, 2022 and 2023 and for the years ended December 31, 2021, 2022 and 2023 and the related Notes thereto included elsewhere in this Annual Report, and (ii) Item 5 to our 2023 20-F. The Cerro Verde Financial Statements are prepared and presented in accordance with IFRS as issued by the IASB.

**A. Operating Results*****Overview***

We hold a 19.58% interest in Cerro Verde, which operates an open-pit copper and molybdenum mining complex located 20 miles southwest of Arequipa, Peru. The site is accessible by paved highway. The Cerro Verde mine has been in operation since 1976 and was previously owned by the Peruvian government before its privatization in 1993. Freeport-McMoRan Inc. holds a majority interest in Cerro Verde.

The Cerro Verde mine is a porphyry copper deposit that has oxide, secondary sulfide, and primary sulfide mineralization. The predominant oxide copper minerals are brochantite, chrysocolla, malachite and copper “pitch.” Chalcocite and covellite are the most important secondary copper sulfide minerals. Chalcopyrite and molybdenite are the dominant primary sulfides.

The Cerro Verde’s operation includes 2 concentrating facilities with an annual average permitted milling capacity of 409,500 metric tonnes of ore per day (and the ability to annually treat up to 5% more for a total of 430,000 metric tonnes of ore per day). As a result of several efficiency initiatives implemented over the past several years, in 2023, Cerro Verde’s 2 concentrators were able to achieve a combined average milling rate of 417,400 metric tonnes of ore per day in 2023. Cerro Verde also operates SX/EW leaching facilities, which have a production capacity of approximately 200 million pounds of copper per year. In 2023, Cerro Verde began to dismantle its crushed leach facility (which had a capacity of 39,000 metric tonnes of ore per day) as a result of pit expansion but continues to utilize its 100,000- metric-tonnes-per-day ROM leach system.

The available fleet consists of fifty-four 300-metric-ton haul trucks (one of which is currently on standby), ninety-three 250-metric-ton haul trucks (ten of which are currently on standby) and 7 leased 380-metric-ton haul trucks loaded by 13 electric shovels with bucket sizes ranging from 33 to 57 cubic meters. This fleet is capable of moving an average of approximately 1,000,000 metric tonnes of material per day.

Copper cathodes and concentrate production that are not sold locally are transported approximately 70 miles by truck and by rail to the Port of Matarani for shipment to international markets. Molybdenum concentrate is transported by truck to either the Ports of Callao or Matarani for shipment.

Cerro Verde currently receives electrical power, including hydro-generated power, under long-term contracts with ElectroPeru and Engie Energia Peru S.A. During 2023, Cerro Verde entered into a new power purchase agreement that is expected to transition its electric power to fully renewable energy sources in 2026.

Water for Cerro Verde’s processing operations comes from renewable sources through a series of storage reservoirs on the Río Chili watershed that collect water primarily from seasonal precipitation and from wastewater collected from the city of Arequipa and treated at a wastewater treatment plant operated by Cerro Verde. Cerro Verde believes that the operation has sufficient water sources to support current operations, but we are closely monitoring ongoing El Niño weather patterns.

[Table of Contents](#)

Presented in the table below are certain summary financial and operating data regarding Cerro Verde for the years ended December 31, 2021, 2022 and 2023:

	<b>As of and for the year ended December 31,</b>		
	<b>2021</b>	<b>2022</b>	<b>2023</b>
<b>Income statement data <sup>(1)</sup></b>			
Sales (US\$ in thousands)	4,199,448	3,975,295	4,143,228
Profit for the year (US\$ in thousands)	1,191,474	925,353	778,964
<b>Proven and Probable Reserves <sup>(2)</sup></b>			
<b>Proven:</b>			
Leachable ore reserves (metric tonnes in thousands)	52,000	44,000	24,000
Millable ore reserves (metric tonnes in thousands)	670,000	620,000	655,000
<b>Probable:</b>			
Leachable ore reserves (metric tonnes in thousands)	58,000	82,000	65,000
Millable ore reserves (metric tonnes in thousands)	3,219,000	3,489,000	3,343,000
Average copper grade of leachable ore reserves (%)	0.33	0.27	0.24
Average copper grade of millable ore reserves (%)	0.37	0.35	0.35
<b>Production</b>			
Cathodes (in thousands of recoverable pounds)	96,350	99,405	99,962
Concentrates (in thousands of recoverable pounds)	790,724	874,053	885,580
Average realized price of copper sold (US\$ per ton payable)	9,833	8,422	8,532

(1) Derived from Cerro Verde's financial statements. See the Cerro Verde Financial Statements, including the Notes thereto, appearing elsewhere in this Annual Report.

(2) Reserve calculations are derived from "Item 3. Key Information – A. Selected Financial Data." Cerro Verde used US\$ 3.00 per pound of copper to determine copper as of December 31, 2023. The calculation or estimation of proven and probable ore reserves for Cerro Verde may differ in some respects from the calculations of proven and probable ore reserves for us located elsewhere in this Annual Report. According to Cerro Verde, ore estimates for Cerro Verde are based upon engineering evaluations, proven and probable mineral reserves were determined from the application of relevant modifying factors to geological data to establish an operational, economically viable mine plan. Cerro Verde's ore estimates include assessments of the resource, mining and metallurgy, as well as consideration of economic, marketing, legal, environmental, social and governmental factors, including projected long-term prices for copper and molybdenum and Cerro Verde's estimate of future cost trends.

(3) Derived from "Item 3. Key Information – A. Selected Financial Data"

#### **Cerro Verde Mining Royalties**

On June 23, 2004, Law 28258 was approved, which requires the holder of a mineral concession to pay a royalty in return for the exploitation of metallic and non-metallic minerals. The royalty is calculated using ranging from 1% to 3% of the value of concentrate or its equivalent according to the international price of the commodity published by the Ministry of Energy and Mines. Prior to January 1, 2014, the Company determined that these royalties were not applicable because it operated under the 1998 Stability Agreement with the Peruvian government. However, beginning January 1, 2014, the Company began paying royalties calculated on operating income with rates between 1% to 12% and a new special mining tax for its entire production base under its current 15-year tax stability agreement, which became effective January 1, 2014. The amount to be paid for the mining royalty will be the greater of a progressive rate of the quarterly operating income or 1% of quarterly sales.

SUNAT assessed mining royalties on materials processed by the Company's concentrator, which commenced operations in late 2006. These assessments cover the period December 2006 to December 2013. The Company contested each of these assessments because it considers that its 1998 Stability Agreement exempts from royalties all minerals extracted from its mining concession, irrespective of the method used for processing such minerals. No assessments can be issued for years after 2013, as the Company began paying royalties on all of its production in January 2014 under its new 15-year stability agreement.

[Table of Contents](#)

Since 2017, the Company has recognized the related expense for the royalty and special mining tax assessments for the period December 2006 through the year 2013. Since 2014, the Company has made total payments of S/2.9 billion (US\$791.9 million based on the date of payment exchange rate) for the disputed assessments for the period from December 2006 through December 2013 under installment payment programs granted through scheduled monthly installments, which were paid in advance in August 2021.

In February 2020, Freeport, on its own behalf and on behalf of the Company, requested the initiation of an international arbitration proceeding against the Government of Peru under the United States-Peru Trade Promotion Agreement. The hearing on the merits was held in May 2023 and the final argument took place on July 15, 2023. In April 2020, Sumitomo filed another international arbitration proceeding against the Peruvian government under the Netherlands-Peru Bilateral Investment Treaty. The hearing on the merits was held in February 2023.

**Critical Accounting Policies**

Cerro Verde has furnished us with a discussion of its critical accounting policies and methods used in the preparation of its financial statements. Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties and could potentially impact results under different assumptions and conditions. Note 2 to the Cerro Verde Financial Statements includes a summary of the significant accounting policies and methods used in the preparation of the Cerro Verde Financial Statements. The following is a brief discussion of the identified critical accounting policies and the estimates and judgments made by Cerro Verde.

**Contingencies**

By their nature, contingencies will be resolved only when one or more uncertain future events occur or fail to occur. The assessment of the existence and potential amount of contingencies inherently involves the exercise of significant judgment and the use of estimates regarding the outcome of future events.

**Stripping cost**

Cerro Verde incurs waste removal costs (stripping costs) during the development and production phases of its surface mining operations. Production stripping costs can be incurred both in relation to the production of inventory in that period and the creation of improved access and mining flexibility in relation to ore to be mined in the future. The waste removal cost is included as part of the costs of inventory, while the production stripping costs are capitalized as a stripping activities asset, as part of the "property, plant and equipment, net" if certain criteria are met.

**Inventories**

Net realizable value tests are performed at least annually and represent the estimated future sales price of the product based on prevailing spot metals prices, less estimated costs to complete production and bring the inventory to sale. Additionally, in calculating the net realizable value of Cerro Verde's long-term stockpiles, Cerro Verde's management also considers the time value of money.

Mill and leach stockpiles generally contain lower grade ores that have been extracted from the ore body and are available for copper recovery. Mill stockpiles contain sulfide ores and recovery of metal is through milling and concentrating. Leach stockpiles contain oxide ores and certain secondary sulfide ores and recovery of metal is through exposure to acidic solutions that dissolve contained copper and deliver it in a solution to extraction processing facilities.

Because it is generally impracticable to determine copper contained in mill and leach stockpiles by physical count, a reasonable estimation method is employed. The quantity of material delivered to mill and leach stockpiles is based on surveyed volumes of mined material and daily production records. Sampling and assaying of blast hole cuttings determine the estimated copper grades of material delivered to mill and leach stockpiles.

Expected copper recovery rates for mill stockpiles are determined by metallurgical testing. The recoverable copper in mill stockpiles, once entered into the production process, can be produced into copper concentrate almost immediately.

[Table of Contents](#)

Expected copper recovery rates for leach stockpiles are determined using small-scale laboratory tests, historical trends and other factors, including mineralogy of the ore and rock type. Total copper recovery in leach stockpiles can vary significantly depending on several variables, including processing methodology, processing variables, mineralogy and particle size of the rock. Process rates and metal recoveries are monitored regularly, and recovery estimates are adjusted periodically as additional information becomes available and as related technology changes.

***Determination of mineral reserves***

Mineral reserves are the parts of mineral deposit ore that can be economically and legally extracted from the mine concessions. Cerro Verde estimates its mineral reserves based on information compiled by individuals qualified in reference to geological data about the size, depth and form of the ore body, and requires geological judgments in order to interpret the data.

The estimation of recoverable reserves involves numerous uncertainties with respect to the ultimate geology of the ore body, including quantities, grades and recovery rates. Estimating the quantity and grade of mineral reserves requires Cerro Verde to determine the size, shape and depth of the ore body by analyzing geological data. In addition to the geology, assumptions are required to determine the economic feasibility of mining the reserves, including estimates of future commodity prices and demand, future requirements of capital and production costs and estimated exchange rates. Revisions in reserve or resource estimates have an impact on the value of mining properties, property, plant and equipment, provisions for cost of mine closure, recognition of assets for deferred taxes and depreciation and amortization of assets.

***Units of production Depreciation***

Estimated mineral reserves are used in determining the depreciation and/or amortization of mine-specific assets. This results in a depreciation/amortization charge proportional to the depletion of the anticipated remaining life-of-mine production. The life of each item, which is assessed at least annually, is impacted by both its physical life limitations and present assessments of economically recoverable reserves of the mine property where the asset is located. These calculations require the use of estimates and assumptions, including the amount of recoverable reserves.

***Provision for remediation and Mine Closure***

Cerro Verde assesses its provision for remediation and mine closure quarterly. It is necessary to make estimates and assumptions in determining this provision, including cost estimates of activities that are necessary for the rehabilitation of the site, technological and regulatory changes, interest rates and inflation rates. As discussed in Note 2(j) to the Cerro Verde Financial Statements, estimated changes in the fair value of the provision for remediation and mine closure or the useful life of the related assets are recognized as an increase or decrease in the book value of the provision and related asset retirement cost ("ARC") in accordance with IAS 16, "Property, Plant and Equipment."

According to Cerro Verde's accounting policies, the provision for remediation and mine closure represents the present value of the costs that are expected to be incurred in the closure period of the operating activities of Cerro Verde. Closure budgets are reviewed regularly to take into account any significant change in the studies conducted. Nevertheless, the closure costs of mining units will depend on the market prices for the closure work required, which would reflect future economic conditions. Also, the timing of disbursements depends on the useful life of the mine, which is based on estimates of future commodity prices.

If any change in the estimate results in an increase to the provision for remediation and mine closure and related ARC, Cerro Verde shall consider whether or not this is an indicator of impairment of the assets and will apply impairment tests in accordance with IAS 36, "Impairments of Assets."

***Impairment of Long-lived Assets***

Cerro Verde has determined that its operations consist of one cash generating unit. Therefore, Cerro Verde's operations are evaluated at least annually in order to determine if there are impairment indicators. If any such indication exists, Cerro Verde makes an estimate of the recoverable amount, which is the greater of the fair value less costs to sell and the value in use. These assessments require the use of estimates and assumptions, such as long-term commodity prices, discount rates, operating costs and others.

[Table of Contents](#)

Fair value is defined as the amount that would be obtained from the sale of the asset in an arm's-length transaction between willing and knowledgeable parties. The fair value of assets is generally determined as the current value of future cash flows derived from the continuous use of the asset, which includes estimates, such as the cost of future expansion plans and eventual disposal, while applying assumptions that an independent market participant may take into account. The cash flows are discounted by applying a discount rate that reflects the current market, the time value of money and the risks specific to the asset.

**Results of Operations for the Years Ended December 31, 2023 and 2022**

*Sales.* Sales, including mark-to-market adjustments for pounds of copper pending settlement and sales of molybdenum and silver contained in copper concentrates, increased by 4%, from US\$3,975.3 million in 2022 to US\$4,143.2 million in 2023, principally due to higher pound sold and higher copper price. The following table reflects the average realized price and volume sold of copper (both cathode and copper concentrate) during the years ended December 31, 2021, 2022 and 2023:

	Year ended December 31,			
	2021	2022	2023	Variation
Average price				
Copper (US\$ per metric ton)	9,833	8,422	8,532	1 %
Volume sold (unaudited)				
Copper (in metric tonnes)	401,886	439,110	450,449	3 %

Average realized copper prices per metric tonne increased from US\$8,422 in 2022 to US\$8,532 in 2023. The volume of copper sold increased from 439,110 metric tonnes in 2022 to 450,449 metric tonnes in 2023. The combined effect of these changes resulted in a US\$167.9 million increase in income from sales in 2023 compared to 2022.

*Total costs of sales of goods.* Total costs of sales of goods increased from US\$2,367.8 million in 2022 to US\$2,556.1 million in 2023, mainly due to the net effect of the following:

- (a) Materials and supplies increased from US\$ 915.3 million in 2022 to US\$982.6 million in 2023, primarily associated with higher material processed at mills, and higher metric ton mined.
- (b) Depreciation of property, plant and equipment increased from \$489.7 million in 2022 to \$530.2 million in 2023, due to higher assets additions in the period coupled with adjustments of depreciation method (from UOP to straight-line basis).
- (c) Labor costs, including workers' profit sharing, increased from US\$343.6 million in 2022 to US\$381.8 million in 2023 mainly due to higher profit sharing expenses.

*Total operating expenses.* Operating expenses increased by 36%, from US\$181.3 million in 2022 to US\$246.1 million in 2023 due mainly to the following:

- (a) Other operating expenses, increased by 277%, from US\$24.2 million in 2022 to US\$91.2 million in 2023 primarily by penalties related to payments on account of income tax from 2006 to 2015 as a consequence of unfavorable tax ruling issued by the Supreme Court.

*Income tax.* Income tax expense, including current and deferred expense, increased by 9%, from an expense of US\$508.5 million in 2022 to an expense of US\$551.8 million in 2023 primarily due to higher taxable profit generated in 2023.

*Profit of the year.* As a result of the foregoing, profit of the year decreased by 16%, from US\$925.4 million in 2022 to US\$779.0 million in 2023. As a percentage of net sales, net income was 23% in 2022, compared to 19% in 2023.

**Results of Operations for the Years Ended December 31, 2022 and 2023**

See "Item 5. Operating and Financial Review and Prospects" in our 2023 Form 20-F for a comparative discussion of Cerro Verde's consolidated results of operations for the year ended December 31, 2023 and 2022.

[Table of Contents](#)**B. Liquidity and Capital Resources**

As of December 31, 2023, Cerro Verde had cash and cash equivalents of US\$509.6 million, compared to US\$553.8 million as of December 31, 2022.

*Cash provided by operating activities for the years ended December 31, 2023 and 2022.* Net cash and cash equivalents provided by operating activities were US\$1,367.3 million in 2023, compared to net cash provided by operating activities of US\$867.1 million in 2022. This change in net cash flow provided by operating activities in 2023 compared to 2022 was mainly attributable to the following factors:

An increase in proceeds from sales from US\$3,908 million in 2022 to US\$4,273 million in 2023.

*Cash used in investing activities for the years ended December 31, 2023 and 2022.* Net cash used in investing activities increased from US\$510.2 million in 2022 to US\$654.0 million in 2023.

*Cash used in financing activities for the years ended December 31, 2023 and 2022.* Net cash and cash equivalents used in financing activities was US\$757.4 million in 2023, compared to net cash used in financing activities of US\$740.8 million in 2022.

The following table shows Cerro Verde's contractual obligations as of December 31, 2023:

	Payments due by Period (US\$ in millions)			
	Total	Less than 1 Year	1-5 years	More than 5 Years
Trade accounts payable	281.7	280.7	1.0	—
Accounts payable – related parties	3.5	3.5	—	—
Lease liabilities	59.6	9.9	49.7	—
Other accounts payable	19.2	19.2	—	—
Total Contractual Cash Obligations	364.0	313.3	50.7	—

**Long-term Debt**

As of December 31, 2023, Cerro Verde had total long-term debt of US\$49.7 million associated with lease liabilities.

**Off-Balance Sheet Arrangements**

Cerro Verde has informed us that there are no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on Cerro Verde's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

**Gold, silver, lead and copper hedging and sensitivity to market price**

Cerro Verde has informed us that they have generally not engaged in, and are currently not engaged in, gold or copper price hedging activities, such as forward sales or option contracts, to minimize their exposure to fluctuations in the prices of gold or copper.

**C. Research and Development**

Not applicable.

**D. Trend Information**

Other than as disclosed in this Annual Report, Cerro Verde has informed us that it is not aware of any trends, uncertainties, demands, commitments or events which are reasonably likely to have a material effect upon Cerro Verde's net sales or revenues, income from continuing operations, profitability, liquidity or capital resources, or that would cause reported financial information to not necessarily be indicative of future operating results or financial condition.

[Table of Contents](#)**E. Critical Accounting Estimates**

A summary of our significant accounting policies is included in Note 3 to our audited consolidated financial statements, which are included in this annual report.

**ITEM 6. Directors, Senior Management and Employees****A. Board of Directors and Senior Management**

Our Board is responsible for policy decisions and our overall direction and other corporate matters in accordance with our By-laws and the Peruvian Companies Law. Our executive officers oversee our business and are responsible for the execution of the policy decisions of the Board. The Board, which must be composed of nine members, is elected at the Annual Mandatory Meeting of shareholders (the “Annual Mandatory Meeting”) for a three-year term. The most recent Board election took place in March 2023 and the next one is scheduled to take place in the Annual Mandatory Meeting to be held in March 2026. See “Item 10. Additional Information—B. Memorandum and Articles of Association.”

Our current directors and executive officers are as follows:

<u>Name</u>	<u>Age</u>	<u>Position</u>	<u>Date First Appointed</u>	<u>Current Term Ends</u>
<b>Directors</b>				
Roque Benavides <sup>(1)</sup>	70	Chairman of the Board	1980	March 2026
Marco Antonio Zaldívar	64	Director	2020	March 2026
William Champion	69	Director	2016	March 2026
Diego de la Torre	62	Director	2017	March 2026
Nicole Bernex	75	Director	2018	March 2026
Raúl Benavides <sup>(1)</sup>	69	Director	2020	March 2026
Jorge Francisco Betzhold	68	Director	2023	March 2026
Ivan Arriagada Herrera	60	Director	2024	March 2026
Andrónico Luksic Lederer	42	Director	2024	March 2026
<b>Executive Officers</b>				
Leandro Garcia	57	Chief Executive Officer	2020	
Daniel Dominguez	47	Vice President and Chief Financial Officer	2020	
Aldo Massa	53	Vice President of Business Development and Commercial	2021	
Alejandro Hermoza	63	Vice President Community Relations	2008	
Juan Carlos Ortiz	54	Vice President Operations	2018	
Renzo Macher	50	Vice President of Projects	2023	
Juan Carlos Salazar	52	Vice President of Explorations	2024	
Gulnara la Rosa	60	General Counsel	2012	

(1) Roque Benavides is the brother of Raúl Benavides.

Set forth below is biographical information concerning members of our board and management.

*Roque Benavides, Chairman of the Board and member of the Nominating Committee.* Mr. Benavides received his degree in Civil Engineering from the Pontifical Catholic University of Peru (PUCP) in 1977 and his Master of Business Administration from the Henley Business School at the University of Reading in the U.K. in 1980. He completed the Management Development Program at the Harvard Business School in 1985 and the Advanced Management Programme at Oxford University in 1997. He is currently Chairman of the Board and a member of the board of directors of some of the Company’s related entities. He is also a member of the board of directors of Banco de Crédito del Perú. He was director of UNACEM from 2010 to 2020. He was previously President of the Peruvian Mining, Oil, and Energy Association (SNMPE) and the Peruvian Confederation of Private Business Institutions (CONFIEP).

[Table of Contents](#)

*Marco Antonio Zaldivar, Director.* Mr. Zaldivar, a certified Public Accountant, graduated from the Universidad de Lima. He also graduated from PAD's the Management Development Program at the Universidad de Piura and holds a Master of Business Administration from the Adolfo Ibáñez School of Management, USA. He is Independent Director of Empresa Editora El Comercio, Técnica Avícola and Core Capital SAF. He has been Independent Director at Cementos Pacasmayo, UCP Backus & Johnston, Banco Santander, among other companies. He was previously Chairman of the board of directors of the Lima Stock Exchange and the second Vice President of Confiep.

*Diego de la Torre, Director.* Mr. de la Torre holds a bachelor's degree in Business Administration from Universidad del Pacífico in Lima and his Master's in Business Administration from the London Business School in England. He is a cofounder and Chairman of the Board of La Viga, Quikrete Perú, Aletea Capital and Bodega RAS. He is also a member of the Advisory Committee of the David Rockefeller Center for Latin American Studies at Harvard University and the international council of CEAPI in Madrid. He was previously a professor at the Universidad del Pacífico for twelve years and a member of the board of directors of several companies and institutions, including Endeavor Perú, IPAE and Perú 2021. He was Chairman of the United Nations Global Compact in Peru, from 2005 to 2021. In 2013, he received the "Empresario Integral" award given by the Latin American Business Council. Also, in 2015, he was selected among the "Top 100 Influential Leaders" by AACSB International. He has been a member of the Board of Directors since 2017.

*Nicole Bernex, Director.* Ms. Bernex received her PhD in Geography from the Paul Valéry University of Montpellier (France). She has served as professor of the Department of Humanities of the Pontifical Catholic University of Peru (PUCP), academic director of the Research Center in Applied Geography (CIGA) of the PUCP, president of the Geographic Society of Lima and president emeritus of the Peruvian Forum for Water (GWP Peru). Ms. Bernex is also a member of the National Academy of Sciences of Peru, the esteemed Water Program of the Inter-American Network of Academies of Sciences (IANAS) and the Steering Committee of 2030 WRG. She has been the director of several research projects and programs, including the "Scientific, legal and financial design of the Scientific Institute of Water – ICA" (CONCYTEC-IRD-PUCP) and the "Water, Climate and Development Program – PACyD" of Global Water Partnership South America. She has been published more than 160 times in many books, articles and other publications.

*William Champion, Director.* Mr. Champion earned his bachelor's degree in Chemical Engineering and Biology from the University of Arizona, in Tucson, Arizona, United States. He has been a member of the Board since January 2016 and also serves as a director of Gladiator Mining Group LLC, a private mining investment company based in the United States. With over 40 years of executive, management, and operating experience in the mining sector, Mr. Champion worked at Rio Tinto PLC from 2002 to 2014 in various positions, was managing director of Rio Tinto Coal Australia and Rio Tinto Diamonds, served as president and chief executive officer of Kennecott Utah Copper and worked at Phelps Dodge Mining Company from 1984 to 1995, where he held different positions, including president of Phelps Dodge de Chile.

*Raúl Benavides Ganoza, Director.* Mr. Benavides earned his bachelor's degree in Mining Engineering from the University of Missouri—Rolla, Master of Mining Administration from Pennsylvania State University, and completed the Advanced Management Program at Harvard Business School (AMP-160). He has served as President of the IIMP and the Mining Convention (Perumin), as well as being the Founder and President of the Mining Safety Institute (ISEM). He is currently the President of the vocational mining school CETEMIN. He has worked at Buenaventura since 1980, and is the Director of 11 related companies.

*Jorge Francisco Betzhold Henzi, Director.* Member of the Australasian Institute of Mining and Metallurgy. Member of the Geostatistical Association of Southern Africa (GASA) with solid knowledge and experience in the mining business. Mr. Betzhold has 36 years practical experience in South America (Chile, Brazil, Venezuela, Argentina), Southern Africa South Africa (Botswana, Namibia, Zambia) and USA (Alaska). Mr. Betzhold studied Geoflogy at Universidad de Chile, Geostatistics at Fontainebleau Centre, Paris School of Mines, France and Management at the Graduate School of Business, University of Stellenbosch, South Africa. In addition, Mr. Betzhold has served as Head of Resource Planning and Development at Minería Escondida Limitada - BHP Billiton from 2011 to 2017.

[Table of Contents](#)

*Leandro Garcia, Chief Executive Officer.* Mr. Garcia earned his bachelor's degree in business administration and a bachelor's degree in accounting from Universidad del Pacífico and his Master of Business Administration from the University of Miami in Florida. He completed the Management Development Program at Harvard Business School in 2017. He held the position of Treasury Head at Buenaventura from 1990 to 1997. He also worked as the finance manager at Sociedad Minera El Brocal until 2000, as general manager of Boticas BTL until 2005, and general manager of Boticas Inkafarma until June 2011. He rejoined Buenaventura as Controller General in July 2011. He has also served as director of Química Suiza Retail, the business that manages the Mi Farma pharmacy chain, from January 2016 until January 2018. Mr. Garcia has also served as Chief Executive Officer of Consorcio Energético de Huancavelica and a director of Sociedad Minera El Brocal, Compañía Minera Condesa y Empresa de Generación Huanza.

*Daniel Dominguez, Vice President and Chief Financial Officer.* Mr. Dominguez earned his bachelor's degree in Economics and a Master of Business Administration from Universidad del Pacífico. He also successfully completed the Harvard Business School General Management Program (GMP-16) in 2015 and the London Business School Corporate Finance Program in 2010. Mr. Dominguez has served in several positions at Buenaventura, most recently as Supply Chain Manager since 2017. Prior to this role, he was the Company's Financial Planning and Investor Relations Manager from 2016 to 2017, Director of Treasury and Financial Planning from 2012 to 2016, and Head of Treasury from 2003 to 2012. He began his career in 2000 as Head of Treasury at IMINSUR, previously a subsidiary of Buenaventura. Since September 2020, he has been appointed as Vice President and Chief Financial Officer. Mr. Dominguez is currently director of Sociedad Minera El Brocal.

*Aldo Massa, Vice President of Business Development and Commercial.* Mr. Massa earned his bachelor's degree in Business Administration from the Universidad de Lima and received an MBA from Universidad del Pacífico, also in Lima. Mr. Massa served as Buenaventura's Commercial Manager since February 2020. He has more than 26 years of mining industry experience with Companies including Southern Copper Corporation, part of the Mexico Group, where he held the role of Corporate Commercial Director for Peru, Mexico, the United States and Spain. Since January 2021, he has been appointed as Vice President of Business Development and Commercial.

*Juan Carlos Ortiz, Vice President of Operations.* Mr. Ortiz earned his bachelor's degree in mining engineering from the Pontificia Universidad Católica del Perú in 1992. He also holds a Master's in Engineering, with a focus on Mineral Engineering Management, from Pennsylvania State University. Prior to assuming his new role at Buenaventura, Mr. Ortiz was the Technical Services Manager at Volcan Compañía Minera, a polymetallic mining company and one of the largest producers of zinc, lead and silver in the world, where he was responsible for the departments of Engineering, Projects, Planning and Environmental Matters as well as Volcan's Alpamarca and Cerro de Pasco operations. Prior to this post, he served Chief Operations Officer at Compañía Minera Milpo (now part of the Nexa Resources Group), where he was responsible for the Cerro Lindo, Atacocha and El Porvenir operations. He is currently Director of the Institute of Mining Engineers of Peru and Sociedad Minera El Brocal.

*Alejandro Hermoza Maraví, Vice President of Labor, Social and Environmental Affairs.* Mr. Maraví graduated from the University of Maryland with a bachelor's degree in Mechanical Engineering and a Master's in Engineering and from the Peruvian University of Applied Sciences (UPC) with a Master's in Administration. He previously worked as the Development Manager of the Peruvian Confederation of Private Business Institutions (CONFIEP) and has worked at Buenaventura since 2003, where he has held the position of community relations manager from 2008 to 2011 and deputy manager of Administration and Human Resources from 2003 to 2008. In 2011, he completed the Advanced Management Program at Harvard Business School.

*Renzo Macher, Vice President of Projects.* Mr. Macher received a bachelor's degree in civil engineering from the Pontificia Universidad Católica del Perú, Lima. He received a Master's in Construction Engineering and Project Management from the University of Berkeley, California. Mr. Macher completed the Management Development Program at the University of Piura, in Lima. In his previous role within the Company, Mr. Macher served as Buenaventura's Projects Manager. Mr. Macher's career at Buenaventura began in 2013 as Manager of the Tambomayo Project, which started operations in 2016. Since then, he has been in charge of Buenaventura's Innovation and Project Development departments.

[Table of Contents](#)

*Gulnara La Rosa, General Counsel.* Ms. La Rosa received her law degree from Pontificia Universidad Católica del Perú in 1992. She also completed the Corporate Law Specialization Program at Universidad de Navarra, Spain, in 1991 and the High Specialization Program of Finance and Corporate Law at ESAN Graduate School of Business, Peru, in 2001. In addition, Ms. La Rosa attended the Management Program for Lawyers at Yale School of Management in 2005 and the Corporate Governance and Performance Program at Yale School of Management in 2012. Ms. La Rosa has worked at Buenaventura since 1990. She was the legal director from 2006 to 2012 and was appointed as legal manager and general counsel in July 2012. Ms. La Rosa served as the head of the Legal Department from 1997 to 2006 and as a staff attorney from 1991 to 1997.

**B: Compensation**

During the year ended December 31, 2023, the aggregate amount of compensation that we paid to all directors and executive officers was approximately US\$13.9 million, including director's fees accrued in 2022 and paid in 2023. We do not disclose to our shareholders or otherwise make public information with respect to the compensation of our individual directors or executive officers. Please refer to Note 32(d) to the Consolidated Financial Statements for further information

**C. Board Practices***Audit Committee*

The Audit Committee, which is composed entirely of independent directors as defined in Section 303A.02 of the New York Stock Exchange's Listed Company Manual, is responsible for assisting the Board in the appointment of independent auditors, upon delegation of such responsibility by the shareholders at the general meeting of shareholders (the "General Meeting") and reviewing the scope of internal and external audits. The Audit Committee also reviews compliance with internal control systems, reviews our annual and quarterly Consolidated Financial Statements before their presentation to the Superintendencia del Mercado de Valores, or the SMV (formerly known as the Comisión Nacional Supervisora de Empresas y Valores (National Supervisory Commission of Business and Securities)) (CONASEV), the Bolsa de Valores de Lima (Lima Stock Exchange) and the SEC and maintains the integrity of the preparation of audits. The members of the Audit Committee are Messrs. Zaldivar, Betzhold and de la Torre.

*Nominating and Compensation Committee*

The nominating and compensation committee is responsible for evaluating executive performance and approving executive compensation, including compensation of the chief executive officer. It is also responsible for preparing the proposals for the General Meetings in respect of the composition of the Board along with the directors' remuneration to be approved by the shareholders. The members of the Compensation Committee for 2023 were Messrs. de la Torre, Roque Benavides and Champion.

*Corporate Governance Committee*

The corporate governance committee is responsible for monitoring issues and practices related to corporate governance and proposing necessary actions in respect thereof. The members of the Corporate Governance Committee for 2022 were Messrs. Roque Benavides, Zaldivar and Betzhold.

[Table of Contents](#)***Sustainability and Innovation Committee***

The Sustainability and Innovation Committee is responsible for monitoring initiatives and practices related to Sustainability and Innovation . The members of the Sustainability and Innovation Committee for 2023 were Miss Nicole Bernex, Messrs. Roque Benavides, Raúl Benavides and de la Torre.

***Operations Committee***

The Operations Committee is responsible for supporting the Vice Presidency of Operations in meeting the goals set at the beginning of each year and providing a long-term vision to achieve the continuity of the Company's operations. The members of the Operations Committee for 2023 were Messrs. Champion, Betzhold, Roque Benavides, Raúl Benavides, Leandro García, Juan Carlos Ortiz and Juan Carlos Salazar.

**D. Employees**

As of December 31, 2023 we, including our subsidiaries and Coimolache, had 13,759 employees (including permanent and temporary employees). In addition, we have entered into arrangements with independent contractors that employed 11,025 workers at our operations. We have sought to strengthen our workforce by implementing a qualifications-based hiring policy and, with respect to employees working in the mines, reducing the average age of the workforce. As of December 31, 2023, the average tenure of Buenaventura's permanent laborers was approximately 10 years.

Of the 2,734 permanent employees (considers employees working on an indefinite term contract) employed by Buenaventura, its subsidiaries and Coimolache, approximately 46% are members of 12 different labor unions (including 04 unions for clerical workers and 08 unions for laborers), representing all aforementioned clerical workers and laborers in collective negotiations. There are also 6 unions for workers employed by independent contractors that were formed over the last ten years in our mines at Uchucchacua, Orcopampa, Tambomayo, Julcani, El Brocal and Coimolache.

Each labor union is company-based with an affiliation to a national union. Administrative personnel are not represented by unions. Labor relations for unionized and non-unionized employees in our production facilities, including compensation and benefits, are governed by collective bargaining agreements, the terms and length of which are negotiated throughout the year as the various collective bargaining agreements come up for renewal. These collective bargaining agreements are typically one year in length (with the exception of the Collective Agreement of Tambomayo laborers, which is valid for years from July 1, 2021 to June 30, 2024 and in the case of Tambomayo clerical workers, valid from August 1, 2021 to July 31, 2024) and set wages for the applicable period and benefits such as overtime, bonuses and family benefits.

Compensation received by our employees includes salary, other cash payments (such as overtime, vacation pay and bonuses, including, but not limited to, high altitude and underground mining bonuses) and non-cash benefits. Non-cash benefits include medical insurance, life insurance and training programs for workers and administrative staff. For mine and processing plant workers, benefits also include transportation services, meals or food allowances, education for children of some of our employees under certain special considerations and housing, medical services and a full range of social services for our permanent employees and their families at town sites near our mines in compliance with mining regulations. We voluntarily provide power, water and sewage services for the camp and houses of the workers as well as for certain towns nearby. In addition, pursuant to a profit-sharing plan mandated by Peruvian labor legislation, employees of mining companies in Peru are entitled to receive the employee profit sharing amount equivalent to 8% of the annual pre-tax profits of their employer, 50% of such profits to be distributed based on the number of days each employee worked during the preceding year and the remaining 50% of such profits to be distributed based on the aggregate annual salary of each employee. Effective January 1, 1997, the annual payment to each employee under the profit sharing plan cannot exceed 18 times such employee's monthly salary, and any difference between the employee profit sharing amount and the aggregate amount paid to employees must be contributed by us to FONDOEMPLEO, a fund established to promote employment and employee training.

Currently, we have (and strictly comply with) a Wage Policy that helps ensure equitable compensation under the principle of non-discrimination. The Wage Policy meets with the parameters established by Law N°30709, which forbids salary discrimination between men and women, as well as the related Regulations approved by Supreme Decree N°002 2018 TR.

[Table of Contents](#)

Under Peruvian law, we may dismiss workers for just cause after completing certain formal procedures. In addition, several decisions adopted by the Peruvian Constitutional Court, holding that an employee is entitled for reinstatement if no cause for dismissal is expressed by the employer or for failure to present evidence supporting the employer's grounds, have limited our ability to dismiss a worker without cause.

In the absence of just cause, workers are typically terminated by paying the applicable worker a layoff indemnification based on, at least, an amount equal to one and a half month's salary for each full year worked plus the pro rata portion for any uncompleted year, collectively, not to exceed in the aggregate 12 months' salary. The use of this method is subject to the worker's acceptance.

Regardless of the cause for termination, all employees are entitled to a severance payment. Such payment is equal to one month's salary (including an amount assigned for the value of other benefits), for each full year worked plus the pro rata portion for any uncompleted year. Pursuant to the Peruvian labor laws, said severance payments are deposited in a special bank account selected by each employee and for the benefit of such employee, in both May and November of each year (approximately 50% of a monthly salary each time). Workers may withdraw such funds in excess of four times the worker's gross monthly salary. Exceptionally and until December 31 2023, workers were able to withdraw 100% of the deposited amounts (Congress is currently considering an extension of said term). Upon termination, the remaining balance may be withdrawn by the worker for any reason.

Our permanent employees receive the benefit of one of two types of pension arrangements. All workers can choose to enroll in a public pension fund managed by the state (the "ONP" system) or in a private pension fund (the AFP system). We are required to withhold from each of the salaries of the employees enrolled in the ONP system 13% of such employee's salary, and pay such amount to the ONP system and withhold from the salary of each employee enrolled in the AFP system approximately 12.5% of such employee's salary, and pay such amounts to the respective AFP (exact amount varies from one AFP to another). Additionally, for workers involved in mining and metallurgical processes, an additional 2% is withheld from their salaries, and we contribute an additional 2% to increase their pension funds. We have no liability for the performance of these pension plans. Our independent contractors are responsible for covering severance and pension payments with respect to their employees.

In addition, we pay EsSalud, the Social Health Insurance Institute of Peru, 9% of our total payroll for general health services for all permanent employees. Further, Law No. 26790 also requires us to provide private insurance representing an average payment equal to 1.30% of the payroll of covered employees for employment-related incapacity and death for blue collar employees and other employees exposed to mining-related hazards.

**E. Share Ownership**

As of March 31, 2024, our directors and executive officers, as a group, owned 30,509,577 Common Shares, representing 12.01% of all 253,986,867 Common and Investment Shares outstanding.

- (1) The table above excludes treasury shares. As of March 31, 2024 Buenaventura held 14,474 Common Shares and 1,230 Investment Shares and our wholly owned subsidiary, Condesa, held 21,160,260 Common Shares and 471,733 Investment Shares.
- (2) Percentage calculated on the basis of 253,715,190 Common Shares outstanding, which excludes 21,174,734 treasury shares.
- (3) Percentage calculated on the basis of 271,677 Investment Shares outstanding, which excludes 472,963 treasury shares.
- (4) Percentage calculated on the basis of 253,986,867 Common Shares and Investment Shares outstanding, which excludes 21,647,697 treasury shares.
- (5) Common Shares owned by Roque Benavides and his son
- (6) Common Shares owned by Raul Benavides and his children.

As of March 31, 2024, we estimate that 221,946,406 Common Shares were held in the U.S., which represented approximately 87.48% of Common Shares outstanding. The number of institutional record holders of our Common Shares (or of ADSs representing our Common Shares) in the U.S. was 43 institutions.

**B. Related Party Transactions**

Except as otherwise disclosed herein, no director, senior officer, principal shareholder or any associate or affiliate thereof had any material interest, direct or indirect, in any transaction since the beginning of our last financial year that has materially affected us, or in any proposed transaction that would materially affect us. Except as otherwise disclosed herein, we have entered into no transactions with parties that are not "related parties" but who would otherwise be able to negotiate terms not available on an arm's-length basis. From time to time in the ordinary course of business, we enter into management, exploration, mine construction, engineering and employment contracts with joint venture companies in which one or more of our direct or indirect subsidiaries holds equity or partnership interests.

[Table of Contents](#)

The compensation of our key executives (including the related income taxes we assumed in connection therewith) amounted to US\$12.1 million in 2021, US\$13.2 million in 2022 and US\$13.9 million in 2023. Please refer to Note 32(d) to the Consolidated Financial Statements for further information.

Chaupiloma was the legal owner of the mining rights operated by Yanacocha until 2022 and received a 3% royalty based on quarterly sales, after deducting refinery and transportation costs. Royalties amounted to US\$15.9 million in 2021 and US\$1.4 million in 2022 and are presented as royalty income in our consolidated statements of income. After 2022, Chaupiloma transferred to Yanacocha all the mining rights and we have ceased to receive royalty since then.

In 2021, 2022 and 2023, we received cash dividends from Sociedad Minera Cerro Verde S.A.A. in an amount of US\$137.01 million, US\$78.3 million and US\$146.9 million, respectively.

We received cash dividends from Coimolache of approximately US\$11.3 million in 2021, and US\$0.8 million in 2022 and US\$0.4 million in 2023.

We recognized revenues of energy sales from Consorcio Energético de Huancavelica S.A. and Empresa de Generación Huanza S.A. of approximately US\$5.4 million in 2021, US\$5.0 million in 2022, and US\$4.8 million in 2023.

**ITEM 8. Financial Information****A. Consolidated Statements and Other Financial Information****Consolidated Financial Statements**

See “Item 19. Exhibits” for a list of consolidated financial statements filed under Item 18.

**Other Financial Information***Export Sales*

See “Item 4. Information on the Company—Buenaventura—B. Business Overview—Sales of Metal Concentrates—Sales and Markets” for information on export sales.

*Legal Proceedings***SUNAT litigation**

Buenaventura is involved in legal proceedings against SUNAT in connection with SUNAT’s refusal to recognize Buenaventura’s deductions with respect to contracts for physical deliveries and certain contractual payments made by the Company during the years 2007 and 2008, as well as tax loss, which was offset in 2009 and 2010.

During 2007 and 2008, Buenaventura modified its client contracts for the purposes of the sale of gold, shifting from a fixed price arrangement to a variable price arrangement. This allowed the Company to appropriately benefit from improved market prices. Additionally, this caused Buenaventura to incur significant expenses during the two-year transition period from 2007 to 2008, which also impacted the income tax payable by Buenaventura for fiscal years 2008 and 2009. However, the modified pricing structure also favorably impacted Buenaventura’s financial results with a corresponding increase in Buenaventura’s income tax payment to SUNAT during subsequent fiscal years.

[Table of Contents](#)

SUNAT's position is that Buenaventura should disregard the additional expenses incurred in connection with the shift to variable price arrangement for purposes of calculating its income tax for fiscal years 2007 and 2008. According to SUNAT, said payments correspond to an early settlement of financial derivative contracts in situations where the Company did not establish the purpose or risks covered by such instruments. Additionally, SUNAT does not recognize the tax losses which the Company offset during fiscal years 2009 and 2010, related to the losses incurred during fiscal years 2007 and 2008.

The claim for the years 2007, 2008, 2009 and 2010 initially amounted to 373.3 million soles (approximately US\$100.5 million updated at the exchange rate of December 31, 2023) which, when accounting for alleged penalties and fees at the date SUNAT commenced collection proceedings, and according to SUNAT's estimations, amounted to 2,107.5 million soles (approximately US\$567.6 million based on the exchange rate corresponding to December 31, 2023).

On November 26, 2020, following the intervening tax court's decision to dismiss the Company's appeal against certain Administrative Resolutions issued by SUNAT in connection with the above-referenced matter, SUNAT began collection proceedings in respect of such amounts. Following the commencement of such collection proceedings by SUNAT, the Company filed a request for deferral and payment plan of the amounts claimed by SUNAT in order to make such tax payments over a 67-month term, in addition to making interest payments in connection with such payments. The requested payment plan consists of an initial payment in an amount equal to 14% of the amount claimed by SUNAT and 66 equal installments for the remaining amounts. In order to finalize the deferral and payment agreement with SUNAT, the Company was required to deliver Letters of Credit in an amount equal to the aggregate claimed amount in accordance with applicable law. To satisfy this requirement, on December 30, 2020, the Company entered into the Syndicated L/C Agreement with a group of financial entities and following delivery of the Letters of Credit, SUNAT approved the Company's payment plan.

On July 30, 2021, the Company paid the full amount of the disputed tax assessment related to the 2007, 2008, 2009 and 2010 tax proceedings that were subject to deferment and installment and that are recorded in the caption "Trade and other receivables, net". For fiscal years 2007 and 2008, the total amount paid was S/1,584,227,000 (equivalent to US\$426,670,000 based on the exchange rate corresponding to December 31, 2023), which included updating the debt to reflect interest accrued as of July 30, 2021, such interest amounting to S/78,279,000 (equivalent to US\$21,082,000 based on the exchange rate corresponding to December 31, 2023). For fiscal year 2009, total amount paid was S/193,398,000 (equivalent to US\$52,199,000 based on the exchange rate corresponding to December 31, 2023) which included updating the amount claimed to reflect interest accrued as of July 30, 2021, such interest amounting to S/8,477,000 (equivalent to US\$2,283,000 based on the exchange rate corresponding to December 31, 2023). For fiscal year 2010, as a result of a deferral and installment, the total amount paid was S/356,691,000 (equivalent to US\$96,273,000 based on the exchange rate corresponding to December 31, 2023) which included the updating the amount claimed to reflect interest accrued as of July 30, 2021, such interest amounting to S/16,762,000 (equivalent to US\$4,514,000).

As of December 31, 2023, as a result of the advance payment mentioned above, the deferral and installment resolutions of the SUNAT tax claim have been rendered null and the letters of credit that were delivered as collateral for said disputed payments have been returned to the issuing banks.

In November 2023, the Fifth Chamber of Transitory Constitutional and Social Law of the Supreme Court notified the cassation ruling that declared the lawsuit filed by the Company unfounded regarding the derecognition of carry forwarded tax losses. In response, on December 22, 2023, the Company and its sponsoring lawyers filed an amparo request before the Constitutional Chamber of the Superior Court of Justice with the purpose of declaring the annulment of the cassation ruling in response of the grievances to the constitutional right to effective procedural protection of the Company.

The liability previously mentioned does not represent a withdrawal from the process, since the process remains in progress. Moreover, it does not imply a cash outflow as it is related to a payment in full made in previous years prior to the recognition of the account receivable.

[Table of Contents](#)

As part of the assessment of the process status as of 2023, the Buenaventura's legal advisors concluded that the probabilities of recovering a portion of the payments made under protest to the Tax Administration related to fiscal years 2009 and 2010 were less than 50%, for which it was recognized with effect on the results of the year a liability due to a claim to the Tax Administration for S/420,231,000 (equivalent to US\$113,178,000) regarding the portion of accounts receivable related to such carry-forwarded losses. The impact in profit or loss was distributed as follows: others, net (US\$9,598,000), financial expenses (US\$58,454,000), and income tax (US\$45,126,000). The liability previously mentioned does not represent a withdrawal from the process, since the process remains in progress. Moreover, it does not imply a cash outflow as it is related to a payment in full made in previous years prior to the recognition of the account receivable.

In March 2024, the Supreme court notified the cassation ruling that declared unfounded the lawsuit filed by the Company to assert its position regarding derivative financial instruments operations in 2007. In the opinion of the sponsored lawyers, there are solid grounds to file an amparo claim, that will be ultimately resolved by the Constitutional Court, requesting the annulment of the aforementioned cassation as a result of the violation of constitutional rights and guarantees. The Company filed said constitutional action on April 19, 2024.

We will continue to pursue appeals on this matter in Peruvian courts. These legal proceedings may be costly and time consuming and there can be no guarantee in respect of the final outcome of these proceedings or that SUNAT will not bring future claims against us.

See Note 31 (d) and 7 (c) of the Consolidated Financial Statements for additional information.

*Dividends and Dividend Policy*

We can distribute three kinds of dividends: (i) cash dividends, which are paid out of our net distributable income for each year, (ii) stock dividends that are akin to stock splits rather than distributions of earnings, which are issued for the purpose of adjusting the book value per share of our stock and (iii) stock dividends for the purpose of capitalizing profits, in each case as described in more detail below. All shares outstanding are entitled to share equally in any dividend declared based on the portion of our capital represented by such share. No cash dividend may be declared if our financial statements do not show distributable profits. However, we may declare dividends during the year. We may make interim provisional payments to shareholders in respect of net distributable income for the current fiscal year, which are referred to as "provisional dividends" or "dividends on account" as explained below, provided the financial statements as of end of the month preceding the date where such dividends are declared, show the existence of net distributable income obtained during the current year and there are no losses to be covered from past years.

The Board, following the end of each fiscal year, makes a recommendation at the Annual Mandatory Meeting regarding the amount and timing of payments, if any, to be made as dividends on our Common Shares and Investment Shares. The Shareholders Meeting can delegate to the Board the approval to pay interim dividends.

The dividend policy establishes that Buenaventura will distribute an annual cash dividend of at least 20% of net income generated by majority-owned operations and subsidiaries. In the case of Buenaventura's Associates (Coimolache and Cerro Verde), 20% attributable to Buenaventura's net income will be included if they distribute cash dividends to Buenaventura. In principle there are two kinds of dividend payments: interim dividends, which are approved by the Board and in the past were generally paid during the fourth quarter of the year, and the final dividend payment, which will be paid in accordance with the general shareholders' meeting resolutions. However, the amount and timing of such payments is subject to the final approval at such Annual Mandatory Meeting and Board meeting, as well as to the availability of earnings to distribute. According to the Peruvian Companies Law, holders of at least 20% of the total Common Shares outstanding can request a dividend of 50% or less of the previous year's after-tax profits, net of amounts allocated to the legal reserve.

Available earnings are subject to the following priorities. First, the mandatory employee profit sharing of 8% of pre-tax profits (which may differ from pre-tax profits determined under IFRS due to different depreciation treatment and different adjustments of non-taxable income and/or non-deductible expenses) is paid.

[Table of Contents](#)

Next, remaining earnings are taxed at the standard corporate income tax rate, which is 29.50%. Not less than 10% of such after-tax net profits must then be allocated to a legal reserve, which is not available thereafter except to cover future losses or for use in future capitalizations, in which case it must be replenished again. Amounts reserved are nevertheless included in taxable income. The obligation to fund this reserve continues until the reserve constitutes 20% of the paid-in share capital. In addition, the holders of Common Shares can agree to allocate any portion of the net profits to any special reserve. The remainder of the net profits is available for distribution to shareholders.

Dividends are subject to an additional withholding tax for shareholders that are either (i) individuals, whether domiciled or non-domiciled in Peru, or (ii) non-domiciled companies or entities. For dividends paid out of our accumulated net profits, the withholding tax rate is 5% when the dividend originated from profits earned on or after January 1, 2017. If any tax or other governmental charge will become payable by Scotiabank Peru, as custodian, the Depositary or us with respect to any ADR or any deposited securities represented by the ADSs evidenced by such ADR, such tax or other governmental charge will be payable by the owner or beneficial owner of such ADR to the Depositary.

Dividends paid to domiciled companies or entities are not subject to such withholding tax. If any tax or other governmental charge will become payable by Scotiabank Peru, as custodian, the Depositary or us with respect to any ADR or any deposited securities represented by the ADSs evidenced by such ADR, such tax or other governmental charge will be payable by the owner or beneficial owner of such ADR to the Depositary.

Dividends on issued and outstanding Common Shares and Investment Shares are distributed in accordance with the proportion of the total capital represented by such respective shares. Dividends are distributed pro rata in accordance with the number of Common Shares or Investment Shares. Accordingly, any dividend declared would be apportioned 99.73% to the holders of Common Shares and 0.27% to the holders of Investment Shares. This proportion will not change in the future except if, and to the extent that holders of Common Shares and Investment Shares exercise their preemptive rights disproportionately in any future issuance of Common Shares and Investment Shares, or if we issue Common Shares without preemptive rights in accordance with Article 259 of the Peruvian Companies Law.

Holders of Common Shares and Investment Shares are not entitled to interest on dividend payments.

Holders of ADRs are entitled to receive dividends with respect to the Common Shares underlying the ADSs evidenced by such ADRs, subject to the terms of the related Amended and Restated Deposit Agreement, to the same extent as owners of Common Shares.

To the extent that we declare and pay dividends on the Common Shares, owners of the ADSs on the relevant record date are entitled to receive the dividends payable in respect of the Common Shares underlying the ADSs, subject to the terms of the Amended and Restated Deposit Agreement. Cash dividends are paid to the Depositary in Soles and, except as otherwise described under the Amended and Restated Deposit Agreement, are converted by the Depositary into U.S. Dollars and paid to owners of ADRs net of currency conversion expenses. Under the Amended and Restated Deposit Agreement, the Depositary may, and will if we so request, distribute stock dividends in the form of additional ADRs evidencing whole ADSs resulting from a dividend or free distribution of Common Shares by us received by the Depositary. Amounts distributed with respect to ADSs were subject to a Peruvian withholding income tax of 6.8% for profits earned during 2016, which was the withholding tax rate applicable to distributions in respect of Common Shares during 2016. The withholding tax rate decreased to 5% for dividends paid out of our accumulated net profits after December 31, 2016. See "Item 10. Additional Information—E. Taxation—Peruvian Tax Considerations."

We issue stock dividends for value per share of our stock. The book value of our share capital is based on the nominal (par) value of each share but is adjusted to account for inflation; thus, in inflationary periods, our book value will increase while the nominal value will remain constant. To adjust the book value of each share to equal or approximate the nominal value, in the past we periodically issue new shares that are distributed as stock dividends to each existing shareholder in proportion to such shareholder's existing holdings, unless it increases the nominal value of the existing shares. These stock dividends (which under the Peruvian income tax law are not considered dividends) do not change a stockholder's percentage of interest in us. In addition, we may from time to time capitalize profits and, in such case, must distribute stock dividends representing the profits capitalized.

Dividends not collected within 10 years will be retained by us, increasing our legal reserve, and the right to collect such dividends will expire.

[Table of Contents](#)

Under Peruvian law, each company may make formal cash distributions only out of net distributable income (calculated on an individual, unconsolidated basis and demonstrated by a statement of financial position at any given time). We, however, may pay provisional dividends. Payment of provisional dividends will be approved on the basis of consolidated financial statements which show the existence of net distributable income obtained during the current fiscal year. If, following such an interim provisional payment, we suffer a loss or if we finish the fiscal year with a net income that is lower than the amount of provisional dividends paid during such fiscal year, shareholders that acted in good faith may retain the dividends exceeding the distributable profit, with such dividends counting as advanced payments credited against profits or liquidation proceeds that they are entitled to receive in following periods. Therefore, it has been and continues to be our policy not to require shareholders to return such payment of provisional dividends, but rather to cover such contingency through a “dividends paid in advance” account to be offset by future net distributable income.

The following table sets forth the amounts of interim and final cash dividends and the aggregate of cash dividends paid with respect to the years 2020 to 2023. Dividends with respect to the years 2020 to 2023 were paid per Common Share and ADS.

Year ended December 31, <sup>(1)</sup>	Per Common Share			Per ADSs			Per Investment Share		
	Interim	Final	Total	Interim	Final	Total	Interim	Final	Total
2020	0.000	0.000	0.000	0.000	0.000	0.000	0.000	0.000	0.000
2021	0.000	0.000	0.000	0.000	0.000	0.000	0.000	0.000	0.000
2022	0.073	0.000	0.073	0.073	0.000	0.073	0.073	0.000	0.073

As of March 31, 2024, the share capital with respect to the Common Shares was S/2,748,899,240 represented by 274,889,924 shares, and the share capital with respect to the Investment Shares was S/7,446,400 represented by 744,640 shares. The Common Shares represent 100% of our outstanding share capital and treasury shares. The Investment Shares have no voting rights and are not, under Peruvian law and accounting rules, characterized as share capital. As of March 31, 2024, there were 931 owners of record of the Common Shares and 895 owners of record of the Investment Shares.

**B. Plan of Distribution**

Not applicable.

[Table of Contents](#)**C. Markets**

The Common Shares and ADSs representing the Common Shares (each ADS representing one Common Share) have been listed and traded on the New York Stock Exchange under the symbol BVN. In addition, the Common Shares and Investment Shares are listed and traded on the Lima Stock Exchange.

**ITEM 10. Additional Information****A. Share Capital**

Our capital stock comprises Common Shares and investment shares. Common Shares have full voting rights while investment shares do not. As of December 31, 2023, there were 253,715,190 Common Shares outstanding, exclusive of 21,174,734 Common Shares held in treasury. In the case of Investment Shares, there were 271,677 Investment Shares outstanding, exclusive of 472,963 Investment Shares held in treasury. In total there are 253,986,867 outstanding shares, and this number has not changed throughout the year 2023. The capital stock is fully subscribed and paid. Additionally, the par value per share (for both Common Shares and Investment Shares) is S/.10.

**B. Memorandum and Articles of Association*****Organization and Register***

We were formed on September 7, 1953 by public deed as a Peruvian *sociedad anónima*. However, in May of 1998, our By-laws were changed to conform with the new Peruvian Companies Law. The term of existence is indefinite and our principal place of business is Lima, Peru. We are registered under file number 02136988 at the Companies Registry of Lima.

We are managed by the Board and the management.

***Objectives and Purposes***

Our legal purpose, as set forth in our Articles of Association and By-laws, is to engage in mining operations and related activities either directly or through majority-owned subsidiaries and controlled companies. Likewise, we may hold shares of other companies, including companies performing mining operations.

***Directors***

The Board, which must be composed of nine members, is elected for a three-year term at the Annual Mandatory Meeting and may be reelected indefinitely. Any changes in the Board require the approval of the shareholders. The removal of the Board must be approved at a shareholders' meeting, attended by holders of 75% of the Common Shares in the first summons and 70% of the Common Shares in the second summons, by resolution approved by at least two thirds of the total number of Common Shares outstanding. In the case of resignation of directors, the Board may appoint substitute directors who will serve until the next shareholders' meeting.

[Table of Contents](#)

Pursuant to Article 29 of our By-laws, Directors are not required to be shareholders. The Board, in its first meeting after the Annual Mandatory Meeting during which elections are held, must choose from among its members a Chairman and a Lead Director. The Peruvian Companies Law requires that all companies (*sociedades anónimas*) provide for the representation of non-controlling shareholders on their Boards of Directors. To that effect, each of our Common Shares gives the holder the right to as many votes as there are directors to be elected. Each holder may pool his votes in favor of one person or distribute them among various persons. Those candidates for the Board who receive the most votes are elected directors.

The Board of Directors meets when called by the Chairman of the Board. The Board of Directors is validly convened when all Directors are present and unanimously agree to carry out the meeting for the purpose of transacting the business that has been proposed. Pursuant to Article 177 of the Peruvian Companies Law, Directors may be jointly and severally liable to us, the shareholders and third parties for their actions if they act with willful misconduct, gross negligence, or abuse their powers. In addition, Article 3 of Law No. 29720, which has been in force since June 26, 2011, as amended by Law No. 30050 in force since June 27, 2013, provides that directors and managers are civilly liable for damages caused to us by any transaction they have approved that favors such director's, or a related party's, interest instead of the Company's interest, when: (i) one of the parties involved in the transaction is a company whose shares are listed in the local stock exchange, as in our case; (ii) the shareholder controlling such listed company also controls the other party involved in the transaction; and (iii) the transaction is not made under arm's-length conditions and represents at least 10% of such company's assets. Directors not participating in the Board meeting or that voted against the transaction are not liable.

In addition, Article 53 of the Single Ordered Text of the Securities Market Law approved by Supreme Decree N° 020-2023-EF contains additional prohibitions for directors and managers of companies whose shares are traded in the stock exchange. Pursuant to Article 53(a) of such law, directors and managers are forbidden to receive loans from listed companies and from using goods and services of the listed company without the Board's authorization for their own use, in their own profit or to benefit persons related to the directors and managers. Additionally, subsection (b) thereof further provides that directors and managers are forbidden from using their positions to obtain improper benefits for them or for persons related to them.

In connection therewith, Article 180 of the Peruvian Companies Law provides that directors can neither approve resolutions that do not protect the company's interest but rather the director's own interests or a related party's interest, nor may a director use a business opportunity that the director is aware of due to their position as a director in their own interest or in a related party's interest. Our By-laws do not contain any provisions related to a director's power to vote on matters in which the director is materially interested. However, such Article 180 of the Peruvian Companies Law requires a director with an interest that conflicts with an interest of ours on a specific matter to disclose such interest to us and abstain from participating in the deliberation and decision of the said matter. A director that contravenes such requirement is liable for the damages suffered by us and can be removed by the Board or a shareholders' meeting upon the request of any shareholder or any member of the Board.

Our By-laws also do not contain any provisions with respect to the power of the directors to vote upon matters relating to their own compensation. Nevertheless, Article 30 of the By-laws requires that the Board receive compensation of no more than 4% of the profits of each fiscal year after making deductions for workers' profit sharing, taxes, reinvestment of profits for tax benefits and legal reserves. This amount will be submitted for ratification by the General Meeting during the Annual Mandatory Meeting, at which time it approves the statement of financial position, taxes, reinvestment of profits for tax benefits and legal reserves.

Our By-laws contain no provision relating to the directors' power to borrow from us. However, Article 179 of the Peruvian Companies Law provides that directors of a company may enter into an agreement with such company only if the agreement relates to operations the Company performs in the regular course of business and is in arms-length conditions. Furthermore, a company may provide a loan to a director or grant securities in his favor only in connection with operations that the Company usually performs with third parties. Agreements, credits, loans or guarantees that do not meet the requirements set forth above require prior approval from at least two thirds of the members of the Company's Board. Directors are jointly liable to the Company and the Company's creditors for contracts, credit, loans or securities executed or granted without complying with Article 179 of the Peruvian Companies Law. In addition, as mentioned above, Article 3 of Law No. 29720, as amended, provides that directors and managers are liable for economic or other damages that they may cause because of the approval of resolutions that favor such director's, or a related party's, interest instead of the Company's interest, when: (i) one of the parties involved in the transaction is a company whose shares are listed in the local stock exchange, as in our case; (ii) the shareholder controlling such listed company also controls the other party involved in the transaction; and (iii) the transaction is not made under arm's-length conditions and represents at least 10% of such Company's assets.

[Table of Contents](#)

Neither our By-laws nor the Peruvian Companies Law contain age limit requirements for the retirement or non-retirement of directors.

**Shares and Voting Rights**

We have two classes of shares, the Common Shares and the Investment Shares. The Common Shares represent 100% of our outstanding share capital. The Investment Shares have no voting rights and are not, under Peruvian law and accounting rules, characterized as share capital. The Common Shares and the Investment Shares may be either physical share certificates in registered form or book-entry securities in the CAVALI ICLV S.A. book-entry settlement system, also in registered form.

Holders of Common Shares are entitled to one vote per share, with the exception of the election of the Board, where each share has the right to as many votes as there are directors to be elected. Each holder's votes may all be cast for a single nominee or they may be distributed among the nominees at the holder's discretion. Holders of Common Shares may attend and vote at shareholders' meetings either in person or through a proxy. Additionally, holders of Common Shares have the right to participate in the distribution of dividends and shareholder equity resulting from liquidation. Our By-laws do not establish a maximum time limit for the payment of the dividends. However, according to Article 232 of the Peruvian Companies Law, the right to collect past-due dividends in the case of *sociedades anónimas abiertas*, as we are, expires at 10 years from the date on which the payment was due in accordance with the dividend declaration.

Our share capital may be increased by holders of Common Shares at a shareholders' meeting. Capital reductions may be voluntary or mandatory and must be approved by holders of Common Shares at a shareholders' meeting. Capital reductions are mandatory when accumulated losses exceed 50% of capital to the extent such accumulated losses are not offset by accumulated earnings and capital increases within the following fiscal year. Capital increases and reductions must be communicated to the SMV, the Lima Stock Exchange and the SUNAT and published in the official gazette El Peruano and in a widely circulated newspaper in the city in which we are located.

The Investment Shares do not represent our stock obligations. Holders of Investment Shares are neither entitled to exercise voting rights nor to participate in shareholders' meetings. However, Investment Shares confer upon the holders thereof the right to participate in the dividends distributed according to their nominal value, in the same manner as Common Shares, as well as to participate in increases of the Investment Shares account and in the distribution of shareholder equity resulting from liquidation.

**Changes in the Rights of Shareholders**

Our By-laws do not contain special provisions relating to actions necessary to change the rights of holders of the classes of shares. However, Article 88 of the Peruvian Companies Law establishes that all shares of a same class must have the same rights and obligations, and that if we decide to establish different rights and obligations, we must create a different class of shares, which creation will be agreed upon by the General Meeting in accordance with the requirements for modification of the By-laws. The Common Shares are the only class of shares representing 100% of our share capital, and, therefore, each Common Share has the same rights and obligations of each other Common Share. These requirements are described under "—Shares and Voting Rights" above.

The rights of any class of shares may not be reduced, except in accordance with the Peruvian Companies Law.

[Table of Contents](#)**Shareholders' Meetings**

Pursuant to Peruvian law and our By-laws, the Annual Mandatory Meeting must be held during the three-month period after the end of each fiscal year. Additional General Meetings may be held during the year. Because we are a *sociedad anónima abierta* (publicly held corporation), we are subject to the special control of the SMV, as provided in Article 253 of the Peruvian Companies Law, to determine whether we have incurred any breach of the Peruvian Companies Law or regulations of the SMV and to impose sanctions. Shareholders' meetings are convened by the Board when deemed convenient for us or when it is requested by the holders of at least 5% of the Common Shares, provided that such Common Shares do not have their voting rights suspended. If, at the request of holders of at least 5% of the Common Shares, the shareholders' meeting is not convened by the Board within 15 business days of the receipt of such request, such holders of at least 5% of the Common Shares may request a notary public or a judge to convene the meeting. The Board is deemed to have implicitly refused to convene the meeting if the Board (a) does not convene a shareholders' meeting within 15 business days of receipt of the request, (b) suspends or amends the terms of the agenda or in any other way amend the terms of the summons already made upon the request of at least 5% of the Common Shares or (c) schedules the shareholders' meeting more than 40 days after the date on which the summons is published. The notary public or the judge of the domicile of the Company shall call for the shareholders meeting. Resolución CONASEV No. 111-2003-EF-94.10, as amended by Resolución CONASEV No. 078-2010-EF/94.01.1, approved provisions related to the right of the non-controlling shareholders to obtain information regarding a *sociedad anónima abierta* (publicly held corporation) such as ourselves. Notwithstanding the notice requirements as described in the preceding two sentences, any shareholders' meeting will be deemed called and legally commenced, provided that the shareholders representing all of the voting shares are present, and provided that every present shareholder, whether or not such shareholder has paid the full price of such shareholder's shares, agrees to hold the shareholders' meeting and accepts the business to be discussed therein. Holders of Investment Shares have no right to request the Board to convene shareholders' meetings.

Since we are a *sociedad anónima abierta* (publicly held corporation), notice of shareholders' meetings must be given by publication of a notice, with the publication occurring at least 25 days before any shareholders' meeting, in El Peruano and in a widely circulated newspaper in the city in which we are located. The notice requirement may be waived at the shareholders' meeting by holders of 100% of the outstanding Common Shares. According to Article 25 of our By-laws and Article 257 of the Peruvian Companies Law, shareholders' meetings called for the purpose of considering a capital increase or decrease, the issuance of obligations, a change in our By-laws, the sale in a single act of assets with an accounting value that exceeds 50% of our capital stock, a merger, division, reorganization, transformation or dissolution, are subject to a first, second and third quorum call, each of the second and third quorum to occur upon the failure of the preceding one. A quorum for the first call requires the presence of shareholders holding 50% of our total voting shares. For the second call, the presence of shareholders holding at least 25% of our total voting shares constitutes a quorum, and for the third call there is no quorum requirement. These decisions require the approval of the majority of the voting shares represented at the shareholders' meeting. General Meetings convened to consider all other matters are subject to a first and second quorum call, the second quorum call to occur upon the failure of the first quorum.

In the case of shareholders' meetings called for the purpose of considering the removal of members of the Board, at least 75% and 70% of the total number of Common Shares outstanding are required to be represented at the shareholders' meeting on the first quorum call and second quorum call. Provided such quorum is attained, the affirmative vote of no less than two thirds of the total number of Common Shares outstanding is required to effect the removal of members of the Board. The special quorum and voting requirements described above cannot be modified at a shareholders' meeting called for the purpose of considering the removal of members of the Board.

Under our By-laws, the following actions are to be taken at the Annual Mandatory Meeting of shareholders: approval of our statements of financial position, profit and loss statements and annual reports; the approval of management performance; the allocation of profits; the election of external auditors or the delegation in the Board of Directors of such election; the election of the members of the Board; and any other matters submitted by the Board. The following actions are to be taken at the same annual shareholders' meetings if the quorum and majority requirements are met or at any other shareholders' meeting: any amendment of our By-laws; any decision to increase or reduce capital; any decision to issue debt; initiating investigations or requesting auditor's reports; and liquidating, spinning-off, merging, consolidating, dissolving, or changing our business form or structure.

In accordance with Article 21 of the By-laws, only those holders of Common Shares whose names are inscribed in our share register not less than 10 days in advance of a meeting will be entitled to attend shareholders' meetings and to exercise their rights.

[Table of Contents](#)

In response to the COVID-19 pandemic, shareholder meetings and board meetings were held virtually from March 2021 to October 2022. Starting in October 2022, we resumed in person board meetings.

***Limitations on the Rights of Nonresident or Foreign Shareholders***

There are no limitations in our By-laws or the Peruvian Companies Law on the rights of nonresident or foreign shareholders to own securities or exercise voting rights on our securities.

***Change in Control***

There are no provisions in our By-laws that would have the effect of delaying, deferring or preventing a change in control.

***Disclosure of Share Holdings***

Article 12 of Resolución No. 019-2015-SMV-01 provides that juridical entities with shares listed in a stock exchange as it is our case, must inform to the SMV within the first fifteen days of each month the list of its shareholders with voting rights holding more than 0.5% of the total number of voting shares indicating the percentage that corresponds to each of them. There are no provisions in our By-laws governing the ownership threshold above which share ownership must be disclosed.

***Takeover Bid***

According to Regulation No. 009-2006-EF-94.10 of the SMV, which became effective on May 3, 2006, as amended by Regulation No. 020-2006-EF-94.10, Regulation No. 05-2009-EF-94.01.1, Regulation No. 034-2015-SMV-01, Regulation No. 009-2020-SMV-01 and Regulation No. 011-2023-SMV/01 of the SMV, when, an individual or financial group acquires, in one act or various successive acts, a significant percentage (more than 25%) of the voting shares of a company with shares listed in a stock exchange, as well as upon any person or group increasing its ownership above the 50% and 60% thresholds, a procedure known as *Oferta Pública de Adquisición*, or a “Takeover Bid,” must be followed. This has the effect of alerting other shareholders and the market that an individual or financial group has acquired a significant percentage of a company’s voting shares, and gives other shareholders the opportunity to sell their shares at the price offered by the purchaser. The purchaser is obliged to launch a Takeover Bid unless it is exempt pursuant to Regulation No. 009-2006-EF-94.10 of the SMV, as amended. The purchase of ADRs is exempted from the Takeover Bid unless the holders: (i) exercises the voting rights of the Common Shares underlying the ADSs evidenced by such ADRs, or (ii) requests the delivery of such underlying Common Shares. In addition, the SMV and the Lima Stock Exchange must be notified of any transfer of more than 5% of our paid-in capital.

***Changes in Capital***

Our By-laws do not establish special conditions for increases or reductions of capital that are more stringent than required by the Peruvian Companies Law. Furthermore, the Peruvian Companies Law forbids *sociedades anónimas abiertas*, such as us, from including in their By-laws stipulations limiting the transfer of their shares or restraining their trading in other ways. We cannot recognize a shareholders’ agreement that contemplates limitations, restrictions or preferential rights on the transfer of shares, even if such agreement is recorded in our share register (*matrícula de acciones*) or in CAVALI ICLV S.A., unless they refer to shares that are not listed in a stock exchange, which is not the case for our shares.

[Table of Contents](#)***Economic Group***

On January 1, 2017 new Regulations on Indirect Property, Relation and Economic Groups (*Reglamento de Propiedad Indirecta, Vinculación y Grupos Económicos*) (the “Regulations”) approved by Regulation No. 019-2015-SMV-01 became effective, replacing the prior Regulations that were in effect since 2006. The new Regulations, which have been amended by Regulations 048-2016-SMV-01, 013-2017-SMV-01, 026-2017-SMV-01, 016-2019-SMV-01 and 019-2021-SMV/01, define more precisely who are considered independent directors, increase the standards of information we are required to provide, require us to identify the individuals that control our economic group, require us to report related individuals and entities; reduce the number of shareholders required to determine that there exists a “representative participation” from 10% of the total capital stock to 4% of voting shares and extend the definition of control. The “representative participation” definition is mainly used by listed companies such as us to determine the existence of indirect property. Regulation No. 083-2016-SMV-01 approved the new forms to be used to provide the SMV all the information about our economic group.

***Criminal liability of companies***

Peruvian Law 30424, as amended by Legislative Decree No. 1352, Law 30835 and Law 31740, introduced corporate liability for corruption, money laundering, terrorist financing, tax and customs crimes and related crimes as of January 1, 2018. Under this law, legal entities may be liable for domestic and international bribery of public officials as well as other offenses committed on their behalf or for their benefit by their shareholders, officers, directors, or de facto administrators or representatives. The law establishes mitigating circumstances such as cooperation with authorities, minimizing the harm caused by the offense, full or partial reparation of damages, and the adoption and implementation of a corporate compliance program known as a “prevention model”. Such preventive program must be tailored to the legal entity’s nature, risks, needs, and characteristics, and must contain adequate monitoring and control measures to prevent the offenses covered by this law or significantly reducing the risk of violating such offenses.

***Dividends and Dividend Policy***

We can distribute three kinds of dividends: (i) cash dividends, which are paid out of our net distributable income for each year, (ii) stock dividends that are akin to stock splits rather than distributions of earnings, which are issued for the purpose of adjusting the book value per share of our stock and (iii) stock dividends for the purpose of capitalizing profits. All shares outstanding are entitled to share equally in any dividend declared based on the portion of our capital represented by such share. No cash dividend may be declared if our financial statements do not show distributable profits. Also, we may make interim provisional payments to shareholders in respect of net distributable income for the current fiscal year, which are referred to as “provisional dividends” or “dividends on account” or “interim dividends” as explained below, provided the financial statements as of end of the month preceding the date where such dividends are declared, show the existence of net distributable income obtained during the current year and there are no losses to be covered from past years.

The Board, following the end of each fiscal year, makes a recommendation at the Annual Mandatory Meeting regarding the amount and timing of payments, if any, to be made as dividends on our Common Shares and Investment Shares. The Shareholders Meeting can delegate to the Board the approval to pay interim dividends and, at our Shareholders Meeting such authorization was granted to our Board by the participants in the Shareholders Meeting.

The dividend policy establishes that Buenaventura will distribute an annual cash dividend of at least 20% of net income generated by majority-owned operations and subsidiaries. In the case of Buenaventura’s associates (Coimolache and Cerro Verde), 20% of Buenaventura’s attributable net income will be included if such associates distribute cash dividends to Buenaventura. In principle there are two kinds of dividend payments: interim dividends, which are approved by the Board and are generally paid during the fourth quarter of the year, and the final dividend payment, which will be paid in accordance with the general shareholders’ meeting resolutions. However, the amount and timing of such payments is subject to the final approval at such Annual Mandatory Meeting and Board meeting, as well as to the availability of earnings to distribute. According to the Peruvian Companies Law, holders of at least 20% of the total Common Shares outstanding can request a dividend of 50% or less of the previous year’s after-tax profits, net of amounts allocated to the legal reserve.

Available earnings are subject to the following priorities. First, the mandatory employee profit sharing of 8% of pre-tax profits (which may differ from pre-tax profits determined under IFRS due to different depreciation treatment and different adjustments of non-taxable income and/or non-deductible expenses) is paid.

[Table of Contents](#)

Next, remaining earnings are taxed at the standard corporate income tax rate, which is 29.50%. Not less than 10% of such after-tax net profits must then be allocated to a legal reserve, which is not available thereafter except to cover future losses or for use in future capitalizations, in which case it must be replenished again. Amounts reserved are nevertheless included in taxable income. The obligation to fund this reserve continues until the reserve constitutes 20% of the paid-in share capital. In addition, the holders of Common Shares can agree to allocate any portion of the net profits to any special reserve. The remainder of the net profits is available for distribution to shareholders.

Dividends are subject to an additional withholding tax for shareholders that are either (i) individuals, whether domiciled or non-domiciled in Peru, or (ii) non-domiciled companies or entities. For dividends paid out of our accumulated net profits, the withholding tax rate is 5%, when the dividend originated from profits earned on or after January 1, 2017. If any tax or other governmental charge will become payable by Scotiabank Peru, as custodian, the Depository or us with respect to any ADR or any deposited securities represented by the ADSs evidenced by such ADR, such tax or other governmental charge will be payable by the owner or beneficial owner of such ADR to the Depository.

Dividends paid to domiciled companies or entities are not subject to such withholding tax. If any tax or other governmental charge will become payable by Scotiabank Peru, as custodian, the Depository or us with respect to any ADR or any deposited securities represented by the ADSs evidenced by such ADR, such tax or other governmental charge will be payable by the owner or beneficial owner of such ADR to the Depository.

Dividends on issued and outstanding Common Shares and Investment Shares are distributed in accordance with the proportion of the total capital represented by such respective shares. Dividends are distributed pro rata in accordance with the number of Common Shares or Investment Shares. Accordingly, any dividend declared would be apportioned 99.73% to the holders of Common Shares and 0.27% to the holders of Investment Shares. This proportion will not change in the future except and to the extent that holders of Common Shares and Investment Shares exercise their preemptive rights disproportionately in any future issuance of Common Shares and Investment Shares, or if we issue Common Shares without preemptive rights in accordance with Article 259 of the Peruvian Companies Law.

Holders of Common Shares and Investment Shares are not entitled to interest on dividend payments.

To the extent that we declare and pay dividends on the Common Shares, owners of the ADSs on the relevant record date are entitled to receive the dividends payable in respect of the Common Shares underlying the ADSs, subject to the terms of the Amended and Restated Deposit Agreement. Cash dividends are paid to the Depository in Soles and, except as otherwise described under the Amended and Restated Deposit Agreement, are converted by the Depository into U.S. Dollars and paid to owners of ADRs net of currency conversion expenses. Under the Amended and Restated Deposit Agreement, the Depository may, and will if we so request, distribute stock dividends in the form of additional ADRs evidencing whole ADSs resulting from a dividend or free distribution of Common Shares by us received by the Depository. Amounts distributed with respect to ADSs were subject to a Peruvian withholding income tax of 6.8% for profits earned during 2016, which was the withholding tax rate applicable to distributions in respect of Common Shares during 2016. The withholding tax rate decreased to 5% for dividends paid out of our accumulated net profits after December 31, 2016. See Item 10. "Additional Information—E. Taxation—Peruvian Tax Considerations."

We issue stock dividends for value per share of our stock. The book value of our share capital is based on the nominal (par) value of each share but is adjusted to account for inflation; thus, in inflationary periods, our book value will increase while the nominal value will remain constant. To adjust the book value of each share to equal or approximate the nominal value, in the past we periodically issue new shares that are distributed as stock dividends to each existing shareholder in proportion to such shareholder's existing holdings, unless it increases the nominal value of the existing shares. These stock dividends (which under the Peruvian income tax law are not considered dividends) do not change a stockholder's percentage of interest in us. In addition, we may from time to time capitalize profits and, in such case, we have to distribute stock dividends representing the profits capitalized.

Dividends not collected within 10 years will be retained by us, increasing our legal reserve, and the right to collect such dividends will expire.

[Table of Contents](#)

Under Peruvian law, each company may make formal cash distributions only out of net distributable income (calculated on an individual, unconsolidated basis and demonstrated by a statement of financial position at any given time). We, however, may pay interim or provisional dividends as explained above. If, following such an interim provisional payment, we suffer a loss or if we finish the fiscal year with a net income that is lower than the amount of provisional dividends paid during such fiscal year, shareholders that acted in good faith may retain the dividends exceeding the distributable profit, with such dividends counting as advanced payments credited against profits or liquidation proceeds that they are entitled to receive in following periods. Therefore, it has been and continues to be our policy not to require shareholders to return such payment of provisional dividends, but rather to cover such contingency through a “dividends paid in advance” account to be offset by future net distributable income.

*Non-controlling Shareholders*

Law No. 28370, published on October 30, 2004, included in the Peruvian Companies Law certain provisions for the protection of non-controlling shareholders of public companies that are *sociedades anónimas abiertas*, such as us, and that were formerly contained in Law No. 26985, which was abrogated. Legislative Decree No. 1061, effective since June 29, 2008, Law No. 29782, effective since July 29, 2011, and most recently Law No. 30050, effective since June 27, 2013, have abrogated or amended certain of these provisions. Pursuant to Article 262-A of the Peruvian Companies Law, we will furnish on our website and on the SMV’s website, upon the earlier to occur of (1) sixty days after the Annual Mandatory Meeting, or (2) the expiration of the three-month period after the end of the prior fiscal year in which such Annual Mandatory Meeting is required to be held, the information regarding total number and value of any shares not claimed by shareholders, the name of such shareholders, the share quote in the securities market for such shares, the total amount of uncollected dividends, the name of shareholders having uncollected dividends and where shares and dividends pending claim are available for the non-controlling shareholders. Article 262-B describes the procedure to request share certificates and/or dividends, that the holder of the shares can instruct us to deposit the dividends in a specific bank account, and that delivery of such share certificates and/or dividends is to be made within 30 days from the request. Article 262-F describes the procedure for handling any claim that the non-controlling shareholders may file, such claims to be resolved by the SMV. SMV may apply warnings and fines between approximately US\$1,400 and US\$ 35,000 in case the Company fails to comply such provisions for the protection of minority shareholders.

**C. Material Contracts**

Below is a description of the material agreements that we have entered into as of December 31, 2023. Such summaries exclude those agreements entered into in the ordinary course of business.

**5.500% Senior Notes due 2026**

In order to comply with its tax obligations, the Buenaventura’s Shareholders’ Meeting held on May 21, 2021 and its board of directors meeting held on July 12, 2021 approved the issue the Notes which were issued on July 23, 2021 with the following terms:

- Denomination of Issue: US\$550,000,000 5.500% Senior Notes due 2026.
- Principal Amount: US\$550,000,000.
- Issue Date: July 23, 2021.
- Maturity Date: July 23, 2026.
- Issue Price: 99.140% of the principal amount.
- Interest Rate: 5.500% per annum.
- Offering Format: private placement under Rule 144A and Regulation S of the U.S. Securities Act of 1933.
- Listing: The bonds were listed on the SGX-ST

The bonds were offered in a private placement to qualified institutional buyers in accordance with Rule 144A under the Securities Act of 1933, as amended (hereinafter the “Securities Act”), and outside the United States to non-U.S. persons in accordance with Regulation S under the Securities Act. The Notes are fully and unconditionally guaranteed jointly and severally by Compañía Minera Condesa S.A., Inversiones Colquijirca S.A., Procesadora Industrial Río Seco S.A. and Consorcio Energético Huancavelica S.A.

[Table of Contents](#)

As part of its issuance of the Notes, Buenaventura entered into an indenture (the “Indenture”) among Buenaventura, The Bank of New York Mellon, and various subsidiary guarantors. Under the terms of the Indenture, Buenaventura agreed to comply with certain restrictive covenants. As a result of these covenants, Buenaventura must confirm that it is in compliance with the Notes Indenture if it wants to undertake any of the following transactions that involve:

- (i) the incurrence of additional debt;
- (ii) certain asset sales;
- (iii) the making of certain investments;
- (iv) the payment of dividends;
- (v) the purchasing of Buenaventura’s equity interests or making any principal payment prior to any scheduled final maturity or schedule repayment of any indebtedness that is subordinated to the Notes (collectively, “Restricted Payments”, as defined in the Indenture),
- (vi) creation of liens; or
- (vii) a merger, consolidation or sale of substantially all assets.

These covenants are known as “Limitations on incurrence of indebtedness”, “Limitation on Asset Sales”, “Limitation on Restricted Payments”, “Limitation on Liens” and “Limitation on Merger, Consolidation or Sale of Assets”, respectively, which also have exceptions that let the Company operate in the ordinary course of business.

We did not enter into any additional material contracts in 2023.

#### **D. Exchange Controls**

Since August 1990, there have been no exchange controls in Peru and all foreign exchange transactions are based on free market exchange rates. Before August 1990, the Peruvian foreign exchange market consisted of several alternative exchange rates. Additionally, during the 1990s, the Peruvian currency has experienced a significant number of large devaluations, and Peru has consequently adopted and operated under various exchange rate control practices and exchange rate determination policies, ranging from strict control over exchange rates to market determination of rates. Current Peruvian regulations on foreign investment allow the foreign holders of equity shares of Peruvian companies to receive and repatriate 100% of the cash dividends distributed by such companies. Such investors are allowed to purchase foreign exchange at free market currency rates through any member of the Peruvian banking system and transfer such foreign currency outside Peru without restriction.

#### **E. Taxation**

The following summarizes the material Peruvian and U.S. federal income tax consequences under present law of the purchase, ownership and disposition of ADSs or Common Shares. The discussion is not a full description of all tax considerations that may be relevant to a decision to purchase ADSs or Common Shares. In particular, this discussion deals only with holders that hold ADSs or Common Shares as capital assets and that have the U.S. Dollar as their functional currency. The summary does not address the tax treatment of certain investors that may be subject to special tax rules, such as partnerships and other entities classified as partnerships for U.S. federal income tax purposes, banks and other financial institutions, dealers and traders in securities or foreign currencies, insurance companies, tax-exempt entities, persons that will hold ADSs or Common Shares as a position in a “straddle” or “conversion transaction” for tax purposes, holders who directly or indirectly, actually or constructively own 10% or more of our shares by either vote or value, certain taxpayers who file applicable financial statements and are required to recognize income no later than when the associated revenue is reflected on such financial statements and holders who acquired our ADSs or Common Shares pursuant to the exercise of any employee stock option or otherwise as compensation. This discussion does not address all aspects of U.S. federal income taxation that may be applicable to a U.S. Holder (as defined below), including gift tax, estate tax, any U.S. state or local taxes, non-U.S. taxes, other than Peruvian taxes as provided below, the U.S. federal alternative minimum tax or the U.S. Medicare tax on net investment income. There is no tax treaty currently in effect between Peru and the U.S., except for a treaty to exchange tax information. The information to be exchanged is defined in such treaty as any data or declaration that may be relevant or essential to the administration and application of taxes. Accordingly, the discussions below of Peruvian and U.S. tax considerations are based on the domestic law of each of Peru and the U.S. which are subject to change possibly with retroactive effect.

[Table of Contents](#)

“U.S. Holder” means a beneficial owner of ADSs or Common Shares that is (i) a U.S. citizen or resident, (ii) a domestic corporation, (iii) a trust subject to the control of one or more U.S. persons (as described in Section 7701(a)(30) of the U.S. Internal Revenue Code of 1986, as amended, (“Code”)) and the primary supervision of a U.S. court or that has validly elected to be treated as a U.S. person or (iv) an estate the income of which is subject to U.S. federal income taxation regardless of its source.

If a partnership or other entity taxable as a partnership for U.S. federal income tax purposes holds ADSs or Common Shares, the tax treatment of a partner will generally depend on the status of the partner in such partnership and the activities of the partnership. Partners of partnerships holding ADSs or Common Shares should consult their tax advisors.

**Peruvian Tax Considerations*****Cash Dividends and Other Distributions***

Cash dividends paid with respect to Common Shares and amounts distributed with respect to ADSs are subject to Peruvian withholding income tax, at a rate of 5% for dividends paid or to be paid beginning January 1, 2017, when the dividend originated from profits earned on or after January 1, 2017. If the dividend originated from profits earned between January 1, 2015 and December 31, 2016, the withholding income tax rate for the dividend is 6.8%. If the dividend originated from profits earned as of December 31, 2014, the withholding income tax rate for dividends is 4.1%. The dividends distribution is related to prior accumulated results. This regime is applicable on dividends that are paid to shareholders that are: (i) individuals, whether resident or nonresident in Peru or (ii) nonresident entities. As a general rule, the distribution of additional Common Shares representing profits, distribution of shares that differ from the distribution of earnings or profits, as well as the distribution of preemptive rights with respect to Common Shares, which are carried out as part of a pro rata distribution to all shareholders, will not be subject to Peruvian Income Tax or withholding taxes.

***Capital Gains***

Pursuant to Article 6 of the Income Tax Law (the “ITL”), individuals and entities resident in Peru are subject to Peruvian Income Tax on their worldwide income while nonresident individuals or entities are subject to Peruvian Income Tax on their Peruvian source income only.

Furthermore, the ITL states that income deriving from the disposal of securities issued by Peruvian entities is considered Peruvian source income subject to the Income Tax (as defined below).

With respect to this matter, Article 2 of the ITL, as amended by Legislative Decree 945, defines: (i) capital gains as any revenue deriving from the disposal of capital goods; and (ii) capital goods as those whose purpose is not to be traded in the regular course of a business. Moreover, Article 2 of the ITL states that income deriving from the disposal of shares and similar securities is considered a capital gain.

Accordingly, capital gains deriving from the disposal of securities issued by legal entities incorporated in Peru are considered Peruvian-source income subject to Peruvian Income Tax.

Currently, regardless of whether or not the transferor is domiciled in Peru, the ITL establishes that taxable income resulting from the disposal of securities is determined by the difference between the sale price of the securities and its tax basis. However, before December 31, 2009, capital gains resulting from the disposal of ADSs or Common Shares issued by legal entities incorporated in Peru were exempt from Peruvian Income Tax if: (i) in the case of non-regular individuals (i.e., individuals who do not frequently trade securities), the transaction was carried out before December 31, 2009; and (ii) in the case of shareholders other than individuals, the transaction was carried out on the Lima Stock Exchange (floor session) before December 31, 2009.

Effective January 1, 2010, the exemption was repealed and, as such, capital gains resulting from the disposal of ADSs or Common Shares issued by legal entities incorporated in Peru became subject to Peruvian Income Tax, or the “Income Tax.” For non-resident entities or individuals, capital gains will be subject to an Income Tax rate of either 5% or 30%, depending on where the transaction takes place. If the transaction is consummated within Peru, the Income Tax rate is 5%; if the transaction is consummated outside of Peru, capital gains are taxed at a rate of 30%.

[Table of Contents](#)

The ITL Regulations have defined transactions consummated within Peru to mean that the securities at issue are transferred through the Lima Stock Exchange. In contrast, the transaction is considered to have been consummated abroad when (i) the securities at issue are not registered on the Lima Stock Exchange or (ii) registered securities are not transferred through the Lima Stock Exchange.

Before December 31, 2012, for nonresident individuals, the first five tax units (approximately US\$6,800) of capital gains deriving from the transfer of securities were exempted from the Income Tax. Effective January 1, 2013, this exemption was repealed. If the transferor is a resident entity, capital gains deriving from the disposal of securities will be treated as any other taxable income subject to the 29.5% corporate Income Tax rate.

Furthermore, before December 31, 2012, if the transferor was a resident individual, the first five tax units (approximately US\$6,800) of capital gains deriving from the transfer of securities were exempted from the Income Tax. Effective January 1, 2013, such exemption was repealed. Any capital gain earned by a resident individual is subject to the 5% annual Income Tax rate regardless of whether or not the transaction is carried out on the Lima Stock Exchange and regardless of how many transactions are carried out by such individual. In this case, the 5% Income Tax rate will be applicable over the annual net capital gain, which is calculated by deducting from the annual gross capital gain of the annual losses resulting from the disposal of shares during the same fiscal year.

Moreover, if the transferor, either a resident or nonresident individual or entity, acquired the ADSs or Common Shares that were exempt from the Income Tax before January 1, 2010, pursuant to a special provision of the ITL, the tax basis is the higher of: (i) the acquisition cost; (ii) the face or nominal value of the shares; or (iii) the stock market value at closing on December 31, 2009.

If the transferor, whether resident or nonresident in Peru, acquires the ADSs or Common Shares on or after January 1, 2010, the tax basis is: (i) for shares purchased by the transferor, the acquisition price paid for the shares; (ii) for shares received by the transferor as a result of a capital stock increase because of a capitalization of net profits, the face or nominal value of such shares; (iii) for other shares received free of any payment, the stock market value of such shares if listed on the Lima Stock Exchange or, if not, the face or nominal value of such shares; and (iv) for shares of the same type acquired at different opportunities and at different values, the tax basis will be the weighted average cost.

The aforementioned rules are also applicable to ADSs or Common Shares acquired before January 1, 2010 that were not exempt from the Income Tax as of December 31, 2009.

On December 31, 2010, Law No. 29645 was promulgated and took effect from January 1, 2011. This law states that in any transaction of Peruvian securities through the Lima Stock Exchange, CAVALI ICLV S.A. (the Peruvian clearing house) will act as withholding agent. As a result of this amendment, the nonresident will no longer have to self-assess and pay its Income Tax liability directly to the Peruvian Tax Administration.

Law No. 29645 has technically been in force since January 1, 2011. Implementing regulations were enacted in July 2011, and CAVALI ICLV S.A. began acting as a withholding agent on November 1, 2011. As a result, with regard to securities transferred through the Lima Stock Exchange by a nonresident transferor after November 1, 2011, such nonresident transferor is no longer obliged to self-assess and pay its Income Tax liability directly to Peruvian tax authorities within the first 12 working days following the month in which Peruvian source income was earned.

If the purchaser is a resident in Peru and the sale is not performed through the Lima Stock Exchange, the purchaser will act as withholding agent, except in cases in which the transferor is a resident individual.

However, if the transferor is a resident entity, such transferor is solely responsible for its Peruvian Income Tax on capital gains resulting from the disposal of ADSs or Common Shares, regardless of whether such securities are listed on the Lima Stock Exchange or elsewhere.

[Table of Contents](#)

On September 12, 2015, Law No. 30341 was published. This law entered into effect on January 1, 2016 and states that capital gains from the disposal of ADSs or Common Shares through December 31, 2018 issued by legal entities incorporated in Peru, executed through the Lima Stock Exchange, are exempt from Peruvian Income Tax if: (i) within a period of twelve (12) months the holder and its related parties do not transfer 10% or more of the issued shares of the legal entity in one or more transactions; and (ii) the Common Shares issued by such legal entity shall have been continuously traded in the stock market (the rules to determine if such shares are continuously traded are set forth in Law No. 30341, as amended). Law No. 30341 was amended by Legislative Decree No. 1262, published on December 10, 2016 and effective since January 1, 2017, which introduced minor amendments related to capital gains deriving from the disposal of ADSs and Common Shares and extended this income tax exemption through December 31, 2019. Law No. 30341 was amended for a second time by Urgent Decree No. 005-2019, published on October 24, 2019 and effective on January 1, 2020, which introduced minor amendments regarding to the rules to determine when shares are continuously traded; and extended this income tax exemption through December 31, 2022.

On December 30, 2022, Law No. 31662 was published. This law entered into effect on January 1, 2023 and extends through December 31, 2023, the income tax exemption on capital gains from the disposal of ADSs or Common Shares issued by legal entities incorporated in Peru, executed through the Lima Stock Exchange, described in the previous paragraph. However, such extension through December 31, 2023 was applicable only to individuals, undivided hereditary estates or undivided inheritance estates (*sucesiones indivisas*) and conjugal partnerships (*sociedades conyugales*) with respect to their previously mentioned capital gains that do not exceed in each taxable year, 100 tax units (approximately US\$130,000 for 2023). It must be noted that this exemption has not been reinstated for fiscal year 2024 by the Peruvian Congress, although discussions are in place to reinstate it for fiscal year 2025.

**Exchange Transactions**

No Peruvian estate or gift taxes are imposed on the gratuitous transfer of ADSs or Common Shares. No stamp, transfer or similar tax applies to any transfer of Common Shares, except for commissions payable by seller and buyer to the Lima Stock Exchange (0.021% of value sold), fees payable to the SMV (0.0135% of value sold), fees payable to CVALI (0.04095% of value sold), brokers' fees (about 0.05% to 1% of value sold) and VAT (at the rate of 18%) on commissions and fees. Any investor who sells its Common Shares on the Lima Stock Exchange will incur these fees and taxes upon purchase and sale of the Common Shares.

**Other Considerations**

As explained in Item 10. Memorandum and Articles of Association – *Final Beneficial Owners*, on August 2, 2018, Legislative Decree No. 1372 was published. This law entered into effect on August 3, 2018 and its regulations were enacted by Supreme Decree No. 003-2019-EF, published on January 8, 2019. According to this law and its regulations, legal entities domiciled or established in Peru must report the identity of their ultimate beneficial owners, as a tool for law enforcement agencies to confront tax evasion, money laundering and terrorist financing. For this reporting obligation, legal entities include any corporation, partnership or similar entity, trust, investment fund or joint venture. This obligation is also applicable to legal entities that are not domiciled in Peru but have a branch, subsidiary, joint venture or permanent establishment in Peru or, in the case of trusts, which have a grantor, settlor, beneficiaries or trustees domiciled in Peru. Ultimate beneficial owner is defined as the individual that effectively owns or controls a legal entity. For this purpose, ownership is when at least 10% of the capital of the legal entity is directly or indirectly under the ownership of an individual and its related parties. On September 25, 2019, the Tax Authority issued Superintendence Resolution No. 185-2019/SUNAT, establishing rules for this mandatory report and, for the legal entities that qualify as principal taxpayers as of November 30, 2019, the first deadline for filing this mandatory report was established within the first half of December 2019. The first deadline to present the affidavit with information regarding the final beneficiaries as of November 30, 2019 was set in the first half of December 2019.

Peruvian law was amended with the objective to grant greater guarantees to the taxpayers through application of the general anti-evasive rule (Rule XVI of the Preliminary Title in the Tax Code) and with the objective of providing more tools to the Tax Administration for effective implementation of such Rule.

[Table of Contents](#)**U.S. Federal Income Tax Considerations**

Assuming the obligations contemplated by the Amended and Restated Deposit Agreement are being performed in accordance with its terms, holders of ADSs (or ADRs evidencing ADSs) generally will be treated for U.S. federal income tax purposes as the beneficial owners of the Common Shares represented by those ADSs. U.S. Holders should be aware that the U.S. Internal Revenue Service (the "IRS") has expressed concerns that parties to whom ADSs are pre-released before common shares are delivered to the depository, or intermediaries in the chain of ownership between holders of ADSs and the issuer of the security underlying the ADSs, may be taking actions that are inconsistent with the claiming of foreign tax credits by holders of ADSs. Accordingly, the creditability of any Peruvian taxes could be affected by actions taken by such parties or intermediaries.

***Cash Dividends and Other Distributions***

In general, distributions with respect to the ADSs or Common Shares will, to the extent made from our current or accumulated earnings and profits, as determined under U.S. federal income tax principles, constitute dividends for U.S. federal income tax purposes. If a distribution exceeds the amount of our current and accumulated earnings and profits, as so determined under U.S. federal income tax principles, the excess will be treated first as a non-taxable return of capital to the extent of the U.S. Holder's tax basis in the ADSs or Common Shares, and thereafter as capital gain. We do not intend to maintain calculations of our earnings and profits under U.S. federal income tax principles and, unless and until such calculations are made, U.S. Holders should assume all distributions are made out of earnings and profits and constitute dividend income for U.S. federal income tax purposes. As used below, the term "dividend" means a distribution that constitutes a dividend for U.S. federal income tax purposes.

Cash dividends paid with respect to Common Shares or Common Shares represented by ADSs can generally be included in the gross income of a U.S. Holder as ordinary income. Dividends generally are treated as foreign source income. Dividends paid to a U.S. Holder that is a domestic corporation are not eligible for the dividends received deduction available to such corporations. Under current law, a reduced U.S. tax rate is imposed on the dividend income of an individual U.S. Holder with respect to dividends paid by a domestic corporation or "qualified foreign corporation" if certain holding period requirements are met. A qualified foreign corporation generally includes a foreign corporation that is not a passive foreign investment company ("PFIC") in the year in which the dividend is paid or in the preceding taxable year and either (i) its shares are readily tradable on an established securities market in the United States or (ii) it is eligible for benefits under a comprehensive U.S. income tax treaty. Clause (i) should apply with respect to the ADSs as long as the ADSs are traded on the New York Stock Exchange. As a result, in the event we are not a PFIC in the year in which the dividend is paid or in the preceding taxable year, we should be treated as a qualified foreign corporation and, therefore, dividends paid to an individual U.S. Holder with respect to ADSs for which the minimum holding period requirement is met should be taxed at a reduced rate. In the case of our Common Shares held directly by U.S. Holders and not underlying ADSs, it is not clear whether dividends paid with respect to such shares will represent "qualified dividend income." U.S. Holders holding our Common Shares directly and not through an ADS are urged to consult their own independent tax advisors.

Dividends paid in Soles are includible in a U.S. dollar amount based on the exchange rate in effect on the date of receipt (which, in the case of ADSs, will be the date of receipt by the Depository) whether or not the payment is converted into U.S. dollars at that time. Any gain or loss recognized upon a subsequent sale or conversion or other taxable disposition of the Soles for a different amount of U.S. dollars will be U.S. source ordinary income or loss for U.S. federal income tax purposes. Distributions to U.S. Holders of additional Common Shares or preemptive rights with respect to Common Shares that are made as part of a pro rata distribution to all of our shareholders generally will not be subject to U.S. federal income tax but in other circumstances may constitute a taxable dividend.

A U.S. Holder may be entitled to claim a U.S. foreign tax credit in respect of any Peruvian taxes imposed on dividends received on our Common Shares or Common Shares represented by ADSs, subject to generally applicable limitations and restrictions and provided that the withholding tax constitutes a "covered withholding tax" under U.S. regulations. In the case of U.S. individuals for whom the reduced rate of tax on dividends applies, such limitations and restrictions will appropriately take into account the rate differential under rules similar to section 904(b)(2)(B) of the Code. U.S. Holders who do not elect to claim a credit for foreign taxes may instead claim a deduction in respect of otherwise creditable Peruvian taxes. Dividends received with respect to our Common Shares or Common Shares represented by ADSs may be treated as foreign source income for U.S. federal income tax purposes, and will be "passive category income" for purposes of calculating foreign tax credits in most cases, subject to various limitations. The rules governing foreign tax credits are complex, U.S. regulations have imposed additional requirements that must be met for a foreign tax to be creditable (including requirements that a "covered withholding tax" be imposed on nonresidents in lieu of a generally applicable tax that satisfies the regulatory definition of an "income tax," which may be unclear or difficult to determine), and U.S. Holders should consult their tax advisors regarding their application to the particular circumstances of such holder.

[Table of Contents](#)

A non-U.S. Holder generally is not subject to U.S. federal income or withholding tax on dividends paid with respect to Common Shares or Common Shares represented by ADSs, unless such income is effectively connected with the conduct by the non-U.S. Holder of a trade or business within the United States.

**Capital Gains**

U.S. Holders will recognize taxable gain or loss on the sale or other taxable disposition of ADSs or Common Shares (or preemptive rights with respect to such shares) held by the U.S. Holder or by the Depositary in an amount equal to the difference between the amount realized on the sale or other taxable disposition and the U.S. Holder's adjusted tax basis in the ADSs or Common Shares. Generally, such gain or loss will be a long-term capital gain or loss if the U.S. Holder's holding period for such Common Shares or ADSs exceeds one year. Long-term capital gain for an individual U.S. Holder is generally subject to a reduced rate of U.S. federal income tax. The deductibility of capital losses is subject to limitations under the Code. Any gain recognized by a U.S. Holder generally will be treated as U.S. source income for U.S. foreign tax credit purposes. Under U.S. regulations mentioned above, Peruvian withholding tax imposed on such U.S. source gain may not constitute a creditable tax. Moreover, in the case of a sale or other taxable disposition of Common Shares or ADSs in a transaction subject to Peruvian tax, even if the tax is a creditable tax, the U.S. Holder may not be able to claim a U.S. foreign tax credit for any Peruvian tax imposed on the gain unless it has sufficient foreign source income from other sources against which it can apply the credit.

For U.S. federal income tax purposes, U.S. Holders will not recognize gain or loss on deposits or withdrawals of Common Shares in exchange for ADSs or on the exercise of preemptive rights.

A non-U.S. Holder of ADSs or Common Shares will not be subject to U.S. federal income or withholding tax on gain from the sale or other disposition of ADSs or Common Shares unless (i) such gain is effectively connected with the conduct of a trade or business within the United States or (ii) the non-U.S. Holder is an individual who is present in the United States for at least 183 days during the taxable year of the disposition and (iii) certain other conditions are met.

**Passive Foreign Investment Company**

Based on our audited financial statements as well as relevant market and shareholder data, we can provide no assurance that we were not a PFIC for U.S. federal income tax purposes with respect to our 2021 taxable year or that we did not become a PFIC in our 2022 taxable year, as a result, in part, of changes in our income and the value of our assets and uncertainty as to the characterization of certain assets. In particular, the conclusion could be affected by a pending tax refund claim the characterization of which for PFIC purposes is unclear and the value of which is highly speculative. For the same reason and also taking into account the effect of the Company's sale of its stake in Yanacocha in February 7, 2022, even if we were not a PFIC for our 2022 taxable year, we cannot assure you that we will not become a PFIC with respect to our current taxable year. Furthermore, because a determination of our PFIC status is based on our income, assets and the nature of our business, as well as the income, assets and business of entities in which we hold at least a 25% interest, from time to time, involves the application of complex tax rules, including the application of proposed United States Treasury Regulations, on which we are entitled to rely until they are finalized, and since our view is not binding on the courts or the IRS, no assurances can be provided that we will not be considered a PFIC for the current, or any past or future tax year. The potential application of the PFIC rules is further discussed below.

A foreign corporation is a PFIC in any taxable year in which, after taking into account the income and assets of certain subsidiaries pursuant to the applicable look-through rules, either (i) at least 75% of its gross income is passive income or (ii) at least 50% of the average value of its assets is attributable to assets that produce passive income or are held for the production of passive income. Passive income generally includes interest, dividends, rents, royalties and certain gains (including certain commodity related gains), but active business gains from the sale of commodities is not considered "passive income" for purposes of determining whether a company is a PFIC. Our PFIC status for any taxable year is likely to depend upon the extent to which our gross profit from our mining activities is considered active business gains.

[Table of Contents](#)

A U.S. Holder would also be subject to additional taxes on any excess distributions received from us and any gain realized from the sale or other disposition of ADSs or Common Shares (regardless of whether we continued to be a PFIC) unless such U.S. Holder makes an election to be taxed currently on its pro rata portion of our income, whether or not such income is distributed in the form of dividends, or otherwise makes a “mark-to-market” election with respect to the ADSs or Common Shares as permitted by the Code. A U.S. Holder has an excess distribution to the extent that distributions on ADSs or Common Shares during a taxable year exceed 125% of the average amount received during the three preceding taxable years (or, if shorter, the U.S. Holder’s holding period for the ADSs or Common Shares). To compute the tax on an excess distribution or any gain, (i) the excess distribution or the gain is allocated ratably over the U.S. Holder’s holding period for the ADSs or Common Shares, (ii) the amount allocated to the current taxable year is taxed as ordinary income and (iii) the amount allocated to other taxable years is taxed at the highest applicable marginal rate in effect for each year and an interest charge is imposed to recover the deemed benefit from the deferred payment of the tax attributable to each year.

If we were a PFIC, U.S. Holders of interests in a holder of ADSs or Common Shares may be treated as indirect holders of their proportionate share of the ADSs or Common Shares and may be taxed on their proportionate share of any excess distribution or gain attributable to the ADSs or Common Shares. An indirect holder also must treat an appropriate portion of its gain on the sale or taxable disposition of its interest in the actual holder as gain on the sale or taxable disposition of the ADSs or Common Shares.

U.S. Holders are urged to consult their own independent tax advisors regarding the potential application of the PFIC rules and related reporting requirements to the Common Shares or ADSs and the availability and advisability of making an election to avoid the adverse tax consequences of the PFIC rules should we be considered a PFIC for any taxable year.

***Information Reporting and Backup Withholding***

Dividends in respect of the ADSs or Common Shares and the proceeds from the sale, exchange, redemption or other disposition of the ADSs or Common Shares may be reported to the IRS and a backup withholding tax may apply to such amounts unless the U.S. Holder (i) is a corporation (which may be required to establish its exemption by certifying its status on IRS Form W-9), (ii) in the case of a U.S. Holder other than a corporation, provides an accurate taxpayer identification number in the manner required by applicable law, (iii) in the case of a non-U.S. Holder, provides a properly executed IRS Form W-8BEN or W-8BEN-E or other applicable Form W-8, or (iv) otherwise establishes a basis for exemption. The amount of any backup withholding from a payment to a U.S. Holder generally may be allowed as a credit against the U.S. Holder’s U.S. federal income tax liability.

***“Specified Foreign Financial Asset” Reporting***

U.S. Holders of “specified foreign financial assets” with an aggregate value in excess of US\$50,000 (and in some circumstances, a higher threshold), may be required to file an information report with respect to such assets with their U.S. federal income tax returns. “Specified foreign financial assets” generally include any financial accounts maintained by foreign financial institutions as well as any of the following, but only if they are held for investment and not held in accounts maintained by financial institutions: (i) stocks and securities issued by non-U.S. persons, (ii) financial instruments and contracts that have non-U.S. issuers or counterparties and (iii) interests in foreign entities.

**F. Dividends and Paying Agents**

Not applicable.

**G. Statement by Experts**

Not applicable.

**H. Documents on Display**

We are subject to the informational requirements of the Exchange Act. Accordingly, we are required to file reports and other information with the SEC, including annual reports on Form 20-F and reports on Form 6-K. The SEC maintains an Internet website that contains reports and other information about issuers, like us, that file electronically with the SEC. The address of that website is [www.sec.gov](http://www.sec.gov).

[Table of Contents](#)**I. Subsidiary Information**

See “Item 4. Information of the Company Buenaventura—C. Organizational Structure”

**J. Annual Report to Security Holders**

Not applicable.

**ITEM 11. Quantitative and Qualitative Disclosures About Market Risk**

The following discussion contains forward-looking statements that are subject to risks and uncertainties, many of which are outside of our control. Our primary market risks are related to fluctuations in the prices of gold, silver, zinc and lead. To a lesser extent, we are subject to market risk related to fluctuations in US\$/ Sol exchange rates and to market risk related to interest rate fluctuation on our cash balances.

**Commodity Contracts*****Gold, silver, lead and copper hedging and sensitivity to market price***

Our revenues and earnings are to a great extent influenced by world market prices for gold, copper, silver, zinc and lead that fluctuate widely and over which we have no control. We and our wholly owned subsidiaries are completely unhedged as to the price at which our gold and silver will be sold. See “Item 3. Key Information—D. Risk Factors—Factors Relating to the Company—Our financial performance is highly dependent on the prices of gold, silver, copper and other metals.”

As of March 31, 2024, we had no silver derivative contracts or gold convertible put option contracts in place.

From January to the date of this report El Brocal had no outstanding hedging commitments. No such hedging commitments are anticipated in 2024.

Cerro Verde has informed us that they have generally not engaged in, and are currently not engaged in, gold or copper price hedging activities, such as forward sales or option contracts, to minimize their exposure to fluctuations in the prices of gold or copper.

***Normal Sales***

We had no normal sales contracts with fixed or capped prices outstanding as of March 31, 2024.

***Foreign currency risk***

We buy and sell our products and obtain capital facilities and investment in U.S. Dollars. The assets and liabilities in different currencies from the U.S. Dollar (Soles) are not significant. We estimate that the future exchange rate fluctuations of Peruvian currency versus the U.S. Dollar will not significantly affect the results of our future operations. See Note 35(a.1).

***Interest Rate Sensitivity***

We reduce our exposure to the risks due to variations in interest rates by engaging in financial obligations and capital leasing with fixed interest rates. See Note 35(a.3) to the Consolidated Financial Statements. Consequently, we do not use derivative instruments to manage this risk and we do not expect to incur significant losses based on interest risks.

[Table of Contents](#)**ITEM 12. Description of Securities Other Than Equity Securities****A. Debt Securities**

Not applicable.

**B. Warrants and Rights**

Not applicable.

**C. Other Securities**

Not applicable.

**D. American Depositary Shares**

The Depositary collects its fees for delivery and surrender of ADSs directly from investors depositing shares or surrendering ADSs for the purpose of withdrawal or from intermediaries acting for them. The Depositary collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees. The Depositary may collect its annual fee for depositary services by making deductions from cash distributions, by directly billing investors or by charging the book-entry system accounts of participants acting for them. The Depositary may generally refuse to provide fee-attracting services until its fees for those services are paid. The following table summarizes the fees and expenses payable by holders of ADSs:

<u>Persons depositing or withdrawing shares must pay:</u>	<u>Payable to:</u>	<u>For:</u>
US\$5.00 (or less) per 100 ADSs (or portion of 100 ADSs)	Depositary	Issuance of ADSs, including issuances resulting from a distribution of shares or rights or other property
US\$5.00 (or less) per 100 ADSs (or portion of 100 ADSs)	Depositary	Cancellation of ADSs for the purpose of withdrawal, including if the deposit agreement terminates
A fee equivalent to the fee that would be payable if securities distributed to you had been shares and the shares had been deposited for issuance of ADSs	Depositary	Distribution of securities distributed to holders of deposited securities which are distributed by the depositary to ADS registered holders
Registration or transfer fees	Depositary	Transfer and registration of shares on our share register to or from the name of the Depositary or its agent when you deposit or withdraw shares
Expenses of the Depositary	Depositary	Cable, telex and facsimile transmissions (when expressly provided in the deposit agreement)
Expenses of the Depositary	Depositary	Converting foreign currency to U.S. Dollars
Taxes and other governmental charges the Depositary or the custodian have to pay on any ADS or share underlying an ADS, for example, stock transfer taxes, stamp duty or withholding taxes	Depositary	As necessary

[Table of Contents](#)**Fees Incurred in Past Annual Period**

From January 1, 2023 through the date of the report, we received no fees from the Depositary related to our ADR facility, including continuing annual stock exchange listing fees, standard out-of-pocket maintenance costs for the ADRs (consisting of the expenses of postage and envelopes for mailing annual and interim financial reports, printing and distributing dividend checks, electronic filing of U.S. federal tax information, mailing required tax forms, stationery, postage, facsimile, and telephone calls), any applicable performance indicators relating to the ADR facility, underwriting fees and legal fees.

***Fees to be Paid in the Future***

The Depositary has agreed to reimburse us for expenses we incur that are related to establishment and maintenance expenses of the ADS program. The Depositary has agreed to reimburse us for our continuing annual stock exchange listing fees. The Depositary has also agreed to pay the standard out-of-pocket maintenance costs for the ADRs, which consist of the expenses of postage and envelopes for mailing annual and interim financial reports, printing and distributing dividend checks, electronic filing of U.S. federal tax information, mailing required tax forms, stationery, postage, facsimile and telephone calls. It has also agreed to reimburse us annually for certain investor relationship programs or special investor relations promotional activities. In certain instances, the Depositary has agreed to provide additional payments to us based on any applicable performance indicators relating to the ADR facility. There are limits on the amount of expenses for which the Depositary will reimburse us, but the amount of reimbursement available to us is not necessarily tied to the amount of fees the Depositary collects from investors.

The Depositary collects its fees for delivery and surrender of ADSs directly from investors depositing shares or surrendering ADSs for the purpose of withdrawal or from intermediaries acting for them. The Depositary collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees. The Depositary may collect its annual fee for depositary services by deduction from cash distributions or by directly billing investors or by charging the book-entry system accounts of participants acting for them. The Depositary may generally refuse to provide fee-attracting services until its fees for those services are paid.

Not applicable.

**ITEM 14. Material Modifications to the Rights of Security Holders and Use of Proceeds**

Not applicable.

[Table of Contents](#)**ITEM 15. Controls and Procedures*****Evaluation of Disclosure Controls and Procedures***

As of December 31, 2023, we carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon and as of the date of our evaluation, our Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures are effective at providing reasonable assurance that information required to be disclosed in the reports we file and submit under the Exchange Act is recorded, processed, summarized and reported as and when required.

***Management's Annual Report on Internal Control over Financial Reporting***

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external reporting purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Our management has assessed the effectiveness of our internal control over financial reporting as of December 31, 2023. In making its assessment, management has utilized the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control—Integrated Framework. Our management concluded that based on its assessment, our internal control over financial reporting was effective as of December 31, 2023.

Our independent registered public accounting firm Tanaka, Valdivia & Asociados S. Civil de R.L., has issued an attestation report on our internal control over financial reporting, which is included below.

***Report of Independent Registered Public Accounting Firm***

To the Shareholders and the Board of Directors of Compañía de Minas Buenaventura S.A.A. and subsidiaries.

[Table of Contents](#)**Opinion on Internal Control over Financial Reporting**

We have audited Compañía de Minas Buenaventura S.A.A. and subsidiaries internal control over financial reporting as of December 31, 2023, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), (the COSO criteria). In our opinion, Compañía de Minas Buenaventura S.A.A. and subsidiaries (the Company) maintained, in all material respects, effective internal control over financial reporting as of December 31, 2023, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated statements of financial position of the Company as of December 31, 2023 and 2022, the related consolidated statements of profit or loss, other comprehensive income (loss), changes in equity and cash flows for each of the three years in the period ended December 31, 2023, and the related notes and our report dated April 30, 2024, expressed an unqualified opinion thereon.

**Basis for Opinion**

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

**Definition and Limitations of Internal Control Over Financial Reporting**

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with International Financial Reporting Standards as issued by the International Accounting Standard Board. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standard Board, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

/s/ Tanaka, Valdivia & Asociados S. Civil de R.L.

A member practice of Ernst & Young Global Limited

Lima, Peru.

April 30, 2024<sup>1</sup>

<sup>1</sup> Note to Draft: To update prior to filing.

[Table of Contents](#)**Changes in Internal Control Over Financial Reporting**

During 2022, it was identified a material weakness in the design and operating effectiveness of a control within the financial statement close process to review a specific transaction. As a result of the material weakness, Management concluded that, as of December 31, 2022, the Company's internal control over financial reporting was not effective.

A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of our annual consolidated financial statements will not be prevented or detected on a timely basis.

As of December 31, 2023, the Company established a remediation plan whereby implemented and tested control over the accounting closing process and hired experienced personnel resulting in the company's internal control over financial reporting being effective.

Apart from the remediation plan mentioned above, there has been no change in our internal control over financial reporting during 2023 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

**ITEM 16A. Audit Committee Financial Expert**

The Board of Directors has determined that Mr. Marco Antonio Zaldívar is the Audit Committee financial expert as defined in Item 16A of Form 20-F. The Board of Directors has also determined that Mr. Zaldívar and each of the other members of the Audit Committee are "independent directors" as defined in Section 303A.02 of the New York Stock Exchange's, (NYSE), Listed Company Manual.

**ITEM 16B. Code of Ethics**

As part of our corporate values and principles, we have approved and published a Code of Ethics and Good Conduct, which is mandatory for our key executives, directors, managers, officers, employees, as well as all persons or businesses that supply the Company with goods or services. The Code of Ethics and Good Conduct also applies to all individuals or entities contractually bound to its terms and compliance commitment. The Code of Ethics and Good Conduct contains the principles and guidelines of conduct that must be followed by all those within its scope. It is published on our website and is publicly accessible at <http://www.buenaventura.com>. The information on our website is not a part of, nor incorporated into, this document.

**ITEM 16C. Principal Accountant Fees and Services**

The Audit Committee proposed at the General Meeting that Tanaka, Valdivia & Asociados S. Civil de R.L., a member firm of Ernst & Young Global Limited, be elected as the independent auditor for 2023. Tanadka, Valdivia & Asociados S. Civil de R.L. has served as our independent public accountant for each of the fiscal years in the two-year period ended December 31, 2022 and 2023, for which audited Consolidated Financial Statements appear in this annual report on Form 20-F.

The following table presents the aggregate fees for professional services and other services rendered by Tanaka, Valdivia & Asociados S. Civil de R.L. for 2022 and 2023.

	<b>Year ended December 31,</b>	
	<b>2022</b>	<b>2023</b>
Audit Fees	US\$ 1,073,717	1,265,706
Tax Fees	US\$ 35,100	57,818
All other Fees	US\$ 11,017	16,950
Total	US\$ 1,119,834	1,340,474

*Audit Fees.* Audit fees in the above table are the aggregate fees billed by Tanaka, Valdivia & Asociados S. Civil de R.L. in connection with the audit of our annual Consolidated Financial Statements, the review of our quarterly Consolidated Financial Statements and statutory and regulatory audits. In addition, the amounts in the above table includes fees that were incurred in connection with the audit of internal control over financial reporting in 2022 and 2023.

[Table of Contents](#)

*Tax Fees.* Tax fees in the above table are fees billed by Tanaka, Valdivia & Asociados S. Civil de R.L. in connection with review of income tax filings.

All other fees It corresponds to the execution of agreed upon procedures carried out during the year 2022 and 2023.

*Audit Committee Pre-approval Policies and Procedures*

Our Audit Committee is responsible for the oversight of the independent auditor. The Audit Committee has adopted a policy regarding pre-approval of audit services provided by our independent auditors, or the "Policy." In accordance with the Policy, the Audit Committee must pre-approve the provision of services by our independent auditor for all audit and non-audit services before commencement of the specified service. The Audit Committee approved all audit and tax fees in 2022 and 2023.

**ITEM 16D. Exemptions from the Listing Standards for Audit Committees**

Not applicable.

**ITEM 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers**

For the year ended December 31, 2023, neither we nor any person acting on our behalf made any purchase of our Common Shares.

**ITEM 16F. Change in Registrant's Certifying Accountant**

Not applicable.

**ITEM 16G. Corporate Governance**

There are significant differences in the corporate governance practices followed by us as compared to those followed by U.S. domestic companies under the NYSE, listing standards. The NYSE listing standards provide that the board of directors of a U.S. domestic listed company must consist of a majority of independent directors and that certain committees must consist solely of independent directors. Under Peruvian corporate governance practices, a Peruvian company is not required to have a majority of the members of the board of directors be independent.

The listing standards for the NYSE also require that U.S. domestic companies have an audit committee, a nominating/corporate governance committee and a compensation committee. Each of these committees must consist solely of independent directors and must have a written charter that addresses certain matters specified in the listing standards. Peruvian corporate governance practices permit the board of directors of a Peruvian company to form special governance bodies in accordance with the needs of such company and do not require that these special governance bodies be composed partially or entirely of independent directors. We maintain five committees, which include the Audit Committee, the Nominating and Compensation Committee, the Corporate Governance Committee Operations Committee and the Sustainability and Innovation Committee. Our Board has determined that our Audit Committee is composed entirely of independent directors, as defined in the NYSE's Listed Company Manual.

In accordance with SMV regulations, we are required to inform our collaborators, directors and shareholders that they are deemed to have access to privileged information and that in accordance with applicable regulations, any undue use of such information could result in sanctions or criminal liability. Anyone with access to material non-public information about our business or securities are prohibited from transmitting this information to outsiders, recommending the purchase or sale of our securities, or making any other use of such information for their own benefit or the benefit of third parties. In addition, Article No. 251-A of the Peruvian Criminal Code establishes a minimum sentence of one year, with a maximum sentence of five years, for people who obtain benefits using privileged information.

The NYSE's listing standards also require U.S. domestic companies to adopt and disclose corporate governance guidelines. In July 2002, the SMV and a committee composed of regulatory agencies and associations prepared and published a list of suggested corporate governance guidelines called "Principles of Good Governance for Peruvian Companies." These principles are disclosed on the SMV's website at <http://www.smv.gob.pe>.

[Table of Contents](#)**ITEM 16H. Mine Safety Disclosure**

Not applicable.

**ITEM 16L. Disclosure Regarding Foreign Jurisdiction that Prevent Inspections**

Not applicable.

**ITEM 16J Insider Trading Policies**

Not applicable.

**ITEM 16K Cybersecurity**

Buenaventura has a risk-based cybersecurity program supported by an assessment and estimation of the maturity level according to the controls within the NIST CSF. As part of the program outcome, a corporate strategy has been designed based on four core pillars to cover the main cybersecurity capabilities that need to be addressed in the current cyber threat scenario: Improvement of cybersecurity governance, continuous risk management, strengthening of a cybersecurity culture, and, finally, a cybersecurity strategy that allows for the reinforcing of the protection of critical assets and improvement detection and response capabilities in the face of cyber incidents.

It should be noted that, as part of this program, an update of the maturity level assessment is performed on a periodic basis and a specialized supplier is requested to provide a third-party view of the evolution of the program and the strategy.

Likewise, for each pillar, a series of measures and controls has been established so as to improve the level of protection against cyber threats, as well as to maintain an adequate management of the cybersecurity program and strategy within the organization. Some of the capabilities currently in place are detailed below:

In order to improve cybersecurity governance, a general information policy for security and cybersecurity and a policy manual have been established as the general framework for the protection of the organization's assets, safeguarding asset confidentiality, integrity and availability and ensuring the trust of key stakeholders. There is a procedure for the identification and classification of information assets.

Risk management has a methodology for the assessment and treatment of information security and cybersecurity risks. The operational cybersecurity risks that threaten the company are detected through an external consultancy. Based on the SWOT analysis, impact and probability, three macro cybersecurity risks were detected. A roadmap was created to address each risk and thus mitigate the impact on our information and operations.

Regarding the cybersecurity culture, an information security and cybersecurity awareness plan has been established, where the activities to be executed as part of the training and awareness of Buenaventura employees and suppliers have been formalized. Likewise, social engineering tests are periodically performed in order to evaluate employees' capabilities to detect and report potential cyber threats that could compromise the critical assets of the organization.

As part of the cybersecurity strategy implemented in the Company, the protection of critical assets has been reinforced, and various cybersecurity solutions and products have been implemented both externally and internally to improve Buenaventura's capabilities to prevent, detect, and minimize the impact of any cyber incident or threat. Finally, as part of the improvement of capabilities, a cybersecurity operations center (SOC) has been implemented to monitor and manage cybersecurity alerts for Buenaventura's network and infrastructure in order to early detect potential threats. Likewise, a general cyber incident response plan has been designed together with a series of operating procedures for the main types of threats according to the current scenario that lay the basis for an adequate and effective response to a cyber incident in order to minimize the impact it could generate. Finally, we have a disaster recovery procedure under continuous review and annual testing.

## Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Compañía de Minas Buenaventura S.A.A.

*Opinion on the Financial Statements*

We have audited the accompanying consolidated statements of financial position of Compañía de Minas Buenaventura S.A.A., and Subsidiaries (together the Group) as of December 31, 2023 and 2022, the related consolidated statements of profit or loss, other comprehensive income (loss), changes in equity and cash flows for each of the three years in the period ended December 31, 2023, and the related notes (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group at December 31, 2023 and 2022, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2023, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Group’s internal control over financial reporting as of December 31, 2023, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated April 30, 2024 expressed an unqualified opinion thereon.

*Basis for Opinion*

These consolidated financial statements are the responsibility of the Group’s management. Our responsibility is to express an opinion on the Group’s consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Group in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

## Report of Independent Registered Public Accounting Firm (continued)

*Critical Audit Matters*

The critical audit matters communicated below are matters arising from the current period audit of the financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

<i>Description of the Matter</i>	<p><b><i>Impairment of property, plant, equipment and development cost</i></b></p> <p>As of December 31, 2023, the net carrying value of the Group's property, plant, equipment and development cost was US\$1,600.3 million, and related disclosures are included in Note 2.4(m) and Note 11(b) to the consolidated financial statements. The Group reviews and evaluates its property, plant, equipment and development cost for impairment, on each reporting date, or when events or changes in circumstances indicate that the related carrying value, at the cash generating unit (CGU) level, may not be recoverable. When the Group determines the existence of impairment indicators, management performs an evaluation to determine if there is impairment. There is impairment when the carrying value of an asset or CGU exceeds its recoverable amount, which is the higher of fair value less costs to sell and value in use (VIU). The Group estimated the VIU of each CGU with impairment indicators to assess the property, plant, equipment and development cost for impairment. As a result of the impairment assessment, the Group did not record an impairment of its property, plant, equipment and development cost during the year ended December 31, 2023.</p> <p>Auditing the Group's impairment assessment of property, plant, equipment and development cost was complex and judgmental due to the significant estimation required to determine the VIU of each CGU with impairment indicators. In particular, the VIU estimates were sensitive to significant assumptions such as production volumes, current life of mine plans, market-based commodity price assumptions, residual value of assets and discount rates and risks specific to the CGU, including estimated quantities of recoverable minerals.</p> <p>The Group involved independent consultants to audit the process used to estimate proven and probable ore reserves and resources and appraisers to assist with the determination of the residual value of long-lived assets that were used as part of the impairment analyses.</p>
<i>How We Addressed the Matter in Our Audit</i>	<p>We obtained an understanding, evaluated the design and tested the operating effectiveness of controls over the impairment assessment process for property, plant, equipment and development cost, including the process to identify and evaluate potential impairment indicators and management's review of the significant assumptions described above, projected financial information and the methodologies used to develop the estimated VIU.</p>

[Table of Contents](#)

## Report of Independent Registered Public Accounting Firm (continued)

To test the estimated VIU of CGUs with impairment indicators, we performed audit procedures that included, among others, assessing the methodologies and testing the significant assumptions described above and the completeness and accuracy of the data used in the impairment assessment. We assessed the projected financial information of CGUs with impairment indicators by comparing commodity prices with available market information and internal business plans. We also assessed future production levels used in impairment analyses, which are based on life-of-mine plans, against historical estimates and actual results. We also performed sensitivity analyses over significant assumptions to evaluate the change in the recoverable amount of the CGU that would result from changes in the assumptions.

We involved our valuation specialists to assist in comparing commodity price assumptions with market data and analyst forecasts. Additionally, our valuation specialists assessed the discount rates used by comparing them to current industry and economic trends, and evaluated the specific risk premiums applied. Likewise, we involved a specialist to assist us in reviewing the estimated residual value of long-lived assets for those CGUs with impairment indicators in which a significant variation in this assumption could potentially result in an impairment.

We also assessed the competence and objectivity of the independent consultants and appraisers used by the Group as part of the impairment assessment process.

In addition, we assessed the related disclosures included in Note 2.4(m) and Note 11(b) to the consolidated financial statements.

*Description of the Matter****Uncertain tax positions***

As disclosed in the Notes 7(c) and Note 31(d) to the consolidated financial statements, the Group has identified certain contingencies related to income taxes associated with fiscal years 2007 to 2010, 2013, 2014, 2017 and 2018. In these years, relevant taxation authorities have challenged the tax treatment applied by the Group under the income tax law in Peru. As of December 31, 2023, the Group has recognized receivables of \$639.7 million related to payments made under protest to the taxation authorities as part of the tax claim process in Peru but for which the Group is disputing the validity of the taxation authorities' assessment. As of December 31, 2023, management concluded that the probability of recovering a portion of the payments made under protest to the Tax Administration related to fiscal years 2009 and 2010 was less than 50%, and the Group recognized a liability of US\$113.2 million related to this uncertain tax position.

Uncertainty in a tax position may arise where there is an uncertainty as to the meaning of the tax law, or the applicability of the tax law to a particular transaction, or both. The Group uses significant judgment to determine whether, based on technical merits, a tax position is more likely than not to be sustained and in the determination of the recoverable amount of the income tax payments made under protest.

Auditing the estimation of the outcome and measurement of the uncertain tax positions and the related recoverability of the receivables for payments made under protest, before the uncertain tax treatment is resolved, requires a high degree of auditor judgment and significant audit effort due to the complexity and judgment used by the Group in the assessment, which is based on interpretations of income tax legislation and legal rulings in Peru.

## Report of Independent Registered Public Accounting Firm (continued)

*How We Addressed the Matter in Our Audit*

We obtained an understanding, evaluated the design and tested the operating effectiveness of controls over the process for assessing uncertain tax positions, including controls over management's review of the technical merits of tax positions, disputed tax assessments and the determination of the recoverable amount of receivables for payments made under protest.

Our audit procedures included, among others, evaluating the assumptions used by the Group to assess its uncertain tax positions based on relevant Peruvian income tax laws, including the inspection of the Group's internal and external counsel analysis of these matters. In addition, we involved our tax subject matter professionals to assess the technical merits of the Group's tax positions and evaluate the application of relevant tax law in assessing the recoverability of payments made under protest.

Furthermore, we evaluate the related disclosures included in Note 7(c) and Note 31(d) to the consolidated financial statements.

/s/ Tanaka, Valdivia & Asociados S. Civil de R.L.  
A member practice of Ernst & Young Global Limited

We have served as the Group's auditor since 2002.

[Table of Contents](#)**Compañía de Minas Buenaventura S.A.A. and Subsidiaries****Notes to the consolidated financial statements**

For the years 2023, 2022 and 2021

**1. Identification and business activity**

- (a) Identification -  
Compañía de Minas Buenaventura S.A.A. (hereafter “the Company” or “Buenaventura”) is a publicly traded corporation incorporated in Peru in 1953. The Company stock is traded on the Lima and New York Stock Exchanges through American Depositary Receipts (ADRs), which represent the Company’s shares deposited in the Bank of New York. The Company’s legal domicile is at Las Begonias Street N°415, San Isidro, Lima, Peru. The Company is the ultimate controlling party.
- (b) Business activity -  
The Company and its subsidiaries (hereinafter “the Group”) are principally engaged in the exploration, mining, concentration, smelting and marketing of polymetallic ores and metals.

The Company operates directly four operating mining units in Peru (Orcopampa, Julcani, Uchucchacua and Tambomayo), two discontinued mining units (Poracota and Shila-Paula), and one mining unit under development stage (San Gabriel). In addition, the Company has a controlling interest in (i) Sociedad Minera El Brocal S.A.A. (hereinafter “El Brocal”), which operates the Colquijirca mining unit; (ii) Minera La Zanja S.R.L. (hereinafter “La Zanja”), which operates La Zanja mining unit; (iii) El Molle Verde S.A.C. (hereinafter “Molle Verde”) which operates Trapiche, a mining unit at the development stage; and (iv) other entities dedicated to energy generation and transmission services, and other activities. All these activities are carried out in Peru.

The legal domicile of the subsidiaries and associates is the same as that of the Company, except for:

- Contacto Corredores de Seguros S.A. whose legal domicile is located at Avenida Del Pinar 180 Offices 902 – 903 Urb. Chacarilla, Surco, Lima, Peru.
- Sociedad Minera Cerro Verde S.A.A. whose legal domicile is located at Calle Jacinto Ibáñez 315, Urb. Parque Industrial, Cercado de Arequipa, Arequipa.
- Tinka Resources Ltd. whose legal domicile is located at #1305 - 1090 West Georgia Street, Vancouver, British Columbia, V6E 3V7 Canada.

*Restart of activities at the Uchucchacua mining unit -*

Due to operational problems that were aggravated by the COVID-19 pandemic (delays in mine preparation and exploration), on October 15, 2021, the Company requested from the Ministry of Energy and Mines, the temporary suspension of activities in the Uchucchacua unit, specifically those related to mining exploitation and benefit.

As a result of said stoppage, the industrial activities in the subsidiary Procesadora Industrial Río Seco S.A. (which receives raw materials from the Uchucchacua mining unit) were suspended until operations resume in Uchucchacua.

On August 28, 2023, the Company presented the Mining Plan Update to the Ministry of Energy and Mines, thus completing the procedures required for the restart of the activities of the Uchucchacua mining unit, as of September 1 of this year.

As of September 1, 2023, the maintenance and start-up work commenced. Likewise, starting in the second half of September, mineral processing began at the Uchucchacua concentrator plant with the objective of achieving a stable production between 2,600 tons and 2,800 tons per day, which will be maintained for the following years. The resumption of activities at the Uchucchacua concentrator plant will allow metallurgical tests to begin on up to 124,600 tons of ore from the pilot pit of the Yumpag project.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

*Approval of the environmental impact study of the Yumpag project -*

The Detailed Environmental Impact Study of the Yumpag Project (EIA) was approved in September 2023. After that the Company prepared and presented all the required procedures before the Ministry of Energy and Mines to obtain the necessary authorizations to initiate the production phase.

On March 18, 2024, the Company received the final authorizations from the Ministry of Energy and Mines to begin production of Yumpag mine project. The Company expects Yumpag's mining operations to provide 1,000 tons per day contributing significantly to the set silver production guidance of period 2024.

*Temporary partial suspension of exploitation activities in the North Mining Pit of the Colquijirca mining unit of the subsidiary El Brocal -*

On October 3, 2023, El Brocal submitted to the Ministry of Energy and Mines a communication suspending for a period of three years the exploitation activities in the North Mining Pit of the Colquijirca mining unit of El Brocal. This event is due to the delay that occurred in the processing and approval of the Modification of the Environmental Impact Study to 25,000 DMT, motivated by events such as the declaration of the pandemic by the WHO and the subsequent Declaration of Emergency in Peru during 2020, as well as existing regulatory changes in 2022, related to the processing of environmental studies.

Exploitation operations in the Marcapunta underground mine will continue to be carried out on a regular basis, while in the North Pit be carried out only exploration activities, transfer of ore accumulated in the North Pit to the concentration plant, water management and care and maintenance activities.

Finally, it is relevant to point out that El Brocal is implementing a plan to increase the production rate in the underground mine, which will allow it to achieve a production of ten thousand metric tons per day this year, with the objective of reaching twelve thousand metric tons daily. Likewise, El Brocal will maintain the policy of generating efficiencies in operational activities so as not to lose competitiveness during the period of suspension of North Pit.

In regard of the assessment of impairment indicators of long-lived assets, in accordance with International Accounting Standard 36, Impairment of Assets, this matter was considered as an impairment indicator by El Brocal, as a result of the assessment, it was concluded that there is no need to record an impairment loss provision of long-lived assets of El Brocal, see note 11(b).

*Reconfiguration of phases of the North Pit -*

From January to April 2023, diamond drilling work was carried out with the purpose of obtaining updated geotechnical information to comply with the final stage of the stabilization plan related to the crumple of phase 12 that occurred in March 2022. This plan involved the mining phases 12C, 13C, and 15 which are tied to stabilization. As a result of these drillings, it was possible to improve the operational criteria to reconfigure these phases allowing a better operational treatment during 2023.

In this way, some of the phases determined as of December 2022 have been reconfigured in their distribution without altering the total volume of reserves nor waste of the pit, but their production progress. On the other hand, as a result of this update of geotechnical information, the production of reconfigured phases 13B and 15 completed their production in September 2023, hence the deferred stripping cost asset related to those phases was fully amortized on that date.

The financial statements as of December 31, 2023, include this effect, which was applied prospectively starting in the third quarter of this year.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

*Mineral stock write-off resulting from the landslide of North Pit phase 12 –*

On March 19, 2022, a landslide occurred in phase 12 of the North open pit of the Colquijirca mining unit. As a result of the event, operations in said phase were stopped, initiating the execution of planning and execution of rehabilitation activities. In response, the Company's Management decided to process the short- and long-term mineral inventory prioritizing economically viable mineral. However, the metallurgical tests carried out by the operations area concluded that the said mineral did not have economic value due to the detected high oxidation rates.

As explained above, in November 2022, the Company's Management decided to write-off the mineral stock for a total of 483,563 TMS equivalent to US\$16,402,000 (net effect for the year of US\$14,898,000 after deducting the provision for devaluation of inventories equivalent to US\$1,504,000).

- (c) Approval of consolidated financial statements -  
The consolidated financial statements as of December 31, 2023, were approved and authorized for issue by the Board of Directors on April 29, 2024 and subsequent events have been considered through that date.
- (d) The consolidated financial statements include the financial statements of the following companies:

As of December 31, 2022, includes three operating mining units in Perú (Orcopampa, Julcani and Tambomayo), a mining unit temporarily suspended (Uchucchacua), two discontinued mining units (Poracota and Shila-Paula) and a mining unit in development stage (San Gabriel).

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

- (ii) As of December 31, 2023, and 2022, the participation of the Company in the voting rights of El Brocal is 61.43%.
- (iii) Until March 30, 2022, Buenaventura held a direct and indirect ownership of 60%, and the remaining 40% was held by Newmont Corporation (hereinafter "Newmont"). On April 1, 2022, the subsidiary S.M.R.L. Chaupiloma Dos de Cajamarca (hereinafter "Chaupiloma") carried out a demerger of 40% of their equity in favor of Newmont Perú Royalty S.R.L. corresponding to the percentage of shares of Newmont in Chaupiloma in favor of Buenaventura. As a result, the direct and indirect ownership of Buenaventura in that subsidiary increased from 60% to 100%. This transaction was accounted as a transaction between owners. Moreover, the subsidiary Chaupiloma transferred all its mining concessions to Minera Yanacocha S.R.L. (hereinafter "Yanacocha"), receiving as consideration an amount similar to percentage of the production sold of Yanacocha, as well as the production of future concessions. During 2023 and 2022, the Group has recognized revenues for the transfer of property mining rights for US\$9,843,000 and US\$8,455,000; respectively, see note 28(a).
- (iv) On February 7, 2022, Buenaventura signed the definite agreements with Newmont for the sale of its holdings in Yanacocha. As part of this transaction, Newmont transferred to Buenaventura its shares of 46.94% in La Zanja, receiving a consideration determined over the future production of the said mining unit. On the other hand, Newmont paid US\$45,000,000 to Buenaventura with the purpose of covering part of the mine closure future costs of La Zanja, which are presented in the caption "Other capital reserves" in the consolidated statements of changes in equity for an amount of US\$31,628,000 (US\$45,000,000 net of taxes). This transaction was accounted as a transaction between owners. Furthermore, the profit of non-controlling interest amounting to US\$18,240,000 was reclassified in the caption "Accumulated earnings" in the consolidated statements of changes in equity.
- (v) On November 2, 2023, Buenaventura and Howden HoldCo Perú S.A.C. signed a contract for the sale of the shares of Contacto Corredores de Seguros S.A., as a result of this transaction, the Company recognized income from the sale of its investment for US\$41.5 million, see note 28, of which US\$27 million were collected. As of December 31, 2023, the Company has accounts receivable from Howden for US\$12.5 million. See more details in note 7(f).
- (vi) On December 18, 2023, Buenaventura sold the shares held in Minera Julcani S.A. de C.V. (México), for an amount of US\$0.039 million, which was fully collected. The net cost of the disposal due to the sale of this investment was US\$0.069 million, see note 28.
- (e) Discontinued operations -  
During 2022, the Group sold its investment in Minera Yanacocha S.R.L (hereinafter "Yanacocha") classified as discontinued during 2021, under IFRS 5 "Non-current Assets Held for Sale and Discontinued Operations". On February 7, 2022, Buenaventura entered into definitive agreements with Newmont Corporation (hereinafter "Newmont") to sell all of the shares it owned in Yanacocha for a consideration collected in full in February 2022 of US\$300,000,000, as well as contingent payments linked to the production of the Sulfides Project that Yanacocha plans to develop and future increases in mineral prices, payments that can amount to up to US\$100,000,000.

	<u>—</u>	<u>(86,161)</u>	<u>41,414</u>
<b>Profit (loss) from discontinued operations</b>	<u>(6,848)</u>	<u>478,547</u>	<u>(387,604)</u>

No net cash flows were generated by the mining units maintained with discontinued operations during 2023, 2022 and 2021.

- (f) *Temporary operation stoppage of mining units related to social conflicts -*  
Beginning in late 2022, intensified tensions, protests, and social turmoil occurred after the country's political leadership change. The protests continued during early and throughout 2023, there was a limited impact in the Company's operations. The Company continues to monitor the scenario with priority in safety and protection. The prolonged disruption of logistics and supply chain could impact future operations.
- (g) *Temporary suspension of operations of Julcani mining unit -*  
On February 5, 2023, people from outside the influence area of Julcani broke into the mining facilities and forced its officials to, among other requirements, stop operations. In order to ensure the workers' safety all personnel were relocated, and operations were suspended until safety was guaranteed. Both the surrounding area communities and the different unions publicly expressed their rejection of the vandalism acts carried out in the mining unit, followed by their formal request to the Company to restart operations of Julcani mining unit. On February 16, 2023, operations were restarted.

## 2. Basis for preparation, consolidation and accounting policies

- 2.1. Basis of preparation -  
The consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB).

[Table of Contents](#)**Notes to the consolidated financial statements** (continued)

The consolidated financial statements have been prepared on a historical cost basis, based on the records of the Company, except for the derivative financial instruments and financial assets and liabilities that have been measured at fair value and discontinued operations that have been valued at the lower of (i) their carrying amount and (ii) its fair value less cost to sell.

The consolidated financial statements are presented in U.S. dollars and all values are rounded to the nearest thousands, except when otherwise indicated.

The Group has prepared the consolidated financial statements on the basis that it will continue to operate as a going concern.

The preparation of consolidated financial statements requires that management use judgments, estimates and assumptions, as detailed in note 3.

These consolidated financial statements provide comparative information in respect of prior periods.

**2.2. Basis of consolidation -**

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries to the date of the consolidated statements of financial position. Subsidiaries are entities controlled by the Group.

Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and can affect those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has all the following:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee).
- Exposure, or rights, to variable returns from its involvement with the investee.
- The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. When the Group has less than a majority of the voting, or similar, rights of an investee, it considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement (s) with the other vote holders of the investee.
- Rights arising from other contractual arrangements.
- The Group's voting rights and potential voting rights.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, revenue and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, revenue, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction between owners or the parent (there is no gain or loss).

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

If the Group loses control over a subsidiary, it derecognizes the related assets (including goodwill), liabilities, non-controlling interest and other components of equity, while any resultant gain or loss is recognized in profit or loss. Any investment retained is recognized at fair value.

## 2.3. Changes in accounting policies and disclosures -

Certain standards and amendments became effective in 2023; however, they did not have a material impact on the consolidated financial statements of the Group and therefore, have not been disclosed. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

## 2.4. Summary of significant accounting policies –

## (a) Foreign currencies (Note 5) -

The Group's consolidated financial statements are presented in U.S. dollars, which is also the parent company's functional currency and the Group's presentation currency. For each entity, the Group determines the functional currency and the items included in the financial statements of each entity are measured using that functional currency. For consolidation purposes, each entity presents its financial statements in U.S. dollars.

*Transactions and balances*

Transactions in foreign currency are initially recorded by each entity in the Group at their respective functional currency spot rates, published by the Superintendence of Banking and Insurance and Pension Fund Administrators (AFP for its acronym in Spanish).

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Differences arising from the settlement or translation of monetary items are recognized in profit or loss with the exception of monetary items that are designated as part of a hedge. These are recognized in other comprehensive income (OCI) until the hedged items are disposed of, at which time, the cumulative amount is reclassified to profit or loss. Tax charges and credits attributable to exchange differences on those monetary items are also recognized in OCI.

Non-monetary assets and liabilities recognized in terms of historical cost are translated using the exchange rates at the dates of the initial transactions.

## (b) Financial instruments - Initial recognition and subsequent measurement -

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

## (i) Financial assets -

## Initial recognition and measurement -

Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through OCI, and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. Except for trade receivables that do not contain a significant financing component, the Group initially measures a financial asset at its fair value plus transaction costs, in the case of a financial asset not at fair value through profit or loss. Trade account receivables that contain a significant financial component are measured at the transaction price, as it is disclosed in the section (p) Revenue recognition – Significant financial component.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

For a financial asset to be classified and measured at amortized cost or fair value through OCI, it needs to give rise to cash flows that are “solely payments of principal and interest (SPPI)” on the principal amount outstanding. This assessment is known as the financial instrument test for collecting principal and interest and is performed at an instrument level. The financial assets with cashflows that are not solely capital payments and interest are classified and assessed at their fair value with changes in profit or loss, regardless of the business model.

The Group’s business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

The financial assets classified and valued at their amortized cost are held in a business model whose objective is to hold financial assets for obtaining contractual cashflows, while the financial assets that are classified and valued at fair value with changes in OCI are held in a business model whose objective is to obtain contractual cashflows and sale financial assets.

Purchases or sales of financial assets that require delivery of assets within a period established by regulation or convention in the marketplace (regular way trades) are recognized on the trade date.

Subsequent measurement -

For purposes of subsequent measurement, financial assets are classified in the following categories:

- Financial assets at amortized cost.
- Financial assets at fair value through OCI.
- Financial assets at fair value through profit or loss.

*Financial assets at amortized cost -*

The Group measures financial assets at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows, and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

This category generally applies to other receivables included in the “Trade and other receivables” caption (see note 7).

*Financial assets at fair value through OCI -*

Financial assets are classified and measured at fair value through OCI if they are held in a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.

This category generally applies to “Hedge derivative financial instruments” caption (see note 34).

*Financial assets at fair value through profit or loss -*

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

This category includes derivative instruments and listed equity investments which the Group had not irrevocably elected to classify at fair value through OCI. Dividends on listed equity investments are recognised as other income in the statement of profit or loss when the right of payment has been established.

A derivative embedded in a hybrid contract, with a financial liability or non-financial host, is separated from the host and accounted for as a separate derivative if: the economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at fair value through profit or loss.

Embedded derivatives within a hybrid contract that contain a financial asset as a host are not accounted for separately. The host financial asset (trade receivable) together with the embedded derivative are recorded as a financial asset at fair value through profit or loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss category.

This category generally applies to other receivables included in the "Trade and other receivables" caption (see note 7).

**Derecognition -**

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is primarily derecognized when:

- The rights to receive cash flows from the asset have expired; or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a pass-through arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset or, (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered a pass-through arrangement, it evaluates to what extent, it has retained the risk and rewards of ownership. When it has neither transferred nor retained substantially all the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

**Impairment of financial assets -**

The Group recognizes an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

For trade receivables and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

The Group considers a financial asset in default when contractual payments are past due according to each contract. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

## (ii) Financial liabilities -

## Initial recognition and measurement -

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans, borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade and other payables (note 14), financial obligations (note 16), contingent consideration liability (note 29).

*Subsequent measurement -*

The measurement of financial liabilities depends on their classification, as described below:

*Financial liabilities at fair value through profit or loss -*

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for repurchasing in the near term. This category also includes derivative financial instruments entered by the Group that are not designated as hedging instruments in hedge relationships as defined by IFRS 9. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in IFRS 9 are satisfied. The Group has designated financial liabilities for contingent consideration as at fair value through profit or loss (note 29).

*Financial liabilities at amortized cost (loans and borrowings) -*

After initial recognition, interest-bearing loans and borrowing are subsequently measured at amortized cost using the EIR. Gains and losses are recognized in the profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. EIR amortization is included in the "Financial costs" caption in the consolidated statements of profit or loss (note 29). This category generally applies to interest-bearing loans and borrowings.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

*Derecognition -*

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the consolidated statements of profit or loss.

## (iii) Offsetting of financial instruments -

Financial assets and financial liabilities are offset, and the net amount is reported in the consolidated statements of financial position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

## (c) Cash and cash equivalents (note 6) -

“Cash and cash equivalents” caption presented in the consolidated statements of financial position comprise cash at banks and on hand, and short-term highly liquid deposits with a current maturity and subject to an insignificant risk of changes in value.

For the purpose of the consolidated statements of cash flows, cash and cash equivalents consist of cash and short-term deposits (with maturity lower or equal to 2 months) as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group’s cash management.

## (d) Inventories (note 8) -

Inventories are valued at the lower of cost or net realizable value. Cost is determined using the average method.

In the case of finished goods and work in progress, cost includes the cost of materials and direct labor and a portion of indirect manufacturing expenses, excluding borrowing costs.

The current portion of the inventories is determined based on the expected amounts to be processed within the next twelve months. Inventories not expected to be processed within the next twelve months are classified as non-current.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs to make the sale.

Provision (or reversal) for losses on the net realizable value are calculated based on a specific analysis conducted annually by Management and is charged to profit or loss in the period in which it determines the need for the provision (or reversal).

Any provision for obsolescence of spare parts and supplies is determined by reference to specific items of stock based on inventory turnover level. A regular review is undertaken to determine the extent of any provision for obsolescence.

## (e) Business combinations and goodwill (note 12(d)) -

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree’s identifiable net assets. Acquisition-related costs are expensed as incurred and included in the “Administrative expenses” caption.

[Table of Contents](#)**Notes to the consolidated financial statements** (continued)

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquirer.

Any contingent consideration to be transferred by the acquirer will be recognized at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of IFRS 9 Financial Instruments, is measured at fair value, with changes in fair value recognized in either profit or loss or as a change to other comprehensive income. If the contingent consideration is not within the scope of IFRS 9, it is measured at fair value at the reporting date with changes in the fair value recorded in the consolidated statement of profit or loss.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interests, and any previous interests held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognized at the acquisition date (see mining concessions identified see Note 11(f)). If the re-assessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognized in the consolidated statements of profit or loss.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, this difference is allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities, of the acquiree, are assigned to those units.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed of in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

(f) Investments in associates and joint venture (see note 10) -

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but not control over those policies.

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

The considerations made in determining significant influence or joint control are similar to those necessary to determine control over subsidiaries. The Group's investments in associates and joint ventures are accounted for using the equity method.

Under this method, the investment in an associate or joint venture is initially recognized at cost. The carrying amount of the investment is adjusted to recognize changes in the Group's share of net assets of the associate and joint ventures since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is not tested for impairment individually.

The consolidated statement of profit or loss reflects the Group's share of the results of operations of the associates and joint ventures. Any change in OCI of those investees is presented, as part of the Group's other comprehensive income. In addition, when there has been a change recognized directly in the equity of the associate or joint venture, the Group recognizes its share of any changes, when applicable, in the consolidated statements of changes in shareholders' equity. Unrealized gains and losses resulting from transactions between the Group and the associate or joint venture are eliminated to the extent of the interest in the associate or joint venture.

The aggregate of the Group's share of profit or loss of an associate or joint venture is shown on the face of the consolidated statements of profit or loss outside operating profit and represents profit or loss after tax in the associates and joint ventures.

The financial statements of the associates or joint venture are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After the application of the equity method, the Group determines whether it is necessary to recognize an impairment loss on its investment in associates or joint venture. At each reporting date, the Group determines whether there is objective evidence that the investments in the associates and joint ventures are impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value, and then recognizes the loss in the consolidated statements of profit or loss.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

Upon loss of significant influence over the associate or joint venture, the Group measures and recognizes any retained investment at its fair value. Any difference between the carrying amount of the associate and joint ventures upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognized in consolidated statements of profit or loss.

## (g) Prepaid expenses (see note 9) -

Non-monetary assets, which represent an entity's right to receive goods or services, are presented as prepaid expenses. The asset is subsequently derecognized when the goods are received, and the services are provided.

## (h) Property, plant and equipment (see note 11) -

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any.

The initial cost of an asset comprises its purchase price or construction cost, any costs directly attributable to bringing the asset into operation, the initial estimate of the obligation for mine closing and, borrowing costs for qualifying assets.

When significant parts of property, plant and equipment are required to be replaced at intervals, the Group depreciates them separately based on their specific useful lives. In addition, when a major inspection is performed, its cost is recognized in the carrying amount of plant and equipment as a replacement if the recognition criteria are satisfied. All other maintenance and repair costs are recognized in the consolidated statement of profit or loss as incurred.

*Depreciation -*

## Unit-of-production method:

In mining units with long useful lives, depreciation of assets directly related to the operation of the mine is calculated using the units-of-production method, which is based on economically recoverable reserves of the mining unit. Other assets related to these mining units are depreciated using the straight-line method with the lives detailed in the next paragraph.

As of December 31, 2023, the Group maintains the following depreciation rates in its respective mining units:

Mining units	Rates
Tambomayo	41.04 %
El Brocal	7.99 %

## Straight-line method:

Depreciation of assets in mining units with short useful lives or used for administrative purposes is calculated using the straight-line method of accounting. The useful lives are the following:

	Years
Buildings, construction and other	Between 2 and 40
Machinery and equipment	Between 2 and 30
Transportation units	5
Furniture and fixtures	Between 4 and 10
Other equipment	Between 3 and 10
Computer equipment	Between 3 and 5

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year-end, and adjusted prospectively, if appropriate.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

*Disposal of assets -*

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal, or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the consolidated statements of profit or loss when the asset is derecognized.

## (i) Leases (Notes 11 and 16) -

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period in exchange for consideration.

*Group as a lessee -*

The Group applies a single recognition and measurement approach for all leases, except for short-term leases with no renewal options and leases of low-value assets. The Group recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) *Right-of-use assets -*

The Group recognizes right-of-use assets at the commencement date of the lease. Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the related assets.

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

ii) *Lease liabilities -*

At the commencement date of the lease, the Group recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate.

Variable lease payments that do not depend on an index or a rate are recognized as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs. The Group does not have variable lease payments that depend on an index or a rate.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments or a change in the assessment of an option to purchase the underlying asset.

The Group's lease liabilities are included in the "Financial obligations" caption on the consolidated statements of financial position (note 16).

iii) *Short-term leases and leases of low-value assets -*

The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment without renewal option. It also applies the lease of low-value assets recognition exemption to leases of office equipment, which are considered low value. Lease payments on short-term leases and leases of low value assets are recognized as expense on a straight-line basis over the lease term.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

*Group as a lessor -*

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in "Other, net" in the consolidated statement of profit or loss due to its operating nature (note 28). Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income.

## (j) Mining concessions (Note 11) -

Mining concessions represent ownership of the right of exploration and exploitation to the Group on mining properties that contains ore reserves acquired. Mining concessions are irrevocable, provided the holder of a mining concession complies with the obligations set forth in the General Mining Law. Such concessions have an indefinite term, subject to payment of an annual concession fee per hectare granted and achievement of minimum annual production for each hectare. Mining concessions are stated at cost and are amortized using a units of production method, based on proven and probable reserves.

If the Group leaves these concessions, the costs associated are written off in the consolidated statements of profit or loss.

Cost includes the fair value attributable to mineral reserves and the portion of mineral resources considered probable of economic extraction at the time of a business combination.

At year-end, the Group evaluates if there is any indicator of impairment. If any indicator exists, the Group estimates the mining concession's recoverable amount.

Mining concessions are presented in the caption of "Property, plant, equipment and development costs" in the consolidated statements of financial position.

## (k) Exploration and mine development costs (Notes 11 and 23) -

*Exploration costs (Note 23) -*

Exploration costs are expensed as incurred. These costs primarily include materials and fuels used, surveying costs, drilling costs and payments made to contractors.

Exploration and evaluation activity includes:

- Researching and analyzing historical exploration data.
- Gathering exploration data through geophysical studies.
- Exploratory drilling and sampling.
- Determining and examining the volume and grade of the resource.
- Surveying transportation and infrastructure requirements.
- Conducting market and finance studies.

*Development costs (Note 11) -*

When the Group's Management approves the feasibility of the conceptual study of a project, the costs incurred to develop such property, including additional costs to delineate the ore body and remove impurities it contains, are capitalized as development costs and included in the "Property, plant, equipment and development cost" caption in the consolidated statements of financial position. These costs are amortized when production begins, on the units-of-production basis over the proven and probable reserves.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

The development costs include:

- Metallurgical and engineering studies.
- Drilling and other costs necessary to delineate ore body.
- Removal of the initial clearing related to an ore body.

Development costs necessary to maintain production are expensed as incurred.

(l) Stripping (waste removal) costs (*Note 11*) -

As part of its mining operations, the Group incurs waste removal costs (stripping costs) during the development and production phases of its mining operations. Stripping costs incurred in the development phase of a mine, before the production phase commences (development stripping), are capitalized as part of the cost of constructing the mine and subsequently amortized over its useful life using the units of production method. The capitalization of development stripping costs ceases when the mine starts production.

Stripping costs incurred during the production phase (production stripping costs) are generally considered to create two benefits, being either the production of inventory or improved access to the ore to be mined in the future. Where the benefits are realized in the form of inventory produced in the period, the production stripping costs are accounted for as part of the cost of producing those inventories. Where the benefits are realized in the form of improved access to ore to be mined in the future, the costs are recognized as a non-current asset, referred to as a stripping activity asset, if the following criteria are met:

- Future economic benefits are probable.
- The component of the ore body for which access will be improved can be accurately identified.
- The costs associated with the improved access can be reliably measured.

To identify components of mineral deposit, the Group works closely with the operating personnel to analyze the mine plans. Mostly, an ore body can have several components. The mine plans, and therefore, the identification of components, will vary among mines for several reasons.

The stripping activity asset is initially measured at cost, which is the accumulation of costs directly incurred to perform the stripping activity. The production stripping cost is presented within "Property, plant, equipment and development cost" caption in the consolidated statements of financial position (note 11).

The production stripping cost is subsequently depreciated using the units of production method over the expected useful life of the portion of the ore body that has been made more accessible by the activity. This production stripping cost is stated at cost, less accumulated depreciation and accumulated impairment losses, if any.

(m) Impairment of non-financial assets (*Notes 19(b) and 11*) -

The Group assesses at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of (i) an assets or cash-generating unit's (CGU) fair value less costs of disposal and (ii) its value in use; and is determined for an individual asset unless the asset does not generate substantially independent cashflows from the other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less cost of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

The Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. A long-term growth rate is calculated and applied to project future cash flows limited to the life of the mine.

Impairment losses of continuing operations, including impairment of inventories, are recognized in the consolidated statements of profit or loss in expense categories consistent with the function of the impaired asset.

For non-financial assets, an assessment is made at each reporting date to determine whether there is an indication that previously recognized impairment losses may no longer exist or have decreased. If such indication exists, the Group estimates the assets or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset or CGU's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statements of profit or loss.

## (n) Provisions (note 15)-

*General -*

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

*Provision for closure of mining units -*

The Group records a provision for closure of mining units when a legally enforceable obligation arises, which is independent of the full depletion of the mine reserves.

The Group recognizes a provision for closure of mining units once the obligation has been properly measured. The liability is initially recognized at the present value of the estimated costs and is capitalized as part of the carrying amount of the related mining assets (property, plant and equipment). The discounted liability is increased for the change in present value based on discounted rates that reflects current market assessments and the risks specific to the liability. In addition, the capitalized cost is depreciated and/or amortized based on the useful life of the asset. Any gain or loss resulting from the settlement of the obligation is recorded in the current results.

Changes in the estimated timing of closure or changes to the estimated future costs are dealt with prospectively by recognizing an adjustment to the provision for closure and a corresponding adjustment to the related mining asset. Any reduction in the provision for closure and, therefore, any deduction from the mining asset to which it relates, may not exceed the carrying amount of the mining asset. If it does, any excess over the carrying amount is recognized immediately to the consolidated statements of profit or loss.

If the change in estimate results in an increase in the provision for closure and, therefore, an addition to the carrying value of the mining asset, the Group considers whether this is an indication of impairment of the asset, and if so, the Group performs an impairment test.

For closed mines, changes to estimated costs are immediately recognized in the consolidated statements of profit or loss (note 1(e)).

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

- (o) Treasury shares (Note 17) -  
The Group's own equity instruments that are reacquired (treasury shares) are recognized at cost and deducted from equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Group's own equity instruments. Any difference between the carrying amount and the consideration, if reissued, is recognized as additional capital in equity. The voting rights related to treasury shares are cancelled for the Group and no dividends on such shares are allocated.
- (p) Revenue recognition (Note 20) -  
Revenue from contracts with customers is recognized when control of goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods and services.

The Group has concluded that it is the principal in its revenue contracts because it typically controls the goods before transferring them to the customer.

The disclosures of significant accounting judgments, estimates and assumptions relating to revenue from contracts with customers are provided in note 3.

*Sales of goods (concentrates and metals) -*

The Group recognizes revenue from sale of concentrates and metals at the point in time when control of the asset is transferred to the customer. Transfer of control is determined in accordance with the terms of each of the contracts entered with the Group's customers; however, under such contracts, transfer of control generally occurs upon shipment or delivery of the goods, including transportation. The recognized revenue corresponds to an amount that reflects the consideration the Group expects to receive in exchange for those products.

Revenue from sale of concentrates and metals is recorded net of "Commercial deductions". Commercial deductions correspond to adjustments in price for treatment and refining charges and can include certain penalties that, in accordance with the applicable contract, are deducted from the international fine metal spot price, and that are incurred after the time of sale of the applicable concentrate. The Group deems these deductions to be part of the transaction price. The normal credit term is 5 to 90 days after delivery.

The Group considers whether there are other promises in the contract that are separate performance obligations, to which a portion of the transaction price needs to be allocated. The Group considers that the only performance obligation is the delivery of the goods. In determining the transaction price for the sale of concentrates and metals, the Group considers the effect of variable consideration and the existence of significant financing components.

*Variable consideration -*

If the consideration in the contract includes a variable amount, the Group estimates the amount of consideration to which it will be entitled in exchange for transferring the goods to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant reversal of revenue recognized will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

The Group's sales of concentrates and metals allow for price adjustments based on the market price at the end of the relevant quotation period (QP) stipulated in the contract. These are referred as to provisional pricing arrangements and are such that the selling price for metal in concentrate is based on prevailing spot prices on a specified future date after shipment to the customer. Adjustments to the sales price occur based on movements in quoted market prices up to the end of the QP. The period between provisional invoicing and the end of the QP can generally range between one and four months.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

The Group's sales of concentrates and metals are also subject to slight variations in yield that can occur while such goods are in transit to their destination due to variations in humidity, weight and ore grades. Such variations are recognized directly as part of "Sales of goods" caption within the statements of profit or loss once the Group reaches an agreement with the applicable customer in respect of final amounts sold.

Sales of concentrates and metals at provisional prices include a gain (loss) to be received at the end of QP; this is considered variable consideration. Changes in the price during the quotation period are recognized in the "Sales of goods" caption of the statements of profit or loss as "Fair value of accounts receivables". See note 20(b).

For provisional pricing arrangements, any future change that occurs over the QP are embedded within the provisional price trade receivables and are, therefore, within the scope of IFRS 9 and not within the scope of IFRS 15. Given the exposure to movement in the commodity price, these provisionally priced trade receivables generally fail the cashflow characteristics test within IFRS 9 and are required to be measured at fair value through profit or loss from initial recognition and until the date of settlement. The subsequent changes in fair value are recognized in the consolidated statements of profit or loss for each period and presented separately from revenue from contracts with customer as part of "fair value of trade receivables". See note 20(b). Changes in fair value over, and until the end of, the QP, are estimated by reference to forward market prices for gold and copper as well as taking into account other relevant fair value considerations set out in IFRS 13, including interest rate and credit risk adjustments.

*Sales of services –*

Services are recognized over time because the customer simultaneously receives and consumes the benefits provided by the Group. The Group uses the output method for measuring progress of the services as the Group has the right to invoice an amount that corresponds directly to the performance completed to date.

*Significant financing component -*

The Group receives short-term advances from its customers. Using the practical expedient in IFRS 15, the Group does not adjust the promised amount of consideration for the effects of a significant financing component if it expects, at contract inception, that the period between the transfer of the promised good to the customer and when the customer pays for that good will be one year or less.

*Contract Balances -**Contract assets*

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognized for the earned consideration that is conditional. As of December 31, 2023, and 2022, the Group has no contract assets.

*Trade receivables -*

A receivable represents the Group's right to an amount of consideration that is unconditional.

*Contract liabilities -*

A contract liability is the obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. If customer pays consideration before the Group transfers the goods or services to the customer, a contract liability is recognized when the payment is made, or the payment is due (whichever is earlier). Contract liabilities are recognized as revenue when the Group performs its obligations under the contract. As of December 31, 2023, and 2022, the Group has no contract liabilities.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

*Cost to obtain a contract -*

The Group pays sales commissions as part of the sales of services in the insurance brokerage segment. The Group has elected to apply the optional practical expedient for cost to obtain a contract which allows the Group to immediately expense sales commissions because the amortization period of the assets that the Group otherwise would have used is one year or less.

*Interest income (Note 29)-*

For all financial instruments measured at amortized cost, interest income is recorded using the EIR. EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or liability. Interest income is included in finance income in the consolidated statements of profit or loss.

*Royalty income (Note 20(b))-*

The royalty income is recognized when the later of the following events occurs: the subsequent sales occur, or the performance obligation is satisfied (or partially satisfied).

*Dividends (Note 32) -*

Dividends from investments is recognized when the Group's right to receive the payment is established, which is generally when the investments' shareholders approve the dividend.

*Rental income (Note 28) -*

Rental income arising from operating leases on investment properties is accounted for on a straight-line basis over the lease term and is included in the "Other, net" caption in the consolidated statement of profit or loss due to its operating nature.

- (q) Benefits to employees (Notes 21,22, 23, 25, 26 and 27) -  
Salaries and wages, bonuses and vacations are calculated in accordance with IAS 19 "Employee Benefits" and are calculated in accordance with current Peruvian legislation on an accrual basis.

*Workers' profit sharing -*

Workers' profit sharing is calculated in accordance with the Peruvian law (Legislative Decree No. 892), and the applicable rate is 8% over the taxable net base for current year. According to Peruvian law, the limit in the workers' profit sharing that an employee can receive is equivalent to 18 months of wages, and any excess above such limit has to be transferred to the Regional Government and "National Fund for Employment's Promotion and Training" (FONDOEMPLEO for its acronym in Spanish).

- (r) Borrowing costs (note 29) -  
Costs directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the cost of the related asset. The Group defines a qualifying asset as one which value is greater than US\$5 million and requires a period greater than 12 months to get it ready for its intended use. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that the Group incurs in connection with the borrowing of funds.

- (s) Taxes (Note 30) -  
*Current income tax -*  
Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the tax authority. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting period.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

Current income tax relating to items recognized directly in equity is recognized in equity and not in the consolidated statements of profit or loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

*Deferred income tax -*

Deferred income tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred income tax liabilities are recognized for all taxable temporary differences, except for taxable temporary differences associated with investments in associates, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses, can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Deferred tax items are recognized in correlation to the underlying transaction either in profit or loss, OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right to compensate current tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

*Uncertain tax positions -*

The Group determines whether to consider each uncertain tax position separately or together with one or more other uncertain tax positions and uses the approach that better predicts the resolution of the uncertainty. In Peru, there are only two possibilities to measure uncertain Peruvian tax positions: 100% probability of recovery in the event that the Group has a favorable decision on the matter to be evaluated, or 0% probability of recovery, in the event that the Group does not prevail in the procedures before the tax authority. The Group determines, based on its tax compliance and transfer pricing studies whether or not it is probable that its tax positions (including those for the subsidiaries) would be accepted by the tax authorities.

*Peruvian mining royalties and special mining tax -*

In accordance with Law No.28258, as amended by Law No. 29788, mining royalties are either payable as the higher of (i) a specified percentage of tax operating profit or (ii) 1% of net revenues. If the mining royalty is calculated as a percentage of tax operating profit, marginal rates ranging from 1% to 12% that increase progressively for companies with higher operating margins will apply.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

Mining royalties and the special mining tax are accounted for in accordance with IAS 12 - Income Taxes, because they have the characteristics of an income tax. This is considered to be the case when they are imposed under government authority and the amount payable is based on taxable income-rather than physical quantities produced or as a percentage of revenue-after adjustment for temporary differences. Legal rules and rates used to calculate the amounts payable are those in effect on the date of the consolidated statements of financial position.

Consequently, liabilities resulting from Mining Royalties and Special Mining Tax are under the scope of IAS 12. Both Mining Royalties and Special Mining Tax generate deferred tax assets and liabilities, which are measured using the average rates expected to apply to tax profit in the quarter in which the Group expects the temporary differences will reverse.

*Sales tax -*

Expenses and assets are recognized net of the amount of sales tax, except:

(i) When the sales tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the sales tax is recognized as part of the cost of acquisition of the asset or as part of the expense item, as applicable.

(ii) When receivables and payables are stated with the amount of sales tax included.

The net amount of sales tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the consolidated statements of financial position.

(t) Fair value measurement (Note 36) -

The Group measures its financial instruments at fair value at the date of the consolidated statements of financial position.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described, as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorization (based on the lowest-level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Group's management determines the policies and procedures for both recurring fair value measurement and non-recurring measurement. At each reporting date, the Group's management analyzes the movements in the values of assets and liabilities, which are required to be re-measured or re-assessed as per the Group's accounting policies.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities based on the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

(u) Derivative financial instruments and hedge accounting (Note 34) -

*Initial recognition and subsequent measurement -*

The Group uses derivative instruments to hedge its commodity price risk (forward commodity contracts ) and interest rate risk. Such derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

At the inception of the hedge relationship, the Group formally designates and documents the hedge relationship to which it wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge.

The documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Group will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined). A hedging relationship qualifies for hedge accounting if it meets all the following effectiveness requirements:

- There is an economic relationship between the hedged item and the hedging instrument.
- The effect of credit risk does not 'dominate the value changes' that result from that economic relationship.
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Group hedges and the quantity of the hedging instrument that the Group actually uses to hedge that quantity of hedged item.

The Group's hedges are classified as cash flow hedges. The effective portion of gain or loss on the hedging instrument is initially recognized in the consolidated statements of changes in equity, under the "Other comprehensive income (loss)" caption, while the ineffective portion is recognized immediately in the consolidated statements of profit or loss in the "Finance costs" caption (Note 29).

(v) Discontinued operations (Note 1(e)) -

Discontinued operations are excluded from the results of continuing operations and are presented as a single amount as profit or loss after tax from discontinued operations in the consolidated statement of profit or loss.

All other notes to the consolidated financial statements include amounts for continuing operations, unless otherwise mentioned.

(w) Other non-financial assets (Note 12) -

The "Other non-financial assets" caption includes patents and industrial property, right-of-use assets related to rights of way, software licenses and goodwill (see 2.4(e)). Patents and industrial property and right-of-use assets are amortized over their economic useful lives. Software licenses are amortized using the straight-line method over useful lives of 1 to 10 years.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

The useful lives of intangible assets are assessed as either finite or indefinite. Intangible assets with finite life are amortized over their useful economic useful lives and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognized in the consolidated statement of profit or loss in the expense category that is consistent with the function of the intangible assets.

Internally generated intangibles, excluding capitalized development costs, are not capitalized. Instead, the related expenditure is recognized in the consolidated statement of profit or loss in the period in which the expenditure is incurred.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the consolidated statement of profit or loss when the asset is derecognized.

- (x) Recognition of costs and expenses (Notes 21, 22, 25, 26, 27 and 28) -  
The costs of sales, sales expenses and administration expenses are recognized when accrued. Likewise, the mineral costs of sales are accrued simultaneously with the revenue recognition of the related sale. The other costs and expenses are recognized as they are accrued, independently of the time they are paid, being recorded in the related periods.
  - (y) Dividends distribution (Note 17) -  
The dividends distribution to shareholders are recognized as liabilities in the consolidated financial statements in the period in which they are approved by the Company's shareholders.
  - (z) Earning per basic and diluted share (Note 17) -  
Earnings per basic and diluted share have been calculated based on the weighted average of common and investment outstanding shares at the date of the consolidated statement of financial position. As December 31, 2023, and 2022, earnings per basic and diluted share are the same as the Group did not have financial instruments with dilutive effect.
  - (aa) Contingencies (Note 29) -  
Contingent liabilities are not recognized in the consolidated financial statements and are disclosed in the notes to the consolidated financial statements unless their occurrence is remote. Contingent assets are not recognized in the consolidated financial statements and only are disclosed when their occurrence is considered probable.
- 2.5. Climate related matters –  
The Group, when appropriate, considers the impact of climate-related matters in its consolidated financial statements. This assessment includes wide range of possible impacts on the Group due to physical and transition risks. Nonetheless, the Group considers that its business model will continue to be viable after the transition to a lower carbon emissions economy since it has been developing initiatives related to mitigating these risks, and which include considerations such as:
- Environmental impact study (EIA by its acronym in Spanish): Monitoring and compliance with more demanding measures related to air and water quality, preservation of the affected area habitat, and rehabilitation plans.
  - Tailings management: Improving tailings treatment practices to minimize impacts on the climate and environment, by incorporating improvements in procedures and implementing monitoring systems.

[Table of Contents](#)**Notes to the consolidated financial statements (continued)**

- Biodiversity conservation: Cooperating with environmental agencies and local communities to develop biodiversity conservation programs, ensuring responsible mining practices and habitat protection.
- Water management conservation: Implementing measures to optimize the use of water, reduce its consumption, and improve the water recycling process within mining operations.

Despite the adopted measures, climate-related risks could have an impact on the measurement of certain significant estimates that could have an impact on the consolidated financial statements such as:

- Useful life of property, plant and equipment (Notes 2.4(h) and 11): Generated by changes in laws and regulations that could generate changes in the estimated term of use of the assets or require significant capital investments for their adaptation.
- Mine closure and remediation obligations (Notes 2.4(n) and 15(a)): Generated by changes in both physical and regulatory conditions could generate changes in the dismantling costs of facilities, rehabilitation and restoration activities.
- Provision for environmental liabilities (Notes 2.4(n) and 15(a)): the Company complies with the environmental protection standards regulated in the country, recognizing it appropriately in the consolidated financial statements.
- Environmental contingencies (Notes 2.4(aa) and 31), in the opinion of the Group's Management and its legal advisors, the Group has recognized in its consolidated financial statements a provision for environmental contingencies.

As of December 31, 2023, the Group continues to assess the impact of climate-related risks to incorporate related disclosures in response to changes and developments in laws and regulations that may have a direct significant impact on the consolidated financial statements. It is important to highlight that the Group is committed to continuing to improve its participation in the preservation of the climate and environment to guarantee its sustainability. Future impacts could include the adoption of advanced technologies and improvements in more sustainable mining practices to stay aligned with the changing environmental regulations and community expectations.

- 2.6. Macroeconomic and geopolitical uncertainty – Peru's economic outlook in the short and medium term will be marked by the post-recession statistical recuperation, a challenging international environment and the ability of the authorities to mitigate political turmoil in the eyes of the business sector. A relatively stable political context is expected.

Internationally, the geopolitical risk increased following the conflict between Israel and Hamas, but economic policy uncertainty has remained relatively low.

The Group's Management will continue to closely evaluate the impact of macroeconomic and geopolitical uncertainty; as of December 31, 2023, they do not have an impact on the consolidated financial statements.

**3. Significant accounting judgments, estimates and assumptions**

The preparation of the Group's consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities at the date of the consolidated financial statements. Estimates and assumptions are continually evaluated and are based on management's experience and other facts, including the expectations about future events that are believed to be reasonable under the current situation. Uncertainty about these estimates and assumptions could result in outcomes that require material adjustment to the carrying amount of assets and liabilities affected in future periods.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

Further information on each of these areas and the impact on the consolidated financial statements and the accounting policies of the Group due to the application of significant accounting judgments, estimates and assumptions that have been used is presented below, as well as in the notes to the respective consolidated financial statements.

## 3.1. Judgments

In the process of applying the Group's accounting policies, Management has made the following judgments, which have the most significant effect on the amounts recognized in the consolidated financial statements:

## (a) Contingencies and uncertain tax positions (Note 31) -

By their nature, contingencies will be resolved only when one or more uncertain future events occur or fail to occur. The assessment of the existence and potential impact of contingencies inherently involves the exercise of significant judgment and the use of estimates regarding the outcome of future events. To identify uncertainties over income tax treatments, the Group makes a determination as to whether a tax treatment is probable of being accepted by the taxation authorities based on its tax compliance and transfer pricing studies.

Pursuant to Peruvian Law, once there is an adverse decision to a taxpayer at the administrative level, Superintendencia Nacional de Aduanas y de Administración Tributaria (SUNAT for its acronym in Spanish) is entitled to deliver notice to the taxpayer demanding payment, regardless of whether the taxpayer decides to appeal the decision at the judiciary level. However, the taxpayer's payment of the SUNAT administrative claim does not entail a settlement of the tax dispute. Instead, this payment is required to be made for the taxpayer to continue the appeal process at the judiciary level and is subject to refund, with interest, if the taxpayer is successful in their judiciary level action.

When measuring the amount to be recorded as an account receivable considering the payments made at the administrative level, the Group applies IFRIC 23.

## (b) Development start date (Note 11) -

The Group assesses the status of each exploration project of its mining units to determine when the development phase begins. One of the criteria used to evaluate the development start date is when the Group determines that the property can be economically developed.

## (c) Production start date (Note 11) -

The Group assesses the stage of each mine under development to determine when a mine moves into the production phase, this begins when the mine is substantially complete and ready for its intended use. The criteria used to assess the start date are determined based on the unique nature of each mining project, such as the complexity of the project and its location. The Group considers various relevant criteria to assess when the production phase is considered to have commenced. Some of the criteria used to identify the production start date include, but are not limited to:

- Level of capital expenditure incurred compared to the original construction cost estimates.
- Completion of a reasonable period of testing of the mine plant and equipment.
- Ability to produce minerals in saleable form (within specifications).
- Ability to sustain ongoing production of minerals.

When a mine development project moves into the production phase, the capitalization of certain mine development costs ceases and costs are either regarded as forming part of the cost of inventory or expensed, except for costs that qualify for capitalization relating to mining asset additions or improvements. It is also at this point that depreciation or amortization commences.

## (d) Useful life of property, plant and equipment (Note 11) -

Depreciation is calculated under the straight-line method of accounting considering the lower of estimated useful lives of the assets or estimated reserves of the mining unit. See note 2.4(h) for useful lives.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

## (e) Revenue recognition (Note 20) -

The Group applies judgement for determining the timing of satisfaction of services of revenue from contracts with customers. The Group has concluded that revenue related to services such as energy generation and transmission, industrial services, and other services is to be recognized over time because the customer simultaneously receives and consumes the benefits provided by the Group.

The Group has determined that the output method is the best method in measuring progress of the services mentioned above due to the Group has the right to invoice an amount that corresponds directly to the performance completed to date.

## 3.2. Estimates and assumptions -

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, however, may vary due to market changes or circumstances arising beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

## (a) Determination of mineral reserves and resources -

Recoverable proven and probable reserves are the part of a mineral deposit that can be economically and legally extracted or produced at the time of the reserve and resources determination. The determination of reserves involves numerous uncertainties with respect to the ultimate geology of the ore bodies, including quantities, grades and recovery rates. Estimating the quantity and grade of reserves and resources requires the Group to determine the size, shape and depth of its ore bodies by analyzing geological data, such as sampling of drill holes, tunnels and other underground workings. In addition to the geology of the Group's mines, assumptions are required to determine the economic feasibility of mining these reserves, including estimates of future commodity prices and demand, the mining methods the Group uses, and the related cost incurred to develop and mine its reserves and resources. The process to estimate proven and probable ore reserves and resources is audited by an independent consultant each year.

All estimated reserves and resources represent estimated quantities of mineral proven and probable that under current conditions can be economically and legally processed. Changes could occur on reserve and resource estimates due to, among others, revisions to the data or geological assumptions, changes in prices, production costs and results of exploration activities. Changes in estimated reserves and resources primarily affect the depreciation of development costs, property, plant and equipment related directly to mining activity, the provision for mine closure, the assessment of the deferred asset's recoverability and the amortization period for development costs.

## (b) Units of production depreciation -

Reserves and resources (measured and indicated) are used in determining the depreciation and amortization of mine-specific assets, dissimilar to the subsidiary El Brocal who considers only reserves.

This results in a depreciation or amortization charge proportional to the depletion of the anticipated remaining life of mine production. Each mine's life is assessed annually to evaluate: (i) physical life limitations inherent to the asset, and (ii) new assessments of mineral reserves economically recoverable. These calculations require the use of estimates and assumptions, including the amount of mineral reserves economically recoverable. Changes in these estimates are recorded prospectively.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

## (c) Provision for closure of mining units (Note 15 (b)) -

The Group assesses its provision for closure of mining units at each reporting date using a discounted future cash flow model. In determining the amount of the provision, it is necessary to make significant assumptions and estimates, because many factors exist that can affect the final amount of this provision. These factors include estimates of the extent and costs of closure activities, technological changes, regulatory changes, cost increases as compared to the inflation rates, and changes in discount rates and periods such costs are expected to be incurred. These uncertainties may result in future actual expenditure differing from the amounts currently provided. The provision at the reporting date represents management's best estimate of the present value of the future closure costs required.

## (d) Inventories (Note 8) -

Inventories are classified as current or non-current depending on the length of time that management estimates will be needed to reach the production state of concentrate extraction for each mining unit.

The finished products and in process are valued at cost or net realizable value, the lower. The costs accrued to place the inventories to their current location and condition are accounted as follows.

## Materials and supplies -

Purchase cost using the weighted average method.

## Finished products, products in process -

The cost of supplies and direct materials, services from third parties, direct labor and a percentage of the indirect expenses, excluding the financing costs and exchange differences.

Net realizable value tests are performed at each reporting date and represent the estimated future sales price of the product the entity expects to realize when the product is processed and sold, less estimated costs to complete production and bring the product to sale. Additionally, management considers the time value of money in calculating the net realizable value of its non-current inventories.

Classified minerals, which are materials with metal content that were removed from the pit of the Colquijirca mining unit for treatment at the expansion operation plant, contain lower grade ore than the average of treated minerals and are available to continue in the process of recovery of mineral and concentrates. Because it is generally impracticable to determine the mineral contained in the classified mineral located in the deposit field near Tajo Norte of Colquijirca mining unit by physical count, reasonable estimation methods are employed. The quantity of minerals delivered to classified mineral is based on surveyed volumes of mined material and daily production records. Sampling and assaying of blasthole cuttings determine the estimated copper, lead and zinc grades of material delivered to classified minerals.

For minerals outside leach platform inventories, finished and in-progress goods are measured by estimating the number of tons added and removed. The number of contained gold ounces is based on assay data, and the estimated recovery percentage is based on the expected processing method. Tonnages and ounces of mineral are verified by periodic surveys.

For minerals inside leach platform inventories, reasonable estimation methods are employed because it is generally impracticable to determine the mineral contained in leach platforms by physical count. The quantity of material delivered to leach platforms are based on surveyed volumes of mined material and daily production records. Sampling and assaying of blasthole cuttings determine the estimated ore grades of material delivered to leach platforms.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

## (e) Impairment of non-financial assets (Note 11) -

The Group assesses each asset or cash generating unit in each reporting period to determine whether any indication of impairment exists. Where an indicator of impairment exists, a formal estimate of the recoverable amount is made, which is considered the higher of (i) the fair value less costs of disposal and (ii) value in use. The assessments require the use of estimates and assumptions such as long-term commodity prices, discount rates, operating costs, among others. These estimates and assumptions are subject to risk and uncertainty.

The fair value of mining assets is generally calculated by the present value of future cash flows arising from the continued use of the asset, which include some estimates, such as the cost of future expansion plans, using assumptions that a third party might consider. The future cash flows are discounted to their present value using a discount rate that reflects current market assessment of the value of money over time, as well as specific risks of the asset or cash-generating unit under evaluation. The Group has determined the operations of each mining unit as an independent cash generating unit.

## (f) Deferred income tax asset and recoverability (Note 30) -

Deferred tax assets are recognized for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

## (g) Fair value of contingent consideration (Note 29 (c)) -

The contingent consideration arising from a business combination is measured at fair value at the date of acquisition, as part of the business combination. If the contingent consideration is eligible to be recognized as a financial liability, the fair value is subsequently re-measured at each date of the consolidated financial statements. Determining the fair value of the contingent consideration is based on a model of discounted future cash flows. The key assumptions take into account the likelihood of achieving each goal of financial performance as well as the discount rate.

**4. Standards and interpretations issued but not effective**

Certain new accounting standards and interpretations have been issued that are not yet effective as of December 31, 2023, and have not been early adopted by the Group. These standards are not expected to have a material impact on the Group in the current or future reporting periods and on foreseeable future transactions.

*Amendments to IFRS 16: Lease Liability in a Sale and Leaseback -*

In September 2022, the IASB issued amendments to IFRS 16 to specify the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction, to ensure the seller-lessee does not recognize any amount of the gain or loss that relates to the right of use it retains.

The amendments are effective for annual reporting periods beginning on or after 1 January 2024 and must be applied retrospectively to sale and leaseback transactions entered into after the date of initial application of IFRS 16. Earlier application is permitted, and that fact must be disclosed. The amendments are not expected to have a material impact on the Group's financial statements.

*Amendments to IAS 1: Classification of Liabilities as Current or Non-current -*

In January 2020 and October 2022, the IASB issued amendments to paragraphs 69 to 76 of IAS 1 to specify the requirements for classifying liabilities as current or non-current. The amendments clarify:

- What is meant by a right to defer settlement.
- That a right to defer must exist at the end of the reporting period.
- That classification is unaffected by the likelihood that an entity will exercise its deferral right.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification.

In addition, a requirement has been introduced to require disclosure when a liability arising from a loan agreement is classified as non-current and the entity's right to defer settlement is contingent on compliance with future covenants within twelve months. The amendments are effective for annual reporting periods beginning on or after 1 January 2024 and must be applied retrospectively. The amendments are not expected to have a material impact on the Group's financial statements.

*Supplier Finance Arrangements - Amendments to IAS 7 and IFRS 7 -*

In May 2023, the IASB issued amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures to clarify the characteristics of supplier finance arrangements and require additional disclosure of such arrangements. The disclosure requirements in the amendments are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk. The amendments will be effective for annual reporting periods beginning on or after 1 January 2024. Early adoption is permitted but will need to be disclosed. The amendments are not expected to have a material impact on the Group's financial statements.

*IFRS 18 "Presentation and disclosure of Financial Statements" -*

In April 2024, the IASB issued IFRS 18 *Presentation and disclosure in the Financial Statements* which replaces IAS 1 Presentation of Financial Statements. The new standard is a result of the IASB's Primary Financial Statements project, which is aimed at improving comparability and transparency of communication in financial statements.

While a number of sections have been brought forward from IAS 1, with limited wording changes, IFRS 18 Introduces new requirements on the presentation within the statement of profit or loss, including the specified totals and subtotals. It also requires disclosure of management defined performance measures and includes new requirements for aggregation and disaggregation of financial information based on the identified "roles" of the primary financial statements (PFS) and the notes. These new requirements are expected to impact all reporting entities.

Narrow scope amendments have been made to IAS 7 Statements of Cash flows and some requirements previously included within IAS 1 have been removed to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors, which has also been renamed as IAS 8 Basis of Preparation of Financial Statement. IAS 34 Interim Financial Reporting was amended to require disclosure of management defined performance measures. Minor consequential amendments to other standards were also made.

IFRS 18, and the amendments to the other standards, is effective for reporting periods beginning on or after January 2027, but earlier application is permitted and must be disclosed, IFRS 18 will apply retrospectively. An entity that prepares condensed interim financial statements in accordance with IAS 34 in the first of adoption of IFRS 18, must present the headings and mandatory subtotals it expects to use in its financial statements. Comparative periods in both interim and annual financial statements will need to be restated and a reconciliation of the statement of profit or loss previously published will be required for the immediately preceding comparative period.

The group is currently assessing the new requirements of IFRS 18, with focus on the specific developments in its industry, to identify and collect relevant information to measure the impacts and resources needed, including internal changes, derived from implementing IFRS 18.

*The Enhancement and Standardization of Climate-Related Disclosures for Investors -*

On March 06, 2024, the Securities and Exchange Commission (SEC) issued the final rule on The Enhancement and Standardization of Climate-Related Disclosures for Investors. This rule mandates the disclosure of information regarding a registrant's climate-related risks that have materially impacted, or are reasonably likely to have a material impact on, its business strategy, results of operations, or financial condition.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

In April, 2024, the SEC voluntarily stayed its climate-related disclosure rules pending judicial review by the US Court of Appeals for the Eighth Circuit of the consolidated challenges to the rules. The SEC said in its order the stay will facilitate the judicial resolution of the challenges and that it will continue to vigorously defend the rules' validity in court.

**5. Transactions in soles**

Transactions in soles are completed using exchange rates published by the Superintendent of Banks, Insurance and A.F.P. As of December 31, 2023, the exchange rates for U.S. dollars published by this Institution were US\$0.2699 for buying and US\$0.2693 for selling (US\$0.2626 for buying and US\$0.2618 for selling as of December 31, 2022) and have been applied by the Group for the assets and liabilities accounts, respectively.

As of December 31, 2023, and 2022, the Group presents the following assets and liabilities originally denominated in soles by its equivalent in U. S. dollars:

	2023 US\$(000)	2022 US\$(000)
<b>Assets</b>		
Cash and cash equivalents	12,124	8,822
Trade and other receivables	749,980	731,367
Income tax credit	16,985	28,046
	<u>779,089</u>	<u>768,235</u>
<b>Liabilities</b>		
Trade and other payables	(94,487)	(84,552)
Provisions	(16,085)	(25,336)
Income tax payable	(6,186)	(2,365)
	<u>(116,758)</u>	<u>(112,253)</u>
<b>Net asset position</b>	<u>662,331</u>	<u>655,982</u>

For the year-ended December 31, 2023, the Group recognized a gain for exchange rate of approximately US\$19,375,000 (gain in exchange rate of US\$26,871,000 for the year ended December 31, 2022, and an exchange rate loss for US\$18,686,000 for the year ended December 31, 2021) in the caption "Foreign currency exchange difference" in the consolidated statements of profit or loss.

See related accounting policies in Note 2.4(a).

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

**6. Cash and cash equivalents**

(a) This caption is made up as follows:

	2023 US\$(000)	2022 US\$(000)
Cash on hand	122	134
Balances with banks (b)	63,979	43,633
Short-term deposits (c)	155,689	210,151
	<u>219,790</u>	<u>253,918</u>

See related accounting policies in Note 2.4(c).

(b) Bank accounts earn interest at floating rates based on market rates.

(c) As of December 31, 2023 and 2022, time deposits were kept in prime financial institutions, which generated interest at annual market rates and have current maturities, lower than 90 days, according to the immediate cash needs of the Group.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

- (c.1) During the year 2023, Buenaventura recognized a liability related to the tax claims of the previous years for a total of US\$113,178,000:

Years	Disbursements US\$(000)	Tax claim liability, note 31(d) US\$(000)	Tax claims as 31.12.2023 US\$(000)
2007	183,516	—	183,516
2008	262,408	—	262,408
2009	86,170	(35,223)	50,947
2010	100,322	(77,955)	22,367
2014	1,516	—	1,516
2017	2,490	—	2,490
2018	3,306	—	3,306
Buenaventura's forced payments claimed	639,728	(113,178)	526,550
Other Buenaventura's claims	2,596	—	2,596
Other Buenaventura's subsidiaries forced payments claimed	17,239	—	17,239
Total	659,563	(113,178)	546,385

- (d) Corresponds to deposits held in the Peruvian State bank and that in accordance with the tax law of Peru which only can be used to offset tax obligations that the Group has with the Tax Authorities.

- (e) As of December 31, 2023 and 2022, the balance also includes the account receivable related to the sale of mining concessions from the subsidiary Chaupiloma to Yanacocha for US\$1.9 million (note 1(e)).

Likewise, during 2023 and 2022, the Group recorded a loss of US\$2 million presented in "Others, net" caption, see note 28, related to the sale of Mally mining unit (original amount of US\$7.3 million), which were transferred to a third-party and collected during May 2022 in exchange for US\$6 million.

- (f) Corresponds mainly to current year refunds applications that are pending as of December 31 of each period.

- (g) Corresponds mainly to collections that are deposited into restricted bank accounts that only can be used for the payment of financial obligations held by the subsidiary Empresa de Generación Huanza S.A. (hereafter "Huanza"), according to the finance lease signed with Banco de Crédito del Perú in 2009. Below is presented the movement:

	2023 US\$(000)	2022 US\$(000)	2021 US\$(000)
<b>Beginning balance</b>	1,092	359	376
Increase	—	733	—
Decrease	(34)	—	(17)
<b>Final balance</b>	1,058	1,092	359

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

(h) Below is presented the movement in the allowance for expected credit losses:

	2023 US\$(000)	2022 US\$(000)	2021 US\$(000)
<b>Beginning balance</b>	26,382	30,897	31,845
Provision for other receivables, note 28(a)	—	253	409
Provision of the year	—	253	409
Foreign exchange difference	35	(59)	(197)
Write off	—	(4,709)	(1,160)
<b>Final balance</b>	<u>26,417</u>	<u>26,382</u>	<u>30,897</u>
Trade receivables	22,276	22,276	22,276
Other receivables	<u>4,141</u>	<u>4,106</u>	<u>8,621</u>
	<u>26,417</u>	<u>26,382</u>	<u>30,897</u>

The allowance for expected credit losses of other receivables is related to accounts receivable from third parties. There is no allowance for expected credit losses of related parties' accounts as they are expected to be fully recoverable.

In the opinion of the Group's management, the balance of the allowance for expected credit losses is sufficient to cover adequately the risks of non-payment as of the consolidated statement of financial position.

(i) As December 31, 2023, the Group holds accounts receivable with Howden Hodco Perú S.A., due to the sale of its Subsidiary Contacto Corredores de Seguros S.A., for US\$14.5 million recognized in the consolidated financial statements at a present value of US\$12.5 million, which will be paid as follows:

- US\$7.6 million within the five calendar days following the third commemoration date of the transaction closing.
- US\$4.9 million during the first semester of 2024.

The financial updating of the long-term account receivables generated the recognition of a financial expense of US\$1.956 million, see note 29(a). These account receivables were determined based on the contractual conditions agreed by both parties.

**8. Inventories**

(a) This caption is made up as follows:

	2023 US\$(000)	2022 US\$(000)
Finished goods, net	1,154	1,047
Products in process, net	18,506	20,124
Spare parts and supplies, net	56,867	67,174
	<u>76,527</u>	<u>88,345</u>

See related accounting policies in Note 2.4(d).

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

(b) The provision for impairment of inventory had the following movements:

	2023 US\$(000)	2022 US\$(000)	2021 US\$(000)
<b>Beginning balance</b>	29,842	30,774	31,117
<b>Continuing operations:</b>			
<i>Finished and in progress goods, note 21(a) -</i>			
Provision	10,536	7,243	6,877
Reversal	(6,685)	(8,314)	(12,348)
	<u>3,851</u>	<u>(1,071)</u>	<u>(5,471)</u>
<i>Spare parts and supplies, note 28(a) -</i>			
Provision	20,478	22,533	22,394
Reversal	(19,409)	(22,394)	(17,266)
	<u>1,069</u>	<u>139</u>	<u>5,128</u>
<b>Final balance</b>	<u><u>34,762</u></u>	<u><u>29,842</u></u>	<u><u>30,774</u></u>

In the opinion of Group's management, the provision for impairment of inventory adequately covers the risk of obsolescence and the net realizable test as of the date of the consolidated statements of financial position.

**9. Prepaid expenses**

(a) This caption is made up as follows:

	2023 US\$(000)	2022 US\$(000)
Right to use facilities paid in advance (b)	23,034	23,920
Prepaid insurance	22,325	15,065
Deferred costs of works for taxes	1,477	1,929
Other prepaid expenses	1,288	1,452
	<u>48,124</u>	<u>42,366</u>
<b>Classification by maturity:</b>		
Current portion	25,976	19,333
Non-current portion	22,148	23,033
	<u>48,124</u>	<u>42,366</u>

See related accounting policies in Note 2.4(g).

(b) Corresponds mainly to payments made in advance to EDEGEL for an original amount of US\$31,007,190 corresponding to the right to use the capacity of the hydraulic system of EDEGEL by the subsidiary Empresa de Generación Huanza S.A. This prepayment is being charged to results during the life of the underlying assets (35 years) since January 2015.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

**10. Investments in associates and joint venture**

(a) This caption is made up as follows:

	<u>Share in equity</u>		2023 US\$(000)	2022 US\$(000)

## Notes to the consolidated financial statements (continued)

**Investment in Sociedad Minera Cerro Verde S.A.A. (Cerro Verde) -**

Cerro Verde is engaged in the extraction, production and marketing of cathodes and copper concentrate from its mining unit that is in Uchumayo, Arequipa, Peru.

*Key financial data -*

The table below presents the key financial data from the financial statements of Cerro Verde under IFRS:

	2023 US\$(000)	2022 US\$(000)	
<b>Statements of financial position as of December 31:</b>			
Current assets	1,789,427	1,946,762	
Non-current assets	6,141,483	6,047,101	
Current liabilities	(460,991)	(564,058)	
Non-current liabilities	<u>(789,545)</u>	<u>(778,378)</u>	
<b>Equity</b>	<u>6,680,374</u>	<u>6,651,427</u>	
Group's interest	1,308,288	1,300,497	
Goodwill	<u>107,763</u>	<u>107,763</u>	
	<u>1,416,051</u>	<u>1,408,260</u>	
	2023 US\$(000)	2022 US\$(000)	2021 US\$(000)
<b>Statements of profit or loss for the years ended December 31:</b>			
Sales of goods	<u>4,143,228</u>	<u>3,975,295</u>	<u>4,199,448</u>
Net profit from continued operations	<u>778,964</u>	<u>925,353</u>	<u>1,191,474</u>
Group's share in results	<u>152,552</u>	<u>181,221</u>	<u>233,342</u>

On March 2, 2024, through Annual Shareholders General Meeting, the shareholders of Cerro Verde agreed to distribute dividends for an amount of US\$29.3 million which were paid on April 26, 2024.

The Group's management determined that there was no objective evidence that its investment in Cerro Verde is impaired as of December 31, 2023 and 2022.

The entity has significant influence although it holds less than 20 percent of the voting rights in Cerro Verde.

**Investment in Compañía Minera Coimolache S.A. (Coimolache) -**

Coimolache is involved in the production and the sales of gold and silver from its open-pit mining unit located in Cajamarca, Peru.

	US\$(000)	US\$(000)	
	<b>2021</b>	<b>2021</b>	
	US\$(000)	US\$(000)	
<b>Statements of profit or loss for the years ended December 31:</b>			
Sales of goods	<u>136,949</u>	<u>159,003</u>	<u>215,481</u>
Net profit (loss)	<u>2,673</u>	<u>(6,218)</u>	<u>20,377</u>
Group's share in results	<u>1,072</u>	<u>(2,493)</u>	<u>8,170</u>

The Group's management determined that there was no objective evidence that its investment in Coimolache is impaired as of December 31, 2023 and 2022.

**Investment in Tinka Resources Ltd. (Tinka) -**

Tinka is a Canadian junior exploration and development mining company with its flagship property being the project of Ayawilca. Ayawilca is carbonate replacement deposit (CRD) in the zinc-lead-silver belt of central Peru, in Cerro de Pasco, 200 kilometers northeast of Lima. Tinka is listed on the Lima (BVL) and Canada Stocks Exchanges (TSX Venture Exchange).

## Notes to the consolidated financial statements (continued)

*Key financial data -*

The table below presents the key financial data from the financial statements of Tinka under IFRS in 2023 and 2022 (financial statements as of September 30, 2023 and 2022) and in 2021 (financial statements as of November 30, 2021):

	2023 US\$(000)	2022 US\$(000)	
<b>Statements of financial position:</b>			
Current assets	5,591	13,007	
Non-current assets	42,475	42,735	
Current liabilities	<u>(350)</u>	<u>(473)</u>	
<b>Equity</b>	<b><u>47,716</u></b>	<b><u>55,269</u></b>	
Group's interest	<u>9,221</u>	<u>10,678</u>	
	2023 US\$(000)	2022 US\$(000)	2021 US\$(000)
<b>Statements of profit or loss for the years:</b>			
Net loss	<u>(6,832)</u>	<u>(12,666)</u>	<u>(5,692)</u>
Group's share in results	<u>(1,320)</u>	<u>(2,447)</u>	<u>(1,098)</u>

For the years 2023, 2022 and 2021, the Group has used the latest financial statements available from its associate Tinka, the difference between the period reported by the associate and the date of issuance of these financial statements being less than 3 months. There have been no significant transactions or events between the reporting date of the associate's financial statements and the consolidated financial statements as of December 31, 2023, and 2022. The Group's management determined that there was no objective evidence that its investment in Tinka is impaired as of December 31, 2023 and 2022.

The entity has significant influence although it holds less than 20 percent of the voting rights in Tinka.

- (c) The Group, through its subsidiary El Brocal, has an interest of 8% in Transportadora Callao S.A., a joint venture whose objective was the construction of a fixed conveyor belt of minerals and deposits in the Port of Callao. In May 2014, Transportadora Callao started operations and currently its main activity is the operation of that terminal.

(b) Impairment of long-lived assets

In accordance with its accounting policies and processes, each asset or CGU is evaluated at each reporting date and annually at year-end, to determine whether there are any indications of impairment. If any such indications of impairment exist, a formal estimate of the recoverable amount is performed.

In assessing whether impairment is required, the carrying value of the asset or CGU is compared with its recoverable amount. The recoverable amount is the higher of (i) the CGU's fair value less costs of disposal (FVLCD) and (ii) its value in use (VIU).

Consequently, the recoverable amount for each CGU is estimated based on discounted future estimated cash flows expected to be generated from the continued use of the CGUs using market-based commodity price and exchange assumptions, estimated quantities of recoverable minerals, production levels, operating costs and capital requirements, and its eventual disposal, based on the latest life of mine (LOM) plans. Capital and operating expenditure associated with the Group's climate change initiatives are, to the extent necessary, considered when determining the recoverable amount of each CGU. The Group Buenaventura practices responsible mining that promotes economic growth and sustainable development, creating value in the regions where it operates. The Group's environmental management has as an objective to innovate in water management and mine closure, looking forward to supporting the sustainability of operations. The use of clean technologies to reduce freshwater consumption and waste generation, together with the application of adequate environmental protection standards and procedures in the management of operations are essential for Buenaventura. The challenges that come from higher environmental and social expectations of the environment are being addressed appropriately, encouraging research to improve the prevention and control of the environmental impacts of the Groups' activities.

[Table of Contents](#)**Notes to the consolidated financial statements** (continued)

These cash flows were discounted using a real pre-tax discount rate that reflected current market assessments of the time value of money and the risks specific to the CGU.

The estimates of quantities of recoverable minerals, production levels, operating costs and capital requirements are obtained from the planning process, including the LOM plans, one-year budgets and CGU-specific studies.

During 2023, the Group identified impairment indicators in Uchucchacua, Julcani, Tambomayo, El Brocal, La Zanja and Río Seco mining units. The Group evaluated and concluded that there is no impairment as a result of the analysis based on the value in use.

During 2022, the Group identified impairment indicators in Orcopampa, Uchucchacua, La Zanja and Río Seco. The Group evaluated and concluded that there is no impairment as a result of the analysis of the recoverable amount based on their value in use of Orcopampa, Uchucchacua and La Zanja mining units. On the other hand, the Group recognized a recovery of impairment of long-lived assets for US\$19.9 million in the CGU Río Seco.

During 2021, the Group identified impairment indicators in Orcopampa, Uchucchacua, La Zanja and Río Seco. The Group evaluated and concluded that there is no impairment as a result of the analysis of the recoverable amount of said units based on their value in use for Orcopampa, Uchucchacua, and La Zanja. As a result of the analysis of the recoverable amount as of December 31, 2021 in Río Seco, the Group recognized an impairment of assets for US\$19.9 million. In addition, the La Zanja unit mining recognized a reversal of impairment of US\$5.0 million, (net effect of US\$14.9 million).

*Key assumptions*

The determination of value in use is most sensitive to the following key assumptions:

- Production volumes
- Commodity prices
- Discount rate
- Residual value

**Production volumes:** Estimated production volumes are based on detailed life-of-mine plans and consider development plans for the mines agreed by management as part of planning process. Production volumes are dependent on several variables, such as: the recoverable quantities; the production profile; the cost of the development of the infrastructure necessary to extract the reserves; the production costs; the contractual duration of mining rights; and the selling price of the commodities extracted.

As each producing mining unit has specific reserve characteristics and economic circumstances, the cash flows of the mines are computed using appropriate individual economic models and key assumptions established by management. The production profiles used were consistent with the reserves and resource volumes approved as part of the Group's process for the estimation of proven and probable reserves and resource estimates.

**Commodity prices:** Forecast commodity prices are based on management's estimates and are derived from forward price curves and long-term views of global supply and demand, building on experience of the industry and consistent with external sources. These prices were adjusted to arrive at appropriate consistent price assumptions for the different qualities and type of commodities, or, where appropriate, contracted prices were applied. These prices are reviewed at least annually.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

Estimated prices for the current and long-term periods that have been used to estimate future cash flows are as follows:

As of December 31, 2023 -

	2024 US\$	2025-2027 US\$
Gold	1,900 /Oz	2,036 /Oz
Silver	23.00 /Oz	27.00 /Oz
Copper	8,500 /MT	10,822 /MT
Zinc	2,600 /MT	3,071 /MT
Lead	2,050/MT	2,449 /MT

As of December 31, 2022 -

	2023 US\$	2024-2026 US\$
Gold	1,750 /Oz	1,735 /Oz
Silver	21.00 /Oz	23.17 /Oz
Copper	7,900 /MT	9,625 /MT
Zinc	3,000 /MT	2,648 /MT
Lead	1,900 /MT	2,181 /MT

(\*) OZ= Ounces, MT = Metric Ton.

Discount rate:

In calculating the value in use, as of December 31, 2023 and 2022 the following discount rates were applied to the cash flows:

	2023 %	2022 %
Uchucchacua	12.04	12.52
Tambomayo	12.04	N/A
Julcani	12.04	N/A
Orcopampa	N/A	12.52
El Brocal	14.78	N/A
Rio Seco	15.06	16.34
La Zanja	14.18	14.08

These discount rates are derived from the Group's pre-tax weighted average cost of capital (WACC), with appropriate adjustments made to reflect the risks specific to the CGU. The WACC considers both debt and equity. The cost of equity is derived from the expected return on investment by the Group's investors. The cost of debt is based on its interest-bearing borrowings the Group is obliged to service. The Beta factors are evaluated annually based on publicly available market data.

Residual value: As part of its financial projections to determine the recoverable amount, the Group has estimated and included the value of long-lived assets that could be sold independently at the end of the life of the mine. The estimation of the residual value is carried out by an independent appraiser each year.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

- (c) The book value of assets held under finance leases amounted to US\$231.6 million as of December 31, 2023 (US\$250.5 million as of December 31, 2022) and is presented in various items of the "Property, plant, equipment and development cost" caption. During 2023 and 2022, no acquisitions of assets under lease agreements were made.
- (d) During 2023, 2022 and 2021, no borrowing costs were capitalized.
- (e) Right-of-use assets

The net assets for right-of-use assets maintained by the Group correspond to the following:

	2023 US\$(000)	2022 US\$(000)
Buildings	9,236	10,484
Transportation units	1,117	1,380
Machinery and equipment	1,403	896
	<u>11,756</u>	<u>12,760</u>

During 2023, the additions to the right-of-use assets were US\$1.9 million and no disposals were made (additions of US\$11.7 million and no disposals were made during 2022).

- (f) Below is the distribution of depreciation expenses of the year:

	2023 US\$(000)	2022 US\$(000)	2021 US\$(000)
Cost of sales of goods	164,543	147,032	159,652
Unabsorbed cost due to production stoppage	10,420	14,877	4,569
Cost of sales of services	9,037	8,153	8,109
Administrative expenses	2,065	1,886	4,741
Property, plant, equipment and development costs	1,799	1,039	963
Exploration in non-operating areas	98	101	114
Selling expenses	103	93	84
Other, net	54	49	48
Discontinued operations, note 1(e)	—	9	14
	<u>188,119</u>	<u>173,239</u>	<u>178,294</u>

Discontinued mining units, note 1(e)	6,991	660
Exploration projects, note 28(a)	<u>(7,794)</u>	<u>13,631</u>
	11,076	(7,880)
Accretion expense:		
Continuing mining units, note 29(a)	11,249	4,932
Exploration projects, note 29(a)	589	138
Discontinued mining units, note 1(e)	<u>229</u>	<u>59</u>
	12,067	5,129
Disbursements	<u>(18,024)</u>	<u>(14,989)</u>
<b>Ending balance</b>	<u>259,366</u>	<u>254,247</u>
<b>Classification by maturity:</b>		
Current portion	80,548	60,644
Non-current portion	<u>178,818</u>	<u>193,603</u>
	<u>259,366</u>	<u>254,247</u>

The provision for closure of mining units and exploration projects represents the present value of the closure costs that are expected to be incurred between the years 2024 and 2042. The Group recognizes the provision for closure of mining units and exploration projects based on estimates of studies and activities that meet the environmental regulations in effect and that will be approved by the Ministry of Energy and Mines. The Group recognizes the provision of continued operations based on its analysis and estimates prepared by independent advisors and reviewed by the Group's management. Provisions related to discontinued operations are based on estimates prepared by internal advisors.

The provision for closure of mining units and exploration projects corresponds mostly to activities that must be carried out for restoring the mining units and areas affected by operation and production activities. The principal work to be performed correspond to earthworks, re-vegetation efforts and dismantling of the plants. Closure budgets are reviewed regularly to take into account any significant change in the studies conducted. Nevertheless, the closure costs of mining units will depend on the market prices for the closure works required, which would reflect future economic conditions. Also, the time when the disbursements will be made depends on the useful life of the mine, which will be based on future metals prices.

As of December 31, 2023, the future value of the provision for closure of mining units and exploration projects was US\$336 million, which has been discounted using annual risk-free rates from minimum of 4.908 percent to a maximum of 6.905 percent, in a period of 1 to 15 years, obtaining as a result an updated liability amounting to US\$259.3 million (as of December 31, 2022, the provision was US\$254.2 million). The Group believes that this liability is sufficient to meet the current environmental protection laws approved by the Ministry of Energy and Mines.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

As of December 31, 2023, the Group has constituted letters of credit in favor of the Ministry of Energy and Mines for US\$101.2 million (US\$171.8 million as of December 31, 2022) to secure current mine closure plans of its mining units, exploration projects and environmental liabilities to date.

(b) In order to comply with its tax obligations, the Buenaventura's Shareholders' Meeting held on May 21, 2021 and its board of directors meeting held on July 12, 2021 approved the issuance of senior unsecured notes (hereinafter "the notes") which were issued on July 23, 2021 with the following terms:

- Denomination of Issue: US\$550,000,000 5.500% Senior Notes due 2026.
- Principal Amount: US\$550,000,000.
- Issue Date: July 23, 2021.
- Maturity Date: July 23, 2026.
- Issue Price: 99.140% of the principal amount.
- Interest Rate: 5.500% per annum.
- Offering Format: private placement under Rule 144A and Regulation S of the U.S. Securities Act of 1933.
- Expected Listing: Buenaventura will apply to list the bonds on the Singapore Exchange Securities Trading Limited ('SGX-ST').

The notes were offered in a private placement to qualified institutional buyers in accordance with Rule 144A under the Securities Act of 1933, as amended (hereinafter the "Securities Act"), and outside the United States to non-U.S. persons in accordance with Regulation S under the Securities Act. The Notes are fully and unconditionally guaranteed jointly and severally by Compañía Minera Condesa S.A., Inversiones Colquijirca S.A., Procesadora Industrial Río Seco S.A. and Consorcio Energético Huancavelica S.A.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

As part of the commitments of the notes, Buenaventura must be in compliance with certain obligations if it wants to enter into any of the following transactions i) incurrence in additional debt, ii) asset sales, iii) making certain investments, paying dividends, purchase Buenaventura's equity interests or making any principal payment prior to any scheduled final maturity or schedule repayment of any indebtedness that is subordinated to the notes (known as "restricted payments"), iv) creation of liens and v) merger, consolidation or sale of assets. These covenants are known as "Limitations on incurrence of indebtedness", "Limitation on Asset Sales", "Limitation on Restricted Payments", "Limitation on Liens" and "Limitation on Merger, Consolidation or Sale of Assets", respectively. These covenants also have exceptions that let the Company operate in the ordinary course of business.

- (c) On June 27, 2016, Buenaventura entered into a long-term finance contract with seven Peruvian and foreign banks for a principal amount of US\$275,000,000. In 2018, April 2020, April 2021, May 2021 Buenaventura signed the first, second, third and fourth amendments to the Syndicated Term Loan to modify some terms and conditions including the issue of Notes in accordance with Rule 144A and Regulation S under the Securities Act of 1933.

On January 3, 2022, the Company made a US\$100 million prepayment of the syndicated loan and the remaining balance of US\$175 million was paid on March 2, 2022. Additionally, the related hedging derivative financial instruments was liquidated. See Note 34(c).

- (d) On October 29, 2019, El Brocal entered into a new financial obligation of US\$161,893,850 with Banco de Crédito del Perú in order to cancel the two previous obligations: (i) Finance leaseback; and (ii) Mid-term financial obligation. The new financial obligation has the following terms and conditions:

- Principal (Part A): US\$113,325,695.
- Principal (Part B): US\$48,568,155.
- Annual interest rate (Part A): 3.76%.
- Annual interest rate (Part B): Three-month LIBOR plus 2.39%
- Term (Part A): 5 years since October 2019 until October 2024.
- Term (Part B): 7 years since October 2019 until October 2026.

On May 22, 2023, El Brocal subscribed the first addendum to the financing contract which main changes were as follows:

- Annual interest rate (Part B): Three-month SOFR plus 2.65%.
- Modifications of terms to replace the references and basis from LIBOR to SOFR.
- Incorporation of additional complementary clauses to the rate modification.

In this regard, the addendum did not include other significant modifications that have impact in repayment dates, guarantees and other obligations compared with the base agreement. El Brocal assessed the financial impacts of the transition to SOFR rate which resulted in no significant changes in financial expenses and the respective payments cashflows since the addendum came into effect.

According to the financing contract mentioned above, El Brocal is required to maintain the following financial ratios as defined in the agreement:

- (i) Debt service coverage ratio: Higher than 1.3.
- (ii) Leverage Ratio: Less than 1.0 times.
- (iii) Indebtedness ratio: Less than 2.25 times.

The financial obligation is collateralized by a security agreement in respect of assets; certain contractual rights, flows and account balances, a real estate mortgage; and a mortgage on certain mining concessions.

[Table of Contents](#)**Notes to the consolidated financial statements (continued)**

The compliance with the financial ratios is monitored by El Brocal's Management. as of December 31, 2023 and 2022, El Brocal complies with the coverage and indebtedness ratios.

- (e) On December 2, 2009, Huanza entered into a finance lease contract with Banco de Crédito del Perú. On October 29, 2020, as part of the Group its strategy of preserving cash, Huanza negotiated a reduction of the fixed rate of interest and agreed to a modification of the following terms and conditions:

- Principal: final installment of US\$44,191,000 (original amount of US\$119,000,000).
- Annual interest rate: LIBOR 30 days plus 2.10%.
- Term: 18 months since November 2, 2020, with final maturity in May 2022.
- Guarantee: Leased equipment.
- Amortization: a final installment of US\$44,191,000.

On June 30, 2014, Banco de Crédito del Perú extended the finance lease contract mentioned above, through the addition of a new tranche. On October 29, 2020, as part of the Group's strategy of preserving cash, Huanza negotiated a reduction of the fixed rate of interest and agreed a modification of the following terms and conditions:

- Principal: final installment of US\$68,905,000 (original amount of US\$103,373,000)
- Annual interest rate: LIBOR 30 days plus 2.10%
- Term: 18 months since November 2, 2020, with final maturity in May 2022.
- Guarantee: Leased equipment.
- Amortization: a final installment of US\$68,905,000.

On April 29, 2022, Banco de Crédito del Peru and Empresa de Generación Huanza signed an addendum considering a prior amortization of outstanding principal of US\$9,191,364 (Tranche I) and US\$13,904,800 (Tranche II). Below we detail the main additional terms and conditions:

**Tranche I:**

- Principal: US\$35,000,000
- Annual interest rate: 5.05 %.
- Term: 60 months since May 2, 2022 with final maturity in 2027.
- Guarantee: Leased equipment.
- Amortization: Through 20 fixed quarterly installments and a final installment of US\$22,531,250 at the end of the payment term.

**Tranche II:**

- Principal: US\$55,000,000
- Annual interest rate: 5.05 %.
- Term: 60 months since May 2, 2022 with final maturity in 2027.
- Guarantee: Leased equipment.
- Amortization: Through 20 fixed quarterly installments and a final installment of US\$35,406,250 at the end of the payment term.

In addition, Huanza granted a security interest for 100% of shares.

According to the lease contract mentioned above, Huanza is required to maintain the following financial ratios:

- Debt service coverage ratio: Higher than 1.1.
- Minimum equity of US\$30,000,000.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

Management performed an analysis to determine if the modification of the terms and conditions in October 2020 were substantially different terms and shall be accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The Group concluded that the terms are not substantially different, due to the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate were less than 10 per cent different compared to the discounted present value of the remaining cash flows of the original financial liability.

On December 2, 2009, Huanza signed a “Guarantee Trust Agreement” (hereinafter “the contract”), related to the financial lease agreement described above. In said contract, Huanza and Buenaventura are the trustors, the Bank is the trustee and La Fiduciaria S.A. is the fiduciary. The objective of the contract is the constitution of a trust equity with irrevocable character, which serves entirely as a guarantee of the total payment of the guaranteed obligations, which are based on the agreements, renewals, extensions or modifications established in the financial lease documents.

Under this contract, Huanza promised to grant the following:

- Trust of flows with respect to all the income of the hydroelectric power station of Huanza, including the income from sales of power and energy, through which Huanza is obliged to receive all the cash flows of commercial income through a collection account, as well as carry out certain mandatory actions that guarantee the channeling of flows mentioned above.
- Trust of assets of the station, the lands, the assets of Huanza necessary for the operation of the station that are not under the Financial Lease Agreement and the actions of Huanza, as well as the right of collection on future flows that would correspond to amounts received by Huanza before the eventual public auction of the rights and assets of the concession because of the expiration of the concession.
- The conditional transfer, by which Huanza assigns to the Bank the rights and obligations derived from the agreements and contracts signed by Huanza for the construction of the Plant.
- Letters of Guarantee, by means of which, Buenaventura is constituted as Huanza’s solidarity guarantor, guaranteeing in favor of the Bank the fulfillment of the obligations breached by Huanza.

As of December 31, 2023 and 2022, Huanza complied with these commitments, including that related to the channeling of all the cash flows received for commercial income through a collection account.

(f) The long-term portion of the financial obligations held by the Group matures as follows:

	2023 US\$(000)	2022 US\$(000)
Between 1 and 2 years (year 2025)	101,885	105,986

Non-current portion	8,233	9,314
	<u>10,320</u>	<u>12,953</u>

Lease payments are presented in the consolidated statements of cash flows in "Lease payments" caption as part of the financing activities. Interest's expense related to the lease liabilities for the years 2023, 2022 and 2021 is presented in the "Financial costs" caption, note 29(a).

(i) *Transportation units* -

The Group has lease contracts for mining vehicles used in its operations. Leases of mining vehicles generally have lease terms between one and three years. The Group's obligations under its leases are secured by the lessor's title to the leased assets. Generally, the Group is restricted from assigning and subleasing the leased assets. No contracts require the Group to maintain certain financial ratios nor includes variable lease payments.

The Group also has certain leases of assets with lease terms of 12 months or less and leases of office equipment with low value. The Group applies the short-term lease and lease of low-value assets recognition exemptions for these leases.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

(j) *Buildings* -

Lease liabilities related to buildings mainly correspond to a lease contract entered by Buenaventura on its administrative offices in Lima located in Las Begonias Street N°415, San Isidro, Lima, Peru, with a lease term of 10 years since the year 2013 and fixed payments. The Group has the option to lease the assets for two additional terms of 5 years each. During the year 2023, the Group extended the contract up to September 20, 2032.

The minimum future rents payable as of December 31, 2023 and 2022 are as follows:

	2023 US\$(000)	2022 US\$(000)
Less than 1 year (2024)	2,281	1,313
Between 1 and 5 years (2025-2028)	5,076	3,264
More than 5 years (since 2029)	4,238	4,238
	<u>11,595</u>	<u>8,815</u>

**17. Equity**(a) *Capital stock* -

The Group's share capital is stated in soles and consisted of authorized, fully paid and voting common shares with a nominal amount of S/ 10.00 per share. The table below presents the composition of the capital stock. As of December 31, 2023 and 2022:

	Number of shares	Capital stock S/(000)	Capital stock US\$(000)
Common shares	274,889,924	2,748,899	813,162
Treasury shares	<u>(21,174,734)</u>	<u>(211,747)</u>	<u>(62,665)</u>
	<u>253,715,190</u>	<u>2,537,152</u>	<u>750,497</u>

The market value of the common shares amounted to S/54 per share as of December 31, 2023 (S/27.9 per share as of December 31, 2022). These shares present trading frequencies of 50% and 25% in 2023 and 2022, respectively.

(b) *Investment shares* -

Investment shares have a nominal value of S/10.00 per share. Holders of investment shares are neither entitled to exercise voting rights nor to participate in shareholders' meetings; however, they confer upon the holders thereof the right to participate in the dividend's distribution. The table below presents the composition of the investment shares as of December 31, 2023 and 2022:

	Number of shares	2023 S/(000)	2022 US\$(000)
Investment shares	744,640	2,161	2,161
Treasury investment shares	<u>(472,963)</u>	<u>(1,370)</u>	<u>(1,370)</u>
	<u>271,677</u>	<u>791</u>	<u>791</u>

The market value of the investment shares amounted to S/16.00 per share as of December 31, 2023 and 2022. These shares did not have a trading frequency in 2023 and 2022.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

## (c) Legal reserve -

The Peruvian Corporations Law requires that a minimum of 10% of the distributable earnings for each period, after deducting the income tax, be transferred to a legal reserve until the latter is equal to 20% of the capital stock. This legal reserve can be used to offset losses or may be capitalized, with the obligation, in both cases, to replenish it.

Although, the balance of the legal reserve exceeded the limit mentioned above, the Group increased its legal reserve by US\$102,000 and US\$76,000 in the years 2023 and 2021 respectively as a result of the expired dividends. During 2022, there were no increases in the legal reserve as a result of the expired dividends. According to the General Corporate Law, dividends expire ten years after the payment due.

## (d) Dividends declared and paid -

During years 2021 no distribution of dividends was made. The table below presents the dividends declared and paid in 2023 and 2022:

Meetings	Date	Dividends declared and paid US\$(000)	Dividend per share US\$
<b>2023 Dividends</b>			
Mandatory Annual Shareholders' Meeting	March 31	20,067	0.073
Less - Dividends of treasury shares		<u>(1,525)</u>	
		<u><u>18,542</u></u>	
<b>2022 Dividends</b>			
Mandatory Annual Shareholders' Meeting	March 31	20,067	0.073
Less - Dividends of treasury shares		<u>(1,525)</u>	
		<u><u>18,542</u></u>	

According to the current Law, there are no restrictions for the remittance of dividends or repatriation of capital by foreign investors.

Dividends declared corresponding to non-controlling interest were US\$1,607,000, US\$2,647,000 and US\$6,160,000 for the years 2023, 2022 and 2021, respectively.

## (e) Basic and diluted profit (loss) per share -

Profit (loss) per share is calculated by dividing net profit (loss) for the period by the weighted average number of shares outstanding during the year. The calculation of profit (loss) per share attributable to the equity holders of the parent for the periods ended December 31 2023, 2022 and 2021 is presented below:

	2023	2022	2021
Profit (loss) for the year (numerator) - US\$	19,855,000	602,550,000	(264,075,000)
Total common and investment shares (denominator)	<u>253,986,867</u>	<u>253,986,867</u>	<u>253,986,867</u>
Profit (loss) per basic share and diluted - US\$	<u><u>0.08</u></u>	<u><u>2.372</u></u>	<u><u>(1.040)</u></u>

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

The calculation of profit (loss) per share from continuing operations attributable to the equity holders of the parent is presented below:

	2023	2022	2021
Profit for the year (numerator) - US\$	26,703,000	124,003,000	123,529,000
Total common and investment shares (denominator)	<u>253,986,867</u>	<u>253,986,867</u>	<u>253,986,867</u>
Profit (loss) per basic share and diluted - US\$	<u>0.11</u>	<u>0.49</u>	<u>0.49</u>

The calculation of profit (loss) per share from discontinuing operations attributable to the equity holders of the parent is presented below:

	2023	2022	2021
Profit (loss) for the year (numerator) - US\$	(6,848,000)	478,547,000	(387,604,000)
Total common and investment shares (denominator)	<u>253,986,867</u>	<u>253,986,867</u>	<u>253,986,867</u>
Profit (loss) per basic share and diluted - US\$	<u>(0.03)</u>	<u>1.88</u>	<u>(1.53)</u>

Common and investment shares outstanding at the close of the years 2023, 2022 and 2021 was 253,986,867.

In accordance with the Income Tax Law, the Company is subject to a tax of 5% of the income tax is established on dividends or any other form of distribution of profits.

**18. Subsidiaries with material non-controlling interest**

## Notes to the consolidated financial statements (continued)

**19. Tax situation**

## (a) Current tax regime -

The Company and its Peruvian subsidiaries are subject to the Peruvian tax regime. By means of Law N° 1261 enacted on December 10, 2016, the Peruvian government introduced certain amendments to the Income Tax Law, effective January 1, 2017. The most relevant are listed below:

- A corporate income tax rate of 29.5% is set.
- A tax of 5% of the income tax is established to the dividends or any other form of distribution of profits. The rate applicable to dividends will be considered considering the year in which the results or profits that form part of the distribution have been obtained. The rate will be considered according to the following: 4.1% with respect to the results obtained until December 31, 2014; 6.8% with respect to the results obtained during the years 2015 and 2016; and 5% with respect to the results obtained from January 1, 2017.
- It has been established that the distribution of dividends to be made corresponds to the oldest retained earnings.

Through Law No. 31962, published on December 19, 2023, changes have been established in the Tax Code that increased the monthly interest rate applicable to returns of improper or excess payments from 0.42% to 0.9%, in force for periods starting January 01, 2024. Moreover, the law establishes that fines will be updated by the legal interest rate set by the Central Bank of Perú (BCR by its acronym in Spanish) and will be applied from the date on which the Tax Authority requires the fine payment from the debtor.

## (b) Years open to tax review -

During the four years following the year of filing the tax return, the tax authorities have the power to review and, as applicable, correct the income tax computed by the Group. The Income Tax and Value Added Tax (VAT) returns for the following years are open to review by the Tax Authorities:

Entity	Years open to review by the Tax Authorities
Compañía de Minas Buenaventura S.A.A.	2022 and 2023
Compañía Minera Condesa S.A.	2018,2019,2021-2023
Compañía Minera Colquirrumi S.A.	2018-2023
Consortio Energético de Huancavelica S.A.	2018-2023
El Molle Verde S.A.C.	2018-2023
Empresa de Generación Huanza S.A.	2018,2019,2021-2023
Inversiones Colquijirca S.A.	2018-2023
Minera La Zanja S.R.L.	2019,2020-2022,2023
Sociedad Minera El Brocal S.A.A.	2018-2023
S.M.R.L. Chaupiloma Dos de Cajamarca	2018-2023
Procesadora Industrial Río Seco S. A.	2018,2019,2022,2023
Apu Coropuna S.R.L.	2018-2023
Cerro Hablador S. A. C.	2018-2023
Minera Azola S. R. L.	2018-2023

As of the date of issuance of these consolidated financial statements, Buenaventura is being audited by the Tax Administration for income tax for the taxable year of 2019 and 2020, and in March 2024 has initiated the audit of the income tax for the taxable year 2021.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

Furthermore, the tax administration has initiated the audit of the income tax for the taxable year 2021 of the subsidiary El Brocal S.A.A. Similarly, it is reviewing the income tax of Consorcio Energético Huancavelica for the taxable year 2017 and Río Seco for the taxable year 2021.

Due to the possible interpretations that the Tax Authorities may give to legislation in effect, it is not possible to determine whether any of the tax audits will result in increased liabilities for the Group. For that reason, any tax or surcharge that could arise from future tax audits would be applied to the income of the period in which it is determined. In the opinion of Management and its legal advisors, any possible additional payment of taxes in the entities mentioned before would not have a material effect on the consolidated financial statements as of December 31, 2023 and 2022.

The open tax process of the Group and its associates are described in note 31(d).

(c) Tax-loss carryforwards -

As of December 31, 2023 and 2022, the tax-loss carryforward determined by the Group amounts to approximately S/3,425,297,000 and S/3,285,065,000, respectively (equivalent to US\$922,515,000 and US\$883,573,000 respectively). As permitted by the Income Tax Law, the Group has chosen a system that permits to offset these losses against future net taxable income subject to an annual cap equivalent to 50% of net taxable income.

The Group recognized a deferred income tax asset related to the tax-loss carryforward of those entities where it is probable that a carryforward can be used to offset future taxable profits. See note 31.

(d) Transfer pricing –

For purposes of determining its income tax, the transfer prices for transactions with related companies and companies domiciled in territories with little or no taxation must be supported with documentation and information on the valuation methods used and the criteria considered for their determination. The tax administration can request this information based on analysis of the Group's operations. The Group's management and its legal advisers believe that, as a result of the application of these standards, no material contingencies will arise for the Group as of December 31, 2023 and 2022.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

**20. Sales**

- (a) The Group's sales are mostly from sales of gold and precious metals in the form of concentrates, including silver-lead, silver-gold, zinc and lead-gold-copper concentrates and ounces of gold. Set out below is the disaggregation of the Group's revenue from contracts with customers:

	2023 US\$(000)	2022 US\$(000)	2021 US\$(000)
<b>Revenues by geographic region:</b>			
<b>Metal and concentrates sales -</b>

	<u>826,641</u>	<u>806,300</u>	<u>961,370</u>

See related accounting policies in Note 2.4(p).

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

- (b) Set out below, is the reconciliation of the revenue from contracts with customers with the amounts disclosed in the consolidated statement of profit or loss:

	2023 US\$(000)	2022 US\$(000)	2021 US\$(000)
Contracts with customers for sale of goods (a)	813,757	782,697	924,390
Hedge operations, note 34(a)	6,056	12,774	(51,952)
Adjustments to prior period liquidations	(450)	(920)	(5,137)
Fair value of accounts receivables	(8,402)	6,648	(3,831)
<b>Sale of goods</b>	<u>810,961</u>	<u>801,199</u>	<u>863,470</u>
<b>Sale of services, note 20(a)</b>	12,884	22,222	21,052
<b>Royalty income, note 20(a)</b>	<u>—</u>	<u>1,381</u>	<u>15,928</u>
	<u><u>823,845</u></u>	<u><u>824,802</u></u>	<u><u>900,450</u></u>

See related accounting policies in Note 2.4 (p).

- (c) Performance obligations -  
The performance obligation of the sale of goods is satisfied upon delivery of the goods and payment is generally due within 5 to 90 days from delivery. Performance obligation of services is satisfied over-time and payment is generally due upon completion and acceptance of service.
- (d) Concentration of sales -  
In 2023, the 4 customers with sales of more than 10% of total sales represented 28%, 20%, 19% and 12% from the total sales of Group (4 clients represented 32%, 23%, 22% and 10% from the total sales of Group during the year 2022 and 4 clients represented 37%, 19%, 17% and 15% during the year 2021). As December 31, 2023, 79% of the accounts receivable correspond to these customers (71% as of December 31, 2022). These customers are related to the mining business.

The Group's sales of gold and concentrates are delivered to investment banks and national and international well-known companies. Some of these customers have long-term sales contracts with the Group that guarantee supplying them the production from the Group's mines.

(b) During 2023 and 2022, there were no collections related to indemnity for the insurance claim.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

In August 2021, collections correspond to the income of the subsidiary El Brocal related to the indemnity for the insurance claim of US\$2,358,000 as a result of the insurance compensation for the damage suffered by the act of vandalism, which occurred in December 2020. On September 3, 2021, the amount was fully collected.

- (c) During 2023 and 2021, the subsidiary El Brocal updated its closure plan for environmental liabilities of Santa Bárbara and Delta Ulpamayo. For the preparation of the Santa Bárbara closure plan, the collaboration of a specialized external company was assigned.

As of December 31, 2023, the total budget of both environmental liabilities amounts to US\$13,587,000, which was discounted using a rate in a range of 4.984 to 5.641 percent over a period of 6 years, resulting in an updated liability amounting to US\$12,401,000 (US\$11,460,000 as of December 31, 2022).

- (d) Corresponds mainly to environmental fines charged to the subsidiary El Brocal by the Environmental Assessment and Audit Organism (OEFA by its acronym in Spanish) related with the inspections performed per expedient of the years 2017, 2019 and 2021.

Accrual of costs for bond issuance, note 16(g)	2,082	1,963	717
Amortized cost of financial obligations, note 16(g)	—	515	8,837
Update of the accounts receivable from Howden Hodco Perú, notes 1(d) and 7(i)	1,956	—	—
Accretion expense for leases related to right-in-use assets, note 16(g)	266	99	176
Fair value variation of the financial liability of the contingent consideration liability (b)	4,709	—	—
	<u>119,254</u>	<u>54,136</u>	<u>60,629</u>

(b) Contingent consideration -

On August 18, 2014, Buenaventura acquired from Minera Gold Fields Peru S.A. (Gold Fields) 51% of the voting shares of Canteras del Hallazgo S.A.C., which represent the whole interest of Gold Fields in the equity of such entity.

Through the merger with Canteras del Hallazgo S.A.C, the Group is the owner of the Chucapaca project, which is in the Ichuña district, in the General Sanchez Cerro province, in the Moquegua department, Peru. According to previously performed studies, there is evidence of the existence of gold, silver, copper and antimony in the area, specifically in the Canahuire deposit.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

The purchase and sale agreement considered a contingent consideration of US\$23,026,000, which corresponds to the present value of the future royalty payments equivalent to 1.5% over the future sales of the minerals arising from the mining properties acquired. The fair value of the future royalty payments was determined using the income approach.

Significant increase (decrease) in the future sales of mineral would result in higher (lower) fair value of the contingent consideration liability, while significant increase (decrease) in the discount rate would result in lower (higher) fair value of the liability. Changes in the fair value of this contingent consideration have been recognized through profit or loss in the consolidated statement of profit or loss.

As of December 31, 2023 and 2022, it is highly probable that the Group reaches the projected future sales. The fair value of the contingent consideration determined as of December 31, 2023 and 2022 reflects this assumption and changes in metal prices.

(c) A reconciliation of fair value measurement of the contingent consideration liability is provided below:

	2023 US\$(000)	2022 US\$(000)	2021 US\$(000)
<b>Beginning balance</b>	16,905	17,718	22,100
Variation of the fair value in profit or loss	4,709	(813)	(4,382)
<b>Ending balance</b>	<u>21,614</u>	<u>16,905</u>	<u>17,718</u>

Significant unobservable valuation inputs are provided below:

	2023	2022
Annual average of future sales of mineral (US\$000)	224,288	208,912
Useful life of mining properties	14	14
Pre-tax discount rate (%)	12.04	13.2

The Group has the preferential right of acquisition of the royalty in case Gold Fields decides to sell it.

Mining royalties and special mining tax	(554)	(837)	(3,253)
Investment in associate available for sale	—	83,192	(83,192)
Non-deductible expenses	12,948	(13,144)	2,048
Non-deductible deferred tax for striping cost	—	—	(1,130)
<b>Income tax income (expense)</b>	<u>10,302</u>	<u>(82,803)</u>	<u>72,237</u>
Income tax of tax claim, note 31(b)	(45,126)	—	—
<b>Mining Royalties and Special Mining Tax</b>	<u>(6,150)</u>	<u>(3,399)</u>	<u>(7,152)</u>
<b>Total income tax</b>	<u>(40,974)</u>	<u>(86,202)</u>	<u>65,085</u>
Income tax from continuing operations	(42,994)	(41)	23,671
Income tax from discontinued operations	<u>2,020</u>	<u>(86,161)</u>	<u>41,414</u>
	<u>(40,974)</u>	<u>(86,202)</u>	<u>65,085</u>

- (e) Related to the investment in associates, the Group has not recognized a deferred income tax asset of US\$35.7 million as of December 31, 2023, originated by the difference between the financial and taxable basis of these investments (US\$35.7 million as of December 31, 2022). Management believes that the timing differences will be reversed in the future without taxable effects. There is no legal or contractual obligation that would require the Company's management to sell its investment in its associates (which event would result in a taxable capital gain based on current tax law).
- (f) As December 31, 2023, the Group maintains an asset for current income taxes of US\$17,059,000 (US\$15,150,000 current portion and US\$1,909,000 non-current portion) and a liability for current income taxes of US\$6,274,000. As December 31, 2022, the Group maintains an asset and liability for income taxes of US\$28,046,000 and US\$2,366,000; respectively.

**31. Commitments and contingencies**

## Commitments

## (a) Environmental -

The Group's exploration and exploitation activities are subject to environmental protection standards.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

Law No. 28090 regulates the obligations and procedures that must be met by the holders of mining activities for the preparation, filing and implementation of Mine Closure Plans, as well as the establishment of the corresponding environmental guarantees to secure fulfillment of the investments, subject to the principles of protection, preservation, and recovery of the environment.

Law No. 28271 regulates environmental liabilities in mining activities. This Law has the objective of ruling the identification of mining activity's environmental liabilities and financing the remediation of the affected areas. According to this law, environmental liabilities refer to the impact caused to the environment by abandoned or inactive mining operations.

The Group considers that the recorded liability is sufficient to comply with the environmental regulations of Peru.

## (b) Leased concessions -

The Group pays 10 percent on the valued production of mineral obtained from the concessions leased by Sindicato Minero Orcopampa S.A. This concession is in force until the year 2043. See note 24.

## Contingencies

## (c) Legal procedures -

*Buenaventura -*

The Group is a party to legal procedures that have arisen in the normal course of business. Nevertheless, in the opinion of Buenaventura's Management, none of these procedures, individually or as a whole, could result in material contingencies for the Group's consolidated financial statements.

The possible environmental, labor, safety, and communities' contingencies amount to US\$2.44 million and US\$3.8 million as of December 31, 2023 and 2022, respectively. The possible tax contingencies amount to US\$10.3 million and US\$28.8 million as of December 31, 2023 and 2022, respectively, see note 31(d).

## (d) Open tax procedures -

*Buenaventura -*

During 2012 and 2014, the Superintendencia Nacional de Aduanas y de Administración Tributaria (SUNAT) reviewed the Company's income tax for 2007 and 2008. As a result, SUNAT does not recognize certain tax deductions totaling S/1,056,310,000 (equivalent to US\$284,490,000) for the year 2007 and S/1,530,985,000 (equivalent to US\$412,331,000) for the year 2008. The main unrecognized deduction is the payment made for the removal of the price component of its commercial contracts for gold sales. In the opinion of management and its legal counsel, the objections are unfounded, so Buenaventura expects to receive a favorable result in the initiated claim process.

In November 2018, the Tax Court resolved the initial appeal proceedings and did not recognize the deductions related to settlement of the contracts of physical deliveries and the related contractual obligation and considers that the payments correspond to an advance financial settlement of Contracts of Derivative Financial Instruments and that the Company would not have accredited the purpose of hedge and the risks covered. The Company's management with the support of its legal advisers initiated various administrative and judicial actions to present their arguments and defend their rights related to the originally claimed deductions.

On November 10, 2020, the Tax Court confirmed the reliquidation of the tax debt determined by SUNAT corresponding to 2007 and 2008. With this ruling, on November 13, 2020, SUNAT notified the Company of the start of the compulsory collection of such taxes for S/1,567,297,000 (equivalent to US\$422,111,000), composed of S/192,049,000 (equivalent to US\$51,723,000) of income tax and S/1,375,248,000 (equivalent to US\$370,387,000) of interest and penalties.

The Company made payments under protest during the months of November and December 2020 for S/72,065,000 (equivalent to US\$19,451,000), which are recorded in the caption "Trade and other receivables", note 7(c). Based on the opinion of the Company's legal advisers, management expects to obtain a favorable result in the judicial process initiated.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

Likewise, the Company requested to SUNAT for an installment payment program that deferred payment for six months and thereafter satisfies the amount via 66 equal monthly payments, amounting to S/1,505,948,000 (equivalent to US\$405,588,000), for which has been delivered, as a guarantee, letters of guarantee for the total amount plus 5% according to the tax requests for a total of S/1,580,126,000 (equivalent to US\$425,566,000). The application was approved by SUNAT on January 5, 2021 and payments were schedule to begin in July 2021 considering a monthly interest rate according to the tax regulations of 0.8% per month until March 31, 2021 and 0.72% per month from April 1 onwards.

On July 30, 2021, the Company paid the full amount of the tax liability related to the 2007 and 2008 tax processes that were subject to deferment and installment. The total amount paid of S/1,583,128,000 (equivalent to US\$426,374,000), which includes the updating of interest as of July 30, 2021 for S/78,279,000 (equivalent to US\$21,082,000). As a result of this payment, SUNAT's resolutions of deferment and installment of the tax amount have been rendered null and void and the letters of credit that were delivered as collateral for said liability have been returned to the Issuing Banks. The amount of S/1,579,716,000 (equivalent to US\$426,374,000 has been recognized as part of the "Trade and other receivables", see note 7(c). Based on the opinion of the Company's legal advisers, management expects to obtain a favorable result in the judicial process initiated.

On December 19, 2018, the Company with the support of its legal advisers filed contentious administrative lawsuits before the Judiciary regarding the controversy of taxable years 2007 and 2008.

On December 30, 2020, the Company was notified that the claim corresponding to fiscal year 2007 was declared unfounded by the Nineteenth Administrative Litigation Court with a Subspecialty in Tax and Customs Issues. On January 11, 2021, the Company with the support of its legal advisers filed an appeal against said judgment, which was submitted to the Superior Court.

On May 3, 2021, the Seventh Superior Chamber declared the First Instance Judgment null and void due to an evident lack of motivation and procedural consistency. On July 15, 2021, the new oral report was made before the Court of First Instance. On January 7, 2022, the new Judgment of the Court of First Instance was issued, again declaring the Company's lawsuit as unfounded. According to the sponsoring lawyers, said ruling fails to comply with the mandate of the Seventh Chamber, again incurring grounds for annulment. On January 18, 2022, the appeal of the new sentence was filed.

On November 7, 2022, the Seventh Chamber declared the Company's claim unfounded. On December 21, 2022, the Company and its sponsoring lawyers filed an appeal requesting the annulment of the ruling of the Seventh Chamber and ordering the issuance of a new ruling without violating the right to due motivation of judicial decisions and the principles of reasoned appreciation and joint assessment of the evidence.

On July 10, 2023, the appeal was admitted by the Fifth Temporary Constitutional and Social Law Chamber of the Supreme Court, due to six causes of regulatory violation, including impacts on due process. The hearing of the case took place on September 13, 2023 and, according to the information available from the Judicial Branch system (Supreme CEJ by its acronym in Spanish), the appeal has been declared unfounded. As of the date of this report, the Supreme Court ruling has not been notified.

In this regard, although the text of the ruling is not yet available and according to the opinion of our sponsoring lawyers, it is possible to infer that the resolution of the Fifth Chamber of Transitory Constitutional and Social Law would not have considered the violations of due diligence alleged in the appeal filed. This would enable the possibility of initiating an amparo process against said sentence, as authorized by the Constitution, the new Constitutional Procedural Code, and the jurisprudence of the Constitutional Court

The lawsuit referring to fiscal year 2008 is pending resolution in the Twenty-Second Administrative Litigation Court.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

During 2015, SUNAT reviewed the Company's income tax for 2009 and 2010. As a result, they did not recognize Buenaventura declared tax deductions of S/76,023,000 (equivalent to US\$20,475,000) and the compensation of tax losses of S/561,758,000 (equivalent to US\$151,295,000). The main unrecognized deductions originally claimed by Buenaventura are the non-deductibility of bonuses paid to contractors, a provision of doubtful accounts not accepted as an expense and income unduly deducted. The Company's Management and its legal advisors consider that the objections made by SUNAT are unfounded, and therefore the claim and appeal processes have been initiated.

In December 2018, the Tax Court resolved the appeal files confirming reparations of S/66,623,000 (equivalent to US\$17,943,000) related to the provision for collection of doubtful receivables as an expense and unfounded income unduly deducted and the compensation of tax losses from previous years. The Company's management, with the support of its legal advisors, has initiated administrative and judicial actions to present its arguments and make its rights prevail.

In December 2019, SUNAT initiated actions of forced collection of interest and fines for the reliquidation that it has made of prepayments from January to December 2009 and January to February 2010. These are based on the 2007 and 2008 annual tax fiscal years, which were recalculated by SUNAT with the objections mentioned in the first and second paragraphs and which are questioned in the judicial process. On December 20, 2019, SUNAT executed the forced collection of S/120,262,000 (equivalent to US\$32,459,000). In the opinion of the legal advisors of the Company, favorable results are expected to be obtained in the judicial process that has been initiated, therefore an account receivable have been recognized in the heading "Trade and other receivables", see note 7(c).

On December 4, 2020, the Tax Court confirmed the reliquidation of the tax debt determined by SUNAT for the year 2010. With this ruling, on December 11, 2020, SUNAT notified the Company of the initiation of the compulsory collection of the taxes for fiscal year 2010 totaling S/340,074,000 (equivalent to US\$91,590,000).

The Company made payments under dispute in December 2020 for S/1,800,000 (equivalent to US\$486,000) which are recorded in the caption "Trade and other receivables", see note 7(c). Based on the opinion of the Company's legal advisers, management expects to obtain a favorable result in the judicial process initiated.

Likewise, on January 5, 2021, the Company requested to SUNAT for an installment payment program that deferred payment for six months and thereafter satisfies the amount via 66 equal monthly payments, amounting to S/339,928,000 (equivalent to US\$91,551,000), for which letters of guarantee for the total amount plus 5% according to the tax requests for a total of S/357,944,000 (equivalent to US\$96,403,000). The application was approved by SUNAT on January 14, 2021 and payments began to be made in July 2021.

On July 30, 2021, the Company paid the full amount of the tax liability referring to fiscal year 2010, which was subject to deferral and installment. The total amount paid of S/356,691,000 (equivalent to US\$96,273,000) which includes the updating of interest as of July 30, 2021 for S/16,762,000 (equivalent to US\$4,514,000) recorded in the caption "Trade and other receivables", see note 7(c). As a result of this payment, SUNAT's resolutions of deferment and installment of the tax debt have been rendered null and void and the letters of credit that were delivered as collateral for said disputed tax assessment have been returned to the issuing banks.

On December 14, 2020, the Tax Court confirmed the reliquidation of the tax liability determined by SUNAT for fiscal year 2009. With this ruling, on December 17, 2020, SUNAT notified the Company of the initiation of the compulsory collection of the disputed amounts for fiscal year 2009 for S/202,614,000 (equivalent to US\$54,569,000).

During January 2021, the Company made payments under protest in January 2021 for S/19,171,000 (equivalent to US\$5,174,000) which are recorded in the caption "Trade and other receivables", note 7(c). Based on the opinion of the Company's legal advisers, management expects to obtain a favorable result in the judicial process initiated with regards to this matter.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

On January 14, 2021, the Company requested to SUNAT for an installment payment program that deferred payment for six months and thereafter satisfies the amount via 66 equal monthly payments, amounting to S/184,922,000 (equivalent to US\$49,804,000) for which has been delivered, as collateral, letters of credit for the total amount plus 5% according to the tax requests for a total of S/194,398,000 (equivalent to US\$52,356,000). The application has been approved by SUNAT on January 27, 2021 and payments began to be made from July 2021.

On July 30, 2021, the Company paid the full amount of the disputed tax debt referring to fiscal year 2009, which was subject to deferral and installment. The total amount paid of S/193,398,000 (equivalent to US\$52,199,000) which includes the updating of interest as of July 30, 2021 for S/8,477,000 (equivalent to US\$2,283,000) recorded in the caption "Trade and other receivables", see note 7(c). As a result of this payment, SUNAT's resolutions of deferment and installment of the tax assessment have been rendered null and void and the letters of credit that were delivered as collateral for said amount have been returned to the Issuing Banks.

On March 5, 2019, the Company and its sponsoring lawyers have filed contentious-administrative lawsuits before the Judiciary regarding the Tax Court decisions on taxable years 2009 and 2010.

On February 28, 2022, the Twenty-Second Contentious Administrative Court declared the Company's claim for the 2009 financial year unfounded. On March 8, 2022, the appeal was filed requesting that the first instance ruling be declared null and void. On June 8, 2022, the Superior Court declared the Company's claim unfounded. On June 27, 2022, the Company and its sponsoring lawyers presented the appeal, which has been classified as admissible.

On November 8, 2023, the Fifth Chamber of Transitory Constitutional and Social Law of the Supreme Court notified the Cassation Ruling declaring the lawsuit filed by the Company unfounded.

On December 22, 2023, the Company and its sponsoring lawyers have filed an amparo request before the Constitutional Chamber of the Superior Court of Justice with the purpose of declaring the annulment of the cassation ruling in response to the violations to the right constitutional protection of the Company.

In the opinion of the sponsoring lawyers of the 2007-2008 judicial processes, it is not possible to recognize tax losses from the years 2009 and 2010 through their call-in of the 2007 process but through the file's compliance stage of the years 2009 and 2010. In their opinion, the possibilities of obtaining the refund of the payments recorded as account receivable for the years 2009 and 2010 at the execution stage of the favorable ruling of income tax 2007 could be less than 50% in regard of the tax losses compensation.

Based on this opinion and the jurisprudence of the Supreme Court that would restrict the carrying-forward and recognition of tax losses in the files of 2009 and 2010, the Company has recorded, in December 2023, a provision to profit or loss of S/420,231,000 (equivalent to US\$113,178,000), note 7(c.1), regarding the portion of the tax debt paid and recorded in accounts receivable in response to the derecognition of the carry-forwarded tax losses in the years 2009 and 2010 of the losses from the years 2007 and 2008, which was recognized in the notes of financial expenses, others, net and a higher income tax expense of US\$58,454,000, US\$9,598,000 and US\$45,126,000, respectively. See notes: 27(a), 28(a) and 30(d), respectively.

In March 2024, the Supreme court notified the cassation ruling that declared unfounded the lawsuit filed by the Company to assert its position regarding derivative financial instruments operations in 2007. In the opinion of the sponsored lawyers, there are solid grounds to file an amparo claim, that will be ultimately resolved by the Constitutional Court, requesting the annulment of the aforementioned cassation as a result of the violation of constitutional rights and guarantees. The Company filed said constitutional action on April 19, 2024.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

On November 1, 2020, the Company was notified that the lawsuit corresponding to fiscal year 2010 filed before the Nineteenth Administrative Litigation Court with a Subspecialty in Tax and Customs Issues has been declared founded in relation to the unsupported income unduly deducted from taxable income. On November 9, 2020, the Company and its sponsoring lawyers filed a partial appeal against said judgment, which has been submitted to the Superior Court. On January 7, 2021, the Company was notified with the second instance judgment, issued by the Sixth Superior Chamber declaring the first instance judgment null ordering the Court to issue a new judgment. On January 21, 2021, the Company with the support of its legal advisors have presented the Appeal for Cassation that must be raised to the Supreme Court. The Sixth Chamber has reserved the processing of the cassation appeal and has referred the file to the Nineteenth Court to issue a new ruling on the grounds that a part of the second instance judgment declared the first instance judgment null.

On January 24, 2024, The Supreme Court has resolved both the lawsuit and the appeal filed by the Company regarding the compliance resolution of the period 2010, pointing out that the Tax Court has incurred in dual criterial in regard of the calculation of the prescription period of the Tax Administration collection action.

On the other hand, on March 4, 2019, the Tax Administration filed a contentious-administrative lawsuit against the end of the Tax Court Resolutions for the years 2009 and 2010 that raised the objections for bonuses paid to contractors.

In respect to the period 2010, the claim was declared founded in first instance and this ruling was subsequently confirmed in the second instance. In supported compliance with the second instance judgment, on October 5, 2021, the Tax Court modified the ruling contained in its initial Resolution and ruled against the Company's position for the bonuses paid to contractors in fiscal year 2010 for S/4,526,000 (equivalent to US\$1,219,000). On January 19, 2022, the Company filed a contentious-administrative lawsuit against the new Resolution of the Tax Court, which is pending resolution. Likewise, the Company and its sponsoring lawyers filed an opposition brief that was declared admissible. On September 29, 2022, the Tax Court correctly complied with the judicial mandate, annulling the objection for bonuses in the defendant end, the same one that has been objected by the Tax Administration. As of the date of issuance of this report, the file is pending resolution in the Twentieth Administrative Court.

The judicial process associated with the 2009 financial year related to contractor bonuses for S/4,695,000 (equivalent to US\$1,265,000) is pending in the first instance.

During the year 2018, SUNAT audited the income tax declaration for 2014. As a result of this audit, SUNAT does not recognize certain of the Company's deductions declared totaling S/94,898,000 (equivalent to US\$25,558,000). The main disagreements are related to the non-deductibility of bonus paid to contractors, which also affects the compensation of tax losses that can be withheld and the use of balances in favor that are not recognized by SUNAT. In Management's and its legal advisor's opinion these observations do not have supporting evidence; consequently, they expect a favorable outcome of the started claim process.

On November 12, 2020, the Tax Court (last administrative instance) resolved the appeal, declaring founded, in part, the payment of bonuses to contractors and confirming the non-recognition of compensation for tax losses.

The Company's Management, with the support of its legal advisors, has initiated administrative actions questioning the re-assessment of the tax debt and the derecognition of favorable balances. On January 25, 2024, the Tax Court resolved the appeal, recognizing the compensation of losses from previous years and the use of tax credits. The Tax Administration must issue the compliance resolution as provided by the Tax Court.

As of December 31, 2023, the total possible contingencies related to these audits amount to S/38,381,000 (equivalent to US\$10,337,000) and S/41,358,000 (equivalent US\$11,139,000) as of December 31, 2022.

On February 15, 2021, the Company and its sponsoring lawyers filed a contentious-administrative lawsuit before the Judicial Branch regarding the ruling of the Tax Court of September 12, 2020.

[Table of Contents](#)**Notes to the consolidated financial statements (continued)**

On March 23, 2023, the Nineteenth Administrative Litigation Court declared the Company's claim founded in part. On April 3, 2023, SUNAT and the Ministry of Economy and Finance appealed the first instance ruling. On April 5, the Company filed an appeal for the part of the lawsuit that was declared unfounded. On June 27, 2023, the Superior Court issued a ruling declaring the first instance ruling null and ordering the Court to issue a new ruling.

During the year 2019, SUNAT reviewed the income tax of the year 2013. As a result, SUNAT did not recognize certain of Buenaventura's declared tax deductions. The main assertions made by the SUNAT include the non-deductibility of bonuses paid to contractors, the compensation of tax losses that can be withheld and the use of balances in favor that are not recognized by SUNAT.

On March 15, 2021, the Tax Court (last administrative instance) has resolved the appeal, declaring, in part, the payment of bonuses to contractors and confirming the lack of compensation for tax losses and use of balance of tax credit for a total of S/139,235,000 (equivalent to US\$37,499,000).

The Company's Management with the support of its legal advisors have initiated administrative actions questioning the re-assessment of the tax debt and the recognition of balances in favor of the previous year. On December 16, 2022, the Tax Court partially agreed with the Company. The SUNAT, in compliance stage, on March 24, 2023, has recognized the tax credit and kept the questioning related to the carry forwarded tax loses, in response the Company presented an appeal that has been resolved by the Tax Court on September 17, 2023, with a favorable outcome. To the date of this report, the Company is waiting for the new re-assessment of the tax debt from SUNAT in compliance with the ruling of the Tax Court.

As of December 31, 2023, there are no total possible contingencies related to this audit. As December 31, 2022, the possible contingencies amounted to S/57,909,000 (equivalent to US\$15,160,000).

On June 11, 2021, the Company and its sponsoring lawyers have filed a contentious-administrative lawsuit before the Judicial Branch regarding the ruling of the Tax Court.

On May 9, 2022, the Twentieth Administrative Court declared the Company's claim unfounded. On May 16, 2022, with the support of the sponsoring lawyers, the Company has filed the appeal. On October 4, 2022, the Seventh Superior Chamber notified the sentence confirming the first instance ruling.

On October 18, 2022, the Company and its sponsoring lawyers filed an appeal. On January 12, 2024, the ruling issued by the Fifth Transitory Chamber of Constitutional and Social Law of the Supreme Court has been notified, declaring unfounded the Company's claim. The sponsoring lawyers together with our external advisors are evaluating the judicial and administrative actions to follow.

During the year 2022, the Tax Administration audited the income tax return for the year 2017. As a result of said audit, SUNAT does not recognize certain deductions by the Company totaling S/39,720,000 (equivalent to US\$10,698,000) mainly for the non-recognition of investment in development costs and the non-recognition of the compensation of carry-over tax losses from previous years for S/127,929,000 (equivalent to US\$34,454,000). In the opinion of Management and its legal advisors, these objections are not supported, so a favorable result is probable in the claim process that has been initiated.

Likewise, during the years 2021 and 2022, the Tax Administration has reviewed the declaration of transfer prices and the operations between related parties carried out in the tax year 2017. As a result of said examination, SUNAT does not recognize the Company declared deductions for services performed by related parties totaling S/3,341,000 (equivalent to US\$900,000).

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

As a consequence of the aforementioned examination processes, the Tax Administration has charged a tax debt of S/17,493,000 (equivalent to US\$4,711,000). Between December 23 and 28, 2022, the Company has paid the tax debt in order to avail itself of the benefit of the fine reduction, disbursing S/9,266,000 (equivalent to US\$2,496,000). The amount referred to the unaccepted repairs of S/9,224,000 (equivalent to US\$2,490,000) has been recorded under the heading "Trade and other receivables", see note 7(c) in the Company's financial statements.

On August 31, 2023, SUNAT has notified that the claim has been declared unfounded, in part. The Company and the lawyers responsible for the process consider that SUNAT's observations are unfounded and have filed an appeal to the Tax Court.

Between November 2022 and July 2023, the Tax Administration has audited the income tax declaration for the year 2018. As a result of said audit, SUNAT does not recognize the Company's deductions declared for S/73,600,000 (equivalent to US\$19,822,000) mainly due to the non-recognition of the investment in development costs and the non-recognition of the compensation of carry forward tax losses from previous years for S/170,900,000 (equivalent to US\$46,027,000). In the opinion of Management and its legal advisors, these objections are unfounded, so a favorable outcome would be obtained from claim process that have been initiated.

As a result of the said review, the Tax Administration has imputed a tax debt of S/20,500,000 (equivalent to US\$5,521,000). On August 11, 2023, the Company has paid the tax debt to obtain the fine reduction benefit by disbursing S/12,249,000 (equivalent to US\$3,306,000), and based on the opinion of its legal advisors, the amount has been recorded in the caption "Trade and other receivables", see note 7(c) in the Company's financial statements.

During the year 2019, SUNAT reviewed the income tax of the year 2014. As a result, SUNAT did not recognize Buenaventura's declared tax deductions related to the deductibility of bonuses paid to contractors for S/2,067,000 (equivalent to US\$557,000). Based on the opinion of the Company's legal advisers, management expects to obtain a favorable result in the judicial process initiated.

On November 17, 2020, SUNAT has resolved the claim appeal, confirming the objections made in the inspection process. The Company has paid the tax amount of S/4,744,000 (equivalent to US\$1,280,000) to reduce the amount of the fines that would otherwise be payable and has recorded in the caption "Trade and other receivables", see note 7(c), based on the opinion of its legal advisors who are of the opinion that there are sound arguments to obtain a favorable result in the appeal process that has been initiated before the Tax Court.

On July 23, 2021, the Tax Court (last administrative instance) has resolved the appeal declaring founded, in part, the claim for the repair of the tax credit for the bonuses paid to contractors and its impact on the carryover of the balance in favor of the exporter. The Company's Management, with the support of its legal advisors, has considered requesting part of the tax credit declared founded once the legal claim filed by SUNAT is resolved. On May 26, 2023, the Court declared SUNAT's claim unfounded, which was appealed on June 2, 2023. On August 21, 2023, the Sixth Superior Court decided to declare the first instance ruling null and has ordered the Court to conduct a new procedure and sentence.

In opinion of the Company's Management and its legal advisors the results of the aforementioned procedures in the various instances will be favorable for the Company, hence they consider that it is not necessary to recognize any provision for these contingencies.

*Subsidiaries –*

Sociedad Minera El Brocal S.A.A. –

On May 30, 2014, SUNAT issued tax and fines assessments related to the 2011 income tax of El Brocal. They do not recognize the deduction of the loss in derivative financial instruments, the expense in mining royalties and the expenses of feeding of third parties within the terms of law. El Brocal filed an appeal that is pending resolution to date. It should be noted that on June 18, 2014, El Brocal decided to pay under protest the income tax assessment S/8,333,000 (equivalent to US\$2,249,000) so it can have access to reduced fine.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

On January 8, 2015, SUNAT notified El Brocal of a tax assessment for the 2012 income tax year related to deductions claimed by the subsidiary and rejected by SUNAT. As a result of the rejection of these deductions, SUNAT notified a tax assessment for income tax payments from January to December 2012, which amounts to S/4,030,000 (equivalent to US\$1,085,000). El Brocal has filed an appeal to the Tax Court.

On June 14, 2017, SUNAT notified El Brocal of its determinations and fine resolutions as a result of the inspection procedure initiated for the 2013 income tax year where the balances in favor and the taxable tax loss are repaired. These resolutions were claimed without favorable results. On January 24, 2018, El Brocal filed the appeal before the Tax Court.

On May 13, 2019, the Tax Court notified El Brocal through Resolution No. 3062-3-2019 that its appeal of the taxable years 2011, 2012 and 2013 had been resolved to prohibit the deduction of the expense for food and confirmed the observations related to the deductibility of losses on derivative financial instruments and the expense associated with the payment of mining royalties of the 2011, 2012 and 2013 fiscal years.

As a result of the aforementioned resolution, the Tax Administration has notified the compliance resolutions re-assessing the income tax and the effects on payments on account for the years 2011, 2012 and 2013. El Brocal has filed an appeal before the Tax Court.

On August 9, 2019, El Brocal filed an administrative contentious lawsuit against the decision of the Tax Court since El Brocal had provided reliable documentation regarding the basis for the deductibility associated with the loss on derivative financial instruments and payment of mining royalties. El Brocal's lawsuit was declared unfounded in the first and second instance and on April 21, 2022, the appeal was filed. Through the Qualification Order dated June 27, 2022, the Supreme Court has declared the appeal filed inadmissible.

On September 21, 2022, the Company and its sponsoring lawyers have filed an amparo claim against the Qualification Order to have it declared null and things are restored to the previous state and the appeal for cassation is ordered to be processed.

As a result of these events in the year 2022, El Brocal recognized in that year the write-off of the account receivable related to the process of 2011 for the amount of S/8,333,000 (equivalent to US\$2,188,000), note 7(a). It includes an amount S/4,044,000 (equivalent to US\$1,062,000) correspond to income tax and are presented under the heading "Current income tax". Meanwhile, the amount of S/4,289,000 (equivalent to US\$1,126,000) corresponds to the fine plus default interest and are presented under the heading "Other, net".

In addition, provision for contingencies for the period 2022 were recorded in profit or loss related to the income tax prepayments effects of the fiscal years 2012 and 2013 for S/4,922,000 (equivalent to US\$1,289,000). Said amount corresponds to fines plus default interest and is presented in the caption "Other, net". On March 2, 2023, the debt imputed by SUNAT, for the aforementioned topics, was paid for S/4,924,000 (equivalent to US\$1,359,000).

During 2019, SUNAT reviewed the tax return for El Brocal's fiscal year 2015. As a result of this review, SUNAT communicated on December 31, 2019 its determination and resolutions where it questioned the depreciation rate of two tailings and the deduction of the development costs of the Smelter Project for a total S/13,930,000 (equivalent to US\$3,752,000) determining a debt of S /3,412,000 (equivalent to US\$919,000). Management of El Brocal and its legal advisors considered that the findings rendered by the SUNAT are not supported by the technical merits of the positions taken by the SUNAT and have started the claim process.

On January 27, 2020, El Brocal made a payment of the resolution in order to benefit from the fine reduction. The amount disbursed is S/1,456,000 (equivalent to US\$393,000).

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

On December 18, 2020, SUNAT rejected El Brocal's claim, leaving without effect the observation referring to the deduction of the development costs of the Tajo Smelter Project and has confirmed the deduction for the depreciation of the tailings dams for S/6,108,000 (equivalent to US\$1,621,000). As a result, SUNAT has returned part of the fine of S/459,000 (equivalent to US\$124,000) for which, as of December 31, 2021, a receivable is recognized of S/997,000 (equivalent to US\$269,000), note 7(a). Management of El Brocal and its legal advisors consider that the remaining objection has no basis, and therefore on January 12, 2021 they have started the appeal process before the Tax Court. On January 3, 2024, the Tax Court has confirmed the objection regarding the depreciation of the tailing's dams. According to the opinion of the sponsoring lawyers, there are elements to obtain a favorable ruling in court, hence El Brocal will file the lawsuit within the legal period.

During 2020, SUNAT reviewed the income tax return for the year 2014. As a result of this review, SUNAT notified El Brocal on December 30, 2020 of its determination Resolutions and the Fine where it questions the depreciation rate of two tailings dams, the deduction of the development costs of the Tajo Smelter Project and certain operating expenses for a total of S/16,582,000 (equivalent to US\$4,466,000) determining an amount to be paid of S/10,902,000 (equivalent to US\$2,936,000). El Brocal's management and its legal advisors consider that the findings have no technical merit and have initiated the claim process.

On January 7, 2021, El Brocal paid the tax assessment under protest in order to benefit from a reduction of the fine. The amount disbursed of S/7,871,000 (equivalent to US\$2,120,000) and was recorded as an account receivable in the financial statements.

On May 21, 2021, SUNAT rejected El Brocal's claim, leaving without effect the observation referring to the deduction of the development costs of the Tajo Smelter Project and has confirmed the deduction for the depreciation of the tailings for S/6,018,000 (equivalent to US\$1,621,000) and operating expenses for S/5,384,000 (equivalent to US\$1,450,000). As a consequence of said ruling, SUNAT has returned part of the fine for S/3,003,000 (equivalent to US\$809,000), therefore, as of December 31, 2023, an account receivable has been recorded, net of S/4,868,000 (equivalent to US\$ 1,314,000), note 7(a). Management of El Brocal and its legal advisors consider that the SUNAT's remaining findings are ungrounded, and the appeal process has begun before the Tax Court on June 11, 2021.

On September 25, 2023, the Tax Court resolved the appeal process, confirming the compensation for the depreciation of the tailings dams for S/6,018,000 (equivalent to US\$1,621,000) and has partially confirmed the compensation of operating expenses for S/4,125,000 (equivalent to US\$1,111,000). In the opinion of the sponsoring lawyers, there are elements to obtain a favorable ruling in judicial instances in regard of the observation of the depreciation of tailings dams and in the operating expenses if supported with additional documentation.

On December 22, 2023, El Brocal filed a lawsuit requesting the partial nullification of the ruling of the Tax Court questioning of tailings depreciation and operating expenses observed at this stage for S/2,617,000 (equivalent to US\$705,000).

As a result of these events and based on the opinion of the sponsoring lawyers, El Brocal has recorded a provision for contingencies charged to profit or loss of year 2023 of S/1,136,000 (equivalent to US\$306,000) for the section of the questioned operating expenses.

During the years 2021 and 2022, the Tax Administration reviewed the income tax return for the year 2016. As a consequence of said review, SUNAT has notified on August 31, 2022 the Determination and Fine Resolutions where it questions the depreciation rate of two tailing dams and the deduction of the development costs of the Tajo Smelter Project for a total of S/20,380,000 (equivalent to US\$5,489,000) determining a decrease in the tax loss of El Brocal. The Management of El Brocal and its legal advisors consider that the objections are unfounded, which is why they have started the claim process.

On May 23, 2023, SUNAT resolved the appeal, confirming the aforementioned observations. The Management of El Brocal and its legal advisors consider that the observations are unfounded, which is why an appeal has been presented to the Tax Court on June 13, 2023.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

During the years 2022 and 2023, the Tax Administration has reviewed the income tax declaration for the year 2017. As a result of said review, SUNAT has notified, on September 29, 2023, the Determination and Fine Resolutions where it questions the depreciation rate of two tailings dams, the deduction of the development costs of the Tajo Smelter Project and operating expenses in the mining unit for a total of S/33,209,000 (equivalent to US\$8,944,000). Moreover, it questions the loss from the settlement of financial instruments for S/35,578,000 (equivalent to US\$9,582,000) since, in the SUNAT'S opinion, these instrument's specific risks would not have been accredited, and they would not have been performed in recognized markets because the agreed prices do not exactly match with the prices published by the London Metal Exchange.

As a consequence, a tax debt of S/27,646,000 (equivalent to US\$7,446,000) has been charged, which was paid on October 4, 2023 to obtain the fine reduction benefit. The disbursed amount of S/22,521,000 (equivalent to US\$6,079,000) was recorded as an account receivable in the financial statements of El Brocal, note 7 (a).

The Management of El Brocal and its legal advisors consider that the observations are unfounded, which is why they are preparing an appeal.

*Minera La Zanja S.R.L. -*

During the years 2016, 2017 and 2018, SUNAT audited the income tax return for the years 2013 and 2015; as a result, SUNAT does not recognize deductions for payments of profit sharing of workers, payments for police protection, balance of profit sharing and the exchange difference associated with the provision for mine closures. On November 20, 2020, the Tax Court confirmed SUNAT's position associated with the profit sharing and the exchange difference for the provision for mine closure. As a result, on March 18, 2021, SUNAT has revised the imputed amount to be paid for the years 2013 and 2015 that La Zanja has proceeded to pay.

The possible contingencies for the two deductions not recognized by SUNAT and the Tax Court amount to S/3,060,000 (equivalent to US\$826,000). As mentioned in the previous paragraph, La Zanja has had to pay the corresponding debt under protest and it is recorded under the "Trade and other receivables" caption, see note 7(c).

In the opinion of management of La Zanja and its legal advisors, the interpretation of the Tax Court on profit sharing and the exchange difference of the mine closure provision is unsupported, and on March 9, 2021, La Zanja initiated a contentious-administrative lawsuit that is pending resolution in the Twenty-First Court of Administrative Litigation with Tax Subspecialty of Lima.

During the year 2021, as a result of the review of the Affidavit of the year 2017, La Zanja has recognized tax contingencies related to the balance in favor of the income tax of the taxable year 2017 for the amount of S/1,124,000 (equivalent to US\$303,000), since in the opinion of Management and its tax advisors this contingency is probable.

In the course of 2022, as a result of the review of the 2016 Affidavit, the Tax Administration has reliquidated and determined a lower tax paid in 2016 for S/4,288,000 (equivalent to US\$1,155,000), as a result of the decrease in the balance in favor of fiscal year 2015 due to the repair of the exchange difference from the closure of mines in said fiscal year and which, updated with fines and interest, imputed a debt of S/11,215,000 (equivalent to US\$3,020,000). The Management of La Zanja and its legal advisors consider that the objection has no basis, and therefore they have started the claim process.

On October 25, 2022, La Zanja has paid the imputed tax debt in order to benefit from the fine reduction. The disbursed amount of S/8,959,000 (equivalent to US\$2,418,000) was recorded as a long-term account receivable in the financial statements, see note 7 (c).

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

During the year 2022, the Tax Administration has reviewed the income tax declaration for the year 2018. As a consequence of said review, on December 28, 2022, SUNAT has notified La Zanja via Determination Resolutions where it questions payments to two mining contractors totaling S/7,777,000 (equivalent to US\$2,091,000), an operating expense of S/4,738,000 (equivalent to US\$1,276,000) and the no recognition of the balance in favor of fiscal year 2017 of S/624,000 (equivalent to US\$168,000), reducing the tax loss of financial year 2018 and the corresponding balance in favor. The Management of La Zanja and its legal advisors consider that the objections are unsupported, which is why the claim process began.

On September 21, 2023, SUNAT declared the appeal unfounded. The Management of La Zanja and its legal advisors have presented an appeal to the Tax Court.

As a result of said review, La Zanja has recognized tax contingencies for the taxable year 2017 in the amount of S/1,598,000 (equivalent to US\$430,000), given that in the opinion of La Zanja and of your tax advisors this contingency is probable.

During the year 2023, the Tax Administration has carried out a partial audit of the 2019 taxable year and as a result has imputed a debt of S/6,507,000 (equivalent to US\$1,752,000) for the alleged surplus refund of the income tax credit of that period. The Management of La Zanja and its legal advisors consider that this observation, in part, is not appropriate, which is why they have initiated the claim process.

On December 19, 2023, La Zanja has paid the imputed debt, taking advantage of the gradual nature of the fine for S/4,533,000 (equivalent to US\$1,221,000)

Likewise, during the year 2023, the Tax Administration has reviewed the income tax of the year 2021. As a consequence of said review, on December 28, 2023, it has closed the process questioning the depreciation rate of the leaching platforms. for an amount of S/14,876,000 (equivalent to US\$4,006,000) and the carry forward tax losses from previous years for S/9,413,000 (equivalent to US\$2,535,000), reducing the tax loss. The Management of La Zanja and its legal advisors consider that the objections are unfounded, which is why the claim process has been initiated.

On December 19, 2023, La Zanja has paid the imputed debt, taking the gradual payment benefit of the fine for S/4,533,000 (equivalent to US\$1,221,000) of which S/2,700,000 (equivalent to US\$729,000) has been recorded in profit or loss as it corresponds to the balance for fiscal year 2017 not refuted by La Zanja, and S/1,830,000 (equivalent to US\$494,000) are recorded in Trade and other receivables long term, see note 7 (c) which corresponds to the credits of the fiscal year 2019 that are impugned with pending resolve from the Tax Court; in the lawyer's opinion a favorable result should be obtained.

*Empresa de Generación Huanza S.A. -*

During 2015, SUNAT audited the 2014 income tax return of the Company's subsidiary Huanza. As a result, a portion of the depreciation of its fixed assets was not recognized for S/27,532,000 (equivalent to US\$7,415,000). The possible contingency amounts to S/7,993,000 (equivalent to US\$1,112,000) as of December 31, 2022 (S/7,532,000 equivalent to US\$1,232,000 as of December 31, 2021). In the opinion of Huanza's management and of its legal advisors, this interpretation has no basis and therefore Huanza expects to obtain a favorable result in the appeal process that has begun.

On April 8, 2023, the Tax Court issued Resolution No. 01851-10-2022 partially lifting the questioning of SUNAT made in the inspection stage.

In December 2022, SUNAT has settled the tax debt and required the respective payment. On December 30, 2022, the Company has made the payment of the imputed tax debt updated with interest to that date for a total amount of S/6,090,000 (equivalent to US\$1,644,000) without this meaning that it accepts the decision of the Court Fiscal. In the opinion of the sponsoring lawyers, the Company should obtain a favorable result in the judicial process that it is going to file before the Judiciary within the Law term, for which the disbursement made has been recorded in the non-current portion of the item "Trade and other receivables" in the Company's financial statements, note 7(c).

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

On March 23, 2023, Huanza Management and its sponsoring lawyers filed a lawsuit against the ruling of the Tax Court, and it has been assigned to the twenty-first Administrative Litigation Court.

On April 27, 2023, SUNAT completed the review process of the income tax report for the 2020 financial period. As a consequence of said review, SUNAT reduced the accumulated tax loss of that financial year of S/342,941,000 (equivalent to US\$92,362,000) to S/309,032,000 (equivalent to US\$83,230,000) due to the effect of the observation regarding the depreciation of fixed assets of the fiscal year 2014 to be resolved in court.

Huanza Management and its legal advisors consider that the questioning is unfounded, so on December 13, 2023, they began the claim process.

*Procesadora Industrial Río Seco S.A. -*

The Customs Division of the SUNAT has determined an alleged omission in the payment of the General Sales Tax of S/1,815,000 (equivalent to US\$489,000) in an import made in 2012 of certain equipment for the construction of Río Seco's industrial plant. SUNAT supported its position that Río Seco should have included the amount of the consideration paid by Río Seco for the engineering services provided by its suppliers abroad in the customs value. In the opinion of management and its legal advisors, this observation is not substantiated, and a favorable ruling is expected to be obtained in the complaint and appeal process.

On March 13, 2019, the Tax Court issued Resolution No. 0844-A-2019 that confirmed the observation of the Tax Administration.

On May 17, 2019, SUNAT initiated coercive collection actions for the tax amount assessed. Río Seco initiated several administrative and judicial actions to suspend the payment, without favorable results. During July to September 2019, Tax Administration executed the forced collection of the tax to be paid amounting to S/11,153,000 (equivalent to US\$3,232,000). In the opinion of the legal advisors of Río Seco, a favorable result should be obtained in the judicial process that has been initiated, and therefore the amount paid has been recorded in the heading "Trade and other receivables", see note 7(c).

On June 13, 2019, Río Seco has filed an administrative contentious lawsuit against the Tax Court's resolution with the intention of obtaining an overturn from the Judiciary that declares its nullity, disclaiming the objection of the Tax Administration, this lawsuit is pending of resolution by the Twenty-second Administrative Litigation Court.

During the year 2022, the Tax Administration has reviewed the income tax return for the year 2020. As a consequence of said review, SUNAT notified Río Seco on November 30, 2022 via a Determination and Fine Resolutions that it is questioning certain deductions totaling S/16,618,000 (equivalent to US\$4,476,000) mainly due to disallowing the recognition of a depreciation deduction for a part of its fixed assets totaling S/15,917,000 (equivalent to US\$4,287,000) and determining a debt of S/2,882,000 (equivalent to US\$776,000). The Management of Río Seco and its legal advisors consider that the objections are unfounded, and therefore the claim process has begun.

On December 28, 2022, Río Seco paid the tax debt under protest in order to benefit from the fine reduction. The disbursed amount of S/2,298,000 (equivalent to US\$620,000) has been recorded under the caption "Trade accounts receivable and other accounts receivable", see note 7(c).

On August 28, 2023, SUNAT notified that the appeal has been declared unfounded. On January 18, 2024, Río Seco Management, with the support of its legal advisors, presented the appeal to the Tax Court.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

*Chaupiloma -*

SUNAT has issued determination resolutions for fiscal years 2001, 2005, 2008, 2009, 2010, 2011 and 2013 challenging the recognition of the amortization of the investment in the mining concessions that was carried out according to the provisions of the Income Tax Law and that, according to SUNAT, said amortization should have been carried out according to the provisions of the General Mining Law applicable to the owners of mining activities. Deductions not recognized by SUNAT are S/10,500,000 (equivalent to US\$2,828,000). In successive rulings, the Tax Court has confirmed that the amortization and deduction made by the Company has been carried out in accordance with the applicable law and has rendered the determination resolutions null. SUNAT has appealed to the Judiciary and has filed contentious-administrative lawsuits for the fiscal years 2008-2009, 2011 and 2013 to which Chaupiloma is responding. In the opinion of management and Chaupiloma's legal advisors, it is expected that a favorable result will be obtained in the different judicial processes that are in process.

On June 11, 2021, the Tax Court resolved the audit file for fiscal years 2001-2005, ruling that the amortization taken for the year 2001 was not deductible because the concessions were not being exploited in said period. The Company has paid, under protest, the tax amount for 2001 of S/1,270,000 (equivalent to US\$339,000), which has been recorded in the caption "Trade and other receivables", see note 7(c) since in the opinion of Chaupiloma's management and its legal advisors expect a favorable result to be obtained through the legal proceedings that have been initiated.

On November 8, 2022, the Company obtained an unfavorable ruling in the last instance (Supreme Court) regarding the 2011 Income Tax. On June 8, 2023, the Tax Administration settled the tax debt, in compliance with the mandate of the Supreme Court, for S/383,000 (equivalent to US\$103,000) that the Company has complied with fully paid.

On July 24, 2023, Chaupiloma had an unfavorable ruling in the last instance (Supreme Court) regarding the 2013 Income Tax. On December 11, 2023, the Tax Administration has settled the tax debt, in compliance with the mandate of the Supreme Court, for S/396,000 (equivalent to US\$103,000) that the Company complied with fully paid.

Consequently, the tax processes for the years 2011 and 2013 have concluded.

On the other hand, the Twenty-First Court has declared SUNAT's claim that questioned the favorable ruling of the Tax Court for the controversy of the 2008 and 2009 fiscal years to be unfounded and the SUNAT appeal has been declared inadmissible on May 8, 2023, resulting in the conclusion of the process for the taxable years 2009 and 2010 with favorable result for Chaupiloma.

*Associates -**Cerro Verde -*

## Mining Royalties

On June 23, 2004, Law N ° 28528 - Law of Mining Royalty was approved under which the owners of mining concessions had to be paid as financial compensation for the exploitation of metallic and non-metallic mineral resources. A mining royalty was determined applying rates that ranged between 1% and 3% on the value of the concentrate or its equivalent, according to the price quotation of the international market published by the Ministry of Energy and Mines. Based on the terms of an agreement signed in 1998 with the government of Peru, Cerro Verde determined that the payment of mining royalties was not applicable, because the new law was signed after the signing of the contract with the Peruvian Government. However, under the terms of its new guaranteed contract, which became effective on January 1, 2014, Cerro Verde began to pay mining royalties and special mining tax for all its production based on Law No. 29788, which is calculated based on the operating profit with rates that fluctuate between 1% and 12%. The amount to be paid for the mining royalty will be the highest amount that results from calculating the result of applying the applicable tax rate on the quarterly operating profit (the rate is established based on the operating margin for the quarter) or 1% of revenues generated by sales made in the calendar quarter.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

SUNAT has also assessed mining royalties on materials processed by Cerro Verde's concentrator, which commenced operations in late 2006. These assessments cover the period December 2006 to December 2013. Cerro Verde contested each of these assessments because it believes that its 1998 stability agreement exempts it from royalties on all minerals extracted from its mining concession, irrespective of the method used for processing such minerals. No assessments can be issued for years after 2013, as Cerro Verde began paying royalties on all of its production in January 2014 under its new 15 - year stability agreement.

Since 2017, Cerro Verde has recorded payments related to the contested tax observations for mining royalties and special tax on mining for the period from December 2006 to December 2013. Since 2014, Cerro Verde has recorded payments of S/2.9 billion (equivalent to US\$791.9 million at payment exchange rate) for disputed assessments for the period from December 2006 to December 2013 through monthly fractionation programs, under which payments were completed in August 2021.

On February 2020, Cerro Verde began arbitration proceedings with the International Centre for Settlement of Investment Disputes (CIADI) and on October 19, 2021, Cerro Verde formally filed its arbitration claim. During the year 2022, the first hearings were held both for the responses of the Peruvian government and the replies by Cerro Verde. For the year 2023, the hearings will continue, and a pronouncement of the court is expected to be rendered in 2024.

Other assessments received from SUNAT -

Cerro Verde has also received assessments from SUNAT for additional taxes (other than the mining royalty), including penalties and interest. Cerro Verde has filed or will file objections to the assessments because it believes it has properly determined and paid its taxes. A summary of these assessments follows:

Year	Taxes US\$(000)	Penalty and interest US\$(000)	Total US\$(000)
2003 – 2005	8,162	38,870	47,032
2006	10,844	51,963	62,807
2007	11,579	22,102	33,681
2008	16,906	16,923	33,829
2009	56,039	51,680	107,719
2010	53,566	126,406	179,972
2011	40,940	70,065	111,005
2012	869	7,326	8,195
2013	48,622	71,620	120,242
2014	5,344	706	6,050
2015	3,001	23,816	26,817
2016	61,875	3,360	65,235
2017	5,043	3,078	8,121
2018	4,666	4,250	8,916
2019-2022	499	172	671
	<u>327,955</u>	<u>492,337</u>	<u>820,292</u>

As of December 31, 2023, Cerro Verde has paid US\$819.2 million about these disputed tax assessments. A reserve has been applied against these payments for a total of US\$545.2 million resulting in a net account receivable of US\$274.0 million (US\$333.3 million as of December 31, 2022) which Cerro Verde expects will be recovered.

(e) *Letters of credit –**Letters of credit with regional governments and others -*

In addition to the letters of credit related to the plans for the closure of mines and projects, mentioned in the note 15(b), the Group maintains letters of credit with regional governments and others for US\$6,345,000 as of December 31, 2023 (US\$1,420,000 as of December 31, 2022).

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

**32. Transactions with related companies and joint venture**

(a) The Group has carried out the following transactions with its related companies and joint venture in the years 2023, 2022 and 2021:

	2023 US\$(000)	2022 US\$(000)	2021 US\$(000)
<b>Associates -</b>			
Revenues from:			
Energy	3,669	3,415	3,255
Royalties	—	1,381	15,928
Supplies, note 28(a)	1,104	179	169

## Notes to the consolidated financial statements (continued)

(b) As a result of the transactions indicated in the paragraph (a), the Group had the following accounts receivable and payable from/to associates:

	2023 US\$(000)	2022 US\$(000)
<b>Trade and other receivables, note 7(a)</b>		
Minera Yanacocha S.R.L.	—	312
Compañía Minera Coimolache S.A.	421	55
	<u>421</u>	<u>367</u>
<b>Other receivables, note 7(a)</b>		
Transportadora Callao S.A.	2,486	1,612
Compañía Minera Coimolache S.A.	—	1,025
Ferrocarril Central Andino S.A.	—	150
Banco Pichincha	—	55
	<u>2,486</u>	<u>2,842</u>
	<u>2,907</u>	<u>3,209</u>
<b>Trade and other payables, note 14(a)</b>		
Compañía Minera Coimolache S.A.	454	163
<b>Other payables, note 14(a)</b>		
Other minor	14	20
	<u>14</u>	<u>20</u>
	<u>468</u>	<u>183</u>

As of December 31, 2023 and 2022, there is no allowance for expected credit losses related to related parties accounts.

(c) S.M.R.L. Chaupiloma Dos de Cajamarca -  
Until February 7, 2022, Minera Yanacocha S.R.L. (hereinafter "Yanacocha") paid the Group a 3% royalty based on quarterly production sold at current market prices, after deducting refinery and transportation costs in accordance with mining lease, amended and effective on January 1, 1994. As of that date, the subsidiary transferred all its mining concessions to Yanacocha, see note 1(d), receiving as consideration an amount similar to a percentage of Yanacocha's sold production, as well as the production of future concessions.

(d) Key officers -  
As of December 31, 2023 there were no loans to employees, directors and key personnel. As December 31, 2022, amounted to US\$1,000, respectively, which are payable monthly and earn interest at market rates.

There are no loans to the Group's directors and key personnel guaranteed with Buenaventura or any of its subsidiaries' shares.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

The Group's key executives' compensation (including the related income taxes assumed by the Group) for the years ended 2023 and 2022 are presented below:

	2023 US\$(000)	2022 US\$(000)
<b>Accounts payable:</b>		
Bonus to officers	7,750	14,861
Directors' remuneration	2,027	3,455
Salaries	847	933
Total	<u>10,624</u>	<u>19,249</u>
<b>Payments:</b>		
Salaries	10,487	10,230
Directors' remuneration	3,376	2,956
Total	<u>13,863</u>	<u>13,186</u>
<b>Expenses:</b>		
Salaries	11,335	11,163
Directors' remuneration	2,027	3,455
Total	<u>13,362</u>	<u>14,618</u>

- (e) The account receivable from Consorcio Transportadora Callao corresponds to the disbursements made between 2011 and 2013 by the subsidiary El Brocal in order to participate in the joint venture (see note 10(c)). This account receivable generates interest at an annual fixed rate of 5.82% and it is estimated that it will be collected from the year 2023.

**33. Disclosure of information on segments**

Management has determined its operating segments based on reports that the Group's Chief Operating Decision Maker (CODM) uses for making decisions. The Group is organized into business units based on its products and services, activities and geographic locations. The broad categories of the Group's business units are the following:

- Production and sale of minerals (mining units in operation).
- Exploration and development projects.
- Energy generation and transmission services.
- Insurance brokerage.
- Rental of mining concessions.
- Holding of investment in shares.
- Industrial activities.

The accounting policies used by the Group in reporting segments internally are the same as those contained in the notes of the consolidated financial statements.

The CODM monitors the operating results of the business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profit or loss and is measured consistently with operating profit or loss in the Group's consolidated financial statements. In addition, the Group's financing and income taxes are managed at the corporate level and are not allocated to the operating segments, except for those entities, which are managed independently.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

Corporate information mainly includes the following:

In the segment information of profit or loss -

- Administrative expenses, other income (expenses), exchange gain (loss), finance costs and income and income tax that cannot be directly allocated to the operational mining units owned by the Parent company (Orcopampa, Uchucchacua, Julcani and Tambomayo).
- Exploration activities in non-operating areas, carried out directly by the Parent company and not by the consolidated separate legal entities.
- Participation in subsidiaries and associate companies of the Company, which are accounted for using the equity method.

In the segment information of assets and liabilities -

- Investments in Sociedad Minera Cerro Verde S.A.A. Tinka Resources Ltd. and Compañía Minera Coimolache S.A., associate companies that are directly owned by the Parent company and are accounted for using the equity method; see note 10 to the consolidated financial statements.
- Assets and liabilities of the operational mining units owned directly by the Parent company since this is the way the CODM analyzes the business. Assets and liabilities of other operating segments are allocated based on the assets and liabilities of the legal entities included in those segments.

Adjustments and eliminations mainly include the following:

In the segment information of consolidated statements of profit or loss –

- The elimination of any profit or loss of investments accounted for under the equity method and not consolidated by the Group corresponding to the associate companies: Sociedad Minera Cerro Verde S.A.A. Tinka Resources Ltd. and Compañía Minera Coimolache S.A.
- The elimination of intercompany sales and cost of sales.
- The elimination of any equity pickup profit or loss of the subsidiaries of the Parent company.

In the segment information of assets and liabilities –

- The elimination of the assets and liabilities of the investments accounted for under the equity method and not consolidated, corresponding to the associate companies: Sociedad Minera Cerro Verde S.A.A., Tinka Resources Ltd. and Compañía Minera Coimolache S.A.
- The elimination of any equity pickup investments of the subsidiaries of the Parent company.
- The elimination of intercompany receivables and payables.

Refer to note 20(a) to the consolidated financial statements for disclosures related to revenues from external customers for each product and service, and revenues from external customers attributed to Peru and foreign countries. Revenue information is based on the locations of customers.

Refer to note 20(d) to the consolidated financial statements for information about major customers (representing more than 10% of the Group's revenues). All non-current assets are located in Peru.

## Notes to the consolidated financial statements (continued)

**34. Derivative financial instruments**

See related accounting policies in Note 2.4(b).

**(a) Copper and Zinc price hedges -**

The volatility of copper prices during 2022 and 2021 has caused management to enter into forward contracts. These 2022 and 2021 contracts are intended to reduce the volatility of the cash flows attributable to the fluctuations in copper and zinc prices in accordance with existing copper concentrate sales commitments, which are related to 50% of the annual production of copper and 25% of the production of two years of zinc, according to the risk strategy approved by the Board of Directors.

During 2023, 2022 and 2021, the effect of hedge derivative financial instruments in profit or loss was a gain of US\$6,056,000, gain of US\$12,774,000, loss of US\$51,952,000, respectively (and it is show in the "Sales of goods" caption, note 20(b)).

The table below presents the composition of open transactions designated as hedging derivative financial instruments as of December 31, 2022:

Quotation period	Concentrate	Metric tons	Quotations		Fair value US\$(000)
			Fixed US\$/DMT(*)	Futures US\$/DMT(*)	
January 2023	Copper	2,000	10,185	8,344	4,332
February 2023	Copper	1,500	10,109	8,350	1,867
March 2023	Copper	1,500	10,153	8,353	2,640
		<u>5,000</u>			<u>8,839</u>

(\*) DMT= Dry metric ton.

Changes in "Hedge derivative financial instruments" is included in "unrealized gain (loss) on hedge derivative financial instruments of copper and zinc prices hedge" in the consolidated statements of other comprehensive income. For the year 2022 and 2021, the Group recorded an unrealized gain of US\$15,171,000 and US\$9,472,000, respectively (unrealized gain of US\$10,696,000 and US\$6,678,000 net of income tax, respectively).

For the year 2023, the Group recognized an unrealized loss of US\$9,047,000 (unrealized loss of US\$6,232,000 net of income taxes, respectively).

As of December 31, 2023, the Group does not maintain a contract for derivative instruments to hedge copper and zinc prices.

**(b) Interest rate hedge -**

As of December 31, 2023 and 2022, the Company did not have hedging derivative instruments. For the years 2022 and 2021, the effect on results was a gain of US\$818,000 and a loss of US\$1,547,000, respectively and is presented in the caption of "Financial costs" see note 29(a).

Changes in "Hedge derivative financial instruments" is included in "Unrealized gain (loss) on hedge derivative financial instruments of interest rate hedge, net of income tax" in consolidated statements of other comprehensive income.

For the years 2022 and 2021, the Company recorded an unrealized gain of US\$644,000 and US\$1,991,000, respectively (unrealized gain of US\$454,000 and US\$1,403,000 net of income tax, respectively).

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

**35. Financial - risk management objectives and policies**

The Group's principal financial liabilities, other than derivatives, are comprised of trade accounts and other payables, and financial obligations. The main purpose of these financial instruments is to finance the Group's operations. The Group's principal financial assets include cash and cash equivalents and trade and other receivables that derive directly from its operations.

The Group is exposed to market risk, credit risk and liquidity risk. The Group's management oversees the management of these risks. A committee that advises on financial risks supports it. This committee provides assurance to management that the Group's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Group's policies and risk objectives. All derivative activities for risk management purposes are carried out by internal specialists that have the appropriate skills, experience and supervision.

There were no changes in the objectives, policies or processes during the years ended December 31, 2023, 2022 and 2021.

The Board of Directors reviews and approves policies for managing each of these risks, which are described below:

(a) Market risk -

Market risk is the risk that the fair value of the future cash flows from financial instruments will fluctuate because of changes in market prices. Market risks that apply to the Group comprise four types of risk: exchange rate risk, commodity risk, interest rate risk and other pricing, such as the risk of movements in the stock price. Financial instruments affected by market risks include time deposits, financial obligations, embedded derivatives and derivative financial instruments.

The sensitivity analyses in this section relate to the positions as of December 31, 2023 and 2022 and have been prepared considering that the proportion of financial instruments in foreign currency are constant.

(a.1) Exchange rate risk

The exchange rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Group's exposure to the risk of changes in foreign exchange relates primarily to the Group's operating activities in soles. The Group mitigates the effect of exposure to exchange-rate risk by carrying out almost all of its transactions in its functional currency.

Excluding loans in soles, management maintains smaller amounts in soles in order to cover its needs in this currency (primarily payment of taxes).

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

A table showing the effect on results of a reasonable change in foreign-currency exchange rates is presented below, with all other variables kept constant:

	Exchange-rate increase/decrease	Effect on profit (loss) before income tax US\$(000)
<b>2023</b>		
Exchange rate	10 %	66,003
Exchange rate	(10)%	(66,003)
<b>2022</b>		
Exchange rate	10 %	58,032
Exchange rate	(10)%	(58,032)
<b>2021</b>		
Exchange rate	10 %	56,122
Exchange rate	(10)%	(56,122)

## (a.2) Commodity price risk

The Group is affected by the price volatility of the commodities it mines. The price of mineral sold by the Group has fluctuated historically and is affected by numerous factors beyond its control.

The Group manages its commodity price risk primarily using sales commitments in customer contracts and hedge contracts for the metals sold by the subsidiary El Brocal.

The Company's subsidiary El Brocal entered into derivative contracts that qualified as cash flow hedges, with the intention of mitigating the risk resulting from the decrease in the prices of its minerals. These derivative contracts are recorded as assets or liabilities in the consolidated statements of financial position, see note 14, and are stated at fair value. To the extent that these hedges were effective in offsetting future cash flows from the sale of the related production, changes in fair value are deferred in an equity account under "Other comprehensive income (loss)". The amounts included temporarily in other comprehensive income (loss) were reclassified to the "Sales of goods" caption when the related minerals were sold. See note 34(a) and note 20(b).

## (a.3) Interest rate risk -

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's exposure to the risk of changes in market interest rates relates to the Groups' long-term financial obligations with floating interest rates.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

A table showing the effect in profit or loss of the variations of interest rates:

	Increase/decrease of LIBOR/SOFR (Percentage rates)	Effect on profit (loss) before income tax US\$(000)
<b>2023</b>		
Interest rate	10 %	24
Interest rate	(10)%	(24)
<b>2022</b>		
Interest rate	10 %	(1,315)
Interest rate	(10)%	1,315
<b>2021</b>		
Interest rate	10 %	(1,414)
Interest rate	(10)%	1,414

## (b) Credit risk -

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily trade receivable) and from its financing activities, including deposits with banks and other financial instruments.

The Group invests its excess cash in leading financial institutions, sets conservative credit policies and constantly evaluates the market conditions in which it operates. Trade accounts receivable are denominated in U.S. dollars. The Group's sales are made to domestic and foreign customers. See concentration of spot sales in note 20(b). An impairment analysis is performed on an individual basis.

Credit risk is limited to the carrying amount of the financial assets to the date of consolidated statements of financial position, which is composed of cash and cash equivalents, trade and other receivables and derivative financial instruments.

Set out below is the information about the credit risk exposure on the Group's trade and other receivables:

	Current US\$(000)	Days past due			Total US\$(000)
		< 30 days US\$(000)	30 - 90 days US\$(000)	> 90 days US\$(000)	
<b>As of December 31, 2023 -</b>					
Trade receivables	181,492	—	—	22,276	203,768
Other receivables	671,707	—	—	4,141	675,848

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

## (c) Liquidity risk -

Prudent management of liquidity risk implies maintaining sufficient cash and cash equivalents and the possibility of committing or having financing committed through an adequate number of credit sources. The Group believes that it maintains suitable levels of cash and cash equivalents and has sufficient credit capacity to get access to lines of credit from leading financial entities.

The Group continually monitors its liquidity risk based on cash flow projections.

An analysis of the Group's financial liabilities classified according to their aging is presented below, based on undiscounted contractual payments:

	Less than 1 year (2024) US\$(000)	Between 1 and 2 years (2025) US\$(000)	Between 2 and 5 years (2026 to 2028) US\$(000)	More than 5 years (2029 and thereafter) US\$(000)	Total US\$(000)
<b>As of December 31, 2023 -</b>					
Trade and other payables	288,570	—	—	—	288,570
Financial obligation – capital	31,034	97,409	574,194	—	702,637

Contingent consideration liability	—	—	11,937	31,934	43,871
	<u>314,707</u>	<u>152,229</u>	<u>677,820</u>	<u>37,308</u>	<u>1,182,064</u>

## (d) Capital management -

For purposes of the Group's capital management, capital is based on all equity accounts. The objective of capital management is to maximize shareholder value.

The Group manages its capital structure and makes adjustments to meet changing economic market conditions. The Group's policy is to fund all projects of short and long term with their own operating resources. To maintain or adjust the capital structure, the Group may change the policy of paying dividends to shareholders, return capital to shareholders or issue new shares.

No changes were made in the objectives, policies or processes for managing capital during the years 2023 and 2022.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

**36. Fair value measurement**

*Fair value disclosure of assets and liabilities according to its hierarchy -*

The following table provides the fair value measurement hierarchy of the Group's assets and liabilities:

	Carrying value US\$(000)	Fair value measurement using:		
		Quoted prices in active markets (Level 1)	Observable inputs (Level 2)	Unobservable inputs (Level 3)
		US\$(000)	US\$(000)	US\$(000)
<b>As of December 31, 2023-</b>				
<b>Assets and liabilities measured at fair value:</b>				
Fair value of account receivable (subject to provisional pricing)	125,586	—	125,586	—
Contingent consideration liability	21,614	—	21,614	—
<b>Fair value of liabilities at amortized cost:</b>				
Financial obligations			—	—
<b>As of December 31, 2022 -</b>				
<b>Assets and liabilities measured at fair value:</b>				
Fair value of account receivable (subject to provisional pricing)	129,567	—	129,567	—
Contingent consideration liability	16,905	—	16,905	—
Hedge instruments asset	8,839	—	8,839	—
<b>Fair value of liabilities at amortized cost:</b>				
Financial obligations	672,110	—	672,110	—

*Financial instruments whose fair value is similar to their book value –*

For financial assets and liabilities such as cash and cash equivalents, trade and other receivables, trade and other payables that are liquid or have short-term maturities (less than three months), it is estimated that their book value is similar to their fair value. The Group's derivative financial instruments are recorded at their fair value.

The fair value of accounts receivable is determined using valuation techniques with information directly observable in the market (future metal quotations).

*Financial instruments at fixed and variable rates -*

The fair value of financial assets and liabilities at fixed and variable rates at amortized cost is determined by comparing the market interest rates at the time of their initial recognition to the current market rates with regard to similar financial instruments. The estimated fair value of deposits that accrue interest is determined by means of cash flows discounted using the prevailing market interest rates in the currency with similar maturities and credit risks.

Based on the foregoing, there are no important existing differences between the book value and the fair value of the assets and financial liabilities as of December 31, 2023 and 2022. There were no transfers between Level 1 and Level 2 during 2023 and 2022.

[Table of Contents](#)

## Notes to the consolidated financial statements (continued)

*Fair value measurements using significant unobservable inputs (level 3) –*

The following table summarizes the quantitative information about the significant unobservable inputs used in level 3 fair value measurements:

Description	Fair value as of December 31, 2023	Unobservable inputs	Range of inputs	Relationship of unobservable inputs to fair value
Contingent consideration liability	21,614	Rate before tax	10.84 %	A change in the discount rate by 10% (rate 10.84%) higher/lower, the fair value would increase/decrease in US\$1.5 million.
		Expected revenues annual average (US\$000)	224,288	If expected sales change by 10% higher/lower, the fair value would increase/decrease in US\$2.2 million.

**37. Events after the reporting period**

On March 27, 2024, through Annual Shareholders General Meeting, the shareholders agreed to distribute dividends for an amount of US\$20,000,000 that are scheduled to be paid on May 03, 2024.

In addition to the event mentioned in the previous paragraph, and the ones disclosed in notes 1(b), 10(b) and 31(d), no other significant events were identified that have occurred between the reporting period and the issuance date of the financial statements that must be disclosed.

In accordance with International Financial Reporting Standards - IFRS, the accompanying financial statements were prepared based on the conditions existing as of December 31, 2023 and considering those events that occurred after that date that provided evidence of conditions that existed at the end of the reporting period up to their issuance date.

To the Shareholders and the Board of Directors of Sociedad Minera Cerro Verde S.A.A.

*Opinion on the Financial Statements*

We have audited the accompanying statement of financial position of Sociedad Minera Cerro Verde S.A.A., (the Company) as of December 31, 2023 and 2022, and the related statements of comprehensive income, changes in shareholders' equity and cash flows for each of the three years in the period ended December 31, 2023, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2023 and 2022, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2023, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board, which differ in certain respects from the accounting principles generally accepted in the United States of America (see notes 23, 24 and 25 to the financial statements).

*Basis for Opinion*

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Tanaka, Valdivia & Asociados S. Civil de R.L.  
A member practice of Ernst & Young Global Limited

We have served as the Company's auditor since 2007.

[Table of Contents](#)**Sociedad Minera Cerro Verde S.A.A.**

Notes to the Financial Statements

As of December 31, 2023, 2022 and 2021

**1. Identification and business activity****(a) Identification -**

Sociedad Minera Cerro Verde S.A.A. (the Company) was incorporated in Peru on August 20, 1993, as a result of the privatization process of certain mining units carried out by the Peruvian State in that year. The Company's shares began being listed on the Lima Stock Exchange on November 14, 2000.

Through its subsidiary Cyprus Climax Metals Company, Freeport Minerals Corporation (FMC), a wholly owned subsidiary of Freeport-McMoRan Inc. (Freeport), owns 53.56% of the voting shares of the Company, SMM Cerro Verde Netherlands B.V. (SMM Cerro Verde), a subsidiary of Sumitomo Metal Mining Company Ltd. (Sumitomo), owns 21.00%, Compañía de Minas Buenaventura S.A.A. (Buenaventura) owns 19.58%, and other stakeholders own the remaining 5.86%.

The Company's legal address is Jacinto Ibañez Street N°315 - Parque Industrial, Arequipa in the city of Arequipa and the ore deposit is located 20 miles southwest of that city (Asiento Minero Cerro Verde S/N Uchumayo – Arequipa).

**(b) Business activity -**

The Company's activities are regulated by the Peruvian General Mining Law and comprise the extraction, production and sale of copper cathodes, copper concentrate and molybdenum concentrate.

The Company's operation consists of an open-pit mine and two concentrating facilities with an annual average permitted milling capacity of 409,500 metric tons of ore per day (mtpd) with the ability of annually treating up to a maximum of 5% more for a total of 430,000 mtpd. The Company also operates a solution extraction and electrowinning (SX/EW) leaching facilities, which has a production capacity of approximately 200 million pounds of copper per year. The leaching and flotation process carried out at these plants are part of the benefit concession "Planta de Beneficio Cerro Verde." In 2023, the Company began to dismantle its crushed leach facility (which had a capacity of 39,000 metric tons of ore per day) as a result of pit expansion but continues to utilize its 100,000-metric-ton-per-day ROM leach system.

During the year ended December 31, 2023, the Company's concentrating facilities processed an average of 417,400 mtpd, a new annual record.

During the year ended December 31, 2023, the Company entered into a new power purchase agreement that is expected to transition the Company's electric power to fully renewable energy sources in 2026.

In April 2024, Cerro Verde reached agreement for a new four-year collective labor agreement (CLA) with one of its two unions that will become effective when the current agreement expires on August 31, 2025. Cerro Verde will record and pay nonrecurring costs in second-quarter 2024 associated with this agreement. Cerro Verde expects to begin negotiations in the near term with its other union on a new CLA to replace the CLA that expires in August 2024.

**(c) Political situation in Perú -**

Beginning in December 2022, heightened tensions, protests and social unrest emerged in Peru following a change in the country's political leadership. The Company operated at reduced rates from time to time during first-quarter 2023. The Company resumed normal operations in March 2023. A new social protest took place on July 19, 2023, (primarily in Lima) but the Company's operations were not impacted. The Company continues to monitor the situation with a priority on safety and security.

[Table of Contents](#)

Notes to the Financial Statements (continue)

(d) Financial statements approval –

The financial statements for the year ended December 31, 2023, have been approved by the Company's Management on April 29, 2024, and the subsequent event have been considered through those dates.

The financial statements for the year ended December 31, 2022, were approved and authorized by the Company's management on April 28, 2023.

**2. Material accounting principles and policies**

The material accounting policies applied in the preparation of the financial statements are summarized below:

(a) Basis of presentation -

The financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS).

The financial statements have been prepared based on historical cost, except for accounts receivable and/or payable related to embedded derivatives, which have been measured at fair value (see Note 2(d)). The financial statements are presented in United States dollars (US\$) and include the years ended December 31, 2023, 2022 and 2021. Unless otherwise indicated, all values have been rounded to the nearest thousand.

(b) Use of judgments, estimates and assumptions -

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions in order to determine the amounts of the assets and liabilities, and the disclosure of contingent assets and liabilities as of December 31, 2023 and 2022, and the amounts of reported revenues and expenses for the years ended December 31, 2023, 2022 and 2021.

Information about significant judgments, estimates and assumptions made by management in the preparation of the financial statements are as follows:

(b.1) Judgments -

(i) Contingencies -

By their nature, contingencies will be resolved only when one or more uncertain future events occur or fail to occur. The assessment of the existence and potential amount of contingencies inherently involves the exercise of significant judgment and the use of estimates regarding the outcome of future events.

(ii) Stripping cost -

The Company incurs waste removal costs (stripping costs) during the development and production phases of its surface mining operations. Production stripping costs can be incurred both in relation to the production of inventory in that period and the creation of improved access and mining flexibility in relation to ore to be mined in the future. The waste removal cost is included as part of the costs of inventory, while the production stripping costs are capitalized as a stripping activity asset, as part of the "property, plant and equipment, net" caption, if certain criteria are met.

Once the Company has identified its production stripping for its surface mining operation, it identifies the separate components of the ore body. An identifiable component is a specific volume of the ore body that is made more accessible by the stripping activity. Significant judgment is required to identify and define these components, and to determine the expected volumes (e.g., in tons) of waste to be stripped and ore to be mined in each of these components.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

## (b.2) Estimates and assumptions -

## (i) Determination of mineral reserves -

Mineral reserves are the part of a mineral deposit that can be economically and legally extracted from the mine concessions. The Company estimates its mineral reserves based on information compiled by individuals qualified in reference to geological data about the size, depth and form of the ore body, and requires geological judgments in order to interpret the data.

The estimation of recoverable mineral reserves involves numerous uncertainties with respect to the ultimate geology of the ore body, including quantities, grades and recoveries. Estimating the quantity and grade of mineral reserves requires the Company to determine the size, shape and depth of the ore body by analyzing geological data. In addition to the geology, assumptions are required to determine the economic feasibility of mining the mineral reserves, including estimates of future commodity prices, future requirements of capital and production costs, and estimated exchange rates. Revisions in mineral reserve or mineral resource estimates have an impact on the value of mining properties, its related property, plant and equipment, provisions for cost of mine closure, recognition of assets for deferred taxes and depreciation and amortization of assets.

## (ii) Units of production depreciation -

Estimated mineral reserves are used in determining the depreciation and/or amortization of mine-specific assets. This results in a depreciation/amortization charge proportional to the depletion of the anticipated remaining life-of-mine production. The life of each item, which is assessed at least annually, is impacted by both its physical life limitations and present assessments of economically recoverable mineral reserves of the mine property at which the asset is located. These calculations require the use of estimates and assumptions, including the amount of recoverable mineral reserves.

## (iii) Provision for remediation and mine closure -

The Company assesses its provision for remediation and mine closure quarterly. It is necessary to make estimates and assumptions in determining this provision, including cost estimates of activities that are necessary for the rehabilitation of the site, technological and regulatory changes, interest rates and inflation rates. As discussed in Note 2(j), estimated changes in the fair value of the provision for remediation and mine closure or the useful life of the related assets are recognized as an increase or decrease in the book value of the provision and related asset retirement cost (ARC) in accordance with IAS 16, "Property, Plant and Equipment."

According to the Company's accounting policies, the provision for remediation and mine closure represents the present value of the costs that are expected to be incurred in the closure period of the operating activities of the Company. Closure budgets are reviewed regularly to take into account any significant change in the studies conducted. Nevertheless, the closure costs of mining units will depend on the market prices for the closure work required, which would reflect future economic conditions. Also, the timing of disbursements depends on the useful life of the mine, which are based on estimates of future commodity prices.

If any change in the estimate results in an increase to the provision for remediation and mine closure and related ARC, the Company considers whether or not this is an indicator of impairment of the assets and applies impairment tests in accordance with IAS 36, "Impairments of Assets."

## (iv) Inventories -

Net realizable value (NRV) tests are performed at least annually and represent the estimated future sales price of the product based on prevailing spot metal prices, less estimated costs to complete production and bring the inventory to sale. Additionally, in calculating the NRV of the Company's long-term stockpiles, management also considers the time value of money.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

Mill and leach stockpiles generally contain lower grade ores that have been extracted from the ore body and are available for copper recovery. Mill stockpiles contain sulfide ores and recovery of metal is through milling and concentrating. Leach stockpiles contain oxide ores and certain secondary sulfide ores and recovery of metal is through exposure to acidic solutions that dissolve contained copper and deliver it in solution to extraction processing facilities.

Because it is generally impracticable to determine copper contained in mill and leach stockpiles by physical count, reasonable estimation methods are employed. The quantity of material delivered to mill and leach stockpiles is based on surveyed volumes of mined material and daily production records. Sampling and assaying of blast hole cuttings determine the estimated copper grades of material delivered to mill and leach stockpiles.

Expected copper recovery rates for mill stockpiles are determined by metallurgical testing. The recoverable copper in mill stockpiles, once entered into the production process, can be produced into copper concentrate almost immediately.

Expected copper recovery rates for leach stockpiles are determined using small-scale laboratory tests, historical trends and other factors, including mineralogy of the ore and rock type. Total copper recovery in leach stockpiles can vary significantly depending on several variables, including processing methodology, processing variables, mineralogy and particle size of the rock. Process rates and metal recoveries are monitored regularly, and recovery estimates are adjusted periodically as additional information becomes available and as related technology changes.

## (v) Asset impairment -

Management has determined that the Company's operations consist of one cash generating unit. The Company's operations are evaluated at least annually in order to determine if there are impairment indicators. If any such indication exists, the Company makes an estimate of the recoverable amount, which is the higher of (i) the fair value less costs of disposal or (ii) the value in use. These assessments require the use of estimates and assumptions, including long-term commodity prices, discount rates, operating costs and other factors.

Fair value is defined as the amount that would be obtained from the sale of the asset in an arm's length transaction between willing and knowledgeable parties. The fair value of assets is generally determined as the current value of future cash flows derived from the continuous use of the asset, which includes estimates, such as the cost of future expansion plans and eventual disposal, while applying assumptions that an independent market participant may take into account. The cash flows are discounted by applying a discount rate that reflects the current market, the time value of money and the risks specific to the asset.

## (c) Functional and reporting currency -

The functional and reporting currencies of the Company are U.S. dollars

## Transactions and balances in foreign currency

Foreign currency transactions are those carried out in a currency other than the functional currency. Foreign currency transactions are translated into the functional currency by applying the exchange rate in force on the date the transaction takes place. Monetary assets and liabilities denominated in foreign currencies are converted using the functional currency spot rate in force at the reporting date.

Gains and losses as a result of the difference in the exchange rate when currency items are liquidated or when converting currency items at exchange rates that are different from those used for their initial recognition are recognized in the statements of comprehensive income of the period.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

The Company uses Peruvian Sol (S/) exchange rates published by the Superintendent of Banks, Insurance and Pension Fund Administrators. The published exchange rates were S/3.705 for US\$1 for buying and S/3.713 for US\$ 1 for selling as of December 31, 2023, and S/3.808 for US\$1 buying and S/3.820 for US\$ 1 for selling as of December 31, 2022. These rates have been applied to the appropriate asset and liability accounts.

## (d) Financial assets –

*Initial recognition and measurement -*

At initial recognition, financial assets are classified and measured at either amortized cost, or fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. With the exception of trade receivables that do not contain a significant financing component, the Company initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component are measured at the transaction price determined under IFRS 15, "Revenue from Contracts with Customers."

The Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets or both.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognized on the trade date.

*Cash and cash equivalents -*

Cash and cash equivalents are financial assets that may be liquidated immediately, such as bank checking accounts, and other liquid investments with original maturities of three months or less.

*Accounts Receivables -*

The Company's receivables include current and non-current trade and other accounts receivable. These receivables are stated at their transaction value, net of an allowance for expected credit loss. Trade accounts receivable are generated primarily from the Company's concentrate and cathode sales, are denominated in US dollars, have current maturities, do not bear interest and have no specific guarantees.

Receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market.

*Subsequent measurement -*

For purposes of subsequent measurement, financial assets are classified in two categories:

- Financial assets at amortized cost (debt instruments).
- Financial assets at fair value through profit or loss.

*Financial assets at amortized cost (debt instruments) -*

This category is the most relevant to the Company. The Company measures financial assets at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to collect contractual cash flows, and
- The contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest rate method and are subject to impairment. Gains and losses are recognized in the statements of comprehensive income when the asset is derecognized, modified or impaired.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

This category generally applies to trade and other receivables, net.

*Financial assets at fair value through profit or loss -*

Financial assets at fair value through profit or loss include financial assets held for trading, financial assets designated upon initial recognition at fair value through profit or loss or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model.

Financial assets at fair value through profit or loss are carried in the statements of financial position at fair value with net changes in fair value recognized in the statements of comprehensive income.

*Embedded derivatives -**Copper Sales -*

The Company's copper sales are provisionally priced at the time of shipment. The provisional prices are finalized in a specified future month based on quoted London Metal Exchange (LME) monthly average prices. The Company receives market prices based on prices in the specified future month, which results in price fluctuations recorded through revenues until the date of settlement. The Company recognizes revenues and invoices customers when it transfers control, which is under CIF (cost, insurance and freight) delivery point based on then-current LME prices, which results in an embedded derivative that is required to be separated from the main contract. The Company's embedded derivatives from sales are measured at fair value (based on LME spot copper prices) and presented as gains/losses on provisionally priced trade receivables (see Note 21).

*Molybdenum Sales -*

The Company's molybdenum sales are also provisionally priced at the time of shipment. The Company recognizes revenues and invoices customers when it transfers control, which is under the CIF delivery point based on the arithmetic mean of the high and low Metals Week Dealer Oxide (MWDO) price. The provisional prices are finalized in a future month, according to the period of quotation, which results in price fluctuations recorded through revenues until the date of settlement, which also results in an embedded derivative that is required to be separated from the main contract (see Note 21).

*Silver Sales (Content in Copper Concentrate Sales) -*

The Company's silver sales are provisionally priced at the time of shipment. The Company recognizes revenue and invoices customers in a specific month when it transfers control, which is under the CIF Incoterm based on quoted London Bullion Market Association. The provisional prices are finalized in a future month, according to the period of quotation, which results in an embedded derivative, and presented as gain/loss in trade receivables (see Note 21).

*Derecognition -*

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is primarily derecognized when:

- The rights to receive cash flows from the asset have expired; or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a pass-through arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset or, (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent, it has retained the risk and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognize the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

*Impairment of financial assets -*

The Company recognizes an allowance for expected credit losses for all debt instruments not held at fair value through the statements of comprehensive income. Expected credit losses are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

Expected credit losses are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, expected credit losses are provided for credit losses that result from default events that are possible within the next 12-months (12-month expected credit losses). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (lifetime expected credit losses).

For trade receivables and contract assets, the Company applies a simplified approach in calculating expected credit losses. Therefore, the Company does not track changes in credit risk, but instead recognizes a loss allowance based on the financial asset's lifetime expected credit losses at each reporting date.

The Company considers a financial asset in default when contractual payments are 180 days past due. However, in certain cases, the Company may also consider a financial asset to be in default when internal or external information indicates that the Company is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Company. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

## (e) Financial liabilities -

All financial liabilities are recognized initially at fair value and in the case of accounts payable and other financial liabilities, net of directly attributable transaction costs. The Company's financial liabilities include loans, trade and other payables and other financial liabilities.

*Derecognition -*

A financial liability is derecognized when the associated obligation is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts are recognized in the statements of comprehensive income.

## (f) Inventories -

Inventories are stated at the lower of cost or net realizable value. Inventory of materials and supplies, as well as saleable products and in-process inventory are determined using the weighted-average cost method. The cost of finished goods and in-process inventory (i.e., stockpiles) includes labor and benefits, supplies, energy and other costs related to the mining and processing of minerals. Net realizable value tests of saleable products and in-process inventory are performed at each reporting date and represent the estimated future sales price using forward metal prices (for the period they are expected to be processed in), less estimated costs to complete production and bring the inventory to sale. The current portion of work-in-process is determined based on the amount the Company expects to process in the next 12 months. Inventories that are not expected to be processed in the next 12 months are classified as non-current inventories.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

## (g) Property, plant and equipment -

Property, plant and equipment are valued at historical cost, including costs that are directly attributed to the construction or acquisition of the asset, net of accumulated depreciation, amortization and impairment.

The initial cost of an asset comprises its purchase price or construction cost, any costs directly attributable to bringing the asset into operation, the initial estimate of the obligation for mine closure, and borrowing costs for qualifying assets.

Repairs and/or improvements that increase the economic life of an asset and for which it is probable that there will be future economic benefit to the Company, are recorded as assets. All other maintenance costs are charged to expense as incurred.

Land is not depreciated. Depreciation of assets directly related to the useful life of the mine is calculated using the units-of-production (UOP) method based on the mine's proven and probable copper reserves. Other assets are depreciated using the straight-line method based on the following estimated useful lives:

	Years
Buildings and other constructions	Between 5 and 35
Machinery and equipment	Between 2 and 30
Transportation units	Between 5 and 7
Furniture and fixtures	Between 7 and 10
Other equipment	Between 3 and 25

Critical spare parts and other parts which are directly identified with machinery or equipment are included in property, plant and equipment, and the economic life corresponds to the main asset with which they are identified.

An item of property, plant and equipment is retired at the time of its disposal or when no future economic benefits are expected from its use or subsequent disposition. Any gain or loss arising at the time of retirement is calculated as the difference between the proceeds from the sale and the book value of the asset and is included in the statements of comprehensive income in the period the asset is retired.

The residual value and useful economic lives of the Company's property, plant and equipment are reviewed, and adjusted if appropriate, at each year end.

*Impairment -*

At each reporting date, the Company evaluates if there is any indication that an asset could be impaired. If such an indication exists, the Company estimates the recoverable amount of the asset. The recoverable amount of an asset is the greater of (i) its fair value less costs to sell or (ii) its value in use and is determined for the assets of the mine as a whole, since there are no assets that generate cash revenues independently.

When the book value of an asset exceeds its recoverable amount, the asset is considered impaired and is reduced to its recoverable amount. When evaluating the value in use, the future estimated cash flows are discounted to their present value using a before-tax discount rate that reflects current market evaluations of the time value of money and the specific risks to the asset.

Losses resulting from the impairment of assets are recognized in the statements of comprehensive income under the categories of expenses consistent with the function of the impaired asset. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. The revised valuation cannot exceed the book value that would have been determined, net of depreciation, if an impairment loss for the asset had not been recognized in a previous period. Such a reversal is recognized in the statements of comprehensive income.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

As of December 31, 2023, the Company recorded impairment charges of US\$3.5 million related to a damaged primary crusher. As of December 31, 2022 and 2021, the Company did not identify any indicators of impairment.

## (h) Leases -

The Company assesses all arrangements, at contract inception, to determine whether they are, or contain, a lease. A contract containing a lease conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Company is a lessee but is not a lessor in any transactions.

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and low-value assets. The Company recognizes lease liabilities representing obligations to make future lease payments and right-of-use assets representing the right to use the underlying assets.

(i) *Right-of-use assets* -

The Company recognizes a right-of-use asset at the commencement date of the lease (i.e., the date when the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term or the estimated useful lives of the assets, as follows:

	Years
Land	30
Buildings and other constructions	Between 1 and 14
Machinery and equipment	Between 1 and 14

The right-of-use assets are also subject to impairment. The Company did not make any impairment adjustments as of December 31, 2023, 2022 and 2021

(ii) *Lease liabilities* -

At the commencement date of the lease, the Company recognizes a lease liability measured at the present value of lease payments to be made over the lease term. The lease liability is re-measured when there is a change in future lease payments arising from a change in an index or a rate, if there is a change in the estimate of the amount expected to be payable under a residual value guarantee, or as appropriate, changes in the assessment of whether a purchase option, termination option or extension option is reasonably certain to be exercised. Variable lease payments that do not depend on an index or a rate are recognized as expenses in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is generally not readily determinable. After the commencement date, lease liabilities are increased to reflect the accretion of interest and reduced for the lease payments made. A summary of lease liabilities aging is described in Note 20(d).

## (i) Exploration, and stripping costs -

*Exploration costs* -

Mineral exploration costs, as well as drilling and other costs incurred for the purpose of converting mineral resources to proven and probable reserves or identifying new mineral resources at development or production stage properties, are charged to the statements of comprehensive income as incurred.

*Stripping cost* -

The stripping costs incurred in the production phase are capitalized as a component of property, plant and equipment, net (see Note 7) if the stripping activity improves access to the ore body or enhances an existing asset. The stripping activity asset is initially measured at cost, which is the accumulation of costs directly incurred to perform the stripping activity. The stripping activity asset is subsequently amortized using the UOP method over the component of the ore body benefitted.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

(j) Provisions -  
*General -*

A provision is recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that resources of the Company will be required to settle the obligation, and an estimate of the amount of the obligation can be calculated. The expense relating to any provision is presented in the statements of comprehensive income, net of any reimbursement, in the period the provision is established.

If the effect of the time value of money is significant, provisions are discounted by applying a discount rate that reflects, where applicable, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a financial expense in the statements of comprehensive income.

*Mine closure provision -*

The Company records a mine closure provision when a contractually or legally enforceable obligation arises. The Company estimates the present value of its future obligation for mine closure and increases the carrying amount of the related asset retirement cost (ARC), which is included in property, plant and equipment in the statements of financial position. Subsequently, the mine closure provision is accreted to full value over time. The related ARC is depreciated using the UOP method over the life of the mine.

The Company evaluates its mine closure provision on a quarterly basis and makes adjustments to estimates and assumptions, including scope, future costs and discount rates, as applicable. Changes in the fair value of the mine closure provision or the useful life of the related asset are recognized as an increase or decrease in the book value of the provision and the related ARC. Any decrease in the mine closure provision and related ARC cannot exceed the current book value of the asset; amounts over the current book value are recorded in the statements of comprehensive income.

## (k) Revenue recognition -

The Company primarily sells copper concentrate and copper cathode in accordance with sales contracts entered into with its customers. Revenues from contracts with customers comprise the fair value of the sale of goods, net of related general sales taxes. Revenue from contracts with customers is recognized when control of goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods.

The Company has concluded that it acts as the principal in its revenue contracts because it normally controls the goods before transferring them to its customers.

The transfer of control is determined in accordance with the terms of each of the contracts entered into with the Company's customers; generally, under such contracts, the transfer of control occurs at the time of shipment or delivery of the goods, including transportation.

The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. The Company consider the only performance obligation is the delivery of the goods. In determining the transaction price for the sale of copper concentrates and copper cathode, the Company considers the effect of variable consideration and the existence of significant financing components.

Revenues from the sale of copper concentrates and cathodes are recorded net of commercial deductions. Commercial deductions include price adjustments for treatment and refining charges and may include certain penalties that, according to the applicable contract, are deducted from the international spot price, and that are incurred after the time of sale of the applicable concentrate. The Company considers these deductions as part of the transaction price. The normal credit term is within 30 days after the fulfillment of the terms of the contract.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

*Variable consideration -*

If the consideration in the contract includes a variable amount, the Company estimates the amount of consideration to which it will be entitled in exchange for transferring the goods to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognized will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

The Company's sales of copper concentrates and cathodes allow for price adjustments based on the market price at the end of the trading period stipulated in the contract. These are called provisional pricing agreements in which the selling price of the copper is settled in a contractually specified future month based on quoted monthly average copper settlement prices. Sales price adjustments occur based on movements in quoted market prices until the end of the trading period. The period between provisional billing and the end of the listing period generally ranges from one to six months.

In addition, the Company's sales of copper concentrates and cathodes are also subject to slight variations in their amount that may occur while the goods are in transit to their destination as a result of variations in moisture, weight and mineral grades. These variations are recognized directly as part of "Revenues" once the Company reaches an agreement with the corresponding customer regarding the final amounts sold.

Sales of copper concentrates and cathodes at provisional prices include a gain (loss) to be received at the end of the trading period; this is considered a variable consideration. Changes in price during the listing period are recognized within "Revenues."

For provisional pricing arrangements, any future changes to the quotation period are embedded within provisionally priced trade receivables and therefore are within the scope of IFRS 9, "Financial Instruments" and not within the scope of IFRS 15. Given the exposure to the price of raw materials, trade receivables with a provisional price will not pass the test of cash flow characteristics within IFRS 9 and will be required to be measured at fair value with changes in the statement of comprehensive income from the initial recognition and until the settlement date. Subsequent changes in fair value are recognized in the statement of comprehensive income for each period. Changes in fair value during and until the end of the trading period are estimated by reference to the updated forward market prices for copper, as well as taking into account other relevant fair value considerations established in IFRS 13, "Fair Value Measurement," including adjustments for interest rate and credit risk.

Revenue is recognized at the amount the entity expects to be entitled. The estimated price that is expected to be received at the end of the quotation period is generally the shipping or delivery month price, according to the terms of the contracts and using the most recently determined estimate of metal in concentrate (based on initial assay results) and the estimated forward price.

The requirements in IFRS 15 on constraint estimates of variable consideration are also applied to determine the amount of variable consideration that can be included in the transaction price.

*Significant financing components -*

The Company receives short-term advances from its customers. Using the practical expedient in IFRS 15, the Company does not adjust the promised amount of consideration for the effects of a significant financing component if it expects, at contract inception, that the period between the transfer of the promised good to the customer and when customer pays for that good will be one year or less.

*Contract balances -**Contract assets*

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company transfers goods or services to a customer before the customer pays for those goods or services or before payment is due, a contract asset is recognized for the earned consideration that is conditional. The Company does not have any contract assets as performance and a right to consideration occurs within a short period of time and all rights to consideration are unconditional.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

*Trade receivables*

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). See Note 2(d) for accounting policies for financial assets.

*Contract liabilities*

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays before the Company transfers goods or services to the customer, a contract liability is recognized when the payment is made, or the payment is due (whichever is earlier). Contract liabilities are recognized as revenue when the Company performs under the contract.

## (l) Income taxes, deferred taxes and other taxes -

*Income taxes -*

Income tax assets and liabilities are measured at the amounts expected to be paid to or recovered from the tax authorities. The amount of current tax payable or receivable is the best estimate of the tax amount to be paid or received that reflects uncertainty related to income taxes, if any. The tax rates and tax laws that are applied to compute the amounts are those that are enacted or substantially enacted at the end of the reporting period. The Company calculates the provision for income tax in accordance with the Peruvian tax legislation in force. For the years ended December 31, 2023, 2022 and 2021, the Company was subject to an income tax rate of 32% (see Note 13(b)).

*Uncertainty about the treatment of income taxes -*

The Company determines whether it considers each uncertain tax treatment separately or in conjunction with one or more other uncertain tax treatments based on the approach that best predicts the resolution of the uncertainty.

The Company makes judgments and estimates when there is uncertainty regarding the income tax treatments (see Notes 6 (b) and 11 (d)).

The Company has uncertain tax positions, mainly related to tailing dams, depreciation of fixed assets, sales commissions with non-related companies and low-value fixed asset acquisitions.

The Company determined, based on its tax compliance and transfer pricing study, that its tax treatments are likely to be accepted by the tax authorities (see Notes 6 (b) and 11 (d)).

*Deferred Taxes -*

Deferred taxes are presented using the liability method for differences between the tax basis of assets and liabilities and their book value for financial reporting purposes. Deferred tax liabilities are recognized for all taxable differences. Deferred tax assets are recorded for all deductible differences when there is a probability that there could be taxable earnings against which the deductible difference could be applied.

The book value of deferred tax assets is reviewed at the end of each period and reduced to an amount that is more likely than not to be realized against taxable earnings. Deferred tax assets that are not recognized are reassessed each period and are recognized when it is more likely than not that those future taxable earnings will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at tax rates that are expected to be applicable during the year when the assets are realized or the liabilities are liquidated, based on the tax rates (and tax laws) that have been enacted or substantively enacted at the end of the period, and reflects uncertainty related to income taxes, if any. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset tax assets against tax liabilities and the deferred tax is related to the same entity and the same tax authority.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

*Mining Taxes -*

On September 29, 2011, Law 29788 (which amended Law 28528) was enacted creating a new mining tax and royalty regime in Peru. Under the new regime, companies are subject to the payment of royalties and a special mining tax. Under the terms of its current 15-year stability agreement (see Note 13(a)), which became effective January 1, 2014, the Company is subject to mining royalties and a special mining tax for all of its mining production (see Note 13(d)).

The amount to be paid for mining royalties will be the greater of (i) a progressive rate ranging of from 1% to 12% of quarterly operating income depending upon the Company's level of operating margins or (ii) 1% of quarterly sales. Mining royalties calculated on sales are presented in "Other operating expenses." (see Note 17).

Mining royalties and special mining tax are accounted for in accordance with International Accounting Standard (IAS 12), "Income Tax" because they have the characteristics of an income tax. This is considered to be the case when they are imposed under government authority and the amount payable is based on taxable income-rather than physical quantities produced or as a percentage of revenue after adjustment for temporary differences. Legal rules and rates used to calculate the amounts payable are those in effect on the date of the statement of financial position.

Therefore, obligations arising from mining royalties and special mining tax are recognized as income tax under the scope of IAS 12, "Income Tax." Both, mining royalties and special mining tax generate deferred tax assets and liabilities, which must be measured using the average rates expected to apply to operating income in the quarter in which the company expects to reverse temporary differences.

*Supplementary Retirement Fund -*

On July 9, 2011, Law 29741 was enacted and established a Mining, Metallurgical and Steel Supplementary Retirement Fund (SRF), which is a social security retirement fund for mining, metals and steel industry workers. Under the terms of its current 15-year stability agreement, the Company is subject to SRF, which is calculated as 0.5% of taxable income.

(m) *Benefits to employees -*

Salaries and wages, bonuses, severance and vacation benefits are calculated in accordance with IAS 19, "Employee Benefits" and current Peruvian legislation.

*Worker's profit sharing -*

The Company recognizes worker's profit sharing in accordance with IAS 19. Worker's profit sharing is calculated in accordance with Peruvian laws (Legislative Decree No. 892), and the Company's worker's profit sharing rate is 8% over the net taxable base of the current year. According to Peruvian law, the limit in the worker's profit sharing that an employee can receive is equivalent to 18 months of wages, and any excess above such limit is transferred to the Regional Government and the National Fund for Employment's Promotion and Training (FONDOEMPLEO). The Company's worker's profit share is recognized as a liability in the statements of financial position and as an operating expense in the statements of comprehensive income.

The long-term portion of "Provision for employee benefits" in the statement of financial position includes the estimate of profit sharing determined in accordance with the IFRIC 23, "Uncertainty over Income Tax Treatments" and includes any workers bonuses to be paid in a period greater than 12 months.

(n) *Fair value measurement -*

The Company measures embedded derivatives at fair value as of each date presented in the statements of financial position.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described, as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities based on the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

(o) Basic and diluted earnings per share -

Basic and diluted earnings per share have been calculated based on the weighted average number of common shares outstanding during the period. When the number of shares is modified because of capitalization of retained earnings, the net income per basic and diluted shares is adjusted retroactively for all of the periods reported. For the years ended December 31, 2023, 2022 and 2021, the Company did not have any financial instruments with dilutive effects; as a result, the basic and diluted shares are the same in all periods presented.

(p) Changes in accounting policies and disclosures –

During the year ended December 31, 2023, the Company applied for the first-time the Amendments to IAS 1 and IFRS Practice Statement 2, “Disclosure of Accounting Policies” and therefore is only disclosing its material accounting principles and policies in Note 2.

(q) Standards issued but not effective -

Below is a summary of the improvements and / or modifications to IFRS that are not yet effective, but would be applicable to the Company:

- *Amendments to IAS 1: Classification of Liabilities as Current or Non-current and Non-current Liabilities with Covenants -*

In January 2020 and October 2022, the International Accounting Standards Board issued amendments to paragraphs 69 to 76 of IAS 1 to specify the requirements for classifying liabilities as current or non-current. The amendments clarify:

- What is meant by a right to defer settlement.
- That a right to defer must exist at the end of the reporting period.
- That classification is unaffected by the likelihood that an entity will exercise its deferral right.
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification.

In addition, a requirement has been introduced to require disclosure when a liability arising from a loan agreement is classified as non-current and the entity’s right to defer settlement is contingent on compliance with future covenants within 12 months.

The amendments are effective for annual reporting periods beginning on or after January 1, 2024, and must be applied retrospectively.

The amendments are not expected to have a material impact on the Company’s financial statements.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

- (r) Reclassifications of comparative information –  
Management has made reclassifications in the income statement for the year ended December 31, 2022 and 2021, in the item “Financial Expenses and Income,” presenting a credit for the favorable amounts of “Financial Expenses” within this item, which were previously presented as “Financial Income” totaling US\$4.9 and US\$1.1 million respectively, related to interest on uncertain tax positions.

**3. Cash and cash equivalents**

This item is made up as follows:

	<b>December 31, 2023</b>	<b>December 31, 2022</b>
	US\$(000)	US\$(000)
Cash in banks	15,560	18,839
Cash equivalents (a)	<u>494,056</u>	<u>534,925</u>
	<u><u>509,616</u></u>	<u><u>553,764</u></u>

- (a) Cash equivalents as of December 31, 2023 and 2022, includes a portfolio of investments in highly marketable liquid investments (mainly investments classified as “AAA” by Standard & Poor’s and Moody’s) which yield variable returns, and are classified as cash equivalents because they are readily convertible to known amounts of cash and management plans to use them for its short-term cash needs. Because of the short maturity of these investments (i.e., less than 90 days), the carrying amount of these investments corresponds to their fair value at the date of the financial statements. Changes in the fair value of these investments are presented in the “Financial income” caption (see Note 18).

[Table of Contents](#)

Notes to the Financial Statements (continue)

**4. Related parties**

Accounts receivable from related parties and accounts payable to related parties are made up as follows:

	December 31, 2023 US\$(000)	December 31, 2022 US\$(000)
<b>Accounts receivable from related parties</b>		
<u>Parent Company</u>		
FMC (a)	531,978	555,150
<u>Other related parties</u>		
Sumitomo (b)	9,902	21,098
Climax Molybdenum Marketing Corporation (c)	1,663	27,069
Sociedad Contractual Minera el Abra	7	—
<u>Embedded derivatives</u>		
Embedded derivatives (d)	37,435	91,011
Total accounts receivable from related parties	<u>580,985</u>	<u>694,328</u>
<b>Classification by measurement</b>		
Accounts receivables from related parties (subject to provisional pricing)	434,820	509,660
Accounts receivables from related parties (not subject to provisional pricing)	108,730	93,657
Embedded derivatives (d)	37,435	91,011
	<u>580,985</u>	<u>694,328</u>
<b>Accounts payable to related parties</b>		
<u>Parent Company</u>		
FMC	330	324
<u>Other related parties</u>		
Freeport-McMoRan Sales Company Inc.	2,938	2,687
Minera Freeport-McMoRan South America Ltda	182	163
Minera Freeport-McMoRan South America SAC	18	—
Total accounts payable to related parties	<u>3,468</u>	<u>3,174</u>

- (a) Accounts receivable from FMC mainly correspond to sales of copper concentrate and copper cathode. The Company has a long-term agreement with FMC through which it has committed to sell between 70% and 80% of its annual copper concentrate production through December 31, 2021, and will continue in force until one of the parties communicates its intention to terminate with an advance written notice of at least 24 months. Terms of the contract are reviewed annually.
- (b) The Company has a long-term agreement with Sumitomo through which it has committed to sell 21% of its annual copper concentrate production through December 31, 2021, and will continue in force until one of the parties communicates its intention to terminate with an advance written notice of at least 24 months. Terms of the contract are reviewed annually.
- (c) The Company has a long-term agreement with Climax Molybdenum Marketing Corporation (a wholly owned subsidiary of FMC) through which it has committed to sell 100% of its annual molybdenum concentrate production, at a price based on MWDO and under incoterm CIF from February 1, 2020, through January 31, 2022. A new agreement with the same terms began on February 1, 2022, until January 31, 2023, and will continue in force until one of the parties communicates its intentions to terminate with and written notice.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

- (d) Reflects the embedded derivative adjustment associated with accounts receivable from related parties (see Note 2(d) and 21).

Short-term and long-term employee benefits are recognized as expenses during the period earned. Benefits received by key management personnel represent 0.27% of total revenues for the year ended December 31, 2023 (0.29% for year ended December 31, 2022 and 0.25% for year ended December 31, 2021). For the years ended December 31, 2023, 2022 and 2021, Freeport granted stock-based compensation to certain key management personnel (see Note 12(d)).

*Terms and transactions with related parties -*

Transactions with related parties are made at normal market prices. Outstanding balances are unsecured, interest free and settlement occurs in cash. There have been no guarantees provided or received for any accounts receivable from related parties. As of December 31, 2023, 2022 and 2021, the Company had not recorded any expected credit loss in accounts receivable from related parties.

The following is a summary of the transactions with related entities that affected results (not including copper and molybdenum sales described in Note 14) for the years ended December 31, 2023, 2022 and 2021:

	2023 US\$(000)	2022 US\$(000)	2021 US\$(000)
<b>Revenues</b>			
Reimbursement of expenses	344	747	65
Supplies	—	2	—
	<u>344</u>	<u>749</u>	<u>65</u>
<b>Expenses</b>			
Reimbursement of information technology services	25,055	22,023	16,941
Commissions	11,347	10,550	8,484
Management fee (See Note 15)	3,098	2,540	2,352
Stock-based compensation (a)	2,776	2,502	2,894
Supplies	6	7	—
	<u>42,282</u>	<u>37,622</u>	<u>30,671</u>

- (a) As indicated in the table above, during 2023, 2022 and 2021 the expense for stock-based compensation amounted to US\$2.8 million, US\$2.5 million and US\$2.9 million, respectively. The related payments / settlements totaled US\$2.8 million, US\$3.4 million and US\$2.7 million respectively. This activity resulted in a net decrease of US\$0.9 million for the year ended December 31, 2022 and US\$0.2 million for the year ended December 31, 2021 in "Other equity contributions" in the statements of changes in shareholders' equity.

Notes to the Financial Statements (continue)

**5. Inventories**

This item is made up as follows:

	<b>December 31, 2023</b>	<b>December 31, 2022</b>
	US\$(000)	US\$(000)
<b>Current</b>		
Materials and supplies (a)	449,168	411,656
Work-in-process (WIP) (b)	170,918	200,969
Finished goods:		
Copper concentrate	16,059	23,012
Copper cathode	6,762	10,976
Molybdenum concentrate	600	3,598
	<u>643,507</u>	<u>650,211</u>
<b>Non-current</b>		
Work-in-process WIP (b)	<u>302,204</u>	<u>287,218</u>
<b>Total inventories</b>	<u><u>945,711</u></u>	<u><u>937,429</u></u>

- (a) For the years ended December 31, 2023, 2022 and 2021 the Company recognized a net expense associated with materials and supplies obsolescence of US\$12.5 million, US\$4.1 and US\$3.6 million respectively.
- (b) WIP inventories represent mill and leach stockpiles that have been extracted from the open pit and are available for copper recovery. Based on the future mine plan production, the Company identifies the portion of inventory that is classified as current or non-current. For mill stockpiles, recovery is through milling and concentrating. For leach stockpiles, recovery is through exposure to acidic solutions that dissolve copper and deliver it in a solution to extraction processing facilities. For the year ended December 31, 2023, the Company recorded metal inventory adjustments totaling US\$1.5 million associated with the write-off of leach stockpiles. For the year ended December 31, 2022, the Company recorded metal inventory adjustments totaling US\$7.7 million associated with the write-off of certain long-term mill and leach stockpiles.

**6. Other non-financial assets**

This item is made up as follows:

	December 31, 2023 US\$(000)	December 31, 2022 US\$(000)
<b>Current</b>		
Value added tax (VAT) credit	39,143	33,014
<b>Non-current</b>		
Other receivables (a)	274,029	333,338
Uncertain tax positions (b)	18,252	16,635
Other taxes to be recovered	1,981	1,928
	<u>294,262</u>	<u>351,901</u>
<b>Total other non-financial assets</b>	<u>333,405</u>	<u>384,915</u>

- (a) As of December 31, 2023, represents disbursements made to SUNAT (National Superintendency of Customs and Tax Administration) under protest by the Company through year 2016 of US\$192.6 million (US\$ 262.3 million as of December 31, 2022), for the years 2015 through 2017 related to customs taxes of US\$ 16.2 million (US\$15.7 million as of December 31, 2022) and for the year 2018 related to social contributions to EsSalud (Social Health Insurance) of US\$ 8.4 million (no balance as of December 31, 2022).

Additionally includes tax credits associated with completion of SUNAT audits through year 2016 of US\$56.8 million as of December 31, 2023, and US\$55.3 million as of December 31, 2022. According to current tax procedures and the timeframe for resolving these types of claims, management and its legal advisors expect resolution of this matter will be favorable to the Company and amounts will be recoverable (see Notes 13(c) and 13(e)).

- (b) The balance as of December 31, 2023, represents income tax benefits for the years 2017, 2019, 2020, 2022 and 2023 of US\$18.3 million determined in accordance with the IFRIC 23, "Uncertainty over Income Tax Treatments" (US\$16.6 million as of December 31, 2022, for the years 2017, 2019 and 2020).

Notes to the Financial Statements (continue)

**8. Trade accounts payable**

Trade accounts payable are primarily originated by the acquisition of materials, supplies, spare parts and services. These obligations are primarily denominated in U.S. dollars, have current and non-current maturities, and do not accrue interest. No guarantees have been granted. As of December 31, 2023, trade accounts payable includes US\$ 25.9 million related to capital projects (US\$ 35.8 million as of December 31, 2022).

**9. Other accounts payable**

This item is made up as follows:

	<b>December 31, 2023</b>	<b>December 31, 2022</b>
	US\$(000)	US\$(000)
<b>Current</b>		
Payroll withholdings (a)	6,707	7,200
Penalties to the Geological, Mining and Metallurgical Institute	3,713	6,547
Social Health Insurance of Peru contribution	2,716	2,469
Mining royalties (see Note 2(l))	2,367	3,309
Miscellaneous interest payable	1,904	1,609
Other	1,840	1,471
Excess of salaries limit of workers profit sharing (b)	—	38,027
	<u>19,247</u>	<u>60,632</u>
<b>Total current</b>	<u>19,247</u>	<u>60,632</u>

(a) As of December 31, 2023, represents employees withholding income tax US\$ 3.0 million (US\$ 3.7 million as of December 31, 2022), pension funds of US\$ 2.6 million (US\$ 2.5 million as of December 31, 2022) and other payroll withholdings of US\$ 1.1 million (US\$ 1.0 million as of December 31, 2022).

(b) As of December 31, 2022, corresponded to the estimated balance associated with the excess salaries limit in workers profit sharing (which included interest of US\$ 18.8 million). This is related to adjustments of previous years income tax assessments, which were recognized in 2020 mainly as a result of the international arbitration proceeding initiated by the Company (see Note 13 (d)). During the year ended December 31, 2023, the Company made the payment to the Arequipa Regional Government.

[Table of Contents](#)

Notes to the Financial Statements (continue)

**10. Other financial liabilities (debt)**

This item is made up as follows:

	December 31, 2023 US\$(000)	December 31, 2022 US\$(000)
Current debt:		
Lease liabilities (a)	<u>9,909</u>	<u>7,028</u>
Non-current debt:		
Lease liabilities (a)	<u>49,683</u>	<u>56,097</u>
Total other financial liabilities	<u><u>59,592</u></u>	<u><u>63,125</u></u>

(a) The lease liability consists of leased land, buildings and other constructions, and machinery and equipment which are used in mine operations.

Set out below are the carrying amounts of lease liabilities and the movements during the period:

	2023 US\$(000)	2022 US\$(000)
Balance at beginning of the year	63,125	70,120
Additions	3,946	4,957
Accrued interest (see Note 18)	3,685	3,912
Payments	(7,423)	(12,327)
Interest payments	(3,685)	(3,912)
Exchange rate effect	(56)	375
<b>Total lease liabilities</b>	<u><u>59,592</u></u>	<u><u>63,125</u></u>

For the year ended December 31, 2023, the following are the amounts recognized in profit:

	2023 US\$(000)	2022 US\$(000)
Expenses related to variable lease payments, low-value and short-term leases	17,755	13,431
Depreciation charge of right-of-use assets (see Note 7(b) and 15)	11,117	12,708
Interest expense on lease liabilities (see Note 18)	<u>3,685</u>	<u>3,912</u>
	<u><u>32,557</u></u>	<u><u>30,051</u></u>

The Company has certain lease contracts for machinery and equipment used in mine operations that contain variable payments based on the number of hours that machinery or equipment is used in operations.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

## (b) Revolving Credit Facility -

On May 31, 2022, the Company entered into a US\$350 million, senior unsecured revolving credit facility with several banks led by the Bank of Nova Scotia. The revolving credit facility expires on May 31, 2027. In May 2022, the Company borrowed US\$325 million on this revolving credit facility, which was repaid using operating cash flows during June 2022. During the year ended December 31, 2022, the Company has recognized debt issuance costs related to the revolving credit facility of US\$3.5 million, which are being amortized over the term of the revolving credit facility agreement. For the years ended December 31, 2023 and 2022, the Company recognized interest expense in the statements of comprehensive income of US\$1.9 million associated with the revolving credit facility (see Note 18).

Interest on the revolving credit facility is calculated based on the adjusted Secured Overnight Financing Rate plus a spread and credit rate differential adjustment contemplated in the contract, and the undrawn portion is subject to a commitment fee of 0.50%.

*Restrictive Covenants* –

The revolving credit facility contains certain financial ratios that the Company must comply with on a quarterly basis, including a total net debt to earnings before interest, taxes, depreciation, and amortization ratio (which cannot exceed 3.50 to 1) and an interest coverage ratio (which cannot be less than 3.0 to 1), defined by the agreement. As of December 31, 2023, the Company was in compliance with all of its covenants.

Following is the movement of the changes derived from the financing activities for the year ended December 31, 2023 and 2022:

	January 1, 2022	Additions	Payments	Long term to short term transfers	Others	December 31, 2022	Additions	Payments	Long term to short term transfers	Others	December 31, 2023
	US\$(000)	US\$(000)	US\$(000)	US\$(000)	US\$(000)	US\$(000)	US\$(000)	US\$(000)	US\$(000)	US\$(000)	US\$(000)

Notes to the Financial Statements (continue)

**11. Provisions**

This item is made up as follows:

	December 31, 2023 US\$(000)	December 31, 2022 US\$(000)
<b>Current:</b>		
Provision for legal contingencies (a)	2,139	465
Provision for social commitments (b)	400	3,096
Provision for remediation and mine closure (c)	234	423
<b>Total current</b>	<u>2,773</u>	<u>3,984</u>
<b>Non-current:</b>		
Provision for remediation and mine closure (c)	259,610	209,237
Provision for social commitments (b)	9,983	7,303
Provision for legal contingencies (a)	1,087	2,211
Provision for uncertainty over income tax treatments (d)	2,140	615
<b>Total non-current</b>	<u>272,820</u>	<u>219,366</u>

- (a) The provision for legal contingencies is associated with OSINERGMIN (Supervisory Agency for Investment in Energy and Mining) and SUNAFIL (National Superintendence of Labor Inspection) fines, which have been appealed by the Company.
- (b) The provision for social commitments is associated with repaving Alata-Congata Road (US\$6.1 million as of December 31, 2023 and 2022) and an irrigation project in La Joya (US\$4.3 million as of December 31, 2023 and 2022).
- (c) The Company's mineral exploitation activities are subject to environmental protection standards. In order to comply with these standards, the Company has obtained the approval for the Environment Adequacy Program (PAMA) and for the Environmental Impact Studies (EIA), required for the operation of Cerro Verde's production unit.

On October 14, 2003, Law 28090 was enacted, which regulates the commitments and procedures that entities involved in mining activities must follow in order to prepare, file and implement a mine site closure plan, as well as the respective environmental guarantees that assure compliance with the plan in accordance with protection, conservation and restoration of the environment. On August 15, 2005, the regulations regarding this law were approved.

During 2006, in compliance with the mentioned law, the Company completed the closure plans for its mine site and presented it to the Ministry of Energy and Mines.

The closure plans for its mine site were approved by Resolution No 302-2009 MEM-AAM and its modifications were approved by Resolution No 207-2012 MEM-AAM, Resolution No 186-2014 MEM-DGAAM, Resolution No 032-2018 MEM-DGAAM and its last modification approved with Resolution No 0358-2023 MEM-DGAAM. To date, the Company has issued a letter of credit totaling US\$107.9 million as guarantee of the most recently approved plan.

The estimate of remediation and mine closure costs is based on studies prepared by independent consultants and based on current environmental regulations. This provision corresponds mainly to the activities to be performed in order to restore the areas affected by mining activities. The main tasks to be performed include ground removal, soil recovery, and dismantling of plant and equipment.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

Under the closure regulations, the Company must submit a closure plan that includes the reclamation methods, closure cost estimates, methods of control and verification, closure and post-closure plans, and financial assurance. In compliance with the requirement for five-year updates, during the year 2023, the Company submitted its updated closure plan which was approved in December 2023 by the Ministry of Energy and Mines.

The table below presents the changes in the provision for remediation and mine closure:

	2023 US\$(000)	2022 US\$(000)
<b>Beginning balance</b>	209,660	222,910
Accretion expense	9,917	4,566
Changes in estimates (see Note 7)	40,425	(17,812)
Progressive mine closure payments in hydrometallurgy process	(149)	—
Exchange rate effect	(9)	(4)
	<u>259,844</u>	<u>209,660</u>
<b>Final balance</b>	<u>259,844</u>	<u>209,660</u>

As of December 31, 2023, the Company's provision for remediation and mine closure was US\$259.8 million (reflecting the future value of the provision for remediation and mine closure of US\$579.8 million, discounted using an annual risk-free rate of 4.13%). As of December 31, 2022, the Company's provision for remediation and mine closure was US\$209.7 million (reflecting the future value of the provision for remediation and mine closure of US\$477.6 million, discounted using an annual risk-free rate of 4.06%). The Company considers this liability sufficient to meet the current environmental protection laws approved by the Ministry of Energy and Mines.

As of December 31, 2023, changes in estimate (increase of US\$40.4 million) primarily related to higher future nominal flows. As of December 31, 2022, changes in estimates (decrease of US\$17.8 million) primarily relate to changes in the discount rate, partially offset by higher future nominal flows and a change in the escalation rate.

- (d) As of December 31, 2023, represents interest and penalties related to income tax for the years 2018, 2021 and 2022 and related taxes, determined in accordance with the IFRIC 23, "Uncertainty over Income Tax Treatments." As of December 31, 2022, represents interest and penalties related to income tax for the years 2018 and 2021.

**12. Shareholders' equity**

- (a) Capital stock -  
As of December 31, 2023 and 2022, the authorized, subscribed and paid-up capital in accordance with the Company's by-laws and its related modifications was 350,056,012 common shares.

The nominal value of the shares is US\$2.83 per share.

The quoted price of these shares was US\$36.50 per share as of December 31, 2023 (US\$29.80 per share as of December 31, 2022).

[Table of Contents](#)

## Notes to the Financial Statements (continue)

As of December 31, 2023, the Company's capital stock structure is as follows:

Percentage of individual interest in capital	Number of shareholders	Total percentage interest
Up to 1.00	2,273	5.86
From 1.01 to 20.00	1	19.58
From 20.01 to 30.00	1	21.00
From 30.01 to 60.00	1	53.56
	2,276	100.00

## (b) Other capital reserves -

Other capital reserves include the Company's legal reserve, which is in accordance with the Peruvian Companies Act, and is created through the transfer of 10% of the earnings for the year up to a maximum of 20% of the paid-in capital (US\$198.1 million as of December 31, 2023 and 2022). The legal reserve must be used to compensate for losses in the absence of non-distributed earnings or non-restricted reserves, and transfers made to compensate for losses must be replaced with future earnings. This legal reserve may also be used to increase capital stock, but the balance must be restored from future earnings.

## (c) Dividend distribution -

Beginning January 1, 2017, dividends paid to shareholders, other than domiciled legal entities, are subject to withholding of income tax at a rate of 5.0%.

At the annual mandatory shareholders meeting held on March 22, 2024, shareholders approved a US\$150 million dividend payment (US\$0.43 per common share). The total amount of this dividend was applied against retained earnings. This dividend was paid on April 26, 2024, and complied with the withholding tax rules (4.1%).

At a Board Meeting held on November 10, 2023, the distribution of a US\$250 million dividend (US\$0.71 per common share) was approved. The total amount of this dividend was applied against retained earnings. This dividend was paid on December 14, 2023, and complied with the withholding tax rules (4.1%).

At a Board Meeting held on July 3, 2023, the distribution of a US\$250 million dividend (US\$0.71 per common share) was approved. The total amount of this dividend was applied against retained earnings. This dividend was paid on August 3, 2023, and complied with the withholding tax rules (4.1%).

At the annual mandatory shareholders meeting held on March 24, 2023, shareholders approved a US\$250 million dividend payment (US\$0.71 per common share). The total amount of this dividend was applied against retained earnings. This dividend was paid on April 28, 2023, and complied with the withholding tax rules (4.1%).

At a Board Meeting held on November 16, 2022, the distribution of a dividend of US\$250 million (US\$0.71 per common share) was approved. The total amount of this dividend was applied against retained earnings. This dividend was paid on December 20, 2022, and complied with the withholding tax rules (4.1%).

At the annual mandatory shareholders meeting held on March 24, 2022, shareholders approved a US \$150 million dividend payment (US\$0.43 per common share). The total amount of this dividend was applied against retained earnings. This dividend was paid on April 29, 2022, and complied with the withholding tax rules (4.1%).

## Notes to the Financial Statements (continue)

## (d) Stock-based compensation -

In accordance with the Senior Executive Plan (SEP), stock-based compensation in the ultimate parent (Freeport) is granted to the Company's senior executives. Amounts presented in "Other equity contributions" in the statement of change in equity totaled US\$10.8 million as of December 31, 2023 and 2022. The fair value of stock options is determined using the Black-Scholes-Merton option pricing model. The fair value of restricted share units (RSUs) is based on Freeport's share price on the grant date. Shares of Freeport's common stock are issued at the vesting date of RSUs settled in shares. The fair value of performance share units (PSUs) is determined using Freeport's stock price and a Monte-Carlo simulation model.

Stock options granted under such plans generally expire 10 years after the grant date. Stock options granted prior to 2018 generally vest in 25% annual increments; beginning in 2018, awards granted vest in 33% annual increments beginning one year from the date of grant. Stock option agreements provide that participants will receive the following year's vesting upon retirement. Therefore, on the grant date, the Company accelerates one year of amortization for retirement-eligible employees. Stock options provide for accelerated vesting only upon certain qualifying terminations of employment within one year following a change of control.

The Company recognizes the compensation cost in the statement of comprehensive income during the award period according to the fair value of the instruments granted. The cost is recognized as an equity contribution in "Other equity contributions."

**13. Tax situation**

- (a) On February 13, 1998, the Company signed an Agreement of Guarantees and Measures to Promote Investments with the Government of Peru, under the Peruvian General Mining Law (the 1998 Stability Agreement). Upon approval of the 1998 Stability Agreement, the Company was subject to the tax, administrative and exchange regulations in force on May 6, 1996, for a period of 15 years, beginning January 1, 1999, and ending December 31, 2013.

On July 17, 2012, the Company signed a new Agreement of Guarantees and Measures to Promote Investments with the Government of Peru, under the Peruvian General Mining Law. Upon approval of this stability agreement, the Company became subject to the tax, administrative and exchange regulations in force on July 17, 2012, for a period of 15 years, beginning January 1, 2014, and ending December 31, 2028.

- (b) Under its current 15-year tax stability agreement, the Peruvian income tax rate applicable to the Company is 32%. As of December 31, 2023, the Company recorded income tax benefits, which it expects to use to offset future income tax provisions or receive as a refund from SUNAT, totaling US\$18.3 million (US\$16.6 million as of December 31, 2022) (see Note 6 (b)).

For the year ended December 31, 2023, the Company recognized current income tax expense of US\$582.4 million (including US\$48.7 million of mining royalties, US\$47.4 million for special mining, and US\$7.5 million for the SRF), and a deferred income tax credit of US\$30.6 million, resulting in a total income tax expense of US\$551.8 million that has been included in the statements of comprehensive income.

For the year ended December 31, 2022, the Company recognized current income tax expense of US\$445.1 million (including US\$44.2 million for special mining tax, US\$44.1 million of mining royalties and US\$6.4 million for the SRF), and a deferred income tax expense of US\$63.4 million, resulting in a total income tax expense of US\$508.5 million that has been included in the statements of comprehensive income.

For the year ended December 31, 2021, the Company recognized current income tax expense of US\$704.5 million (including US\$74.6 million of mining royalties, US\$70.3 million for special mining tax, and US\$8.8 million for the SRF), and a deferred income tax expense of US\$31.2 million, resulting in a total income tax expense of US\$735.7 million that has been included in the statements of comprehensive income.

## Notes to the Financial Statements (continue)

- (c) SUNAT has the right to examine, and if necessary, amend the Company's income tax return for the last four years. The Company's income tax for the years 2017 through 2022 are open to examination by the tax authorities. To date, SUNAT has concluded its review of the Company's income tax through the year 2016 and the Company is in the claim and/or appeal process for the years 2003 through 2016.

As a result of the many possible interpretations of current legislation, it is not possible to determine whether or not future reviews (including reviews of years pending examination) will result in additional tax liabilities for the Company. If management determines it is more likely than not that additional taxes are payable, these amounts, including any related interest and penalties, will be charged to expense in that period. In management's and its legal advisors' opinions, any possible tax settlement is not expected to be material to the financial statements.

- (d) Royalties and special mining taxes –

On June 23, 2004, Law 28528 was approved, which requires the holder of a mineral concession to pay a royalty in return for the exploitation of metallic and non-metallic minerals. The royalty is calculated using rates ranging from 1% to 3% of the value of concentrate or its equivalent according to the international price of the commodity published by the Ministry of Energy and Mines. Prior to January 1, 2014, the Company determined that these royalties were not applicable because it operated under the 1998 Stability Agreement with the Peruvian government. However, beginning January 1, 2014, the Company began paying royalties calculated on operating income with rates between 1% to 12% and a new special mining tax for its entire production base under its current 15-year tax stability agreement, which became effective January 1, 2014. The amount paid for the mining royalty is the greater of a progressive rate of the quarterly operating income or 1% of quarterly sales.

SUNAT assessed mining royalties on materials processed by the Company's concentrator, which commenced operations in late 2006. These assessments cover the period December 2006 to December 2013. The Company contested each of these assessments because it considers that its 1998 Stability Agreement exempts from royalties all minerals extracted from its mining concession, irrespective of the method used for processing such minerals. No assessments can be issued for years after 2013, as the Company began paying royalties on all of its production in January 2014 under its new 15-year stability agreement.

Since 2017, the Company has recognized the related expense for the royalty and special mining tax assessments for the period December 2006 through the year 2013. Since 2014, the Company has made total payments of S/2.9 billion (US\$791.9 million based on the date of payment exchange rate) for the disputed assessments for the period from December 2006 through December 2013 under installment payment programs granted through scheduled monthly installments, which were paid in advance in August 2021.

In February 2020, Freeport filed, on its own behalf and on behalf of the Company, international arbitration proceedings against the Peruvian government under the United States-Peru Trade Promotion Agreement. The hearing on the merits was held in May 2023 and the final closing argument took place on July 15, 2023. In April 2020, Sumitomo filed parallel international arbitration proceedings against the Peruvian government under the Netherlands-Peru Bilateral Investment Treaty. The hearing on the merits was held in February 2023.

## Notes to the Financial Statements (continue)

## (e) Other assessments received from SUNAT -

The Company has also received assessments from SUNAT for additional taxes (other than the mining royalty and special mining tax explained in Note 13(d) above), including penalties and interest. The Company has filed objections to the assessments because it believes it has properly determined and paid its taxes. A summary of these assessments follows:

Fiscal year	Taxes US\$(000)	Penalty and Interest US\$(000)	Total US\$(000)
2003 – 2005	8,162	38,870	47,032
2006	10,844	51,963	62,807
2007	11,579	22,102	33,681
2008	16,906	16,923	33,829
2009	56,039	51,680	107,719
2010	53,566	126,406	179,972
2011	40,940	70,065	111,005
2012	869	7,326	8,195
2013	48,622	71,620	120,242
2014	5,344	706	6,050
2015	3,001	23,816	26,817
2016	61,875	3,360	65,235
2017	5,043	3,078	8,121
2018	4,666	4,250	8,916
2019 - 2022	499	172	671
	<u>327,955</u>	<u>492,337</u>	<u>820,292</u>

As of December 31, 2023, the Company has paid US\$819.2 million on these disputed tax assessments. A reserve has been applied against these payments totaling US\$545.2 million, resulting in a net receivable of US\$274.0 million (US\$333.3 million as of December 31, 2022) which the Company believes is collectible and is included in "Other non-financial assets, non-current" (see Note 6(a)) in the statements of financial position for these disputed tax assessments.

## (f) Payments on account of income tax

The Supreme Court, by means of Cassation rulings, has declared unfounded the Company's request to not apply interest and penalties for omissions to payments on account after the presentation of the annual Income Tax return for the cases of 2005 and 2007. As a result, the Company has recognized the financial impact through 2015 related to penalties, interest on penalties and interest (see Note 17(a) and Note 18(a)). Despite this, in May 2023, the Company filed an amparo proceeding against the Cassation rulings for the 2005 case and in July 2023 for the 2007 case.

Notes to the Financial Statements (continue)

**14. Revenues**

(a) This item is made up as follows:

	For the year ended December 31, 2023		For the year ended December 31, 2022		For the year ended December 31, 2021	
	Pounds (000)	US\$(000)	Pounds (000)	US\$(000)	Pounds (000)	US\$(000)
Copper in concentrate	891,451	3,219,033	866,703	3,120,448	794,205	3,421,871
Copper cathode	101,617	394,809	101,368	404,115	91,802	394,256
Other (primarily silver and molybdenum concentrate)		<u>529,386</u>		<u>450,732</u>		<u>383,321</u>
Total revenues		<u>4,143,228</u>		<u>3,975,295</u>		<u>4,199,448</u>

Revenues with related parties totaled US\$4.0 billion for the year ended December 31, 2023 (US\$3.8 billion for the year ended December 31, 2022 and US\$4.0 billion for the year ended December 31, 2021).

As described in Note 2(d), the sale of copper, molybdenum and silver in concentrate are provisionally priced at shipment. Adjustments to the provisional prices are recognized as gains and losses in sales of goods through the month of settlement. Adjustments to provisional priced copper and molybdenum sales resulted in decreases in revenue totaling US\$53.6 million for the year ended December 31, 2023, an increases of US\$ 78.2 million for the year ended December 31, 2022 and a decrease of US\$ 88.6 million for the year ended December 31, 2021.

(b) The following table shows sales by geographic region based on the final destination port:

	For the year ended December 31, 2023 US\$(000)	For the year ended December 31, 2022 US\$(000)	For the year ended December 31, 2021 US\$(000)
Asia	3,083,051	3,229,797	3,223,191
North America	547,934	386,768	429,330
Europe	401,512	165,871	314,425
South America (primarily Peru)	<u>110,731</u>	<u>192,859</u>	<u>232,502</u>
Total sales	<u>4,143,228</u>	<u>3,975,295</u>	<u>4,199,448</u>

(c) Concentration of sales -

For the year ended December 31, 2023, 97%, of the Company's sales were to related entities (FMC, Sumitomo Metal Mining Company and Climax Molybdenum). For the year ended December 31, 2022 and 2021, 95% of the Company's sales were to these related entities.

[Table of Contents](#)

Notes to the Financial Statements (continue)

**15. Cost of sales**

This item is made up as follows:

	For the year ended December 31, 2023 US\$(000)	For the year ended December 31, 2022 US\$(000)	For the year ended December 31, 2021 US\$(000)
Materials and supplies	982,616	915,323	698,246
Property Plant and Equipment Depreciation (see Note 7 and 2(g))	530,199	489,700	470,228
Labor (a)	381,761	343,575	425,524
Third-party services	279,923	246,247	220,920
Energy	249,039	243,549	194,982
Variable lease payments, low-value and short-term leases	17,741	13,369	5,806
Change in finished goods inventory	14,165	(10,368)	(6,129)
Change in work in process inventory	13,538	(1,358)	(16,609)
Loss on materials obsolescence, net	12,496	4,053	3,622
Depreciation for right-of-use assets (see Note 7)	11,117	12,708	12,459
OEFA and OSINERGMIN contributions (b)	8,015	9,308	10,334
Management fees	3,098	2,540	2,352
Intangible amortization	2,342	2,342	1,531
WIP stockpile write-offs (see Note 5 (b))	1,527	7,668	—
Cost related to COVID-19 pandemic (c)	817	43,672	89,050
Other costs	47,658	45,439	42,772
	<u>2,556,052</u>	<u>2,367,767</u>	<u>2,155,088</u>

- (a) For the year ended December 31, 2023, labor includes an expense of US\$130.9 million related to profit sharing. For the year ended December 31 2022 and 2021 include and expense of US\$118.2 million and US\$156.2 million respectively coupled with a credit of S\$3.1 million and an expense of US\$2.6 million, respectively as a result of the recognition of lower contingent liabilities for prior years still open to review by the tax authority).
- (b) The Company is subject to OEFA and OSINERGMIN royalties. These funds are used by these agencies as part of their operating budgets for investment supervision in energy and mining, as well as the environment. The calculation for the OSINERGMIN royalty is 0.14% of invoiced sales and the calculation for the OEFA royalty is 0.10% of invoiced sales for the years ended December 31, 2023, 2022 and 2021.
- (c) For the year ended December 31, 2023, the expense is primarily related to medical response center service for suspected cases of COVID (for the year ended December 31, 2022, the expense is primarily related to medical tests, for the year ended December 31, 2021, the Company recognized expenses of US\$89.1 million, mainly for labor costs associated with quartered-personnel at the mine site, including housing costs and medical tests). According to the Peruvian government's Supreme Decree No. 008-2020, the declaration of COVID as a health emergency expired on May 25, 2023.

In compliance with corporate policies, the Company recognizes administrative costs as an inventory cost (approximately US\$32.6, US\$44.5, and US\$45.3 million for the year ended December 31, 2023, 2022 and 2021 respectively. The effect of this policy is immaterial to the financial statements as a whole.

Cathode freight	4,102	3,831	1,960
Other expenses	2,457	2,595	2,442
	<u>158,244</u>	<u>157,373</u>	<u>109,886</u>

**17. Other operating expenses**

This item is made up as follows:

	For the year ended December 31, 2023 US\$(000)	For the year ended December 31, 2022 US\$(000)	For the year ended December 31, 2021 US\$(000)
Penalties of income tax payments on account (a)	70,045	—	—
Exploration expenses	9,179	4,973	170
Royalty non-income tax (b)	4,488	9,238	—
Impairment of assets	3,546	—	—
Cancellation of projects	2,164	18	195
Optimization and prefeasibility/feasibility studies	1,401	8,905	5,929
Tax contingencies	258	1,078	1,903
Other expenses	138	—	313
	<u>91,219</u>	<u>24,212</u>	<u>8,510</u>

(a) Corresponds to penalties related to payments on account of income tax from 2006 to 2015 as a consequence of unfavorable tax rulings issued by the Supreme Court (see Note 13(f)).

(b) Represents current year mining royalties calculated based on revenues according to applicable tax rules (see Note 13(d)).

Notes to the Financial Statements (continue)

**18. Financial expenses and income****Financial Expenses**

This item is made up as follows expenses:

	For the year ended December 31, 2023 US\$(000)	For the year ended December 31, 2022 US\$(000)	For the year ended December 31, 2021 US\$(000)
Interests on income tax payments on account (a)	73,363	—	—
Interest on advance payments of customers	3,901	2,377	708
Interest on leases (see Note 10(a))	3,685	3,912	4,371
Interest on revolving credit facility (see Note 10(b))	1,863	1,880	—
Amortization of debt issuance cost	696	675	955
Interest on senior unsecured credit facility	—	3,196	10,127
Other financial expenses	50	54	364
Interest on excess of salaries limit of workers profit sharing (see Note 9(b))	—	1,527	1,638
Change in estimates of uncertain positions (b)	(433)	(4,921)	(1,107)
Capitalized interest associated to capital projects	(3,584)	(3,084)	(1,997)
Interest on disputed mining royalties	—	—	15,334
Change in estimates related to excess of salaries limit of worker profit sharing (see Note 9(b))	(12,423)	—	—
	<u>67,118</u>	<u>5,616</u>	<u>30,393</u>

(a) Mainly corresponds to the recognition of interest on penalties and interest related to income tax payments on account for the years 2006 to 2015, as a result of unfavorable tax rulings issued by the Supreme Court.

(b) For 2022, primarily represents the favorable impact on updated interest related to the completion of 2016 tax audit.

**Financial Income**

This item is made up of the following income

	For the year ended December 31, 2023 US\$(000)	For the year ended December 31, 2022 US\$(000)	For the year ended December 31, 2021 US\$(000)
Gain in the fair value of market liquid investment (see Note 3(a))	35,142	11,215	803
Other Interest income	1,143	1,099	910
	<u>36,285</u>	<u>12,314</u>	<u>1,713</u>

[Table of Contents](#)

Notes to the Financial Statements (continue)

**19. Earnings per share**

Basic and diluted earnings per common share have been determined as follows:

	For the year ended December 31, 2023	For the year ended December 31, 2022	For the year ended December 31, 2021
Profit for the period (US\$)	778,964,000	925,353,000	1,191,474,000
Weighted average number of share outstanding (Note 12(a))	350,056,012	350,056,012	350,056,012
Basic and diluted earnings per share (US\$)	2.225	2.643	3.404

Basic and diluted earnings per share are calculated by dividing earnings by the weighted-average number of outstanding shares during the period.

**20. Financial risk management**

The Company's activities are exposed to different financial risks. The main risks that could adversely affect the Company's financial assets and liabilities or future cash flows are: (i) market risk, (ii) credit risk, (iii) interest rate risk, (iv) liquidity risk, and (v) capital risk. The Company's financial risk management program focuses on mitigating potential adverse effects on its financial performance.

Management knows the conditions prevailing in the market and based on its knowledge and experience, manages the risks that are summarized below. The Company's Board of Directors reviews and approves the policies to manage each of these risks:

## (a) Market risk -

*Commodity price risk -*

The international price of copper has a significant impact on the Company's operating results. The price of copper has fluctuated historically and is affected by numerous factors beyond the Company's control. The Company does not hedge its exposure to price fluctuation.

As described in Note 2(d), the Company has price risk through its provisionally priced sales contracts, which provide final pricing in a specified future month (generally between three and six months after the shipment's arrival date) based primarily on quoted LME monthly average prices. The Company records revenues and invoices customers at the time of shipment based on then-current LME prices, which results in an embedded derivative on the provisionally priced contract that is adjusted to fair value through revenues each period, using the period-end forward prices, until the date of final pricing. To the extent that final prices are higher or lower than what was recorded on a provisional basis, an increase or decrease to revenues is recorded each reporting period until the date of final pricing (see Note 21).

[Table of Contents](#)

## Notes to the Financial Statements (continue)

The table below summarizes the estimated impact on the Company's profit before income tax as of December 31, 2023, 2022 and 2021, based on a 10% increase or decrease in future copper price while all other variables are held constant. The 10% increase is based on copper prices ranging from US\$/pound 4.235 to US\$/pound 4.287 (US\$/ US\$/pound 4.178 to US\$/pound, 4.179 as of December 31, 2022 and US\$/pound 4.765 to US\$/pound 4.879, as of December 31, 2021), and the 10% decrease is based on copper prices ranging from US\$/pound 3.465 to US\$/pound 3.507 (US\$/pound 3.418 to US\$/pound 3.419, as of December 31, 2022 and US\$/pound 3.899 to US\$/pound 3.992, as of December 31, 2021).

	Effect on profit before income tax US\$(000)
<b>December 31, 2023</b>	
10% increase in future copper prices	91,734
10% decrease in future copper prices	(91,734)
<b>December 31, 2022</b>	
10% increase in future copper prices	123,181
10% decrease in future copper prices	(123,181)
<b>December 31, 2021</b>	
10% increase in future copper prices	140,420
10% decrease in future copper prices	(140,420)

*Exchange rate risk -*

As described in Note 2(c), the Company's financial statements are presented in U.S. dollars, which is the functional and presentation currency of the Company. The Company's exchange-rate risk arises mainly from balances related to tax payments, benefits to employees deposits, other accounts payable and deposits in currencies other than the U.S. dollar, principally soles.

A table showing the effect on results of a reasonable change in foreign-currency exchange rates is presented below, with all other variables kept constant:

	Exchange-rate increase/decrease	Effect on profit (loss) before income tax US\$(000)
<b>2023</b>		
Exchange rate	5 %	(28,316)
Exchange rate	(5)%	28,316
<b>2022</b>		
Exchange rate	5 %	(23,801)
Exchange rate	(5)%	23,801
<b>2021</b>		
Exchange rate	5 %	(7,782)
Exchange rate	(5)%	7,782

[Table of Contents](#)

## Notes to the Financial Statements (continue)

## (b) Credit Risk -

The Company's exposure to credit risk arises from a customer's inability to pay amounts in full when they are due and the failure of third parties in cash and cash equivalent transactions. The risk is limited to balances deposited in banks and financial institutions and for trade accounts receivable at the date of the statements of financial position (the Company sells copper concentrate and cathode and molybdenum concentrate to companies widely recognized in the worldwide mining sector and collections are made within 30 days after the fulfilment of the contractual terms). To manage this risk, the Company has established a treasury policy, which only allows the deposit of surplus funds in highly rated institutions, by establishing conservative credit policies and through a constant evaluation of market conditions. Consequently, the Company does not expect to incur losses on accounts involving potential credit risk.

## (c) Interest rate risk -

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. As of December 31, 2023, the Company's exposure to the risk of changes in market interest rates has no significant impact considering that the Company had no outstanding bank debt balances.

## (d) Liquidity risk -

Liquidity risk arises from situations in which cash might not be available to pay obligations at their maturity date and at a reasonable cost. The Company maintains adequate liquidity by properly managing the maturities of assets and liabilities in such a way that allows the Company to maintain a structural liquidity position (cash available) enabling it to meet liquidity requirements. Additionally, the Company has the ability to obtain funds from financial institutions and shareholders to meet its contractual obligations.

The following tables show the expected aging of maturity of the Company's obligations, excluding taxes, accruals and benefits to employees, as of December 31, 2023 and 2022:

	On demand US\$(000)	Less than 3 months US\$(000)	3 to 12 months US\$(000)	1 to 5 years US\$(000)	More than 5 years US\$(000)	Total US\$(000)
<b>As of December 31, 2023</b>						
Trade accounts payable (see Note 8)	—	276,541	4,159	1,047	—	281,747
Accounts payable - related parties (see Note 4)	—	2,087	1,381	—	—	3,468
Lease liabilities (see Note 10)	—	1,420	8,489	49,683	—	59,592
Other accounts payable (see Note 9)	—	14,818	4,429	—	—	19,247
<b>Total</b>		<b>294,866</b>	<b>18,458</b>	<b>50,730</b>	<b>—</b>	<b>364,054</b>
<b>As of December 31, 2022</b>						
Trade accounts payable (see Note 8)	—	316,460	2,923	1,017	—	320,400
Accounts payable - related parties (see Note 4)	—	1,740	1,434	—	—	3,174
Lease liabilities (see Note 10)	—	1,036	5,992	45,033	11,064	63,125
Other accounts payable (see Note 9)	—	15,293	45,339	—	—	60,632
<b>Total</b>		<b>334,529</b>	<b>55,688</b>	<b>46,050</b>	<b>11,064</b>	<b>447,331</b>

## (e) Capital risk -

The objective is to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders, benefits for stakeholders and maintain an optimal structure that would reduce the cost of capital.

The Company manages its capital structure, and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Company controls dividend payments to shareholders, the return of capital to shareholders and the issuance of new shares. No changes were made to the objectives, policies or processes during the year ended December 31, 2023.

[Table of Contents](#)

Notes to the Financial Statements (continue)

**21. Embedded derivatives**

As discussed in Note 2(d), the Company's sales create exposure to changes in the market prices of copper and molybdenum which are considered embedded derivatives. As of December 31, 2023 and 2022, information about the Company's embedded derivatives is as follows:

	Pounds payable (000)	Maturity	As of December 31, 2023		
			Provisional pricing US\$/Pound	Forward pricing US\$/Pound	Fair value US\$(000)
Copper Concentrate	231,774	January to May 2024	Between 3.588 and 3.840	Between 3.850 and 3.897	34,581
Copper Cathode	5,072	January 2024	3.869	3.850	(95)
Molybdenum	2,173	January to February 2024	Between 15.251 and 17.803	17.395	2,384
Silver	757	January to May 2024	Between 21.568 and 24.910	Between 23.910 and 24.370	565 (a)
					<u>37,435 (b)</u>
			As of December 31, 2022		
	Pounds payable (000)	Maturity	Provisional pricing US\$/Pound	Forward pricing US\$/Pound	Fair value US\$(000)
Copper Concentrate	320,095	January to May 2023	Between 3.448 and 3.807	Between 3.798 and 3.799	63,335
Copper Cathode	4,187	January 2023	Between 3.808 and 3.817	3.798	(61)
Molybdenum	2,425	January to February 2023	Between 16.677 y 16.935	28.267	27,737
					<u>91,011 (a)</u>

(a) Beginning January 1, 2023, the Company records the impact of the embedded derivatives related to variation in the price of silver contained in the sale of copper concentrate. As of December 31, 2022 and 2021, the impact of the embedded derivatives related to the variation in the price of silver was immaterial to the financial statements.

(b) Embedded derivative adjustments are recorded on the statement of financial position in "Trade account receivable – related parties".

**22. Hierarchy and fair value of financial instruments***Hierarchy:*

As of December 31, 2023 and 2022, the only financial assets carried at fair value are embedded derivatives, included in trade accounts receivable and related parties, which are generated by the sale of copper, molybdenum and silver and measured at fair value based on commodity prices. The net value of this embedded derivative as of December 31, 2023, was an asset of US\$37.4 million (asset of US\$91.0 million as of December 31, 2022). Embedded derivatives are categorized within Level 2 of the fair value hierarchy. The fair value of embedded derivatives is determined using information directly observable in the market (forward prices of metals).

*Financial instruments whose fair value is similar to their book value -*

For financial assets and liabilities which are liquid or have short-term maturities (less than three months), such as cash and cash equivalent, accounts receivable, other accounts receivable, accounts payable, and other current liabilities, it is estimated that their book value is similar to their fair value.

*Financial instruments at fixed and variable rates -*

Financial assets and liabilities with fixed or variable rates are recorded at amortized cost and fair value is determined by comparing the market interest rates at the time of their initial recognition to the current market rates for similar financial instruments.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

Based on the foregoing, there are no significant differences between the book value and the fair value of financial instruments (assets and liabilities) as of December 31, 2023 and 2022.

**23. Summary of significant differences between accounting principles followed by the Company and U.S. generally accepted accounting principles (U.S. GAAP)**

The Company's financial statements have been prepared in accordance with International Financial Reporting Standards which differs in certain respects from U.S. GAAP. The effects of these differences are reflected in note 24 and are principally related to the items discussed in the following paragraphs:

**(a) Stripping Cost**

Under IFRS, the production stripping costs can be incurred both in relation to the production of inventory in that period and the creation of improved access and mining flexibility in relation to ore to be mined in the future. The waste removal cost is included as part of the cost of inventory, while the production stripping costs are capitalized as a stripping activity asset, if certain criteria are met, and amortized based on proved and probable reserves of each ore body (component) identified in the open pit. See note 2b.

Under U.S. GAAP, the costs of clearing removal (production stripping costs) incurred during the production stage are recorded as part of the production cost of inventories; accordingly, such costs are recorded on the income statement at an earlier time than under IFRS.

**(b) Inventories**

Under IFRS, the inventory costs include the amortization of production-stripping costs. Also, inventories are valued using the weighted average method and includes the stripping activity asset and worker's profit sharing.

Under U.S. GAAP, the inventory cost excludes the amortization of production-stripping cost and the inventories are determined using the Last-In-First-Out (LIFO) method.

**(c) Deferred workers' profit sharing**

Under IFRS, the workers' profit sharing is calculated based on the Company's taxable income and is recorded as an employee benefit (cost of production or administrative expense, depending on the function of the workers).

Under US GAAP, the workers' profit sharing is treated in a similar way as income tax since both are calculated based on the Company's taxable income. Therefore, the Company calculates a deferred workers' profit sharing resulting from the taxable and deductible temporary differences.

**(d) Deferred income tax –**

The differences between US GAAP and IFRS are re-measurements that lead to different temporary differences.

**(e) Remediation and mine closure –**

Under IFRS, the liability is measured in accordance with IAS 37 and IFRIC 1. Upward and downward revisions in the amount of undiscounted estimated cash flows are discounted using the current market-based discount rate (this includes changes in the time value of money and the risks specific to the liability).

Under IFRS, the Company updates the discount rate used to discount its liability at the closing date, this change in the discount rate has an impact (increase/decrease) on the book value of the asset retirement cost (ARC) and the remediation liability.

Under U.S. GAAP, upward revisions in the amount of undiscounted estimated cash flows are discounted using the current credit-adjusted risk-free rate. Downward revisions in the amount of undiscounted estimated cash flows are discounted using the credit-adjusted risk-free rate that existed when the original liability was recognized.

[Table of Contents](#)

## Notes to the Financial Statements (continue)

Under U.S. GAAP, there is no requirement to update the discount rate.

## (f) Mine equipment main components -

Under IFRS, in accordance with IAS 16, the main components associated with mine equipment (primarily engines) are capitalized and depreciated based on the estimated useful lives.

Under U.S. GAAP, the Company's policy is that those components are charged directly to the statement of comprehensive income at the time are utilized.

## (g) Water truck conversion

Under IFRS, in accordance with IAS 16, the conversion of truck into water truck are capitalized.

Under U.S. GAAP, the Company's policy is that those conversion costs are treated as operating expense and charged directly to the statement of comprehensive income at the time are performed.

[Table of Contents](#)

Notes to the Financial Statements (continue)

**24. Reconciliation between net income and shareholders' equity determined under IFRS and U.S. GAAP**

The following is a summary of the main adjustments to net income for the years ended December 31, 2023, 2022 and 2021 and to shareholders' equity as of December 31, 2023, 2022 and 2021 that would be required if U.S. GAAP had been applied instead of IFRS in the financial statements:

	2023 US\$(000)	2022 US\$(000)	2021 US\$(000)
<b>Net profit under IFRS</b>	778,964	925,353	1,191,474

Notes to the Financial Statements (continue)

**25. New U.S. GAAP Accounting Pronouncements**

The new accounting pronouncements applicable to the Company are detailed below:

Accounting Standards Update- ASU 2023-01—Leases (Topic 842): Common Control Arrangements

The amendments in this update for both Issue 1 and Issue 2 are effective for fiscal years beginning after December 15, 2023, including interim periods within those fiscal years.

Accounting Standards Update- ASU 2023-06—Disclosure Improvements: Codification Amendments in Response to the SEC’s Disclosure Update and Simplification Initiative Because the effective dates are predicated on the SEC removing its disclosure requirements, the Board decided that the amendments would remain in pending content until the SEC removes the applicable disclosures. The Board decided that it would remove the amendments from the Codification by June 30, 2027, if the SEC’s rulemaking is not completed by that date. The Board requested that the staff continue to monitor the SEC’s rulemaking related to those disclosures, and, if needed, a future Board could revisit the date at which the pending content would be removed from the Codification.

Accounting Standards Update- ASU 2023-09—Income Taxes (Topic 740): Improvements to Income Tax Disclosures

For public business entities, the amendments in this Update are effective for annual periods beginning after December 15, 2024. For entities other than public business entities, the amendments are effective for annual periods beginning after December 15, 2025.

Early adoption is permitted for annual financial statements that have not yet been issued or made available for issuance.

The amendments in this Update should be applied on a prospective basis. Retrospective application is permitted.

**26. Subsequent events**

Since December 31, 2023, and through the date these financial statements were issued, no material events have occurred that may affect the interpretation of these financial statements.
